Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066
Dislocation roles in energetic crystal responses
p 3348 N93-30086
Photorefractive integrators and correlators
[AD-A264200] p 3597 N93-30144
Tunable CW diode-pumped Tm,Ho:YLiF4 laser operating at or near room temperature
[NASA-CASE-NPO-18611-1-CU] p 3440 N93-30415
Computational analysis of slip in PETN
[DE92-040222] p 3598 N93-30445
Intracavity-pumped 2.1 micrometer Ho(3+): YAG laser
[AD-D015728] p 3441 N93-30587
Phase transition studies in barium and strontium titanates at microwave frequencies p 3293 N93-30970

CUBANE
Synthesis of cubane based energetic molecules
[AD-A263271] p 3564 N93-28562

CUBIC LATTICES
Constitutive laws for deformation and dynamic recrystallization in cubic metals
[DE93-010740] p 3326 N93-30486

CUES
Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing
p 3501 N93-28853
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information
[AD-A263874] p 3507 N93-29888
Utility of a ghost horizon and climb/dive ladder line tapering on a head-up display
[AD-A264401] p 3508 N93-30167

CULTURAL RESOURCES
Remote sensing survey of Mississippi River-Gulf Outlet, Breton Sound disposal area, Plaquemines Parish, Louisiana
[AD-A263097] p 3459 N93-29146

CULTURE TECHNIQUES
Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy
[AD-A262483] p 3493 N93-28759

CURING
An investigation of stereolithography as a means of prototyping from a cad database
[AD-A263410] p 3613 N93-29210

CURRENT DENSITY
Microstructural understanding and critical current optimization of advanced high field superconductors
[DE93-011046] p 3592 N93-28643
Operational results of pilot cell test with cermet inert anodes
[DE93-009338] p 3322 N93-29061
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A263464] p 3411 N93-29833
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A264048] p 3411 N93-30031

CURRENT DISTRIBUTION
Operational results of pilot cell test with cermet inert anodes
[DE93-009338] p 3322 N93-29061
Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787

CURRENT SHEETS
Solar flare MDH
[AD-A262275] p 3652 N93-28756

CURVATURE
The curvature of plane elastic curves
[AD-A263198] p 3450 N93-28516

CURVE FITTING
Molecular dynamics of physical aging processes in polymer glasses
[AD-A263737] p 3334 N93-29856

CURVED BEAMS
Chaos in mechanical systems with especial reference to rotorcraft and missiles
[AD-A263703] p 3604 N93-29384

CURVED PANELS
Structural evaluation of curved stiffened composite panels fabricated using a THERM-Xsm process
p 3301 N93-30435
Prediction of stiffener-skin separation in composite panels p 3307 N93-30871

CURVES (GEOMETRY)
The curvature of plane elastic curves
[AD-A263198] p 3450 N93-28516
Packing odd paths
[CWI-BS-R9207] p 3549 N93-29849
A method for intersection line calculation between parametric surfaces
[ETN-93-94178] p 3551 N93-30572

CYANO COMPOUNDS
Synthesis and polymerization of azaethylenes and aza-1,3-dienes
[AD-A263651] p 3332 N93-29290

CYCLES
Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669
Fuzzy operators and cyclic behavior in formal neuronal networks p 3519 N93-29576

CYCLIC COMPOUNDS
Applications of transition metal compounds in the preparation of useful silicon-containing ceramics
[AD-A264028] p 3335 N93-30028

CYCLIC HYDROCARBONS
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes
[AD-A263250] p 3438 N93-29800

CYCLOBUTANE
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes
[AD-A263250] p 3438 N93-29800

CYCLONES
Rhode Island hurricanes and tropical storms: A fifty-six year summary, 1936-1991
[PB93-162006] p 3481 N93-29198
The sensitivity of ageostrophic circulations to model resolution: A case study using NGM forecasts of ERICA IOP-4
[AD-A262011] p 3482 N93-29393

CYCLOPROPANE
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes
[AD-A263250] p 3438 N93-29800

CYCLOTRON RESONANCE
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166

CYCLOTRON RESONANCE DEVICES
Development of high power microwave source
[DE93-753316] p 3436 N93-28980
High-power Ka-band amplifier p 3385 N93-29590
Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922

CYCLOTRONS
Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002

CYLINDERS
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929

CYLINDRICAL BODIES
The wave, the cylinder, and the plate
[DE93-009458] p 3450 N93-28596
A thermal stress solution for multilayered composite cylinders
[AD-A262579] p 3295 N93-28657
Topics in General Relativity theory: Gravitational-wave measurements of black-hole parameters; gravitational collapse of a cylindrical body; and classical-particle evolution in the presence of closed, timelike curves
p 3603 N93-28690
The hydraulic analysis of cylindrical Flibe jets in a HYLIFE-2 ICF reactor
[DE93-009234] p 3586 N93-29053
A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161

A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494
Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598

CYLINDRICAL CHAMBERS
Evaluation of multi-dimensional flux models for radiative transfer in cylindrical combustion chambers
p 3257 N93-29955
High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606

CYLINDRICAL TANKS
Liquid Motion in a rotating tank Experiment (LME)
p 3264 N93-28710
Combined centrifugal force/gravity gas/liquid separator system
[AD-D015726] p 3444 N93-29288

CYTOMETRY
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A263240] p 3494 N93-29620

CZECHOSLOVAKIA
Remote sensing in Czechoslovakia and Hungary: An analysis of the possible co-operation of The Netherlands with Czechoslovakia and Hungary in the field of remote sensing
[BCRS-92-12] p 3461 N93-29466

D

D REGION
Investigations of equatorial ionosphere nighttime mode conversion at VLF p 3396 N93-30735

DAMAGE
High-performance visible/UV CCD focal plane technology for spacebased applications
p 3434 N93-28771
Novel polymer compositions for high-temperature membrane applications, phase 1
[PB93-174126] p 3331 N93-29201
Energetic material response to abnormal environments p 3350 N93-30095
The environment as an operational center of gravity
[AD-A264170] p 3472 N93-30154
Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159
Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205
Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts)
[PB93-174993] p 3485 N93-30758
Characterization of multiaxial warp knit composites
p 3304 N93-30851
Progressive failure methodologies for predicting residual strength and life of laminated composites
p 3307 N93-30866

DAMAGE ASSESSMENT
Defect density measurements in a shocked single crystal of ammonium perchlorate p 3319 N93-30093
Energetic material response to abnormal environments p 3350 N93-30095
Center for surface radiation damage studies
[AD-A264330] p 3570 N93-30366
An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination
[AD-A264293] p 3492 N93-30818
Effects of bolt-hole contact on bearing-bypass damage-onset strength p 3307 N93-30870

DARK MATTER
Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles
[BONN-92-31] p 3632 N93-28473
Dark matter: Theoretical perspectives
[DE93-008484] p 3633 N93-28676
Tests of the particle physics-physical cosmology interface
[DE93-008483] p 3634 N93-28963
Predictions of a non-Gaussian model for large scale structure
[DE93-010196] p 3636 N93-30528
Planck scale effects in neutrino physics
[DE93-606133] p 3571 N93-30793

DATA ACQUISITION
Radiometric calibration system for IR cameras
[DE93-009237] p 3430 N93-28520
Enhanced reduction of velocity data obtained during CETA flight experiment
[NASA-TM-4460] p 3431 N93-29209
A comparison of high-speed links, their commercial support and ongoing R/D activities
[DE93-008134] p 3382 N93-29245
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
SPREE Interactive Data Analysis Tool (SIDAT)
[AD-A262782] p 3273 N93-29306
Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402
The Telecommunications and Data Acquisition Report
[NASA-CR-193144] p 3384 N93-29586
Collection, analysis, and archival of LDEF activation data p 3624 N93-29631
Project Copernicus: An Earth observing system
p 3231 N93-29738
TACSAT ground control and data collection
p 3388 N93-29895
Airborne data acquisition using a front-end processor architecture p 3373 N93-30329
Acquisition of physiological data during G-induced Loss of Consciousness (G-LOC)
[AD-A264492] p 3496 N93-30400
Data management in NOAA p 3617 N93-30454
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488
Filling the gaps: An overview of data on education in grades K through 12
[PB93-176550] p 3608 N93-30821
An automated data collection system for a Charpy impact tester p 3293 N93-30972

DATA BASE MANAGEMENT SYSTEMS
A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846
VIEWCACHE: An incremental database access method for autonomous interoperable databases
p 3614 N93-29238
On the evaluation of fuzzy quantified queries in a database management system p 3517 N93-29569
A high performance, ad-hoc, fuzzy query processing system for relational databases p 3518 N93-29571
Data management in NOAA p 3617 N93-30454
High-performance mass storage system for workstations p 3618 N93-30457

DATA BASES
DOKMA: A document oriented communication model for medical applications as a basis of a role system in the medical field
[ETN-93-93799] p 3492 N93-28469
A model for processing the SGML document in version oriented hypertext systems
[ETN-93-93797] p 3611 N93-28528
Modeling land-surface/atmosphere dynamics for CHAMMP
[DE93-008520] p 3476 N93-28677
The Backgrounds Data Center p 3624 N93-28814
Design and evaluation of a uniaxial pull test for lithium hydride/deuteride
[DE93-010760] p 3451 N93-28832
A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846
The meteorological database
[DE93-007289] p 3481 N93-29054
LDEF materials data bases
[NASA-TM-107757] p 3290 N93-29067
National collaboratories: Applying information technology for scientific research
[LC-93-83795] p 3612 N93-29129
Hanford Environmental Information System (HEIS) user's manual, volume 1
[DE93-007465] p 3470 N93-29135
NSSDC data listing
[NASA-TM-108264] p 3612 N93-29167
Summer 1990 Atlanta ozone precursor study (January 1993)
[PB93-167203] p 3470 N93-29200
An investigation of stereolithography as a means of prototyping from a cad database
[AD-A263410] p 3613 N93-29210
RBSE: Product development team research activity deliverables
[NASA-CR-193115] p 3527 N93-29212
Program plan for an experimenter's laboratory for visualized interactive science p 3613 N93-29224
DataHub knowledge based assistance for science visualization and analysis using large distributed databases p 3613 N93-29230
Collection-oriented match: Scaling up the data in production systems
[AD-A262755] p 3615 N93-29459
A composite self tuning strategy for fuzzy control of dynamic systems p 3511 N93-29530
A high performance, ad-hoc, fuzzy query processing system for relational databases p 3518 N93-29571
EnviroNET: On-line information for LDEF
p 3624 N93-29625
Programmer's reference guide to FDMS file formats
[PB93-182038] p 3354 N93-29663
Decision maker's guide to international space
[ANSER-STDN-93-4] p 3669 N93-29710
Thunderstorm forecast study for Eglin AFB, Florida
[AD-A263423] p 3483 N93-29810
Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817
On the development of a film cooling layer
p 3258 N93-29959
Cloudiest year study: An analysis of the 3DNEPH and RTNEPH databases
[AD-A263409] p 3483 N93-29967
Residual acceleration data on IML-1: Development of a data reduction and dissemination plan
[NASA-CR-193224] p 3281 N93-30038
Data quality statements for spatial databases
[AD-A264125] p 3616 N93-30195
The Visible Human Project of the National Library of Medicine: Remote access and distribution of a multi-gigabyte data set p 3617 N93-30453
Data management in NOAA p 3617 N93-30454
Interim report on Landsat national archive activities
p 3618 N93-30455
Requirements for a system to analyze HEP events using database computing
[DE93-009960] p 3576 N93-30527
Air weather service master station catalog USAFETAC climatic database users handbook no. 6
[AD-A264761] p 3484 N93-30608
Intelligent real-time problem solving
[AD-A264830] p 3535 N93-30614
Toward a coordinated spatial data infrastructure for the nation
[B-149] p 3456 N93-30634
Office of Water Environmental and Program Information Systems Compendium, FY 1992
[PB93-186203] p 3462 N93-30833
Land use database for the Netherlands using LANDSAT Thematic Mapper pictures
[BCRS-91-32] p 3463 N93-30839
A representative survey of US space systems and methods for estimating their costs
[AD-A264159] p 3272 N93-30881
A prototype of a faculty and staff executive information system
[AD-A264852] p 3623 N93-30907
Software conception and structure of automated workstation for an experimental data processing
[DE93-609815] p 3623 N93-30994
Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation
[NASA-CR-193016] p 3272 N93-31033

DATA COMPRESSION
Frequency domain speech compression using the Karhunen-Loeve Transform
[AD-A262613] p 3379 N93-28476
Information-theoretic performance bounding of Bayesian identifiers
[DE93-010705] p 3554 N93-28763
Digital image compression using artificial neural networks p 3624 N93-28811
Analysis and computation for vortex dynamics and rarefied gases
[AD-A264705] p 3427 N93-30499
Transputers, parallel processing in embedded systems for image compression in space applications
[NLR-TP-89242-U] p 3522 N93-30840

DATA CONVERTERS
Interim report on Landsat national archive activities
p 3618 N93-30455

DATA FLOW ANALYSIS
Flow control using the theory of zero sum Markov games
[INRIA-RR-1597] p 3553 N93-28507
Data Multiplexing Network (DMN) equipment Operational Test and Evaluation (OT&E) integration test report
[AD-A263172] p 3538 N93-29490
The modern high rate digital cassette recorder
p 3435 N93-30468

DATA INTEGRATION
Overview of the System of Experts for Intelligent Data Management (SEIDAM) p 3613 N93-29228
Multi-channel holographic birfurcative neural network system for real-time adaptive EOS data analysis
p 3614 N93-29231
An MCM/chip concurrent engineering validation
[AD-A262959] p 3409 N93-29513

The fusion of information via fuzzy integration
p 3517 N93-29568
Incorporation of varying types of temporal data in a neural network p 3518 N93-29575

DATA LINKS
Results of DATAS investigation of ATCRBS environment at the Los Angeles International Airport
[DOT/FAA/CT-93/6] p 3245 N93-28625
A comparison of high-speed links, their commercial support and ongoing R/D activities
[DE93-008134] p 3382 N93-29245
Hybrid data link
[AD-D015714] p 3383 N93-29280
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648
Ethernet performance of the Motorola Altair WIN system
[AD-A263877] p 3387 N93-29890
Optoelectronic technology consortium
[AD-A263580] p 3580 N93-29973
Security of the remote control link of Anik E satellites
p 3365 N93-30282
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

DATA MANAGEMENT
National collaboratories: Applying information technology for scientific research
[LC-93-83795] p 3612 N93-29129
Applied Information Systems Research Program Workshop p 3613 N93-29223
Overview of the System of Experts for Intelligent Data Management (SEIDAM) p 3613 N93-29228
DataHub knowledge based assistance for science visualization and analysis using large distributed databases p 3613 N93-29230
Flight Projects Office Information Systems Testbed (FIST) p 3615 N93-29241
Programmer's reference guide to FDMS file formats
[PB93-182038] p 3354 N93-29663
Storage systems for national information assets
[DE93-009303] p 3615 N93-29783
What's past is prologue: Supporting global change research with historical data
[DE93-005777] p 3472 N93-30009
Managing operational intelligence overload: Guidelines for avoiding decision paralysis
[AD-A264184] p 3610 N93-30158
The future role of the Director of Information Management (DOIM) organization within the DOD corporate information management initiative
[AD-A264118] p 3616 N93-30193
Consultative Committee for Space Data Systems recommendation for space data system standards: Telecommand. Part 2.1: Command operation procedures
[NASA-TM-108158] p 3393 N93-30371
Data management in NOAA p 3617 N93-30454
MR-CDF: Managing multi-resolution scientific data
p 3618 N93-30456
The state of the state of the art in mass storage technology p 3622 N93-30475
Toward a coordinated spatial data infrastructure for the nation
[B-149] p 3456 N93-30634

DATA PROCESSING
DOKMA: A document oriented communication model for medical applications as a basis of a role system in the medical field
[ETN-93-93799] p 3492 N93-28469
A survey of network interface designs
[MEMO-INF-92-59] p 3379 N93-28502
Dynamic object oriented interaction and its implementation in the framework in an interface management system
[ETN-93-93795] p 3523 N93-28526
A model for processing the SGML document in version oriented hypertext systems
[ETN-93-93797] p 3611 N93-28528
Research in mathematics and computer science, March 1, 1991 - September 30, 1992
[DE93-011492] p 3509 N93-28573
Preprocessing remotely-sensed data for efficient analysis and classification
[DE93-007367] p 3611 N93-28580
Exact trajectory determinator for ERS-1
p 3457 N93-28918
Users manual for fault tree analysis code: CUT-TD
[DE93-753272] p 3525 N93-28978
Fundamental study of the signal processing by optics
[DE93-776265] p 3577 N93-28982
Initial graphics exchange specification hybrid microcircuit application protocol
[PB93-175404] p 3407 N93-29203
Colorado Center for Astrodynamics Research (CCAR)
p 3614 N93-29233
SAVS: A Space Data Analysis and Visualization System p 3614 N93-29235
Spatial Analysis and Modeling Systems (SAMS)
p 3614 N93-29239
Introduction to cadet center for advanced data evaluation technology p 3614 N93-29240
Using today's technology to improve mobile C4I for the operational commander
[AD-A263613] p 3245 N93-29285
Software development and analysis for experimental high frequency surface wave radar data
[AD-A261982] p 3383 N93-29438
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 1
[NASA-CP-10112-VOL-1] p 3509 N93-29516
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 2
[NASA-CP-10112-VOL-2] p 3515 N93-29556
Incomplete fuzzy data processing systems using artificial neural network p 3519 N93-29578
Collection, analysis, and archival of LDEF activation data p 3624 N93-29631
Computer systems laboratory
[PB93-181873] p 3521 N93-29662
Capability maturity model for software, version 1.1
[AD-A263403] p 3530 N93-29852
ARSRP signal processing software
[AD-A263543] p 3391 N93-29975
OSI transaction processing standard: An introduction and outlines of implementation
[VTT-TIED-1250] p 3532 N93-29997
XRONOS: A timing analysis software package. User's guide, version 3.00
[NASA-TM-109222] p 3532 N93-30023
Generalized octrees for constrained object modeling
p 3369 N93-30304
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488
Requirements for a system to analyze HEP events using database computing
[DE93-009960] p 3576 N93-30527
Efficient algorithms and data structures in geometric design
[AD-A264678] p 3534 N93-30544
Independent research and independent exploratory development programs
[AD-A264735] p 3544 N93-30556
The 1991 neural information processing systems: Natural and synthetic
[AD-A264754] p 3623 N93-30559
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964
Software conception and structure of automated workstation for an experimental data processing
[DE93-609815] p 3623 N93-30994

DATA PROCESSING EQUIPMENT
Digital hardware architecture implementation
[AD-A263219] p 3521 N93-29492
Implementation of parallel algorithms
[AD-A263126] p 3529 N93-29496
Incomplete fuzzy data processing systems using artificial neural network p 3519 N93-29578
Software conception and structure of automated workstation for an experimental data processing
[DE93-609815] p 3623 N93-30994

DATA RECORDERS
Clementine sensor processing system
p 3285 N93-28778

DATA RECORDING
The NT digital micro tape recorder
p 3435 N93-30461
The modern high rate digital cassette recorder
p 3435 N93-30468
Optimizing digital 8mm drive performance
p 3435 N93-30479
National Media Laboratory p 3628 N93-30717

DATA REDUCTION
A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844
Enhanced reduction of velocity data obtained during CETA flight experiment
[NASA-TM-4460] p 3431 N93-29209
Data reduction expert assistant p 3613 N93-29227
Multi-channel holographic birfurcative neural network system for real-time adaptive EOS data analysis
p 3614 N93-29231
SAVS: A Space Data Analysis and Visualization System p 3614 N93-29235
Spatial Analysis and Modeling Systems (SAMS)
p 3614 N93-29239
Introduction to cadet center for advanced data evaluation technology p 3614 N93-29240
Empirical quantile function nonparametric integrated analyses
[AD-A263704] p 3554 N93-29385
Fuzzy multiple linear regression: A computational approach p 3518 N93-29574
Residual acceleration data on IML-1: Development of a data reduction and dissemination plan
[NASA-CR-193224] p 3281 N93-30038
Towards the results of global analysis of data on nucleon electromagnetic structure
[DE93-606125] p 3571 N93-30792
A miniature fatigue test machine p 3291 N93-30956

DATA RETRIEVAL
VIEWCACHE: An incremental database access method for autonomous interoperable databases
p 3614 N93-29238
LDEF archival system plan p 3624 N93-29704
MR-CDF: Managing multi-resolution scientific data
p 3618 N93-30456
High-performance mass storage system for workstations p 3618 N93-30457
GE networked mass storage solutions supporting IEEE network mass storage model p 3618 N93-30458

DATA SAMPLING
The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766
Enhanced resolution and de-aliasing techniques for fast Fourier transforms p 3358 N93-30240

DATA SIMULATION
Numerical simulation of perfect fluid flows around complex 3D configurations by a multidomain solver using the MUSCL approach p 3417 N93-28745

DATA SMOOTHING
Empirical quantile function nonparametric integrated analyses
[AD-A263704] p 3554 N93-29385

DATA STORAGE
Colorado Center for Astrodynamics Research (CCAR)
p 3614 N93-29233
A planetary version of PC-McIDAS
p 3614 N93-29236
Holographic data storage crystals for the LDEF
p 3435 N93-29697
LDEF archival system plan p 3624 N93-29704
Storage systems for national information assets
[DE93-009303] p 3615 N93-29783
Goddard Conference on Mass Storage Systems and Technologies, Volume 1
[NASA-CP-3198] p 3616 N93-30449
Mass storage system reference model, Version 4
p 3617 N93-30450
Optical media standards for industry
p 3617 N93-30451
Technology for national asset storage systems
p 3617 N93-30452
The Visible Human Project of the National Library of Medicine: Remote access and distribution of a multi-gigabyte data set p 3617 N93-30453
Data management in NOAA p 3617 N93-30454
Interim report on Landsat national archive activities
p 3618 N93-30455
MR-CDF: Managing multi-resolution scientific data
p 3618 N93-30456
High-performance mass storage system for workstations p 3618 N93-30457
GE networked mass storage solutions supporting IEEE network mass storage model p 3618 N93-30458
High-speed data duplication/data distribution: An adjunct to the mass storage equation
p 3619 N93-30459
The fundamentals and futures of removable mass storage alternatives p 3619 N93-30460
The NT digital micro tape recorder
p 3435 N93-30461
RAID 7 disk array p 3537 N93-30462
Tutorial: Performance and reliability in redundant disk arrays p 3537 N93-30463
Striped tertiary storage arrays p 3620 N93-30464
National Media Laboratory media testing results
p 3620 N93-30465
Evaluation of D-1 tape and cassette characteristics: Moisture content of Sony and Ampex D-1 tapes when delivered p 3435 N93-30466
Grand challenges in mass storage: A systems integrators perspective p 3620 N93-30467
The modern high rate digital cassette recorder
p 3435 N93-30468
Evolution of a high-performance storage system based on magnetic tape instrumentation recorders
p 3435 N93-30470
Mass optical storage-tape (MOST)
p 3621 N93-30471
ICI optical data storage tape: An archival mass storage media p 3621 N93-30472
Flexible storage medium for write-once optical tape
p 3621 N93-30473

Electron trapping data storage system and applications p 3622 N93-30474
The state of the state of the art in mass storage technology p 3622 N93-30475
Measurements over distributed high performance computing and storage systems p 3622 N93-30476
Analysis of cache for streaming tape drive
p 3435 N93-30477
LANL High-Performance Data System (HPDS)
p 3622 N93-30478
Optimizing digital 8mm drive performance
p 3435 N93-30479
Using Transparent Informed Prefetching (TIP) to reduce file read latency p 3522 N93-30480
National Media Laboratory p 3628 N93-30717

DATA STRUCTURES
Topology of hybrid objects
[ETN-93-93594] p 3546 N93-28466
Formal definition of a conceptual language for the description and manipulation of information models
[TR-92-16] p 3523 N93-28503
Robust and efficient implementation of the Delaunay tree
[INRIA-RR-1619] p 3547 N93-28511
Parallel computation and the basis system
[DE93-008755] p 3537 N93-28544
Parametric likelihood inference for record breaking problems
[AD-A262546] p 3549 N93-29413
WARP: Weight Associative Rule Processor. A dedicated VLSI fuzzy logic megacell p 3513 N93-29538
NESL: A nested data-parallel language (Version 2.6)
[AD-A263548] p 3530 N93-29822
Consultative Committee for Space Data Systems recommendation for space data system standards: Telecommand. Part 2.1: Command operation procedures
[NASA-TM-108158] p 3393 N93-30371
Qualitative methods in computer vision
[AD-A264335] p 3533 N93-30418
Efficient algorithms and data structures in geometric design
[AD-A264678] p 3534 N93-30544

DATA SYSTEMS
NSSDC data listing
[NASA-TM-108264] p 3612 N93-29167
Applied Information Systems Research Program Workshop p 3613 N93-29223
A distributed system for visualizing and analyzing multivariate and multidisciplinary data
p 3613 N93-29226
Colorado Center for Astrodynamics Research (CCAR)
p 3614 N93-29233
Spatial Analysis and Modeling Systems (SAMS)
p 3614 N93-29239
Flight Projects Office Information Systems Testbed (FIST) p 3615 N93-29241
Collection-oriented match: Scaling up the data in production systems
[AD-A262755] p 3615 N93-29459
Consultative Committee for Space Data Systems recommendation for space data system standards: Telecommand. Part 2.1: Command operation procedures
[NASA-TM-108158] p 3393 N93-30371
LANL High-Performance Data System (HPDS)
p 3622 N93-30478
Using Transparent Informed Prefetching (TIP) to reduce file read latency p 3522 N93-30480
Centralized maintenance evaluation
[AD-A264400] p 3544 N93-30886

DATA TRANSFER (COMPUTERS)
OSI transaction processing standard: An introduction and outlines of implementation
[VTT-TIED-1250] p 3532 N93-29997
An application protocol for CAD to CAD transfer of electronic information
[AD-A264554] p 3533 N93-30383
High-speed data duplication/data distribution: An adjunct to the mass storage equation
p 3619 N93-30459
The modern high rate digital cassette recorder
p 3435 N93-30468
Mass optical storage-tape (MOST)
p 3621 N93-30471

DATA TRANSMISSION
Polarimetric multispectral imaging technology
p 3434 N93-28774
Selection and transmission of information. Issue 22: Republic interdepartmental collection (selected articles)
[AD-A262825] p 3615 N93-29431
Data Multiplexing Network (DMN) equipment Operational Test and Evaluation (OT&E) integration test report
[AD-A263172] p 3538 N93-29490
Galileo post-Gaspra cruise and Earth-2 encounter
p 3385 N93-29597
DSN support of Mars Observer p 3385 N93-29598
Signal-to-noise ratio losses in full spectrum combining of signals with a downconverted subcarrier
p 3386 N93-29599
Performance analysis of communication protocols using D-timed Petri net p 3356 N93-30227
Automatic synthesis of protocol specifications
p 3356 N93-30228
Consultative Committee for Space Data Systems recommendation for space data system standards: Telecommand. Part 2.1: Command operation procedures
[NASA-TM-108158] p 3393 N93-30371
RAID 7 disk array p 3537 N93-30462

DEAD RECKONING
Advanced Unmanned Search System (AUSS) supervisory command, control and navigation
[AD-A263171] p 3245 N93-28990

DEATH
World commercial aircraft accidents
[DE93-010892] p 3243 N93-28571

DEBONDING (MATERIALS)
Damage of multi-directionally reinforced ceramic-matrix composites p 3308 N93-30937

DEBRIS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55
[NASA-TM-107559] p 3271 N93-29136

DECISION MAKING
Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing
p 3501 N93-28853
A new class of mission support for combat air-crew
p 3501 N93-28854
Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA
[DE93-001923] p 3505 N93-28942
Robotics and artificial intelligence for hazardous environments
[DE93-008271] p 3541 N93-29047
MoCog1: A computer simulation of recognition-primed human decision making
[NASA-TM-103868] p 3542 N93-29386
Information technology: A force for organizational change
[AD-A261986] p 3615 N93-29439
A perspective on acquisition of NASA space systems
[AD-A263246] p 3610 N93-29499
Estimations of expectedness and potential surprise in possibility theory p 3510 N93-29518
A model for amalgamation in group decision making
p 3513 N93-29540
Fuzzy forecasting and decision making in short dynamic time series p 3513 N93-29541
Decision analysis with approximate probabilities
p 3513 N93-29542
An experimental methodology for a fuzzy set preference model p 3514 N93-29547
A fuzzy set preference model for market share analysis p 3514 N93-29548
The cognitive bases for the design of a new class of fuzzy logic controllers: The clearness transformation fuzzy logic controller p 3515 N93-29554
Determining rules for closing customer service centers: A public utility company's fuzzy decision
p 3516 N93-29561
A fuzzy case based reasoning tool for model based approach to rocket engine health monitoring
p 3289 N93-29570
AHP version 5.1 user's manual
[DE93-007050] p 3532 N93-30034
Intelligent support for human computer interaction and decision-making in distribution planning and scheduling systems
[AD-A263985] p 3610 N93-30124
The environment as an operational center of gravity
[AD-A264170] p 3472 N93-30154
Managing operational intelligence overload: Guidelines for avoiding decision paralysis
[AD-A264184] p 3610 N93-30158
Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413
Aircraft guidance for wind shear avoidance: Decision-making under uncertainty p 3246 N93-31005

DECISION THEORY
Resource limited reasoning: A study of literature in the context of model-based diagnosis
[MEMO-INF-92-38] p 3540 N93-28480
Asymptotic properties of constrained Markov decision processes
[INRIA-RR-1598] p 3553 N93-28508
Optimal control of the M/G/1 queue with repeated vacations of the server
[INRIA-RR-1637] p 3541 N93-28637
Closed-loop control with delayed information
[INRIA-RR-1638] p 3541 N93-28638
Determining rules for closing customer service centers: A public utility company's fuzzy decision
p 3516 N93-29561
Multi-Attribute Decision Theory methodology for pollution control measure analysis
[DE93-005444] p 3472 N93-30008

DECODERS
Uncorrectable sequences and telecommand
p 3385 N93-29596

DECODING
A systolic-array structure for MTCM receivers
p 3357 N93-30236
An error control protocol based on trellis coded modulations p 3358 N93-30237
Comparison of diversity combining, interleaving, and decoding techniques of a scintillated channel
p 3362 N93-30266

DECOMPOSITION
The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials
p 3343 N93-30063
Thermal oxidation of HCN by NO2 in shock waves
p 3318 N93-30064
Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066
NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069
QR decomposition based least squares lattice algorithm p 3358 N93-30239
Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658
Hydrogen sulfide decomposition into hydrogen and sulfur by quinone cycles, part 1
[PB93-175297] p 3317 N93-30761

DEEP SPACE
Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770

DEEP SPACE NETWORK
The Telecommunications and Data Acquisition Report
[NASA-CR-193144] p 3384 N93-29586
The effect of clock, media, and station location errors on Doppler measurement accuracy
p 3246 N93-29588
Gravity referenced elevation encoder development
p 3385 N93-29592
Maximum and minimum return losses from a passive two-port network terminated with a mismatched load
p 3385 N93-29594
Galileo post-Gaspra cruise and Earth-2 encounter
p 3385 N93-29597
DSN support of Mars Observer p 3385 N93-29598
An analysis of the 70-meter antenna hydrostatic bearing by means of computer simulation p 3386 N93-29601
The flight performance of the Galileo orbiter USO
p 3386 N93-29603

DEEP WATER
ELF propagation in deep and shallow sea water
p 3397 N93-30739

DEFECTS
Healing of lithographically introduced flaws in glass and glass containing ceramics
[DE93-010453] p 3330 N93-28761
Use of local x ray computerized tomography for high-resolution, region-of-interest inspection of large ceramic components for engines
[DE93-005564] p 3449 N93-28943
Characterization and optimization of a Hot Air Solder-Leveling System
[DE93-010188] p 3332 N93-29328
Three-dimensional elastic stress analysis in materials with many inhomogeneities
[AD-A263736] p 3453 N93-29855
Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 2
[AD-A263814] p 3335 N93-29881
Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 1
[AD-A263813] p 3335 N93-29886
Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels
[DE93-006206] p 3454 N93-30213
Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569

DEFENSE PROGRAM
Proceedings of the Near-Earth-Object Interception Workshop
[NASA-TM-108236] p 3556 N93-28572
International aviation (Selected articles)
[AD-A262566] p 3227 N93-28576
Workshop on Advanced Technologies for Planetary Instruments, part 1
[NASA-CR-193015] p 3639 N93-28764
Defense conversion: Redirecting research and development
[OTA-ITE-552] p 3610 N93-29649
The future role of the Director of Information Management (DOIM) organization within the DOD corporate information management initiative
[AD-A264118] p 3616 N93-30193
Technology transfer within the government
p 3627 N93-30709
First NASA Advanced Composites Technology Conference, part 2
[NASA-CP-3104-PT-2] p 3303 N93-30841
Research, Development, Test and Evaluation (R, D, T, and E) programs (R-1), Department of Defense budget for fiscal year 1994
[PB93-169878] p 3611 N93-30936

DEFLAGRATION
Strategies for understanding the deflagration-to-detonation transition
p 3319 N93-30077
Energetic material response to abnormal environments p 3350 N93-30095

DEFLECTION
Study of gain in C-band deflection cavities for a frequency-doubling magnicon amplifier
[AD-A263132] p 3409 N93-29478
Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374
A new tubeless nanosecond streak camera based on optical deflection and direct CCD imaging
[DE93-011893] p 3433 N93-30491

DEFORESTATION
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648

DEFORMATION
The temperature dependence of the deformation and oxidation behavior of an age-hardenable beta + alpha-two titanium alloy
[AD-A262232] p 3320 N93-28491
Deformations of the Lie algebras L1(H(2)) and L1(W(2))
[MEMO-1056] p 3547 N93-28667
Silicon crystal under bending
[DE93-010522] p 3593 N93-28888
Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144
Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445
Gravity referenced elevation encoder development
p 3385 N93-29592
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
Constitutive laws for deformation and dynamic recrystallization in cubic metals
[DE93-010740] p 3326 N93-30486

DEGASSING
Aluminium-high strength material by mechanical alloying and reaction milling: Basics of processing and characterisation of material
[ESA-TT-1249] p 3324 N93-29272

DEGENERATION
An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination
[AD-A264293] p 3492 N93-30818

DEGRADATION
Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561
Neutron radiation induced degradation of diode characteristics
[AD-A263277] p 3405 N93-28563
High-performance visible/UV CCD focal plane technology for spacebased applications
p 3434 N93-28771
APU diaphragm testing. Test plan
[NASA-TM-108251] p 3271 N93-29387
Degradation of electro-optic components aboard LDEF p 3582 N93-29689
Degradation of optical components in a space environment p 3582 N93-29692

DEGREES OF FREEDOM
Quantum dynamics of X2BC van der Waals clusters
[DE93-006416] p 3565 N93-28892
Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099
Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261

DEHUMIDIFICATION
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206

DEHYDRATION
High octane ethers from synthesis gas-derived alcohols
[DE93-012470] p 3341 N93-28752

DEICERS
FAA international conference on airplane ground deicing
[AD-A263617] p 3244 N93-29286

DEICING
FAA international conference on airplane ground deicing
[AD-A263617] p 3244 N93-29286

DELAMINATING
Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076
Effects of freeze/thaw cycles on hydrostatically conditioned E-glass/J-2 composite
[AD-A262980] p 3298 N93-29425
The initiation, propagation, and effect of matrix microcracks in cross-ply and related laminates
p 3304 N93-30847
Delaminations in composite plates under impact loads
p 3304 N93-30849
Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850
Progressive failure methodologies for predicting residual strength and life of laminated composites
p 3307 N93-30866

DELAY
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256

DELAY LINES
Acoustic charge transport technology investigation for advanced development transponder
p 3386 N93-29602

DELIVERY
The development of a parachute system for aerial delivery from high speed cargo aircraft
[DE93-008339] p 3239 N93-29035

DELTA WINGS
Computation of a delta-wing roll-and-hold maneuver
[AD-A264704] p 3260 N93-30498

DEMODULATION
Effects of imbalances and DC offsets on I/Q demodulation
[AD-A264466] p 3393 N93-30537

DEMOGRAPHY
Guide to Federal Water Quality Programs and Information: A Guide with Computer Software Developed by the Interagency Working Group on Water Quality
[PB93-186245] p 3475 N93-30834

DENSE PLASMAS
Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers
[DE93-008706] p 3586 N93-29093
Engineering consideration for the self-energizing magnetoplasmadynamic (MPD): Type fusion plasma thruster
[AD-A262785] p 3288 N93-29289

DENSIFICATION
Lunar regolith densification p 3276 N93-29115
Lunar regolith penetrators and cutters
p 3276 N93-29117
Reactive sintering of Ni3Al intermetallic alloys under compressive stress
[DE93-009729] p 3327 N93-30652
The effect of Bi2 O3 on the electrical properties of Zr O2: 3 percent Mg O ceramic solid electrolytes
[DE93-607029] p 3339 N93-30774

DENSITY DISTRIBUTION
Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles
[BONN-92-31] p 3632 N93-28473
Using C-vector method to derive the three-dimensional circulation pattern near the East Greenland Polar Front
[AD-A261979] p 3487 N93-29437
Fluids in porous media.
[PB93-175198] p 3428 N93-30759

DENSITY MEASUREMENT
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Shear, strain, and thermohaline vertical fine structure in the upper ocean p 3488 N93-30046
Defect density measurements in a shocked single crystal of ammonium perchlorate p 3319 N93-30093

DEOXYRIBONUCLEIC ACID
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651
Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

DEPOSITION
Ion-beam-assisted deposition of wear-resistant coatings
[DE93-011529] p 3330 N93-28687
Study of codeposition of aluminum-haffnium and deposition of yttrium by the cementation technique: Elaboration of Ni-Cr-Al and Ni-Cr-Al-Hf felt materials
[ONERA-NT-1990-9] p 3336 N93-30112
Simulation and calculation of diffusive aerosol deposition
[DE93-007518] p 3474 N93-30506

DEPTH
A methodology and tool for the prediction of depth of reception in the sea for a VLF/LF communications system p 3397 N93-30741

DEPTH MEASUREMENT
A calibration procedure for the SBE 19 Conductivity, Temperature, and Depth (CTD) profiler
[AD-A264435] p 3489 N93-30420

DERIVATION
Research in mathematics and computer science, March 1, 1991 - September 30, 1992
[DE93-011492] p 3509 N93-28573

DESICCANTS
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206

DESIGN ANALYSIS
The meta model hierarchy: A framework for information systems concepts and techniques
[TR-92-17] p 3611 N93-28481
Formal definition of a conceptual language for the description and manipulation of information models
[TR-92-16] p 3523 N93-28503
Design and construction of a prototype ACTS propagation terminal
[NASA-CR-193071] p 3404 N93-28539
Ergonomic development of digital map displays
p 3503 N93-28866
Natural environmental service support to NASA vehicle, technology, and sensor development programs
[NASA-CR-192554] p 3469 N93-29029
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Lunar rovers and local positioning system
p 3277 N93-29119
Design optimization of space structures
p 3278 N93-29122
Ultra-high resolution water window x ray microscope optics design and analysis
[NASA-CR-193225] p 3578 N93-29128
Guide for certifying pressure vessels and systems
[NASA-TM-107549] p 3449 N93-29220
Velocity measurements of low Reynolds number tube flow using fiber-optic technology
[DE93-009865] p 3422 N93-29335
Integrated approaches to parallelism in optimization and solution of inverse problems
[AD-A262259] p 3452 N93-29349
Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408
Aerodynamic characteristics of a rotorcraft airfoil designed for the tip region of a main rotor blade
[NASA-TM-4264] p 3240 N93-29450
Effect of design selection on response surface performance
[NASA-CR-4520] p 3249 N93-29885
SAR sensors on TACSATS: A feasibility assessment
p 3286 N93-29909
Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103
Communications systems design for testability: Grey-box testing p 3368 N93-30302
Structural design, analysis, and code evaluation of an odd-shaped pressure vessel
[DE93-008182] p 3447 N93-30632

Multi-parameter optimization tool for low-cost commercial fuselage crown designs p 3305 N93-30858
Process and assembly plans for low cost commercial fuselage structure p 3306 N93-30865
Multiple methods integration for structural mechanics analysis and design p 3307 N93-30867
Optimum design of multiwire cages for high-voltage applications [AD-A264310] p 3400 N93-30995
Structural design using neural networks p 3545 N93-31029

DESIGN TO COST
Process and assembly plans for low cost commercial fuselage structure p 3306 N93-30865

DESORPTION
Acid gas treating by aqueous alkanolamines [PB93-176188] p 3471 N93-29676
Photo-desorption from copper alloys [DE93-011872] p 3326 N93-30490
Development of an O atom gun [AD-A264753] p 3570 N93-30558
Surface chemistry of N2H4 on Si(100)-2x1 [AD-A264819] p 3316 N93-30627
Complex-compound heat pump: Topical report on phase 1 results [PB93-185460] p 3466 N93-30814

DESTRUCTIVE TESTS
Report on the test set-up for the structural testing of the Airmass Sunburst Ultralight Aircraft p 3249 N93-29775
Load test set-up for the Airmass Sunburst Ultra-Light Aircraft p 3249 N93-29776

DESULFURIZING
The thermodynamic properties of thianthrene and phenoxathiin [DE93-000124] p 3603 N93-28964
Rates and mechanisms of reaction of hydrogen sulfide with iron chelates [PB93-184299] p 3312 N93-29665

DETECTION
Valve malfunction detection apparatus [NASA-CASE-MFS-29904-1] p 3432 N93-29503
Advanced signal processing requirement in an ion mobility explosives detector p 3320 N93-30277
Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System [DE93-006283] p 3412 N93-30370

DETECTORS
Sensor systems for monitoring Maglev guideway structures [PB93-154821] p 3444 N93-29205
A high resolution 14-bit ADC for Gammasphere Project [DE93-010446] p 3598 N93-30393

DETONATION
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials [AD-A263244] p 3342 N93-29494
ONR/LANL Workshop on the Fundamental Physics and Chemistry of Combustion, Initiation, and Detonation of Energetic Materials [CPIA-PUBL-589] p 3343 N93-30061
Propulsion and detonics research in France p 3344 N93-30070
Chemical dynamics simulations as a probe to the initiation and propagation of condensed phase detonations p 3318 N93-30071
A steric hindrance model for the crystal orientation dependence of the shock initiation sensitivity of PETN explosive [LA-UR-92-1427] p 3345 N93-30074
Detonation mass spectrometry p 3319 N93-30076
Strategies for understanding the deflagration-to-detonation transition p 3319 N93-30077
Energetic material response to abnormal environments p 3350 N93-30095
Detonation shock dynamics of composite energetic materials p 3350 N93-30096
Molecular dynamics of detonation in crystals with defects p 3350 N93-30097
Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100
The measurement of electrical conductivity in detonating condensed explosives [AD-A264482] p 3352 N93-30424
The use of quantum chemistry to estimate the performance and properties of explosives [DE92-040369] p 3352 N93-30446

DETONATION WAVES
Implementation of a single-material version of PAGOSA on MIMD hypercubes [SAND-92-0640] p 3526 N93-29127
Response of energetic solids to light, heat and shock pulses [AD-A263702] p 3342 N93-29296
Weakly nonlinear dynamics of near-CJ detonation waves [DE93-007344] p 3424 N93-29836
Metallization at detonation fronts in solids p 3319 N93-30087
Towards a better hydro for dynamic mix calculations [DE93-010702] p 3426 N93-30485

DETONATORS
Rocket-triggered lightning studies for the protection of critical assets [DE93-009633] p 3484 N93-30651

DEUTERIDES
Design and evaluation of a uniaxial pull test for lithium hydride/deuteride [DE93-010760] p 3451 N93-28832

DEUTERIUM
Exotic atoms [DE93-010242] p 3564 N93-28611
Inertial confinement fusion target component fabrication and technology development support [DE93-010836] p 3585 N93-28836
A high field optical-pumping spin-exchange polarized deuterium source [DE93-009208] p 3574 N93-28970
Reaction and reorientation of electronically excited H2(B) [DE93-010435] p 3569 N93-29860

DEUTERIUM COMPOUNDS
Laser spectroscopy of hydrocarbon radicals [DE93-012555] p 3436 N93-28653

DEUTERONS
Coherent and semi-coherent neutron transfer reactions [DE93-008336] p 3565 N93-28959

DIAGNOSIS
Resource limited reasoning: A study of literature in the context of model-based diagnosis [MEMO-INF-92-38] p 3540 N93-28480
Proceedings of a Workshop on Molecular Nuclear Medicine [DE93-010828] p 3493 N93-28835
Fuzzy neural network methodology applied to medical diagnosis p 3498 N93-29546
A neural network based approach for machine fault diagnosis [VTT-TIED-1274] p 3543 N93-29998
Centralized maintenance evaluation [AD-A264400] p 3544 N93-30886

DIAMETERS
Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey p 3638 N93-29361
Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures [PB93-178598] p 3475 N93-30887
Application of hardness testing in foundry processing operations: A university and industry partnership p 3292 N93-30961

DIAMINES
Polyimides prepared from 3,5-diamino benzo trifluoride [NASA-CASE-LAR-14206-1] p 3331 N93-29083
Diphenylmethane-containing dianhydride and polyimides prepared therefrom [NASA-CASE-LAR-14487-1] p 3331 N93-29085
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene [NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506

DIAMOND FILMS
Growth, characterization and device development in monocrystalline diamond films [AD-A263204] p 3593 N93-28874
Complex dielectric function of amorphous diamond films deposited by pulsed excimer (ArF) laser ablation of graphite [AD-A264527] p 3598 N93-30408
Diamond nucleation of surfaces using carbon clusters [AD-A264634] p 3599 N93-30548
Study on diamond semiconductor [DE92-531076] p 3413 N93-30622

DIAMONDS
Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364
Flame or plasma synthesis of diamond under turbulent and transition flow conditions [AD-D015689] p 3333 N93-29456
Defect density measurements in a shocked single crystal of ammonium perchlorate p 3319 N93-30093
Sensitive detection of new superconductors created at ultra high pressures [AD-A264340] p 3597 N93-30161
Diamond nucleation of surfaces using carbon clusters [AD-A264634] p 3599 N93-30548
High thermal conductivity of diamond p 3294 N93-30977

DIAPHRAGMS (MECHANICS)
APU diaphragm testing [NASA-TM-108254] p 3272 N93-29501
Valve malfunction detection apparatus [NASA-CASE-MFS-29904-1] p 3432 N93-29503

DIATOMIC GASES
Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions [NASA-CR-193223] p 3604 N93-29168

DICHROISM
Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591

DICTIONARIES
Handbook of frequently used acronyms and glossary of terms [DE93-011388] p 3616 N93-30123

DIELECTRIC PROPERTIES
LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690
Complex dielectric function of amorphous diamond films deposited by pulsed excimer (ArF) laser ablation of graphite [AD-A264527] p 3598 N93-30408
Phase transition studies in barium and strontium titanates at microwave frequencies p 3293 N93-30970

DIELECTRICS
Improving the jitter of the 150 kJ experiments solid dielectric switches [DE93-009459] p 3405 N93-28597
Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films [AD-A263664] p 3594 N93-29293
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics [AD-A263427] p 3332 N93-29337
High pressure studies of hydrated nafion membranes: Dielectric relaxation and deuteron NMR [AD-A263511] p 3332 N93-29342
LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690
Phase transition studies in barium and strontium titanates at microwave frequencies p 3293 N93-30970
Advanced electromagnetic methods for aerospace vehicles [NASA-CR-193468] p 3400 N93-31036

DIENES
Synthesis and polymerization of azaethylenes and aza-1,3-dienes [AD-A263651] p 3332 N93-29290

DIESEL ENGINES
Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine [AD-A263810] p 3580 N93-29880

DIESEL FUELS
Limitations of the ideal phase-Doppler system: Extension to spatially and temporally inhomogeneous particle flows with an application to diesel sprays [DE93-009447] p 3416 N93-28595

DIETS
Field trial of caffeine on physical performance at altitude: An attempt to overcome the challenge [AD-A264260] p 3497 N93-30894

DIFFERENCE EQUATIONS
Towards a better hydro for dynamic mix calculations [DE93-010702] p 3426 N93-30485

DIFFERENTIAL CALCULUS
Differential calculus on quantum spaces and quantum groups [DE93-010425] p 3551 N93-30392

DIFFERENTIAL EQUATIONS
JPRS report: Science and technology. Central Eurasia: Physics and mathematics [JPRS-UPM-93-002] p 3560 N93-29022
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations [NASA-CR-193241] p 3421 N93-29213
An upwind method for the solution of the 3D Euler and Navier-Stokes equations on adaptively refined meshes [AD-A262863] p 3423 N93-29472
Some implications of a differential turbomachinery equation with viscous correction [AD-A264693] p 3427 N93-30571
Application of integral and differential equation methods for various EM interaction problems [AD-A264821] p 3394 N93-30597
Determination of low frequency reference slipping for high frequency unstationary motion processes [ILR-MITT-273(1992)] p 3455 N93-31017

DIFFERENTIAL GEOMETRY
Manifold shape: From differential geometry to mathematical morphology
[CS-9204] p 3552 N93-31012

DIFFRACTION PATTERNS
Powder x ray diffraction patterns of energetic materials for use as reference standards
[DE93-009903] p 3592 N93-28568
Design of a high resolution spatial heterodyne interferometer
[AD-A262867] p 3285 N93-29461
The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces
p 3255 N93-29944
Photorefractive integrators and correlators
[AD-A264200] p 3597 N93-30144
The characterization of materials using x ray diffraction p 3293 N93-30968

DIFFUSION
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007
Studies of curvature, strain, and unsteady effects on premixed flames p 3316 N93-30646
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

DIFFUSION COEFFICIENT
Diffusion coefficients and heats of mixing in aqueous alkanolamines
[PB93-176212] p 3316 N93-30661

DIFFUSION FLAMES
Studies of hydrogen-air diffusion flames and of compressibility effects related to high-speed propulsion
p 3310 N93-29125
Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667
Effects of buoyancy on gas jet diffusion flames
[NASA-CR-191109] p 3352 N93-31031

DIFFUSION THEORY
The onset of vortex turbulence
[DE93-010424] p 3417 N93-28663
The role of grain boundaries in hydrogen diffusion in metals at 25 C
[NASA-TM-108407] p 3322 N93-29043

DIFFUSION WAVES
Nonlinear stability of viscous shock waves
[TRITA-NA-9205] p 3419 N93-29025

DIFFUSION WELDING
Healing of lithographically introduced flaws in glass and glass containing ceramics
[DE93-010453] p 3330 N93-28761
Diffusion bonding
[DE93-011480] p 3442 N93-28837

DIFFUSIVITY
Simulation and calculation of diffusive aerosol deposition
[DE93-007518] p 3474 N93-30506

DIGESTING
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651

DIGITAL COMPUTERS
Digital hardware architecture implementation
[AD-A263219] p 3521 N93-29492

DIGITAL DATA
Multiple image multipoint matching for automatic aerotriangulation p 3461 N93-29615
Acousto-optic time-integrating correlators for processing wideband digital data p 3360 N93-30253
Applications of digital 3-D imaging
p 3366 N93-30287
The Visible Human Project of the National Library of Medicine: Remote access and distribution of a multi-gigabyte data set p 3617 N93-30453
GE networked mass storage solutions supporting IEEE network mass storage model p 3618 N93-30458
Evaluation of D-1 tape and cassette characteristics: Moisture content of Sony and Ampex D-1 tapes when delivered p 3435 N93-30466
Towards a 1000 tracks digital tape recorder
p 3435 N93-30469
Mass optical storage-tape (MOST)
p 3621 N93-30471
Electron trapping data storage system and applications p 3622 N93-30474
Toward a coordinated spatial data infrastructure for the nation
[B-149] p 3456 N93-30634

DIGITAL ELECTRONICS
Electronics mixed-mode simulation
[AD-A264734] p 3534 N93-30577

DIGITAL FILTERS
Theoretical bit error rate performance of the Kalman filter excisor for FM interference
[AD-A263018] p 3383 N93-29407
International Journal of Numerical Modeling: Electronic Networks, Devices, and Fields, volume 5, number 3, August 1992
[AD-A263765] p 3387 N93-29877

DIGITAL INTEGRATORS
Acousto-optic time-integrating correlators for processing wideband digital data p 3360 N93-30253

DIGITAL SYSTEMS
Digital image compression using artificial neural networks p 3624 N93-28811
Time-interpolation method for digital beamformers
[AD-D015709] p 3383 N93-29275
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455
Dynamics and robust control of sampled data systems for large space structures
[AD-A264192] p 3281 N93-30142
A new way to use fuzzy sets in image sharpening
p 3363 N93-30273
The NT digital micro tape recorder
p 3435 N93-30461
Towards a 1000 tracks digital tape recorder
p 3435 N93-30469
Topical meeting of broadband analog and digital optoelectronics
[AD-A264643] p 3581 N93-30522
ELF/VLF spectrum measurements
p 3398 N93-30745

DIGITAL TECHNIQUES
Digital image compression using artificial neural networks p 3624 N93-28811
Digital image processing of descanned terrestrial ground photographs p 3459 N93-28928
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
The modern high rate digital cassette recorder
p 3435 N93-30468

DILATOMETRY
The design and testing of a high-temperature graphite dilatometer
[AD-A262185] p 3430 N93-28488

DIMENSIONAL ANALYSIS
Quantum group generalization of the heterotic QFT
[DE92-644727] p 3607 N93-30920

DIMENSIONAL MEASUREMENT
Possibilistic measurement and set statistics
p 3517 N93-29567
Method of continuously determining crack length
[NASA-CASE-LAR-14480-1-CU] p 3452 N93-29612
Issues, concepts, and standard techniques in assessing accuracy of coordinate measuring machines
[PB93-184331] p 3354 N93-29666
Atmospheric transverse coherence length measurement system for laser communications
[AD-A263563] p 3439 N93-29827
Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961

DIMERS
Be3(AsO4)2 2H2O: A new berylloarsenate phase containing bridged tetrahedral 3-rings
[AD-A262518] p 3592 N93-28584

DIODES
Analysis of electrothermal interactions in power semiconductor modules
[ETN-93-93800] p 3591 N93-28470
Influence of optical feedback on the pulse behavior of semiconductor lasers
[ETN-93-93798] p 3436 N93-28614
Electrochemical fabrication of cadmium chalcogenide microdiode arrays
[AD-A263169] p 3310 N93-28988
ND laser with co-doped ion(s) pumped by visible laser diodes
[AD-D015711] p 3437 N93-29277

DIPHENYL COMPOUNDS
The thermodynamic properties of thianthrene and phenoxathiin
[DE93-000124] p 3603 N93-28964

DIPOLE ANTENNAS
Coupling gain computation between antennas on circular cylinders at SHF/EHF frequencies p 3369 N93-30309
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

DIPOLE MOMENTS
Experimental study of location and identification of ferrous spheroids using a smart total field magnetometer
[AD-A263661] p 3324 N93-29391

DIPOLES
Computation of far-field helicopter rotor tone noise
[ONERA-P-1990-5] p 3562 N93-30110

DIRAC EQUATION
General method for reducing the two-body Dirac equation
[DE93-609833] p 3607 N93-30943
Relativity theory in (2 + 2)-space
[DE92-644671] p 3608 N93-30983

DIRECTIONAL ANTENNAS
A satellite-tracking millimeter-wave reflector antenna system for mobile satellite-tracking
[NASA-CASE-NPO-18772-1-CU] p 3381 N93-28955
Planar microstrip YAGI antenna array
[NASA-CASE-NPO-17873-2-CU] p 3384 N93-29507

DIRECTIONAL STABILITY
Hypersonic lateral and directional stability characteristics of aeroassist flight experiment configuration in air and CF4
[NASA-TM-4435] p 3239 N93-29166
Vehicle dynamic stability and rollover
[PB93-185437] p 3447 N93-30828

DIRECTIVITY
Evaluation of the scattered pressure due to infinite rigid cylinders, infinite elastic cylindrical shells, and rigid spheres in the presence of an ambient noise field
[AD-A264835] p 3563 N93-30899

DISABILITIES
Intelligent virtual reality in the setting of fuzzy sets
p 3513 N93-29544

DISCONTINUITY
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414

DISCRETE FUNCTIONS
Topology and statistics in zero dimensions
[DE93-604080] p 3607 N93-30932

DISCRIMINANT ANALYSIS (STATISTICS)
Thunderstorm forecast study for Eglin AFB, Florida
[AD-A263423] p 3483 N93-29810

DISEASES
Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy
[AD-A262483] p 3493 N93-28759
Proceedings of a Workshop on Molecular Nuclear Medicine
[DE93-010828] p 3493 N93-28835
Gene transcription and electromagnetic fields
[DE93-010854] p 3490 N93-28848
Incorporation of varying types of temporal data in a neural network p 3518 N93-29575
The AFOSR Workshop on the Future of EEG and MEG
[AD-A264338] p 3495 N93-30160

DISILICIDES
Refractory metal disilicides research
[AD-A262416] p 3320 N93-28499

DISK OPERATING SYSTEM (DOS)
Study on the concurrent calculation with a multitransputer network
[DE93-753191] p 3524 N93-28531

DISLOCATIONS (MATERIALS)
Fundamental studies of the mechanical behavior of microelectronics thin film materials
[AD-A264334] p 3337 N93-30417

DISPLACEMENT MEASUREMENT
Issues, concepts, and standard techniques in assessing accuracy of coordinate measuring machines
[PB93-184331] p 3354 N93-29666
Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics
[DE93-009827] p 3433 N93-30510

DISPLAY DEVICES
Optically tiled flat panel displays. A feasibility study
[AD-A262737] p 3592 N93-28590
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
The design and development of the new RAF standard HUD format p 3502 N93-28856
Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1
p 3502 N93-28857
Head-steered sensor flight test results and implications p 3502 N93-28859
Oculo-motor responses and virtual image displays
p 3503 N93-28862
Ergonomic development of digital map displays
p 3503 N93-28866
Application of ray tracing in radiation heat transfer
[NASA-TM-106206] p 3419 N93-29075

Grid Analysis and Display System (GrADS): A practical tool for earth science visualization p 3613 N93-29225
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Head mounted displays for virtual reality
[AD-A263498] p 3506 N93-29340
A tutorial on exit pupils and eye rotation with virtual image optical displays
[AD-A262399] p 3494 N93-29400
A comparison of simulated parallax and single-station range aids to navigation
[AD-A263460] p 3246 N93-29818
Virtual reality flight control display with six-degree-of-freedom controller and spherical orientation overlay
[NASA-CASE-NPO-18733-1-CU] p 3251 N93-30416
The effects of superimposing symbology on a simulated night vision goggle display
[AD-A263458] p 3508 N93-30590
Laser based 3D volumetric display system
[AD-A264825] p 3441 N93-30599
Introduction to the National Information Display Laboratory p 3628 N93-30718

DISSOCIATION
Kinetics of nitric oxide formation behind 3 to 4 KM/S shock waves
[AD-A263653] p 3312 N93-29389
Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066

DISSOLVED GASES
Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments
[DE93-009202] p 3323 N93-29102
Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327

DISTRIBUTED FEEDBACK LASERS
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772

DISTRIBUTED PARAMETER SYSTEMS
Distributed traffic signal control using fuzzy logic
p 3513 N93-29543

DISTRIBUTED PROCESSING
A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846
Distributed Virtual System (DIVIRS) Project
[NASA-CR-193234] p 3526 N93-29169
Applying high-level language paradigms to communications software for distributed systems
[AD-A263001] p 3528 N93-29463
Data parallelism
[DE93-009300] p 3539 N93-29782
A redesigned Isis and Meta system under Mach
[AD-A263576] p 3531 N93-29976
OSI transaction processing standard: An introduction and outlines of implementation
[VTT-TIED-1250] p 3532 N93-29997
On analytical performance modelling of software for distributed systems p 3364 N93-30279
Mass storage system reference model, Version 4
p 3617 N93-30450
Technology for national asset storage systems
p 3617 N93-30452
Measurements over distributed high performance computing and storage systems p 3622 N93-30476
Nonlinear explicit transient finite element analysis on the Intel Delta
[DE93-009561] p 3535 N93-30647

DISTRIBUTION (PROPERTY)
Distribution of C1-C2 aldehydes in the free troposphere
[JUEL-2650] p 3475 N93-28475

DISTRIBUTION FUNCTIONS
Evidence-based classification of satellite image data
p 3459 N93-28931
Possibilistic measurement and set statistics
p 3517 N93-29567

DISULFIDES
The thermodynamic properties of thianthrene and phenoxathiin
[DE93-000124] p 3603 N93-28964

DIURNAL VARIATIONS
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model
[DE93-007365] p 3477 N93-29346
Spectral energetics of the lower thermosphere
p 3477 N93-29467
ELF/VLF spectrum measurements
p 3398 N93-30745
Atmospheric studies with SODAR at Kalpakkam
[DE93-605544] p 3480 N93-30992

DIVERGENCE
Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768

DIVERTERS
A survey of problems in divertor and edge plasma theory
[DE93-007531] p 3586 N93-29056
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334
Modeling the D3-D plasma boundary with the LEDGE code
[DE93-009301] p 3588 N93-29772
Optimization for steady-state and hybrid operations of ITER by using scaling models of divertor heat load
[DE93-764151] p 3590 N93-30649

DIVING (UNDERWATER)
Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598

DMSP SATELLITES
Electrodynamics of the dayside cleft region based on ground observations at Svalbard
[AD-A263571] p 3477 N93-29831
TACSAT meteorological payloads
p 3391 N93-29913

DOCUMENTATION
A model for processing the SGML document in version oriented hypertext systems
[ETN-93-93797] p 3611 N93-28528

DOCUMENTS
A model for processing the SGML document in version oriented hypertext systems
[ETN-93-93797] p 3611 N93-28528

DOMAINS
Comparison of specificity and information for fuzzy domains p 3510 N93-29519
Automated modeling of physical systems
[NASA-CR-193256] p 3531 N93-29873

DONOR MATERIALS
Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557
Experimental and theoretical aspects of excited state electron transfer and related phenomena
[AD-A263457] p 3570 N93-30589

DOORS
F-15 composite engine access door
p 3302 N93-30442

DOPED CRYSTALS
Theory of normal and superconducting properties of fullerene-based solids
[DE93-007722] p 3592 N93-28582
Texturing of InP surfaces for device applications
[NASA-TM-106061] p 3321 N93-28618
High octane ethers from synthesis gas-derived alcohols
[DE93-012470] p 3341 N93-28752
Subnanosecond high power performance of a bistable optically-controlled GaAs switch
[DE93-006285] p 3406 N93-28944
Uniaxially stressed Ge:Ga and Ge:Be
[DE93-010426] p 3594 N93-29150
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
Quantum devices using Si-based superlattices and structures
[AD-A263700] p 3595 N93-29383
Ambient-atmosphere compatible superconducting fullerenes
[AD-A262025] p 3595 N93-29397
Defect studies in low-temperature-grown GaAs
[DE93-010405] p 3595 N93-29417
LEO effects on candidate solar cell cover materials
p 3467 N93-29687
Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501
Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569
A tight binding model for the electronic structure of FCC and SC C60
[DE93-606214] p 3601 N93-30794

DOPPLER EFFECT
Some aspects of the aeroacoustics of high-speed jets
[NASA-CR-191458] p 3418 N93-28975
Acquisition of physiological data during G-induced Loss of Consciousness (G-LOC)
[AD-A264492] p 3496 N93-30400

DOPPLER NAVIGATION
Advanced Unmanned Search System (AUSS) supervisory command, control and navigation
[AD-A263171] p 3245 N93-28990

DOPPLER RADAR
Control-structures interaction test of the LACE satellite
p 3263 N93-28706
Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra
[DE93-008734] p 3481 N93-29095
Contributions to the American Meteorological Society's 26th International Conference on Radar Meteorology
[AD-A263385] p 3481 N93-29257
The effect of clock, media, and station location errors on Doppler measurement accuracy
p 3246 N93-29588

DOSAGE
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153

DOSIMETERS
Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730
The emulsion chamber technology experiment
p 3268 N93-28743
Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626
A measurement of the radiation dose to LDEF by passive dosimetry p 3572 N93-29634
LDEF: Dosimetric measurement results (AO 138-7 experiment) p 3573 N93-29635
Development and application of a 3-D geometry/mass model for LDEF satellite ionizing radiation assessments
p 3573 N93-29640
Radiation model predictions and validation using LDEF satellite data p 3573 N93-29641

DOWN-CONVERTERS
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-193137] p 3509 N93-28895
Technical examination and simulation of a photovoltaic system: Solar generator, battery, download
[ETN-93-94179] p 3466 N93-30573

DOWNLINKING
Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801
Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591
A satellite downlink spread spectrum timing beacon
p 3362 N93-30267

DRAG
Bounds on internal state variables in viscoplasticity
[NASA-TM-106215] p 3451 N93-29196

DRAG REDUCTION
Flow visualization on helicopter blades using acenaphthen
[ESA-TT-1255] p 3422 N93-29273
Turbulent drag reduction: Studies of feedback control and flow over riblets p 3242 N93-30645

DREDGING
System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468

DRIFT RATE
Radiation sensitivity of quartz crystal oscillators experiment for the Long Duration Exposure Facility (LDEF), part 2 p 3414 N93-29685

DRILLING
Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805
Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1
[PB93-173797] p 3468 N93-28899
Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide
[PB93-173805-VOL-2] p 3471 N93-29861

DROP SIZE
Limitations of the ideal phase-Doppler system: Extension to spatially and temporally inhomogeneous particle flows with an application to diesel sprays
[DE93-009447] p 3416 N93-28595
Modeling the effects of drop drag and breakup on fuel sprays
[AD-A263650] p 3445 N93-29388
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162

DROPS (LIQUIDS)
Estimation of droplet collision frequency in a spray
[DE93-007991] p 3416 N93-28566
Studies of complexity in fluid systems
[DE93-010776] p 3418 N93-28878
A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126
Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling
[AD-A263495] p 3423 N93-29352

Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162

DROUGHT

Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967

DRUGS

Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502

DUALITY THEOREM

The space of spheres, a geometric tool to unify duality results in Voronoi diagrams
[INRIA-RR-1620] p 3547 N93-28512

DUCTED FLOW

A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161

DUCTILITY

Environmental embrittlement of binary and Zr-doped Ni3Al
[DE93-008575] p 3321 N93-28679

The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886

Transformation plasticity in ductile solids
[DE93-008636] p 3321 N93-28902

Materials characterization of cermet anodes tested in a pilot cell
[DE93-008924] p 3323 N93-29101

Tailored interfaces for metal-matrix composites-fundamental considerations
[AD-A263048] p 3298 N93-29130

Effects of internal helium on mechanical properties of Nitronic (tm) 40 stainless steel
[DE93-009902] p 3324 N93-29265

Low temperature environmental embrittlement in ordered intermetallics
[DE93-009711] p 3324 N93-29786

Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863

Improvement in ductility of the intermetallic compound Ti3Al
[ESA-TT-1276] p 3325 N93-30105

Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis
[AD-A264221] p 3453 N93-30147

Durability of Quick Reaction Satellite Antenna (QRSA) trunnion castings
[AD-A264095] p 3281 N93-30813

DUCTS

Turbulent flow and heat transfer in idealized blade cooling passages p 3254 N93-29938

An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels
p 3255 N93-29942

DUMP COMBUSTORS

Thrust augmentation system for low-cost-expendable turbojet engine
[AD-A263727] p 3259 N93-30877

DUNITE

Frequency dependent electrical properties of minerals and partial-melts
[DE93-009254] p 3410 N93-29793

DURABILITY

Durability of Quick Reaction Satellite Antenna (QRSA) trunnion castings
[AD-A264095] p 3281 N93-30813

DUST

Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805

DWARF GALAXIES

Can physical stellar collisions explain the blue stragglers in the dwarf spheroidal galaxies?
[DE93-008711] p 3634 N93-28907

The 12 UM contribution of nearby galaxies to the infrared background
[AD-A264336] p 3654 N93-30419

DWARF NOVAE

Multiwavelength studies of classical nova shells
p 3636 N93-30412

DWARF STARS

Magnetic activity in low mass stars
[DE93-009073] p 3632 N93-28547

Spectroscopic and photometric studies of main sequence M stars and a search for late-type dwarfs in the solar vicinity p 3629 N93-28608

DYE LASERS

Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207

Computer control of pulsed tunable dye lasers
[DE93-605896] p 3441 N93-30801

Efficient laser action from two CW laser pumped pyrromethene-BF2 complexes
[AD-A264887] p 3441 N93-30910

DYES

Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596

DYNAMIC CHARACTERISTICS

A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578

Interaction dynamics of on-orbit construction
p 3274 N93-29109

Hybrid CMS methods with model reduction for assembly of structures p 3274 N93-29110

Molecular dynamics of detonation in crystals with defects p 3350 N93-30097

A computational model that couples aerodynamic and structural dynamic behavior of parachutes during the opening process
[AD-A264115] p 3241 N93-30119

DYNAMIC CONTROL

Controls of interaction dynamics of orbital assembly
p 3275 N93-29111

Articulated fin/wing control system
[AD-D015712] p 3259 N93-29278

Automated reasoning with function evaluation for COCOLOG
[INRIA-RR-1713] p 3529 N93-29488

Clustering of tethered satellite system simulation data by an adaptive neuro-fuzzy algorithm
p 3512 N93-29535

Dynamics and robust control of sampled data systems for large space structures
[AD-A264192] p 3281 N93-30142

DYNAMIC LOADS

Dynamic ice structure interaction: Theory and applications
[VTT-PUBS-90] p 3353 N93-28632

Structural load control during construction
p 3275 N93-29113

Sudden loading and fatigue effects on the human spine
[PB93-167526] p 3493 N93-29199

DYNAMIC MODELS

A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578

Interaction dynamics of on-orbit construction
p 3274 N93-29109

Lunar crane system p 3277 N93-29118

Vibration control of flexible space structures in noisy environment p 3285 N93-30235

Trajectory generation for dual-arm robots using artificial impedance approach p 3370 N93-30310

Experimental and analytical investigation of finger-follower cam systems p 3446 N93-30378

On symmetric central configurations with application to satellite motion about rings p 3652 N93-31000

A dynamical model of structural phase transition in La2CuO4
[DE93-605325] p 3602 N93-31025

DYNAMIC PROGRAMMING

Flow control using the theory of zero sum Markov games
[INRIA-RR-1597] p 3553 N93-28507

Robust and efficient implementation of the Delaunay tree
[INRIA-RR-1619] p 3547 N93-28511

A self-learning rule base for command following in dynamical systems p 3512 N93-29531

Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561

Examinations of perturbation reduction by automatic speech dependent recognition of separately spoken single words
[ETN-93-94180] p 3394 N93-30672

DYNAMIC RANGE

Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A263161] p 3406 N93-28940

ELF/VLF spectrum measurements
p 3398 N93-30745

DYNAMIC RESPONSE

Control-structures interaction test of the LACE satellite
p 3263 N93-28706

A computational model that couples aerodynamic and structural dynamic behavior of parachutes during the opening process
[AD-A264115] p 3241 N93-30119

Containment of explosions in spherical vessels
[DE93-005445] p 3446 N93-30211

Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374

Experimental and analytical investigation of finger-follower cam systems p 3446 N93-30378

DYNAMIC STABILITY

Vehicle dynamic stability and rollover
[PB93-185437] p 3447 N93-30828

DYNAMIC STRUCTURAL ANALYSIS

The dynamics and control of space tethers
p 3274 N93-28629

Dynamic ice structure interaction: Theory and applications
[VTT-PUBS-90] p 3353 N93-28632

NASA instep/MDMSC jitter suppression experiment (JITTER) p 3263 N93-28702

Description of the Joint Damping Experiment (JDX)
p 3263 N93-28703

Control-structures interaction test of the LACE satellite
p 3263 N93-28706

Upper atmosphere research satellite jitter study
p 3264 N93-28708

Controls of interaction dynamics of orbital assembly
p 3275 N93-29111

An integrated optimum design approach for high speed prop-rotors including acoustic constraints
[NASA-CR-193222] p 3248 N93-29153

Testing in combined dynamic environments
[DE93-010679] p 3278 N93-29250

Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410

Containment of explosions in spherical vessels
[DE93-005445] p 3446 N93-30211

Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374

The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376

Theoretical and experimental investigation of slack cable/mass system dynamics p 3455 N93-31028

DYNAMIC TESTS

The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376

DYNAMICAL SYSTEMS

Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749

SIAM Conference on Applications of Dynamical Systems
[DE93-007969] p 3548 N93-29057

Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079

Estimating the parameters of chaotic maps
[AD-A262574] p 3556 N93-29423

A composite self tuning strategy for fuzzy control of dynamic systems p 3511 N93-29530

A self-learning rule base for command following in dynamical systems p 3512 N93-29531

Learning characteristics of a space-time neural network as a tether skiprope observer p 3512 N93-29534

Designing a fuzzy scheduler for hard real-time systems p 3512 N93-29537

Non-scalar uncertainty: Uncertainty in dynamic systems p 3517 N93-29565

Knot invariants and cellular automata
[AD-A264199] p 3607 N93-30884

On symmetric central configurations with application to satellite motion about rings p 3652 N93-31000

On neural networks in identification and control of dynamic systems
[NASA-TM-107702] p 3455 N93-31038

DYNAMO THEORY

The production and evolution of plasma and associated magnetic fields during hypervelocity impacts: Implications for planetary paleomagnetism p 3589 N93-30000

E

EAR PROTECTORS

Sound attenuation characteristics of the standard DH-132A and SPH-4 helmets worn in combination with standard issue earplugs
[AD-A263011] p 3506 N93-29406

EARTH (PLANET)

Proceedings of the Near-Earth-Object Interception Workshop
[NASA-TM-108236] p 3556 N93-28572

EARTH ATMOSPHERE

Prognostic cloud water in the Los Alamos general circulation model
[DE93-007381] p 3482 N93-29347

EARTH CORE

Modern seismic travel time tables and station corrections for P and S waves
[AD-A262536] p 3477 N93-29412

EARTH GRAVITATION

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

EARTH IONOSPHERE
Ionospheric structure specifications and systems effects
[AD-A263573] p 3476 N93-29343
Electrodynamics of the dayside cleft region based on ground observations at Svalbard
[AD-A263571] p 3477 N93-29831
Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595
The cone structure and focusing of the electric field of VLF and LF waves at high altitudes of the ionosphere
p 3395 N93-30731
Transient (approximately equals 10 s) VLF amplitude and phase perturbations due to lightning-induced electron precipitation into the ionosphere (the Trimpi effect)
p 3396 N93-30736
Studies of the propagation of Low Frequency (LF) radio waves p 3396 N93-30738

EARTH LIMB
Honeywell's compact, wide-angle UV-visible imaging sensor p 3582 N93-28806

EARTH MAGNETOSPHERE
Transfer Orbit Plasma Interaction Experiment (TROPIX) p 3267 N93-28734
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
The dynamic cusp at low altitudes: A case study combining Viking, DMSP, and Sondrestrom incoherent scatter radar observations
[NASA-CR-193152] p 3476 N93-28842
FNAS CRRES program completion
[NASA-CR-192468] p 3476 N93-29032

EARTH MANTLE
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405
Modern seismic travel time tables and station corrections for P and S waves
[AD-A262536] p 3477 N93-29412

EARTH OBSERVATIONS (FROM SPACE)
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648
The 1990-1991 project summaries
p 3234 N93-29755
Evolution or revolution: The Catch 22 of TACSATs
p 3269 N93-29894
NOAA satellite programs and technology requirements
p 3627 N93-30710

EARTH OBSERVING SYSTEM (EOS)
Multi-channel holographic birfurcative neural network system for real-time adaptive EOS data analysis
p 3614 N93-29231

EARTH ORBITAL ENVIRONMENTS
Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561
Solar Array Module Plasma Interaction Experiment (SAMPIE) p 3265 N93-28716
The Photovoltaic Array Space Power Plus diagnostics (PASP Plus) flight experiment p 3265 N93-28717
Return flux experiment p 3266 N93-28727
Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730
LDEF materials data bases
[NASA-TM-107757] p 3290 N93-29067
Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193
Hypervelocity impact facility for simulating materials exposure to impact by space debris
p 3283 N93-29365
Analysis of LDEF micrometeoroid/debris data and damage to composite materials p 3309 N93-29366
LDEF data: Comparisons with existing models
p 3283 N93-29375
The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380
LDEF microenvironments, observed and predicted
p 3283 N93-29623
A generalized approach to the thermal analysis of the Long Duration Exposure Facility's flight experiments
p 3428 N93-29624
The effect of the low Earth orbit environment on space solar cells: Results of the Advanced Photovoltaic Experiment (S0014) p 3467 N93-29686
LEO effects on candidate solar cell cover materials
p 3467 N93-29687
New results from FRECOPA analysis
p 3448 N93-29688
Degradation of electro-optic components aboard LDEF p 3582 N93-29689
Characterization of a space orbited incoherent fiber optic bundle p 3583 N93-29698
Future radiation measurements in low Earth orbit
p 3654 N93-29708
Advanced research in sky surveillance: A search for low-luminosity objects
[AD-A264832] p 3631 N93-30629

EARTH ORBITS
SEU tolerant computer based on the R3000
[DE93-009294] p 3520 N93-29058

EARTH RADIATION BUDGET
Prognostic cloud water in the Los Alamos general circulation model
[DE93-007381] p 3482 N93-29347

EARTH RESOURCES
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681
Geoscience center research
[AD-A263465] p 3462 N93-29834
What's past is prologue: Supporting global change research with historical data
[DE93-005777] p 3472 N93-30009

EARTH ROTATION
Refinements on the pinhole camera measurements of the LDEF attitude p 3283 N93-29622

EARTH SCIENCES
JPRS report: Science and technology. Central Eurasia: Earth science
[JPRS-UES-93-003] p 3456 N93-29089
NSSDC data listing
[NASA-TM-108264] p 3612 N93-29167
Grid Analysis and Display System (GrADS): A practical tool for earth science visualization p 3613 N93-29225
JPRS report: Science and technology. Central Eurasia: Earth sciences
[JPRS-UES-93-002] p 3456 N93-30624

EARTH SURFACE
SAR shape-from-shading for a populated alpine area
p 3458 N93-28923

EARTH TERMINALS
Terrain and coverage prediction analyses for non-geostationary orbit EHF satellite communications
p 3389 N93-29902
Teleglobe's international Mobile Earth Terminal service p 3371 N93-30317

EARTH TIDES
Tidal and lunar data for Point Mugu, San Nicolas island, and the Barking Sanda area during 1993
[AD-A262725] p 3477 N93-29401

EARTH-IONOSPHERE WAVEGUIDE
Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595
A long wave TE/TM noise prediction model
p 3397 N93-30742

EARTH-MOON SYSTEM
Double swingby at Earth-Moon for increase of excess velocity
[ETN-93-94177] p 3270 N93-30582

EARTHQUAKES
DSS-14 subreflector actuator dynamics during the Landers earthquake p 3386 N93-29600
Modeling earthquakes with local and regional broadband data p 3478 N93-30005

ECOLOGY
JPRS report: Science and technology. Central Eurasia: Earth science
[JPRS-UES-93-003] p 3456 N93-29089
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681
The environment as an operational center of gravity
[AD-A264170] p 3472 N93-30154

ECONOMIC ANALYSIS
Multi-Attribute Decision Theory methodology for pollution control measure analysis
[DE93-005444] p 3472 N93-30008
Prefeasibility study on compressed air energy storage systems
[VTT-TIED-1267] p 3465 N93-30111
Viability assessment for reliable long-wave communication links p 3399 N93-30754

ECONOMIC FACTORS
Global warming issue and global economic model
[DE93-781334] p 3468 N93-28881

ECONOMIC IMPACT
Using a neural network to estimate solvent consumption
[PB93-173110] p 3467 N93-28873

ECOSYSTEMS
Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase
[DE93-010081] p 3467 N93-28543
State of the art: Ecological biomarkers
[DE93-006621] p 3469 N93-28992
Proposal to develop guides for high school teachers on global systems science
[DE93-008759] p 3624 N93-29100
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681
Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study
[PB93-181618] p 3474 N93-30823

EDDY CURRENTS
Reliability assessment at airline inspection facilities. Volume 2: Protocol for an eddy current inspection reliability experiment
[DOT/FAA/CT-92/12-VOL-2] p 3449 N93-28685

EDDY VISCOSITY
Large eddy simulations of shockwave passage through turbulence
[DE92-019503] p 3419 N93-29050

EDGE DETECTION
A robust multi-operator 3-D edge detection approach for range image segmentation p 3366 N93-30288

EDGE DISLOCATIONS
Dislocation roles in energetic crystal responses
p 3348 N93-30086

EDUCATION
A demonstration of simple airfoils: Structural design and materials choices
[DE93-007882] p 3238 N93-28662
Proposal to develop guides for high school teachers on global systems science
[DE93-008759] p 3624 N93-29100
Advanced network technology: Background paper
[OTA-BP-TCT-101] p 3539 N93-29650
Concept formulation process aid for trade-off determination: Operator's guide
[AD-A263756] p 3531 N93-29874
Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002
Profiles of major federal literacy programs
[PB93-163863] p 3608 N93-30657
Filling the gaps: An overview of data on education in grades K through 12
[PB93-176550] p 3608 N93-30821
National Educators' Workshop. Update 92: Standard Experiments in Engineering Materials Science and Technology
[NASA-CP-3201] p 3290 N93-30948
Experiments in corrosion for younger students by and for older students p 3291 N93-30955
Introduction to high performance composites
p 3291 N93-30957
Materials education activities p 3291 N93-30958
Experiments in materials science from household items p 3293 N93-30971
An automated data collection system for a Charpy impact tester p 3293 N93-30972
Visualizing weld metal solidification using organic analogs p 3293 N93-30973
Taguchi method of experimental design in materials education p 3294 N93-30975
Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976
High thermal conductivity of diamond
p 3294 N93-30977
Temperature-dependent electrical conductivity of soda-lime glass p 3294 N93-30978
Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979

EDUCATIONAL TELEVISION
Review of the effectiveness of video media in instruction
[AD-A264226] p 3392 N93-30362

EFFERENT NERVOUS SYSTEMS
Evolving neural network architecture
[AD-A264802] p 3544 N93-30592

EFFLUENTS
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197

EIGENVALUES
Classification theorem for principal fibre bundles, Berry's phase, and exact cycle evolution
[DE93-011114] p 3556 N93-28601
A normally elliptic Hamiltonian bifurcation
[W-9201] p 3548 N93-28753
A summary of block schemes for reducing a general matrix to Hessenberg form
[DE93-010621] p 3525 N93-28877
Benchmark eigenvalue spectrum calculations with anisotropic effects
[DE93-006387] p 3548 N93-28891
Stabilization using low-gain PI control: SISO case
[OUEL-1947/92] p 3541 N93-28898

Vertical slot convection: A linear study
[DE93-007643] p 3423 N93-29804

EIGENVECTORS
Classification theorem for principal fibre bundles, Berry's phase, and exact cycle evolution
[DE93-011114] p 3556 N93-28601
A summary of block schemes for reducing a general matrix to Hessenberg form
[DE93-010621] p 3525 N93-28877
Benchmark eigenvalue spectrum calculations with anisotropic effects
[DE93-006387] p 3548 N93-28891

EINSTEIN EQUATIONS
The semiclassical stability of de Sitter spacetime
[DESY-92-131] p 3603 N93-28472

EISCAT RADAR SYSTEM (EUROPE)
Electrodynamics of the dayside cleft region based on ground observations at Svalbard
[AD-A263571] p 3477 N93-29831

EJECTA
Hypervelocity impact facility for simulating materials exposure to impact by space debris
p 3283 N93-29365
Multiwavelength studies of classical nova shells
p 3636 N93-30412
Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

EL NINO
Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967
A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region
[AD-A263490] p 3488 N93-29819

ELASTIC BARS
A Riemann problem for an elastic bar that changes phase
[AD-A262827] p 3452 N93-29432

ELASTIC CYLINDERS
The wave, the cylinder, and the plate
[DE93-009458] p 3450 N93-28596
Evaluation of the scattered pressure due to infinite rigid cylinders, infinite elastic cylindrical shells, and rigid spheres in the presence of an ambient noise field
[AD-A264835] p 3563 N93-30899

ELASTIC DEFORMATION
Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004

ELASTIC PROPERTIES
The curvature of plane elastic curves
[AD-A263198] p 3450 N93-28516
Influence of ply waviness on stiffness and strength reduction of composite laminates
[AD-A263224] p 3294 N93-28559
Quiet by design: Numerical acousto-elastic analysis of aircraft structures
[ISBN-90-386-0042-9] p 3248 N93-29268
Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291
Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446
Three-dimensional elastic stress analysis in materials with many inhomogeneities
[AD-A263736] p 3453 N93-29855
Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863
Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004
Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159
Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598
Micropipet manipulation of lipid membranes: Direct measurement of the material properties of a cohesive structure that is only two molecules thick
p 3291 N93-30953

ELASTIC SCATTERING
Spin observables in large t elastic N-N scattering
[DE93-009211] p 3564 N93-28549
The wave, the cylinder, and the plate
[DE93-009458] p 3450 N93-28596
Elastic and reactive collisions of atoms and molecules with neutral alkali clusters
[DE93-009313] p 3566 N93-29206
Measurement of W-Z interference from neutrino-electron scattering
[DE93-010724] p 3566 N93-29313
Coupled-channel analysis of low energy nucleon-antinucleon interactions
[DE93-606115] p 3571 N93-30791

ELASTIC SHELLS
Sound wave scattering from an elastic spherical shell
[AD-A264039] p 3562 N93-30029

ELASTIC WAVES
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method
[ONERA-P-1990-4] p 3335 N93-30024

ELASTOMERS
Evaluation of polyaryl adhesives in elastomer-stainless steel joints
[DE93-009794] p 3329 N93-28551
Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193

ELBOW (ANATOMY)
Prosthetic elbow joint
[NASA-CASE-MFS-28707-1] p 3508 N93-30566

ELECTRETS
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method
[ONERA-P-1990-4] p 3335 N93-30024

ELECTRIC AUTOMOBILES
Technical examination and simulation of a photovoltaic system: Solar generator, battery, download
[ETN-93-94179] p 3466 N93-30573

ELECTRIC BATTERIES
In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques
[DE93-007699] p 3405 N93-28581
Approach to extending the cycle life of lithium secondary battery
[DE93-776266] p 3406 N93-28983
Evaluation of actuator energy storage and power sources for spacecraft applications
[NASA-CR-193226] p 3288 N93-29091
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-010658] p 3408 N93-29311
Temperature compensated lithium battery energy monitor
[AD-D015680] p 3409 N93-29605
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825

ELECTRIC CHARGE
Research and development of carbon black anodes for lithium secondary cells
[DE93-781331] p 3406 N93-28746
Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923

ELECTRIC CONDUCTORS
Apparatus for intercalating large quantities of fibrous structures
[NASA-CASE-LEW-15077-2] p 3298 N93-29609

ELECTRIC CONNECTORS
Characteristic and development report SA3581/MC4196 Lightning Arrestor Connector (LAC)
[DE93-010610] p 3412 N93-30118

ELECTRIC CURRENT
Fiber-optic currents measurements
[DE93-007970] p 3579 N93-29350
Two-dimensional model for current and heat transport in solid-armature railguns
[AD-A262014] p 3271 N93-29394
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923

ELECTRIC DIPOLES
The cone structure and focusing of the electric field of VLF and LF waves at high altitudes of the ionosphere
p 3395 N93-30731
ELF propagation in deep and shallow sea water
p 3397 N93-30739
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740

ELECTRIC DISCHARGES
Discharge of electrically charged clouds
[AD-A263212] p 3480 N93-28518
Research and development of carbon black anodes for lithium secondary cells
[DE93-781331] p 3406 N93-28746
Approach to extending the cycle life of lithium secondary battery
[DE93-776266] p 3406 N93-28983
Aircraft and refueler bonding and grounding study
[AD-A262027] p 3261 N93-29398
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method
[ONERA-P-1990-4] p 3335 N93-30024

ELECTRIC ENERGY STORAGE
Alkali metal carbon dioxide electrochemical system for energy storage and/or conversion of carbon dioxide to oxygen
[NASA-CASE-LEW-14973-1] p 3464 N93-28974

ELECTRIC EQUIPMENT TESTS
Total dose tests for the PROMICS-3 instrument
[VTT-TIED-1203] p 3411 N93-30108

ELECTRIC FIELD STRENGTH
Mithras studies of the boundary between open and closed field lines
[AD-A264758] p 3479 N93-30562
Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595

ELECTRIC FIELDS
Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer
[AD-A262189] p 3329 N93-28489
Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Coherent and semi-coherent neutron transfer reactions
[DE93-008336] p 3565 N93-28959
Proceedings of the Thunder and Lighting Seminar and the 3D Lightning Warning Workshop
[AD-A262766] p 3482 N93-29304
Fast multipole method in simulations of aqueous systems
[AD-A263422] p 3567 N93-29336
Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445
Molecular dynamics modeling of electric double layers with spectroscopic applications
[AD-A263168] p 3568 N93-29489
Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787
Partial cross sections in H(-) photodetachment
[DE93-011570] p 3569 N93-30130
Progress in the development of broadband electric-field sensors for transient fields p 3369 N93-30306
Pulse control in an accelerator for heavy-ion fusion
[DE93-009527] p 3576 N93-30390
Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595
The cone structure and focusing of the electric field of VLF and LF waves at high altitudes of the ionosphere
p 3395 N93-30731
Antenna modeling and analysis for ELF/VLF/LF applications p 3398 N93-30751
A covariant form of the Maxwell's equations in four-dimensional spaces with an arbitrary signature
[DE93-606070] p 3605 N93-30783
Electric magnetic duality in string theory
[DE93-606061] p 3606 N93-30807
Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925
Optimum design of multiwire cages for high-voltage applications
[AD-A264310] p 3400 N93-30995

ELECTRIC FURNACES
A high-temperature furnace for applications in microgravity p 3229 N93-29723

ELECTRIC GENERATORS
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
Power generation and transportation systems research department
[PB93-178309] p 3352 N93-30663

ELECTRIC MOTOR VEHICLES
Polymer electrolyte fuel cells for transportation applications
[DE93-008721] p 3464 N93-29147
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-010658] p 3408 N93-29311

ELECTRIC MOTORS
Study on decreasing torque noise resulting from feedback noise for the modified bang-bang controller
[AD-A263178] p 3407 N93-29010

Energy efficient drivepower: An overview
[DE93-012435] p 3411 N93-30057
Energy efficient drivepower
[DE93-012436] p 3411 N93-30058

ELECTRIC NETWORKS
Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882

ELECTRIC POTENTIAL
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Transient tests on an MHD thruster
[DE93-008656] p 3587 N93-29299
An improved linear ion trap physics package
p 3384 N93-29587
Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880
Experiments in corrosion for younger students by and for older students p 3291 N93-30955

ELECTRIC PROPULSION
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
Battery testing at Argonne National Laboratory
[DE93-009204] p 3407 N93-29036
Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-010658] p 3408 N93-29311
Electric propulsion for lightsats: A review of applications and advantages p 3290 N93-29907

ELECTRIC PULSES
Optically controlled solid state opening switches
[AD-A262404] p 3591 N93-28496
Response of a Nb/Al2O3/Nb tunnel junction to picosecond electrical pulses
[DE93-010416] p 3594 N93-29249

ELECTRIC ROCKET ENGINES
Engineering consideration for the self-energizing magnetoplasmadynamic (MPD): Type fusion plasma thruster
[AD-A262785] p 3288 N93-29289

ELECTRIC SWITCHES
Optically controlled solid state opening switches
[AD-A262404] p 3591 N93-28496
Improving the jitter of the 150 kJ experiments solid dielectric switches
[DE93-009459] p 3405 N93-28597
An explosively actuated electrical switch using Kapton insulation
[AD-A263835] p 3411 N93-30021

ELECTRIC WIRE
Microstructural understanding and critical current optimization of advanced high field superconductors
[DE93-011046] p 3592 N93-28643
Aircraft and refueler bonding and grounding study
[AD-A262027] p 3261 N93-29398
Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882
Improved measurement of thermal effects on microstructure p 3292 N93-30959
Optimum design of multiwire cages for high-voltage applications
[AD-A264310] p 3400 N93-30995

ELECTRICAL ENGINEERING
Geoscience center research
[AD-A263465] p 3462 N93-29834
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-1-2] p 3354 N93-30215
Novel methods of acceleration
[AD-A264828] p 3590 N93-30600

ELECTRICAL FAULTS
Microstructural modeling of electrical breakdown in solid fuel propellants
[AD-A263466] p 3342 N93-29835

ELECTRICAL GROUNDING
Aircraft and refueler bonding and grounding study
[AD-A262027] p 3261 N93-29398

ELECTRICAL IMPEDANCE
Acoustic transducer system
[AD-D015713] p 3562 N93-29279
Optically controlled active impedance element particularly suited for a microwave oscillator
[AD-D015723] p 3408 N93-29281
The 2nd International symposium on electrochemical impedance spectroscopy (extended abstracts)
[AD-A262994] p 3312 N93-29462
Frequency dependent electrical properties of minerals and partial-melts
[DE93-009254] p 3410 N93-29793
Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882
Scattering through apertures and by three-dimensional structures. Application to the measurement of the surface impedance of conductive materials
[ONERA-P-1990-2] p 3392 N93-30018

ELECTRICAL INSULATION
Numerical simulation of quantum many-body systems
[DE93-008300] p 3603 N93-28958
An explosively actuated electrical switch using Kapton insulation
[AD-A263835] p 3411 N93-30021
Diamond nucleation of surfaces using carbon clusters
[AD-A264634] p 3599 N93-30548

ELECTRICAL MEASUREMENT
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084
Fiber-optic currents measurements
[DE93-007970] p 3579 N93-29350
The measurement of electrical conductivity in detonating condensed explosives
[AD-A264482] p 3352 N93-30424
Investigation of methods for the measurement of small electron bundle currents
[DIGEL-1992-4] p 3413 N93-30763
Analysis of possibilities for using laser scattering for MeV electron beam diagnostics
[DE93-606223] p 3441 N93-30767
Measurements of the energy spectrum of an intense microsecond relativistic electron beam in the beam-plasma experiments using a multi-foil analyzer
[DE93-606271] p 3590 N93-30768
Coupled-channel analysis of low energy nucleon-antinucleon interactions
[DE93-606115] p 3571 N93-30791

ELECTRICAL PROPERTIES
A detailed technology roadmap for superconductivity
p 3526 N93-29045
Polymers with electrical and nonlinear optical properties
[AD-D015691] p 3333 N93-29457
Frequency dependent electrical properties of minerals and partial-melts
[DE93-009254] p 3410 N93-29793
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825
Electrical relaxation in acid-form nafion
[AD-A263558] p 3410 N93-29826
Fundamental studies of the morphology, chemistry, and electrical properties of metals on GaAs and other III-V semiconductor compounds
[AD-A264417] p 3597 N93-30120

ELECTRICAL RESISTIVITY
Numerical simulation of quantum many-body systems
[DE93-008300] p 3603 N93-28958
High pressure studies of hydrated nafion membranes: Dielectric relaxation and deuteron NMR
[AD-A263511] p 3332 N93-29342
Electrical relaxation in acid-form nafion
[AD-A263558] p 3410 N93-29826
A calibration procedure for the SBE 19 Conductivity, Temperature, and Depth (CTD) profiler
[AD-A264435] p 3489 N93-30420
The measurement of electrical conductivity in detonating condensed explosives
[AD-A264482] p 3352 N93-30424
The effect of Bi2 O3 on the electrical properties of Zr O2: 3 percent Mg O ceramic solid electrolytes
[DE93-607029] p 3339 N93-30774
Temperature-dependent electrical conductivity of soda-lime glass p 3294 N93-30978

ELECTRO-OPTICAL EFFECT
Measurements and Characterization Branch
[DE93-000094] p 3465 N93-30207

ELECTRO-OPTICS
Planning of a West Virginia University Research Center in the basic materials sciences
[DE93-011731] p 3592 N93-28647
The quest for an integrated flying helmet
p 3502 N93-28860
Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics
[AD-A263427] p 3332 N93-29337
Multichip module high speed testing
[AD-A262989] p 3408 N93-29427
Degradation of electro-optic components aboard LDEF p 3582 N93-29689
Optoelectronic technology consortium
[AD-A263580] p 3580 N93-29973
Electro-optic characterisation of extremely wide bandwidth electrical signals
[AD-A264202] p 3392 N93-30145
Subpicosecond electrooptic sampling
[AD-A264635] p 3581 N93-30520
Topical meeting of broadband analog and digital optoelectronics
[AD-A264643] p 3581 N93-30522

ELECTROACOUSTIC TRANSDUCERS
Acoustic transducer system
[AD-D015713] p 3562 N93-29279

ELECTROCATALYSTS
The electrolyte factor in O2 reduction electrocatalysis
[AD-A263565] p 3313 N93-29828

ELECTROCHEMICAL CELLS
In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques
[DE93-007699] p 3405 N93-28581
Research and development of carbon black anodes for lithium secondary cells
[DE93-781331] p 3406 N93-28746
Alkali metal carbon dioxide electrochemical system for energy storage and/or conversion of carbon dioxide to oxygen
[NASA-CASE-LEW-14973-1] p 3464 N93-28974

ELECTROCHEMICAL CORROSION
The growth of small corrosion fatigue cracks in alloy 2024
[NASA-TM-107755] p 3451 N93-29069
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Experiments in corrosion for younger students by and for older students p 3291 N93-30955

ELECTROCHEMISTRY
Synthesis of conducting polymer composite fibers in electrochemical flow cells
[AD-A262233] p 3294 N93-28492
Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002
Analytical applications of electrified interfaces between two immiscible solutions
[AD-A263085] p 3311 N93-29132
Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
Fast multipole method in simulations of aqueous systems
[AD-A263422] p 3567 N93-29336
The 2nd International symposium on electrochemical impedance spectroscopy (extended abstracts)
[AD-A262994] p 3312 N93-29462
Characterization of lithium electrode surface in lithium secondary batteries by in situ Raman spectroscopic methods
[AD-A263728] p 3411 N93-29986
Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551
Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816
Experiments in corrosion for younger students by and for older students p 3291 N93-30955

ELECTRODE MATERIALS
Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540

ELECTRODEPOSITION
Electrochemical fabrication of cadmium chalcogenide microdiode arrays
[AD-A263169] p 3310 N93-28988
In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331
The electrodeposition of low contraction chromium using high/low current pulsing
[AD-A264475] p 3327 N93-30538

ELECTRODES
Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534
Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540
Development of an updated pinch-welding capability
[DE93-009823] p 3442 N93-28552
Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133
Transient tests on an MHD thruster
[DE93-008656] p 3587 N93-29299
Adsorption of hydrated halide ions on charged electrodes: Molecular dynamics simulation
[AD-A263137] p 3568 N93-29619

Characterization of lithium electrode surface in lithium secondary batteries by in situ Raman spectroscopic methods
[AD-A263728] p 3411 N93-29986
ELECTRODYNAMICS
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
Electrodynamics of the dayside cleft region based on ground observations at Svalbard
[AD-A263571] p 3477 N93-29831
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923
ELECTROENCEPHALOGRAPHY
The AFOSR Workshop on the Future of EEG and MEG
[AD-A264338] p 3495 N93-30160
ELECTROLYSIS
Electrolysis performance improvement and validation experiment p 3267 N93-28737
Method for producing oxygen from lunar materials
[NASA-CASE-MSC-21759-1] p 3312 N93-29617
ELECTROLYTES
Analytical applications of electrified interfaces between two immiscible solutions
[AD-A263085] p 3311 N93-29132
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Transcutaneous analyte measuring methods
[AD-A262861] p 3494 N93-29509
The electrolyte factor in O2 reduction electrocatalysis
[AD-A263565] p 3313 N93-29828
Dioxygen reduction in various acid electrolytes
[AD-A263564] p 3317 N93-30664
Experiments in corrosion for younger students by and for older students p 3291 N93-30955
ELECTROLYTIC CELLS
Electrolysis performance improvement and validation experiment p 3267 N93-28737
Polymer electrolyte fuel cells for transportation applications
[DE93-008721] p 3464 N93-29147
Experiments in corrosion for younger students by and for older students p 3291 N93-30955
ELECTROMAGNETIC ABSORPTION
Microtextured metals for stray-light suppression in the Clementine startracker p 3286 N93-28785
A unique photon bombardment system for space applications p 3286 N93-28790
A single band processor for the computation of range from optical absorbance p 3363 N93-30272
Triplet states and optical absorptions in finite polyenes and conjugated polymers
[AD-A264552] p 3337 N93-30381
Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557
ELECTROMAGNETIC COMPATIBILITY
Coupling gain computation between antennas on circular cylinders at SHF/EHF frequencies p 3369 N93-30309
ELECTROMAGNETIC COUPLING
Electromagnetic diffusion and wire coupling
[AD-A263183] p 3381 N93-29011
ELECTROMAGNETIC FIELDS
Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532
Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556
Predicting radiation characteristics from antenna physical dimensions
[AD-A262462] p 3379 N93-28654
Gene transcription and electromagnetic fields
[DE93-010854] p 3490 N93-28848
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876
International Journal of Numerical Modeling: Electronic Networks, Devices, and Fields, volume 5, number 3, August 1992
[AD-A263765] p 3387 N93-29877
Applications of three-dimensional modeling in electromagnetic exploration p 3391 N93-30010
Quantification of thermographic mapping techniques
[AD-A264020] p 3391 N93-30016
Transient field computations within or proximity of complex structures: FD-TD approach
p 3366 N93-30292
Application of integral and differential equation methods for various EM interaction problems
[AD-A264821] p 3394 N93-30597
Rocket-triggered lightning studies for the protection of critical assets
[DE93-009633] p 3484 N93-30651
Modern approach to relativity theory (radar formulation)
[DE93-606032] p 3606 N93-30804
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923
ELECTROMAGNETIC INTERACTIONS
Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556
Measurement of W-Z interference from neutrino-electron scattering
[DE93-010724] p 3566 N93-29313
Neutrino mass
[DE93-010735] p 3566 N93-29315
An improved model-creation program for EM interaction analysis p 3367 N93-30294
Application of integral and differential equation methods for various EM interaction problems
[AD-A264821] p 3394 N93-30597
Parton's picture of the electroweak processes in high energy e(+)e(-)-collisions
[DE93-606107] p 3571 N93-30788
Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931
ELECTROMAGNETIC INTERFERENCE
Electromagnetic diffusion and wire coupling
[AD-A263183] p 3381 N93-29011
ELECTROMAGNETIC MEASUREMENT
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Progress in the development of broadband electric-field sensors for transient fields p 3369 N93-30306
Measurement of electromagnetic properties of composite materials
[AD-A264725] p 3303 N93-30555
ELECTROMAGNETIC NOISE
Influence of optical feedback on the pulse behavior of semiconductor lasers
[ETN-93-93798] p 3436 N93-28614
Analytical predictions of the intermodulation noise of semiconductor laser diode p 3361 N93-30256
ELF/VLF/LF Radio Propagation and Systems Aspects
[AGARD-CP-529] p 3394 N93-30727
A long wave TE/TM noise prediction model
p 3397 N93-30742
Application of non-standard signal processing to ELF noise characterization for the TSS1-OESEE programme
p 3397 N93-30743
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744
ELECTROMAGNETIC PROPERTIES
A detailed technology roadmap for superconductivity
p 3526 N93-29045
Elastic and reactive collisions of atoms and molecules with neutral alkali clusters
[DE93-009313] p 3566 N93-29206
Measurement of electromagnetic properties of composite materials
[AD-A264725] p 3303 N93-30555
ELECTROMAGNETIC PULSES
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
Electromagnetic diffusion and wire coupling
[AD-A263183] p 3381 N93-29011
Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765
High resolution free-electron laser spectroscopy
[AD-A263734] p 3439 N93-29853
Nonequilibrium screening and exciton dynamics probed by femtosecond laser pulses
[AD-A263603] p 3439 N93-29983
Radiated fields from an electromagnetic pulse simulator p 3366 N93-30290
Transient field computations within or proximity of complex structures: FD-TD approach
p 3366 N93-30292
A computer simulation of the production of an artificially ionized layer using the Arecibo facility
[DE93-010817] p 3478 N93-30487
Subpicosecond electrooptic sampling
[AD-A264635] p 3581 N93-30520
ELECTROMAGNETIC RADIATION
Predicting radiation characteristics from antenna physical dimensions
[AD-A262462] p 3379 N93-28654
Gene transcription and electromagnetic fields
[DE93-010854] p 3490 N93-28848
An improved model-creation program for EM interaction analysis p 3367 N93-30294
Neutrino oscillations and a new Faraday effect
[DE93-606111] p 3571 N93-30789
ELECTROMAGNETIC SCATTERING
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876
International Journal of Numerical Modeling: Electronic Networks, Devices, and Fields, volume 5, number 3, August 1992
[AD-A263765] p 3387 N93-29877
Application of integral and differential equation methods for various EM interaction problems
[AD-A264821] p 3394 N93-30597
ELECTROMAGNETIC SHIELDING
Electromagnetic diffusion and wire coupling
[AD-A263183] p 3381 N93-29011
ELECTROMAGNETIC SPECTRA
ELF/VLF spectrum measurements
p 3398 N93-30745
ELECTROMAGNETIC WAVE TRANSMISSION
A computer simulation of the production of an artificially ionized layer using the Arecibo facility
[DE93-010817] p 3478 N93-30487
ELF/VLF/LF Radio Propagation and Systems Aspects
[AGARD-CP-529] p 3394 N93-30727
Introduction p 3395 N93-30728
ELF propagation in deep and shallow sea water
p 3397 N93-30739
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740
ELECTROMAGNETISM
A proposed approach for developing next-generation computational electromagnetics software
[DE93-007326] p 3380 N93-28900
Electronics research at the University of Texas at Austin. Appendix: JSEP sponsored publications
[AD-A262993] p 3409 N93-29485
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-193468] p 3400 N93-31036
ELECTROMAGNETS
Cryogenic magnetic bearing
[AD-A264716] p 3446 N93-30512
ELECTROMECHANICAL DEVICES
The NASA SBIR product catalog
[NASA-TM-108242] p 3609 N93-29322
Automated modeling of physical systems
[NASA-CR-193256] p 3531 N93-29873
Efficient reorientation of a deformable body in space: A free-free beam example p 3280 N93-29994
Advances in the identification of electrochemical transfer function models using Prony analysis
[DE93-009424] p 3550 N93-30041
ELECTROMOTIVE FORCES
Research and development of carbon black anodes for lithium secondary cells
[DE93-781331] p 3406 N93-28746
Change of solar cell element properties influenced by adsorbed atoms
[DE93-606694] p 3466 N93-30777
ELECTROMYOGRAPHY
Sudden loading and fatigue effects on the human spine
[PB93-167526] p 3493 N93-29199
ELECTRON ACCELERATORS
Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator
[DE93-010461] p 3575 N93-29870
Novel methods of acceleration
[AD-A264828] p 3590 N93-30600
Investigation of methods for the measurement of small electron bundle currents
[DIGEL-1992-4] p 3413 N93-30763
Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880
ELECTRON BEAMS
Accelerator research studies
[DE93-009353] p 3573 N93-28522
Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533
Low-pump-rate multi-millisecond atomic xenon laser
[DE93-011484] p 3437 N93-29180
High-power Ka-band amplifier p 3385 N93-29590
Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method
[AD-A263997] p 3439 N93-29867
Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator
[DE93-010461] p 3575 N93-29870
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488

Unexpected increase in the thermal generation rate of bulk GaAs due to electron-beam metallization
[DE93-009829] p 3598 N93-30511

Non-perturbative calculation of equilibrium polarization of stored electron beams
[DE93-764500] p 3577 N93-30607

Complex apparatus and results of active experiment Electron-1 with injection of electronic beam in the ionosphere
[DE93-605452] p 3480 N93-30991

Microsecond ribbon relativistic electron beam in a plane undulator and generation of microwave radiation
[DE93-605693] p 3400 N93-30993

ELECTRON CYCLOTRON HEATING

Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532

Electron cyclotron heating and current drive in toroidal geometry
[DE93-010400] p 3586 N93-29049

Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303

ELECTRON DENSITY (CONCENTRATION)

Plasma diagnostics by antenna impedance measurements p 3400 N93-28820

Applications of density functional theory to calculation of reaction energetics p 3351 N93-30098

Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595

ELECTRON DENSITY PROFILES

Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595

ELECTRON DIFFRACTION

Diffraction and holography with photoelectrons and Auger electrons: Some new directions
[DE93-007664] p 3313 N93-29766

Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101

ELECTRON DIFFUSION

Plasma diffusion through multidipole magnetic fields
[DE93-608548] p 3591 N93-31007

ELECTRON ENERGY

Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415

ELECTRON GAS

Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776

ELECTRON GUNS

Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101

Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880

ELECTRON MASS

Planck scale effects in neutrino physics
[DE93-606133] p 3571 N93-30793

ELECTRON MICROSCOPES

What is underneath? Moving atoms and molecules to find out
[AD-A263363] p 3567 N93-29332

Scanning electron microscope/energy dispersive x ray analysis of impact residues in LDEF tray clamps
p 3283 N93-29369

Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists
[AD-A263130] p 3432 N93-29476

ELECTRON MICROSCOPY

Undulator Spectromicroscopy Facility at the Advanced Light Source
[DE93-007964] p 3261 N93-28490

Tailored interfaces for metal-matrix composites-fundamental considerations
[AD-A263048] p 3298 N93-29130

Scanning ionic microscopy with high spatial resolution: Parallel acquisition of elementary images by high resolution mass spectrometry
[ONERA-NT-1990-7] p 3314 N93-30139

Center for surface radiation damage studies
[AD-A264330] p 3570 N93-30366

ELECTRON MOBILITY

Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-193137] p 3509 N93-28895

ELECTRON PARAMAGNETIC RESONANCE

Magnetic resonance studies of photo-induced electron transfer reactions
[DE93-012239] p 3311 N93-29182

ELECTRON PHONON INTERACTIONS

Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787

Applications of mesoscopic physics
[DE93-012104] p 3597 N93-30141

ELECTRON PHOTON CASCADES

Beta/gamma Monte Carlo transport in repetitive structures of satellite systems
[DE93-007610] p 3281 N93-30509

ELECTRON PLASMA

Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533

A Fokker-Planck operator for the emission and absorption of electron plasma waves in a magnetized plasma
[DE93-009579] p 3584 N93-28598

ELECTRON PRECIPITATION

Transient (approximately equals 10 s) VLF amplitude and phase perturbations due to lightning-induced electron precipitation into the ionosphere (the Trimpi effect)
p 3396 N93-30736

Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737

ELECTRON SCATTERING

Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446

Extracting infinite system properties from finite size clusters: Phase randomization/boundary condition averaging
[AD-A264712] p 3551 N93-30503

ELECTRON STATES

NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068

Triplet states and optical absorptions in finite polyenes and conjugated polymers
[AD-A264552] p 3337 N93-30381

Experimental and theoretical aspects of excited state electron transfer and related phenomena
[AD-A263457] p 3570 N93-30589

Electronic states in quantum wells with periodically structured interfaces
[DE93-606295] p 3600 N93-30769

ELECTRON TRAJECTORIES

Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880

ELECTRON TRANSFER

Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096

Magnetic resonance studies of photo-induced electron transfer reactions
[DE93-012239] p 3311 N93-29182

Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446

Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists
[AD-A263130] p 3432 N93-29476

Electronics research at the University of Texas at Austin. Appendix: JSEP sponsored publications
[AD-A262993] p 3409 N93-29485

Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787

Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557

Experimental and theoretical aspects of excited state electron transfer and related phenomena
[AD-A263457] p 3570 N93-30589

Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776

ELECTRON TRANSITIONS

An improved linear ion trap physics package
p 3384 N93-29587

ELECTRON TUNNELING

What is underneath? Moving atoms and molecules to find out
[AD-A263363] p 3567 N93-29332

Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists
[AD-A263130] p 3432 N93-29476

NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666

ELECTRON-POSITRON PAIRS

New limits on generation-1 leptoquarks
[DE93-008138] p 3567 N93-29351

Towards the results of global analysis of data on nucleon electromagnetic structure
[DE93-606125] p 3571 N93-30792

ELECTRONIC CONTROL

Strategic avionics technology definition studies. Subtask 3-1A: Electrical Actuation (ELA) systems
[NASA-CR-193237] p 3271 N93-29215

Subpicosecond electrooptic sampling
[AD-A264635] p 3581 N93-30520

ELECTRONIC COUNTERMEASURES

Modified Acousto-Optic Adaptive Processor (Mod-AOAP)
[AD-A261983] p 3381 N93-28997

ELECTRONIC EQUIPMENT

Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408

Low cost instrumentation: Parallel port analog to digital converter
[AD-A263468] p 3433 N93-30584

Electronics for a neutron detector and a Geiger-Mueller detector for the radiation protection around MEA and AmPS
[DIGEL-1992-6] p 3413 N93-30838

Performance of thermal adhesives in forced convection p 3293 N93-30974

ELECTRONIC EQUIPMENT TESTS

Standardization of automatic test equipment in the US Air force
[AD-A262076] p 3250 N93-29004

ELECTRONIC MODULES

Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641

Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408

ELECTRONIC PACKAGING

Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408

Multichip module high speed testing
[AD-A262989] p 3408 N93-29427

ELECTRONS

High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488

Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501

Extracting infinite system properties from finite size clusters: Phase randomization/boundary condition averaging
[AD-A264712] p 3551 N93-30503

Unitary approximation of Bhabha diffusion by high energies and its implementation in Monte Carlo event generators
[ETN-93-93622] p 3571 N93-30670

ELECTROPHORESIS

Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651

Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

ELECTROPHYSIOLOGY

An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination
[AD-A264293] p 3492 N93-30818

ELECTROPLATING

The electrodeposition of low contraction chromium using high/low current pulsing
[AD-A264475] p 3327 N93-30538

ELECTROSTATIC CHARGE

Spacecraft surface charging handbook
[AD-A262778] p 3279 N93-29305

Aircraft and refueler bonding and grounding study
[AD-A262027] p 3261 N93-29398

ELECTROSTATICS

Microstructural modeling of electrical breakdown in solid fuel propellants
[AD-A263466] p 3342 N93-29835

Antenna modeling and analysis for ELF/VLF/LF applications p 3398 N93-30751

Defining protein electrostatic recognition processes
[AD-A264838] p 3571 N93-30901

ELEMENTARY EXCITATIONS

Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642

Response of a Nb/Al2O3/Nb tunnel junction to picosecond electrical pulses
[DE93-010416] p 3594 N93-29249
On the method of determining relations
[DE93-606041] p 3551 N93-30765
On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912

ELEMENTARY PARTICLE INTERACTIONS
Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542
Research in theoretical physics
[DE93-008401] p 3603 N93-28961
New Mexico Center for Particle Physics: Studies of fundamental interactions
[DE93-008302] p 3566 N93-29261
New limits on generation-1 leptoquarks
[DE93-008138] p 3567 N93-29351
Elementary particle interactions
[DE93-005113] p 3568 N93-29764
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488
Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

ELEMENTARY PARTICLES
Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652
Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960
Modern Monte Carlo particle transport simulation for safety and radiation protection applications in accelerometer technology and in space science
[JUEL-2609] p 3574 N93-29062
Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796
On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912
A squeezed state holomorphic phase space representation of equations of motion
[DE93-609835] p 3607 N93-30945

ELEVATION
Gravity referenced elevation encoder development
p 3385 N93-29592

ELEVATORS (LIFTS)
Platform stair lift
[NASA-CASE-MFS-28772-1] p 3507 N93-29845

ELLIPSOIDS
Hypersonic lateral and directional stability characteristics of aeroassist flight experiment configuration in air and CF4
[NASA-TM-4435] p 3239 N93-29166
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923

ELLIPSOMETERS
Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372

ELLIPSOMETRY
Real time self-directed MBE flux control incorporation in situ ellipsometry, phase 1
[AD-A263501] p 3595 N93-29341
Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372

ELONGATION
Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445

EMBEDDED COMPUTER SYSTEMS
Transputers, parallel processing in embedded systems for image compression in space applications
[NLR-TP-89242-U] p 3522 N93-30840

EMBEDDING
Virtual interface applications for airborne weapons systems p 3502 N93-28858
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325

EMBRITTLEMENT
Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems
[DE93-753130] p 3320 N93-28529
Planning of a West Virginia University Research Center in the basic materials sciences
[DE93-011731] p 3592 N93-28647
Environmental embrittlement of binary and Zr-doped Ni3Al
[DE93-008575] p 3321 N93-28679
SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2
p 3318 N93-29367
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829

EMISSION SPECTRA
Luminescence study of ion-implanted and MBE-grown Er-doped GaAs and Al(x)Ga(1-x)As
[AD-A262602] p 3591 N93-28471
Multifractal analysis of radio lobes
p 3380 N93-28689
The Backgrounds Data Center p 3624 N93-28814
Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid
[DE93-007362] p 3593 N93-28966
A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052
Multiwavelength studies of classical nova shells
p 3636 N93-30412
Tunable CW diode-pumped Tm,Ho:YLiF4 laser operating at or near room temperature
[NASA-CASE-NPO-18611-1-CU] p 3440 N93-30415
Observing and modelling F-region ionospheric dynamics using the OII 7320A emission p 3479 N93-30564
Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

EMITTANCE
Development of an O atom gun
[AD-A264753] p 3570 N93-30558

EMITTERS
Field-emitter arrays for RF vacuum microelectronics
[AD-A262677] p 3404 N93-28483
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A263464] p 3411 N93-29833
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A264048] p 3411 N93-30031
RF vacuum microelectronics
[AD-A264528] p 3412 N93-30409

EMULSIONS
Detonation shock dynamics of composite energetic materials p 3350 N93-30096

END EFFECTORS
Spline screw autochanger
[NASA-CASE-GSC-13435-1] p 3445 N93-29505
Robot arm with positional absolute encoded joints
p 3370 N93-30312
A testbed for autonomous reflexive grasping
[AD-A264557] p 3446 N93-30384

ENDOSCOPES
Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805

ENERGY ABSORPTION
An automated data collection system for a Charpy impact tester p 3293 N93-30972

ENERGY BANDS
A tight binding model for the electronic structure of FCC and SC C60
[DE93-606214] p 3601 N93-30794

ENERGY BUDGETS
Steady-state and transient modeling of tracer and nutrient distributions in the global ocean
[DE93-011043] p 3486 N93-28670
Spectral energetics of the lower thermosphere
p 3477 N93-29467
The estimation and scaling of land-surface fluxes of latent and sensible heat with remotely sensed data over a grassland site p 3462 N93-30045

ENERGY CONSERVATION
Assessment of energy technologies contributing to environmental conservation
[DE93-781439] p 3468 N93-28882
Study on technology for effective utilization of carbon dioxide in view of global environment
[DE93-781440] p 3468 N93-28883
Energy efficient drivepower: An overview
[DE93-012435] p 3411 N93-30057
Energy efficient drivepower
[DE93-012436] p 3411 N93-30058

ENERGY CONSUMPTION
Assessment of energy technologies contributing to environmental conservation
[DE93-781439] p 3468 N93-28882
Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396

ENERGY CONVERSION
Solar energy emplacement developer
p 3230 N93-29732

ENERGY CONVERSION EFFICIENCY
New III-V cell design approaches for very high efficiency
[DE93-000097] p 3464 N93-28971
The effect of the low Earth orbit environment on space solar cells: Results of the Advanced Photovoltaic Experiment (S0014) p 3467 N93-29686
Low-cost, high-efficiency solar cells utilizing GaAs-on-Si technology
[DE93-000096] p 3464 N93-29965
Magnetic character investigation of higher alcohol synthesis Cu-Co-Cr catalysts
[DE93-009732] p 3316 N93-30653

ENERGY DISSIPATION
Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096

ENERGY GAPS (SOLID STATE)
Role of oxygen vacancies in anodic TiO2 thin films
[DE92-642137] p 3602 N93-31027

ENERGY LEVELS
Numerical simulation of quantum many-body systems
[DE93-008300] p 3603 N93-28958
Inner-shell photo-ionized x ray laser schemes
[DE93-009285] p 3438 N93-29309
Electronic states in quantum wells with periodically structured interfaces
[DE93-606295] p 3600 N93-30769
Schroedinger equations of higher (greater than 2) order
[DE92-644677] p 3552 N93-30984

ENERGY METHODS
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414

ENERGY OF FORMATION
The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials
p 3343 N93-30063

ENERGY POLICY
Development of alternative fuels from coal-derived syngas
[DE93-011629] p 3341 N93-28668
Overview of the DOE Atmospheric Chemistry Program's Ozone Project
[DE93-007416] p 3471 N93-29770
Strategic Environmental Research and Development Program (SERDP)
[AD-A263745] p 3471 N93-29858

ENERGY REQUIREMENTS
Strategic avionics technology definition studies. Subtask 3-1A: Electrical Actuation (ELA) systems
[NASA-CR-193237] p 3271 N93-29215
Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765

ENERGY SPECTRA
Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533
Nonconservative and reverse spectral transfer in Hasegawa-Mima turbulence
[DE93-010132] p 3585 N93-28913
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415
Spectral energetics of the lower thermosphere
p 3477 N93-29467
LET spectra measurements of charged particles in the P0006 experiment on LDEF p 3573 N93-29637
Light-heavy ion measurements in CR-39 located on the Earth side of LDEF p 3573 N93-29638
A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052
Characterizing transient vibrations using band limited temporal moments
[DE93-009639] p 3453 N93-30185
Energy spectra and photoelectron work function from YBa2Cu3O7 high-T(sub c) superconductor
[DE93-606329] p 3600 N93-30766
Measurements of the energy spectrum of an intense microsecond relativistic electron beam in the beam-plasma experiments using a multi-foil analyzer
[DE93-606271] p 3590 N93-30768
Complex apparatus and results of active experiment Electron-1 with injection of electronic beam in the ionosphere
[DE93-605452] p 3480 N93-30991

ENERGY STORAGE
Sodium-Sulfur Cell Technology flight experiment (SSCT) p 3264 N93-28715
Evaluation of actuator energy storage and power sources for spacecraft applications
[NASA-CR-193226] p 3288 N93-29091
Research and development of lithium secondary batteries for load conditioner use, volume 2
[DE93-781329] p 3410 N93-29673

Nuclear isomers as ultra-high-energy-density materials [DE93-009520] p 3568 N93-29784

New hydrogen technologies [DE93-778353] p 3343 N93-30042

Prefeasibility study on compressed air energy storage systems [VTT-TIED-1267] p 3465 N93-30111

ENERGY TECHNOLOGY

Development of alternative fuels from coal-derived syngas [DE93-011629] p 3341 N93-28668

JPRS report: Science and technology. Central Eurasia: Engineering and equipment [JPRS-UEQ-93-003] p 3353 N93-28691

Assessment of energy technologies contributing to environmental conservation [DE93-781439] p 3468 N93-28882

JPRS report: Science and technology. Central Eurasia: Engineering and equipment [JPRS-UEQ-93-001] p 3274 N93-29014

Solar energy emplacement developer p 3230 N93-29732

Strategic Environmental Research and Development Program (SERDP) [AD-A263745] p 3471 N93-29858

Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2 [PB93-174779] p 3465 N93-30001

Energy efficient drivepower: An overview [DE93-012435] p 3411 N93-30057

Energy efficient drivepower [DE93-012436] p 3411 N93-30058

Power generation and transportation systems research department [PB93-178309] p 3352 N93-30663

Departmental technology transfer update p 3625 N93-30694

Plasma Physics Network Newsletter, no. 5 [DE93-606216] p 3591 N93-30795

Solar World Congress: Proceedings of the Biennial Congress of the International Solar Energy Society, volume 2, part 2 [PB93-174795] p 3466 N93-30935

ENERGY TRANSFER

Observation of a beam energy shift caused by a plasma wakefield [DE93-753243] p 3583 N93-28533

Nonconservative and reverse spectral transfer in Hasegawa-Mima turbulence [DE93-010132] p 3585 N93-28913

Kinetics and energy transfer in nonequilibrium fluid flows [AD-A263612] p 3240 N93-29284

Response of energetic solids to light, heat and shock pulses [AD-A263702] p 3342 N93-29296

New hydrogen technologies [DE93-778353] p 3343 N93-30042

Vibrational spectroscopy of shock-compressed fluids p 3318 N93-30072

Some implications of a differential turbomachinery equation with viscous correction [AD-A264693] p 3427 N93-30571

ENGINE DESIGN

Small Stirling dynamic isotope power system for robotic space missions [NASA-TM-105785] p 3287 N93-28686

Experimental evaluation of a cooled radial-inflow turbine [NASA-TM-106230] p 3251 N93-28697

Use of local x ray computerized tomography for high-resolution, region-of-interest inspection of large ceramic components for engines [DE93-005564] p 3449 N93-28943

Advanced engine study program [NASA-CR-187217] p 3287 N93-28946

Additional support for the TDK/MABL computer program [NASA-CR-193037] p 3526 N93-29028

Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392

Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

Aero-thermal design of a cooled transonic NGV and comparison with experimental results p 3257 N93-29957

ENGINE INLETS

The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet [NASA-TM-106240] p 3252 N93-29162

Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack [AD-A263905] p 3240 N93-29862

The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932

ENGINE PARTS

Surface modification of tribological components in transportation [DE93-008647] p 3442 N93-28903

An analysis of the correlation between the J52 engine component improvement program and improved maintenance parameters [AD-A262062] p 3251 N93-28984

Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392

Improved silicon nitride for advanced heat engines [NASA-CR-182193] p 3298 N93-29451

Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane p 3253 N93-29930

Characterization of ceramic composite materials for gas turbine applications [DE93-009719] p 3259 N93-30168

ENGINE TESTING LABORATORIES

The USAF Advanced Turbine Aerothermal Research Rig (ATARR) p 3255 N93-29945

ENGINE TESTS

Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane p 3253 N93-29930

The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932

Measurement of turbulent spots and intermittency modelling at gas-turbine conditions p 3253 N93-29934

Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing [NASA-CR-191036] p 3448 N93-31039

ENGINEERING

JPRS report: Science and technology. Central Eurasia: Engineering and equipment [JPRS-UEQ-93-001] p 3274 N93-29014

JPRS report: Science and technology. Central Eurasia: Engineering and equipment [JPRS-UEQ-93-004] p 3354 N93-29090

NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 31: The information-seeking behavior of engineers [NASA-TM-109224] p 3616 N93-30037

National Educators' Workshop. Update 92: Standard Experiments in Engineering Materials Science and Technology [NASA-CP-3201] p 3290 N93-30948

Materials education activities p 3291 N93-30958

ENGINEERING TEST REACTORS

Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR) [DE93-753349] p 3576 N93-30006

ENGINEERS

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 28: The technical communication practices of Russian and US aerospace engineers and scientists [NASA-TM-108249] p 3612 N93-28948

Advanced network technology: Background paper [OTA-BP-TCT-101] p 3539 N93-29650

NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 31: The information-seeking behavior of engineers [NASA-TM-109224] p 3616 N93-30037

ENTHALPY

Some implications of a differential turbomachinery equation with viscous correction [AD-A264693] p 3427 N93-30571

ENTROPY

Thermodynamic properties for polycyclic systems by non-calorimetric methods [DE93-011373] p 3603 N93-28747

ENVIRONMENT EFFECTS

Environmental embrittlement of binary and Zr-doped Ni3Al [DE93-008575] p 3321 N93-28679

Low Earth orbital mission aboard the Space Test Experiments Platform (STEP-3) p 3267 N93-28732

Emission inventories: A global modeling perspective [DE93-005817] p 3469 N93-28965

Atmospheric and Geophysical Sciences Division: G-Division did you know? [DE93-007412] p 3469 N93-28967

State of the art: Ecological biomarkers [DE93-006621] p 3469 N93-28992

Proposal to develop guides for high school teachers on global systems science [DE93-008759] p 3624 N93-29100

Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments [DE93-009202] p 3323 N93-29102

Environmental effects on stitched RTM composites [NASA-CR-193221] p 3297 N93-29107

Ocean Margins Program [DE93-008937] p 3470 N93-29262

Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

Analyses of space environment effects on active fiber optic links orbited aboard the LDEF p 3583 N93-29699

Potential effects of HFC-152a on global ozone and climate [DE93-008018] p 3471 N93-29792

Quantifying and minimizing uncertainty of climate forcing by anthropogenic aerosols [NASA-TM-108259] p 3472 N93-30043

Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider [DE93-011481] p 3412 N93-30127

Simulation of landscape disturbances and the effect of climatic change [DE93-011615] p 3472 N93-30131

VLF/LF propagation measurements p 3395 N93-30732

Statement on the United Nations Conference on Environment and Development [DE93-601878] p 3475 N93-30996

ENVIRONMENT MANAGEMENT

Hanford Environmental Information System (HEIS) user's manual, volume 1 [DE93-007465] p 3470 N93-29135

Remote vehicle survey tool [DE93-010822] p 3460 N93-29255

An architecture for robotic system integration [DE93-010829] p 3444 N93-29316

Building alliances to restore coastal environments: A coastal America progress report [PB93-169464] p 3470 N93-29674

Strategic Environmental Research and Development Program (SERDP) [AD-A263745] p 3471 N93-29858

The environment as an operational center of gravity [AD-A264170] p 3472 N93-30154

Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study [PB93-181618] p 3474 N93-30823

Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances [PB93-185551] p 3475 N93-30829

ENVIRONMENT MODELS

Predicted and observed directional dependence of meteoroid/debris impacts on LDEF thermal blankets p 3638 N93-29358

Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626

A measurement of the radiation dose to LDEF by passive dosimetry p 3572 N93-29634

Environmental studies: Mathematical, computational and statistical analyses [AD-A264223] p 3473 N93-30360

ENVIRONMENT POLLUTION

Using a neural network to estimate solvent consumption [PB93-173110] p 3467 N93-28873

Global warming issue and global economic model [DE93-781334] p 3468 N93-28881

State of the art: Ecological biomarkers [DE93-006621] p 3469 N93-28992

Statement on the United Nations Conference on Environment and Development [DE93-601878] p 3475 N93-30996

ENVIRONMENT PROTECTION

Summer 1990 Atlanta ozone precursor study (January 1993) [PB93-167203] p 3470 N93-29200

Analysis of protocol gases: An on-going quality assurance audit [PB93-168839] p 3311 N93-29204

Tropical forests and biological diversity: USAID report to Congress 1990-1991 [PB93-180453] p 3471 N93-29681

Pollution prevention: A regulatory update [DE93-009727] p 3472 N93-30180

An evaluation of factors affecting the solidification/stabilization of heavy metal sludge [AD-A264128] p 3473 N93-30197

Planetary protection issues for the MESUR mission: Probability of growth (Pg) [NASA-CP-3167] p 3651 N93-30214

Environmental studies: Mathematical, computational and statistical analyses [AD-A264223] p 3473 N93-30360

Evaluation of environmental marketing terms in the United States
[PB93-175784] p 3474 N93-30660

ENVIRONMENTAL CONTROL
Automation of closed environments in space for human comfort and safety p 3230 N93-29734

ENVIRONMENTAL ENGINEERING
Assessment of energy technologies contributing to environmental conservation
[DE93-781439] p 3468 N93-28882

ENVIRONMENTAL MONITORING
Magnetohydrodynamic projects at the CDIF
[DE93-012195] p 3584 N93-28649
Orbital Debris Environment Monitor (ODEM)
p 3267 N93-28735
Lightweight modular instrumentation for planetary applications p 3286 N93-28787
Environmental monitors in the Midcourse Space Experiments (MSX) p 3286 N93-28826
Hanford Environmental Information System (HEIS) user's manual, volume 1
[DE93-007465] p 3470 N93-29135
Summer 1990 Atlanta ozone precursor study (January 1993)
[PB93-167203] p 3470 N93-29200
Mathematical modeling and control law development for the atmospheric monitoring and control system of the Controlled Environment Research Chamber (CERC) at NASA Ames Research Center
[AD-A261978] p 3261 N93-29436
Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648
What's past is prologue: Supporting global change research with historical data
[DE93-005777] p 3472 N93-30009
The environment as an operational center of gravity
[AD-A264170] p 3472 N93-30154
Case study of Frontal Boundary Study Mission 03
[DE93-007176] p 3473 N93-30183
Remote sensing for water quality monitoring in the Tennessee Valley: Field tests of two systems
[DE93-008997] p 3462 N93-30637
Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study
[PB93-181618] p 3474 N93-30823
Planning and progress of EPA's pollution prevention research program
[PB93-185767] p 3475 N93-30831
Office of Water Environmental and Program Information Systems Compendium, FY 1992
[PB93-186203] p 3462 N93-30833

ENVIRONMENTAL QUALITY
Trend survey on the elucidation of the global warming mechanism by the governments of major industrialized nations
[DE93-776427] p 3470 N93-29672

ENVIRONMENTAL SURVEYS
Thermal Analyzer for Planetary Soil (TAPS): An in situ instrument for mineral and volatile-element measurements p 3643 N93-28782
Planetary protection issues for the MESUR mission: Probability of growth (Pg)
[NASA-CP-3167] p 3651 N93-30214
Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study
[PB93-181618] p 3474 N93-30823

ENVIRONMENTAL TESTS
LDEF materials data bases
[NASA-TM-107757] p 3290 N93-29067

ENZYME ACTIVITY
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651

ENZYMES
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651
Introductions to the Proceedings of the Fourteenth Symposium on Biotechnology for Fuels and Chemicals
[DE93-006235] p 3490 N93-28890
Center of Excellence in Biotechnology (Research)
[AD-A263598] p 3491 N93-29915

EPHEMERIDES
Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801

EPIDEMIOLOGY
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153

EPITAXY
Low temperature (LT) GaAs and related materials
[AD-A263607] p 3298 N93-29282
In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331
Crystallization of nanocomposite glasses made by the SSG process
[AD-A262892] p 3333 N93-29511
Submillimeter and microwave residual losses in epitaxial films of Y-Ba-Cu-O and Tl-Ca-Ba-Cu-O
[DE93-010430] p 3596 N93-29868
Low-cost, high-efficiency solar cells utilizing GaAs-on-Si technology
[DE93-000096] p 3464 N93-29965
Atomic layer epitaxy of semiconductor heterostructures
[AD-A264755] p 3599 N93-30560
Design, synthesis, and chemical processing of hierarchical ceramic structures for aerospace applications
[AD-A264227] p 3339 N93-30885

EPOXY MATRIX COMPOSITES
Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials
p 3303 N93-30845
The initiation, propagation, and effect of matrix microcracks in cross-ply and related laminates
p 3304 N93-30847
Ultrasonic detection and identification of fabrication defects in composites p 3305 N93-30856

EPOXY RESINS
Synthesis of new high performance lubricants and solid lubricants
[DE93-012237] p 3330 N93-28748
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene
[NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506
Comparison of impact results for several polymeric composites over a wide range of low impact velocities
p 3304 N93-30848
Delaminations in composite plates under impact loads
p 3304 N93-30849
Characterization of multiaxial warp knit composites
p 3304 N93-30851
Ultrasonic detection and identification of fabrication defects in composites p 3305 N93-30856

EQUATIONS OF MOTION
Coarse image motion for saccade control
[OUEL-1916/92] p 3523 N93-28485
Reference equations of motion for automatic rendezvous and capture
[NASA-CR-185676] p 3269 N93-29652
Visualization techniques for analyzing control of human movement: Affine mappings between multi-dimensional spaces p 3508 N93-30204
Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210
A closed-form formula for the manipulator regressor
p 3355 N93-30218
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Electric magnetic duality in string theory
[DE93-606061] p 3606 N93-30807
A new exact solution to the classical equations of motion of the relativistic string with massive ends
[DE92-644736] p 3557 N93-30922
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923
On symmetric central configurations with application to satellite motion about rings p 3652 N93-31000
A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002
Theoretical and experimental investigation of slack cable/mass system dynamics p 3455 N93-31028

EQUATIONS OF STATE
Thermodynamic properties for polycyclic systems by non-calorimetric methods
[DE93-011373] p 3603 N93-28747
Tables of experimental data used for the correlation of the thermophysical properties of ethane
[PB93-173417] p 3313 N93-29768
SESAME equation of state number 8010: Boron loaded silicone potting material
[DE93-012083] p 3300 N93-30395
Direct Monte Carlo simulation of the chemical equilibrium composition of detonation products
[DE92-040372] p 3315 N93-30447
Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918

EQUATORIAL REGIONS
A comparison of trans-equatorial ionosphere propagation predictions from AMBCOM with measured data
[AD-A264006] p 3391 N93-29987

EQUILIBRIUM EQUATIONS
A normally elliptic Hamiltonian bifurcation
[W-9201] p 3548 N93-28753

EQUIPMENT
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-001] p 3274 N93-29014
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-004] p 3354 N93-29090

EQUIPOTENTIALS
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923

EQUIVALENT CIRCUITS
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Antenna modeling and analysis for ELF/VLF/LF applications p 3398 N93-30751

ERGODIC PROCESS
Some qualitative properties in polling systems
[INRIA-RR-1596] p 3552 N93-28506

ERROR ANALYSIS
The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672
Pre- and postprocessing techniques for determining goodness of computational meshes
[NASA-CR-192553] p 3538 N93-29030
Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction
[NASA-CR-188249] p 3634 N93-29042
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074
Errors when shock waves interact due to numerical shock width
[DE93-010699] p 3426 N93-30484
Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles
[DE92-644678] p 3535 N93-30914
Bayesian linear analysis with application to removal of atmospheric influences on optical remote sensing images
[BCRS-92-19] p 3463 N93-31011
A continuum code investigation of stress integration using exact and approximate material rotation
[DE93-001892] p 3454 N93-31013

ERROR CORRECTING CODES
Accuracy enhancement in optical computing
[AD-A264872] p 3522 N93-30179
An error control protocol based on trellis coded modulations p 3358 N93-30237
A single chip high-speed CMOS Viterbi decoder
p 3358 N93-30238

ERROR DETECTION CODES
Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413

ERROR SIGNALS
Computation and generalization in neural networks
[AD-A263752] p 3549 N93-29871

ERRORS
Measurement of the relative and absolute microgravity environment of space platforms, recent flight results, and determination of the spatial microgravity field
p 3266 N93-28725
Implementing error-valued semantics for dataflow languages on imperative machines
[DE93-009319] p 3615 N93-29310
A neural fuzzy controller learning by fuzzy error propagation p 3516 N93-29560
Inverse problems: Fuzzy representation of uncertainty generates a regularization p 3516 N93-29563
The effect of clock, media, and station location errors on Doppler measurement accuracy
p 3246 N93-29588
Uncorrectable sequences and telecommand
p 3385 N93-29596
Monte Carlo simulation of magnitude-angle error sources
[AD-A263738] p 3555 N93-29857
A neural network based approach for machine fault diagnosis
[VTT-TIED-1274] p 3543 N93-29998
The planning coordinator: A design architecture for autonomous error recovery and on-line planning of intelligent tasks
[NASA-CR-193250] p 3543 N93-30039
Errors when shock waves interact due to numerical shock width
[DE93-010699] p 3426 N93-30484

An analysis of en route controller-pilot voice communications
[AD-A264784] p 3394 N93-30611

ERS-1 (ESA SATELLITE)

Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR)
[DLR-MITT-92-09] p 3456 N93-28915

The German PAF (Processing and Archiving Facilities) for ERS-1 p 3457 N93-28916

Processing of altimeter data by the German ERS-1 Processing and Archiving Facility (D-PAF)
p 3457 N93-28917

Exact trajectory determinator for ERS-1
p 3457 N93-28918

The interferometric SAR technology and its usability in the framework of ERS-1 p 3457 N93-28919

The German satellite ground station in Antarctica: Realization and first results p 3458 N93-28924

ERS-1 directional wave spectra validation with the airborne SAR PHARS
[BCRS-92-18] p 3463 N93-31010

ESCALATORS

Platform stair lift
[NASA-CASE-MFS-28772-1] p 3507 N93-29845

ESCHERICHIA

Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

ESTERS

The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces
p 3255 N93-29944

ESTIMATES

A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845

Estimations of expectedness and potential surprise in possibility theory p 3510 N93-29518

A fuzzy set preference model for market share analysis p 3514 N93-29548

ESTIMATING

Subjective response to simulated sonic booms with ground reflections
[NASA-TM-107764] p 3561 N93-28692

Information-theoretic performance bounding of Bayesian identifiers
[DE93-010705] p 3554 N93-28763

Estimating test range capacity
[AD-A262493] p 3270 N93-28938

Theory and applications of random fields
[AD-A262829] p 3555 N93-29454

An analysis of possible applications of fuzzy set theory to the actuarial credibility theory p 3510 N93-29517

Performance analysis of subspace methods
[AD-A263984] p 3530 N93-29865

Gradient estimation for regenerative processes
[AD-A263766] p 3555 N93-29878

ETALONS

Tunable CW diode-pumped Tm,Ho:YLiF4 laser operating at or near room temperature
[NASA-CASE-NPO-18611-1-CU] p 3440 N93-30415

ETCHING

Texturing of InP surfaces for device applications
[NASA-TM-106061] p 3321 N93-28618

ETHANE

Tables of experimental data used for the correlation of the thermophysical properties of ethane
[PB93-173417] p 3313 N93-29768

ETHERS

High octane ethers from synthesis gas-derived alcohols
[DE93-012470] p 3341 N93-28752

Preliminary properties of a resin from ethynyl terminated materials p 3303 N93-30842

ETHYL ALCOHOL

Mass spectrometric investigation of 2-methoxyethanol and 2-ethoxyethanol clusters: Magic numbers and structural implications
[AD-A262822] p 3312 N93-29429

ETHYL COMPOUNDS

Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551

ETHYLENE

APU diaphragm testing. Test plan
[NASA-TM-108251] p 3271 N93-29387

EUCLIDEAN GEOMETRY

Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210

The ground state wavefunctions of a conformally invariant scalar field in different spacetime background
[DE93-606063] p 3606 N93-30808

EUKARYOTES

Regulation of alternative CO2 fixation pathways in procaryotic and eucaryotic photosynthetic organisms
[DE93-012109] p 3491 N93-29181

EULER EQUATIONS OF MOTION

Development of a 3-D Implicit Euler Code for Hypersonic and High Supersonic Flows
[ONERA-RSF-23/1123-AY-230A] p 3417 N93-28744

State vector splitting: A numerical scheme for the Euler equations p 3419 N93-29039

EULER-CAUCHY EQUATIONS

Numerical modelling of the cold plasma with time-dependent, magnetohydrodynamic methods
[KFK-5053] p 3586 N93-29081

EULER-LAGRANGE EQUATION

Stability, bifurcation, and control of Hamiltonian systems
[DE93-012103] p 3547 N93-28648

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644744] p 3557 N93-30927

EURECA (ESA)

The Optical Properties Monitor (OPM): A multipurpose optical laboratory in space p 3266 N93-28729

EUROPE

System of navigation by satellites with European coverage p 3284 N93-29897

EUROPEAN SPACE PROGRAMS

The prehistory of ESRO, 1959 - 1960
[ESA-HSR-1] p 3660 N93-29500

EUTECTIC ALLOYS

Compatibility studies of AISI type 316 stainless steel with lead-lithium eutectic alloy
[DE93-605281] p 3328 N93-31022

EUTECTICS

Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems
[DE93-753130] p 3320 N93-28529

Eutectic solidification of Al-U at slowly cooling rates (10 C per second)
[DE92-640082] p 3328 N93-30941

A review of hot cracking in austenitic stainless steel weldments
[DE93-605280] p 3328 N93-31021

EVALUATION

Battery testing at Argonne National Laboratory
[DE93-009204] p 3407 N93-29036

Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424

Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix C: Nozzle PFORs
[NASA-CR-192565] p 3272 N93-30620

EVAPORATION

Prognostic cloud water in the Los Alamos general circulation model
[DE93-007381] p 3482 N93-29347

Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling
[AD-A263495] p 3423 N93-29352

Unexpected increase in the thermal generation rate of bulk GaAs due to electron-beam metallization
[DE93-009829] p 3598 N93-30511

The adhesion of AgI molecules to gaseous metallic silver cluster cations
[AD-A264820] p 3338 N93-30628

EVAPORATIVE COOLING

Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling
[AD-A264174] p 3425 N93-30155

EVAPORATORS

Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads
[AD-A263497] p 3423 N93-29339

EVAPOTRANSPIRATION

National remote sensing programme 2 ACMS project. Phase 1: Validation. Part 1: Definition of validation experiment
[BCRS-92-10-PHASE-1-PT-1] p 3461 N93-29465

EVOKED RESPONSE (PSYCHOPHYSIOLOGY)

An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination
[AD-A264293] p 3492 N93-30818

EXCIMER LASERS

Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101

EXCITATION

The natural excitation technique (NExT) for modal parameter extraction from operating wind turbines
[DE93-010611] p 3463 N93-28603

Femtosecond laser studies of excited state dynamics
[AD-A263708] p 3439 N93-29918

Nonequilibrium screening and exciton dynamics probed by femtosecond laser pulses
[AD-A263603] p 3439 N93-29983

Experimental and theoretical aspects of excited state electron transfer and related phenomena
[AD-A263457] p 3570 N93-30589

EXCITONS

Nonequilibrium screening and exciton dynamics probed by femtosecond laser pulses
[AD-A263603] p 3439 N93-29983

EXERCISE PHYSIOLOGY

Beta-adrenergic blockade and lactate metabolism during exercise at high altitude
[AD-A263544] p 3495 N93-29820

Field trial of caffeine on physical performance at altitude: An attempt to overcome the challenge
[AD-A264260] p 3497 N93-30894

EXHAUST DIFFUSERS

Cooling predictions in turbofan engine components
p 3259 N93-29964

EXHAUST EMISSION

Assessment of energy technologies contributing to environmental conservation
[DE93-781439] p 3468 N93-28882

Study on technology for effective utilization of carbon dioxide in view of global environment
[DE93-781440] p 3468 N93-28883

EXHAUST FLOW SIMULATION

Numerical simulation of perfect fluid flows around complex 3D configurations by a multidomain solver using the MUSCL approach p 3417 N93-28745

Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

EXHAUST GASES

Generation of carbon monoxide in compartment fires
[PB93-146702] p 3244 N93-29211

EXHAUST NOZZLES

Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

Evaluation of four advanced nozzle concepts for short takeoff and landing performance
[NASA-TP-3314] p 3239 N93-29165

EXHAUST SYSTEMS

Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

EXOBIOLOGY

Planetary protection issues for the MESUR mission: Probability of growth (Pg)
[NASA-CP-3167] p 3651 N93-30214

EXOTHERMIC REACTIONS

Chemical dynamics simulations as a probe to the initiation and propagation of condensed phase detonations p 3318 N93-30071

Rate constant determinations of reactions H + HNO from ab initio reaction path calculations
p 3319 N93-30099

EXPANDABLE STRUCTURES

Advanced collapsible tank for liquid containment
[NASA-CR-188247] p 3353 N93-28698

EXPERIMENT DESIGN

NASA instep/MDMSC jitter suppression experiment (JITTER) p 3263 N93-28702

CSI-Star: A low-cost CSI orbital testbed
p 3263 N93-28707

NASA in-step: Permeable membrane experiment
p 3267 N93-28736

Experiments in corrosion for younger students by and for older students p 3291 N93-30955

Improved measurement of thermal effects on microstructure p 3292 N93-30959

Direct tension experiments on compacted granular materials p 3292 N93-30960

Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961

Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

A 69 cent look at thermoplastic softening
p 3292 N93-30963

Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964

Walkway friction: Experiment and analysis
p 3293 N93-30966

Thermoforming from a systems viewpoint
p 3293 N93-30967

Fracture of glass p 3293 N93-30969

Experiments in materials science from household items p 3293 N93-30971

An automated data collection system for a Charpy impact tester p 3293 N93-30972

Visualizing weld metal solidification using organic analogs p 3293 N93-30973
Taguchi method of experimental design in materials education p 3294 N93-30975
Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976
High thermal conductivity of diamond p 3294 N93-30977
Temperature-dependent electrical conductivity of soda-lime glass p 3294 N93-30978
Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979

EXPERT SYSTEMS
Planning for air to air combat p 3501 N93-28852
Uncertainty reasoning in expert systems [NASA-CR-193120] p 3548 N93-28973
Neural network technologies [AD-A262576] p 3541 N93-28987
Systems engineering studies of on-orbit assembly operation p 3275 N93-29114
Spurious symptom reduction in fault monitoring [NASA-CR-191453] p 3542 N93-29192
Data reduction expert assistant p 3613 N93-29227
Overview of the System of Experts for Intelligent Data Management (SEIDAM) p 3613 N93-29228
DataHub knowledge based assistance for science visualization and analysis using large distributed databases p 3613 N93-29230
Collection-oriented match: Scaling up the data in production systems [AD-A262755] p 3615 N93-29459
Parallel inferencing method and apparatus for rule-based expert systems [NASA-CASE-NPO-18004-1-CU] p 3521 N93-29504
How to select combination operators for fuzzy expert systems using CRI p 3510 N93-29521
Approximate reasoning using terminological models p 3510 N93-29522
A neuro-fuzzy architecture for real-time applications p 3511 N93-29529
Fuzzy neural network methodology applied to medical diagnosis p 3498 N93-29546
An experimental methodology for a fuzzy set preference model p 3514 N93-29547
A genetic algorithms approach for altering the membership functions in fuzzy logic controllers p 3518 N93-29573
Life insurance risk assessment using a fuzzy logic expert system p 3520 N93-29585
Development of a concept formulation process aid for analyzing training requirements and developing training devices [AD-A263579] p 3261 N93-29972
Systems description of MIVOS (mist forecast system), part 1 [KNMI-TR-141-PT-1] p 3483 N93-30013
STRATUS: A prototype expert advisory system for terminal weather forecasting p 3367 N93-30296
An expert system for identification of the task status from tactile sensor data p 3368 N93-30300
Airspace Design Expert System (ADES), a 2D/3D mapping and modelling tool incorporating an expert system for use in instrument approach design p 3247 N93-30357

EXPLODING WIRES
Improving the jitter of the 150 kJ experiments solid dielectric switches [DE93-009459] p 3405 N93-28597
High-voltage pulse generator capable of 2000 J at 10 kV [AD-A262034] p 3407 N93-28999

EXPLOSIONS
Mitigation of shock waves in a cylindrical tunnel by foam [AD-A262491] p 3423 N93-29419
Combustion/explosion chemistry of bulk materials p 3343 N93-30062
Containment of explosions in spherical vessels [DE93-005445] p 3446 N93-30211
Acoustic-gravity waves from low-altitude localized disturbances [AD-A264804] p 3479 N93-30593
Tool grinding and spark testing p 3291 N93-30954

EXPLOSIVES
Synthesis of cubane based energetic molecules [AD-A263271] p 3564 N93-28562
Powder x ray diffraction patterns of energetic materials for use as reference standards [DE93-009903] p 3592 N93-28568
A simple model for explosives formulation [DE93-010703] p 3341 N93-29251
Response of energetic solids to light, heat and shock pulses [AD-A263702] p 3342 N93-29296
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits [AD-A262862] p 3506 N93-29471
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials [AD-A263244] p 3342 N93-29494
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes [AD-A263250] p 3438 N93-29800
An explosively actuated electrical switch using Kapton insulation [AD-A263835] p 3411 N93-30021
Combustion/explosion chemistry of bulk materials p 3343 N93-30062
Propulsion and detonics research in France p 3344 N93-30070
Chemical dynamics simulations as a probe to the initiation and propagation of condensed phase detonations p 3318 N93-30071
A steric hindrance model for the crystal orientation dependence of the shock initiation sensitivity of PETN explosive [LA-UR-92-1427] p 3345 N93-30074
Detonation mass spectrometry p 3319 N93-30076
Strategies for understanding the deflagration-to-detonation transition p 3319 N93-30077
Detonation shock dynamics of composite energetic materials p 3350 N93-30096
Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100
Automatic detection of explosives using x ray imaging p 3244 N93-30275
Explosives detection systems for airport security gas chromatographic based devices p 3244 N93-30276
Advanced signal processing requirement in an ion mobility explosives detector p 3320 N93-30277
The measurement of electrical conductivity in detonating condensed explosives [AD-A264482] p 3352 N93-30424
Conjugated substituted ionic polyacetylenes [AD-A264702] p 3337 N93-30497
Rocket-triggered lightning studies for the protection of critical assets [DE93-009633] p 3484 N93-30651

EXPONENTIAL FUNCTIONS
Dipolar orientational relaxation in guest/host amorphous polymer probed by second harmonic generation [AD-A262006] p 3333 N93-29441

EXPOSURE
Issues on human acceleration tolerance after long-duration space flights [NASA-TM-104753] p 3495 N93-29651
The chronic effects of jP-8 jet fuel exposure on the lungs [AD-A264162] p 3495 N93-30153
An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination [AD-A264293] p 3492 N93-30818
Carbon monoxide exposure of subjects with documented cardiac arrhythmias [PB93-179943] p 3497 N93-30890

EXTENSOMETERS
The design and testing of a high-temperature graphite dilatometer [AD-A262185] p 3430 N93-28488
Enhanced noncontacting laser extensometer for biaxial strain measurements [AD-A263170] p 3430 N93-28989

EXTERNAL SURFACE CURRENTS
Computer-aided modeling for analysis of arbitrary scatterers and feeds p 3367 N93-30293

EXTRAPOLATION
The numerical solution of low Mach number flow in confined regions by Richardson extrapolation [TRITA-NA-9207] p 3238 N93-29005

EXTRASOLAR PLANETS
Detection of other planetary systems using photometry p 3632 N93-28791

EXTRATERRESTRIAL RADIATION
The emulsion chamber technology experiment p 3268 N93-28743
High-performance visible/UV CCD focal plane technology for spacebased applications p 3434 N93-28771
Future radiation measurements in low Earth orbit p 3654 N93-29708

EXTREME ULTRAVIOLET RADIATION
In orbit degradation of EUV optical components in the wavelength range 10-40 nm AO 138-3 p 3582 N93-29691
Research studies on short wavelength by selective auger processes [AD-A264493] p 3440 N93-30401

EXTREMELY HIGH FREQUENCIES
High-power Ka-band amplifier p 3385 N93-29590
Advanced technologies for lightweight EHF tactical communications satellites p 3389 N93-29900
Synchronization techniques for medium data rate EHF MILSATCOM systems p 3389 N93-29901
Terrain and coverage prediction analyses for non-geostationary orbit EHF satellite communications p 3389 N93-29902
Coarse synchronization in an EHF frequency-hopped satellite communications system p 3365 N93-30281
Adaptive jammer nulling in EHF communications satellites p 3365 N93-30284

EXTREMELY LOW FREQUENCIES
Gene transcription and electromagnetic fields [DE93-010854] p 3490 N93-28848
ELF/VLF/LF Radio Propagation and Systems Aspects [AGARD-CP-529] p 3394 N93-30727
ELF propagation highlights p 3395 N93-30730
ELF propagation in deep and shallow sea water p 3397 N93-30739
A long wave TE/TM noise prediction model p 3397 N93-30742
Application of non-standard signal processing to ELF noise characterization for the TSS1-OESEE programme p 3397 N93-30743
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744
ELF/VLF spectrum measurements p 3398 N93-30745
Results of the joint HIPAS/NUWC campaigns to investigate ELF generated by auroral electrojet modulation p 3398 N93-30746
Pattern measurements of US Navy ELF antennas p 3399 N93-30752
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines p 3399 N93-30755

EXTREMELY LOW RADIO FREQUENCIES
Application of non-standard signal processing to ELF noise characterization for the TSS1-OESEE programme p 3397 N93-30743
Results of the joint HIPAS/NUWC campaigns to investigate ELF generated by auroral electrojet modulation p 3398 N93-30746
Pattern measurements of US Navy ELF antennas p 3399 N93-30752

EXTRUDING
Acid solution absorption of extruded polyethylene foam [DE93-011701] p 3330 N93-28839

EYE (ANATOMY)
Discomfort glare from high-intensity discharge headlamps: Effects of context and experience [PB93-174720] p 3496 N93-30659

EYE DOMINANCE
The effects of superimposing symbology on a simulated night vision goggle display [AD-A263458] p 3508 N93-30590

EYE MOVEMENTS
NASA supporting studies for microgravity research on eye movements [NASA-CR-193233] p 3493 N93-29041
Head mounted displays for virtual reality [AD-A263498] p 3506 N93-29340
A tutorial on exit pupils and eye rotation with virtual image optical displays [AD-A262399] p 3494 N93-29400
A simple computational model of center-surround receptive fields in the retina [AD-A264723] p 3496 N93-30515
An algorithm for simple and complex feature detection: From retina to primary visual cortex [AD-A264306] p 3497 N93-30897

F

F REGION
Mithras studies of the boundary between open and closed field lines [AD-A264758] p 3479 N93-30562
Observing and modelling F-region ionospheric dynamics using the OII 7320A emission p 3479 N93-30564

F-15 AIRCRAFT
F-15 composite engine access door p 3302 N93-30442

F-16 AIRCRAFT
Head-steered sensor flight test results and implications p 3502 N93-28859

F-18 AIRCRAFT
Modal survey of a full-scale F-18 wind tunnel model [AD-A262482] p 3240 N93-29410
Flight control system design factors for applying automated testing techniques [NASA-TM-4242] p 3260 N93-30764

FABRICATION
Lightweight flexible composite tent materials
[AD-A263021] p 3295 N93-28660
Novel low temperature superconducting bolometers
[DE93-010433] p 3430 N93-28664
Inertial confinement fusion target component fabrication and technology development support
[DE93-010836] p 3585 N93-28836
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A263161] p 3406 N93-28940
Electrochemical fabrication of cadmium chalcogenide microdiode arrays
[AD-A263169] p 3310 N93-28988
Oxidation behavior in reaction-bonded aluminum-silicon alloy/alumina powder compacts
[DE93-010407] p 3298 N93-29191
Characterization and optimization of a Hot Air Solder-Leveling System
[DE93-010188] p 3332 N93-29328
Method and apparatus for weaving a woven angle ply fabric
[NASA-CASE-LAR-14048-1] p 3354 N93-29611
NSF Tokyo reports: Japanese R and D projects on micro- and nanofabrication and related basic research projects
[PB93-181261] p 3410 N93-29671
Ferroelectric liquid crystal optical interconnect switching systems
[AD-A263751] p 3596 N93-29859
A unified approach for composite cost reporting and prediction in the ACT program p 3302 N93-30441
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 3447 N93-30567
Infiltration/cure modeling of resin transfer molded composite materials using advanced fiber architectures
p 3303 N93-30843
Advanced fiber placement of composite fuselage structures p 3306 N93-30864
Near net shape processing: A necessity for advanced materials applications p 3290 N93-30949
New materials: Fountainhead for new technologies and new science p 3291 N93-30952
Introduction to high performance composites
p 3291 N93-30957
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

FABRICS
Lightweight flexible composite tent materials
[AD-A263021] p 3295 N93-28660
Technology transfer personnel exchange at the Boeing Company
[DE93-010190] p 3625 N93-29329
Method and apparatus for weaving a woven angle ply fabric
[NASA-CASE-LAR-14048-1] p 3354 N93-29611
Characterization of multiaxial warp knit composites
p 3304 N93-30851
Ultrasonic detection and identification of fabrication defects in composites p 3305 N93-30856

FACE (ANATOMY)
Methods for characterizing the human head for the design of helmets
[AD-A263875] p 3507 N93-29889

FACE CENTERED CUBIC LATTICES
Neutron scattering studies of the structures and lattice dynamics of the alkali metals
[DE93-008272] p 3593 N93-28956
The role of grain boundaries in hydrogen diffusion in metals at 25 C
[NASA-TM-108407] p 3322 N93-29043
Order-disorder transformations in Ni-Al alloys
[DE93-009293] p 3326 N93-30389
A tight binding model for the electronic structure of FCC and SC C60
[DE93-606214] p 3601 N93-30794

FACTOR ANALYSIS
A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844
Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA
[DE93-001923] p 3505 N93-28942
Dynamic factorization in large-scale optimization
[AD-A263993] p 3528 N93-29345

FACTORIAL DESIGN
Study on various problems in statistical planning and inference
[AD-A262484] p 3554 N93-29411

FACTORIALS
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

FACTORIZATION
Dynamic factorization in large-scale optimization
[AD-A263993] p 3528 N93-29345

FADDEEV EQUATIONS
Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles
[DE92-644678] p 3535 N93-30914
Algorithm of numerical calculations of differential Yakubovsky equations for the (1 + 3) scattering problem
[DE92-644679] p 3535 N93-30915

FAILURE
Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414
Uncorrectable sequences and telecommand
p 3385 N93-29596
Tutorial: Performance and reliability in redundant disk arrays p 3537 N93-30463
Delaminations in composite plates under impact loads
p 3304 N93-30849
Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850
Multi-parameter optimization tool for low-cost commercial fuselage crown designs
p 3305 N93-30858
Comparison of hand laid-up tape and filament wound composite cylinders and panels with and without impact damage p 3306 N93-30859
Effects of scale in predicting global structural response p 3306 N93-30860

FAILURE ANALYSIS
Inservice diagnostic methods for solenoid-operated valves
[DE93-007823] p 3443 N93-28968
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens
[NASA-TM-106219] p 3449 N93-29073
Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205
A fuzzy case based reasoning tool for model based approach to rocket engine health monitoring
p 3289 N93-29570
Overview of the Systems Special Investigation Group investigation p 3318 N93-29683
An experimental/analytical evaluation of biaxial sheet failure
[DE93-010620] p 3453 N93-29843
Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR)
[DE93-753349] p 3576 N93-30006
Evaluation of category 3 MLS designs
p 3247 N93-30358
A ceramic fracture model for high velocity impact
[AD-A264728] p 3454 N93-30545
Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598
Durability of Quick Reaction Satellite Antenna (QRSA) trunnion castings
[AD-A264095] p 3281 N93-30813
Structural response of bead-stiffened thermoplastic shear webs p 3308 N93-30873
An overview of the crash dynamics failure behavior of metal and composite aircraft structures
p 3308 N93-30875
Direct tension experiments on compacted granular materials p 3292 N93-30960

FAILURE MODES
Inservice diagnostic methods for solenoid-operated valves
[DE93-007823] p 3443 N93-28968
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414
An experimental/analytical evaluation of biaxial sheet failure
[DE93-010620] p 3453 N93-29843
Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider
[DE93-011481] p 3412 N93-30127
The initiation, propagation, and effect of matrix microcracks in cross-ply and related laminates
p 3304 N93-30847
Comparison of hand laid-up tape and filament wound composite cylinders and panels with and without impact damage p 3306 N93-30859
Prediction of stiffener-skin separation in composite panels p 3307 N93-30871
Experimental behavior of graphite-epoxy Y-stiffened specimens loaded in compression p 3307 N93-30872
Evaluation of some scale effects in the response and failure of composite beams p 3308 N93-30874

FALLING SPHERES
Macrostatistical hydrodynamics
[DE93-012289] p 3417 N93-28751

FAR FIELDS
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740
Application of the Fourier transform to short antennas
p 3398 N93-30750

FAR INFRARED RADIATION
Far infrared supplement. Third edition: Catalog of infrared observations (lambda greater than or equal to 4.6 micrometers)
[NASA-RP-1295] p 3629 N93-29156
Formulation of Ames 24E2 IR-black coating
[NASA-TM-102864] p 3629 N93-29453
The 12 UM contribution of nearby galaxies to the infrared background
[AD-A264336] p 3654 N93-30419
A variable reflectivity output coupler for optically pumped far infrared lasers
[MPE-PREPRINT-225] p 3441 N93-30640

FAR ULTRAVIOLET RADIATION
Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652
Research studies on short wavelength by selective auger processes
[AD-A264493] p 3440 N93-30401

FARADAY EFFECT
Fiber-optic currents measurements
[DE93-007970] p 3579 N93-29350
Neutrino oscillations and a new Faraday effect
[DE93-606111] p 3571 N93-30789

FARM CROPS
Continued results of the seeds in space experiment
p 3492 N93-29703

FAST FOURIER TRANSFORMATIONS
A multigrid extension of the FFT for the numerical inversion of Fourier and LaPlace transforms
[TRITA-NA-9204] p 3548 N93-29024
Enhanced resolution and de-aliasing techniques for fast Fourier transforms p 3358 N93-30240
The use of data turning in airborne radars
p 3358 N93-30241

FAST NEUTRONS
Fast neutron cross section measurements
[DE93-009053] p 3563 N93-28546
Subnanosecond high power performance of a bistable optically-controlled GaAs switch
[DE93-006285] p 3406 N93-28944

FAST NUCLEAR REACTORS
Annual progress report on the NSRR experiments, (21)
[DE93-753190] p 3574 N93-29137
Compatibility studies of AISI type 316 stainless steel with lead-lithium eutectic alloy
[DE93-605281] p 3328 N93-31022

FASTENERS
Quick connect fastener
[NASA-CASE-MFS-28833-1] p 3445 N93-29846

FATIGUE (MATERIALS)
Mechanics of elevated temperature fatigue damage in fiber-reinforced ceramics
[AD-A262403] p 3329 N93-28495
Crack length determination by ultrasonic methods
[DE93-008075] p 3450 N93-28567
Ultrahigh temperature assessment study: Ceramic matrix composites
[AD-A262740] p 3295 N93-28592
Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850

FATIGUE LIFE
Mechanics of elevated temperature fatigue damage in fiber-reinforced ceramics
[AD-A262403] p 3329 N93-28495
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments
[DE93-009202] p 3323 N93-29102

FATIGUE TESTS
A miniature fatigue test machine p 3291 N93-30956

FAULT TOLERANCE
SEU tolerant computer based on the R3000
[DE93-009294] p 3520 N93-29058
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A263076] p 3382 N93-29131
Compiler-assisted multiple instruction rollback recovery using a read buffer
[NASA-CR-193175] p 3527 N93-29170
Spurious symptom reduction in fault monitoring
[NASA-CR-191453] p 3542 N93-29192

Research on reconfigurable and reliable manipulators [DE93-010244] p 3444 N93-29330
Associative memories for supercomputers [AD-A263142] p 3520 N93-29482
Synthesis techniques and analysis tools for on-chip fault-tolerance [AD-A263167] p 3409 N93-29654
A redesigned Isis and Meta system under Mach [AD-A263576] p 3531 N93-29976
The planning coordinator: A design architecture for autonomous error recovery and on-line planning of intelligent tasks [NASA-CR-193250] p 3543 N93-30039
An artificial neural network model for periodic trajectory generation p 3356 N93-30225
Fault tolerance and testing for WSI systems p 3361 N93-30258

FAULT TREES
Users manual for fault tree analysis code: CUT-TD [DE93-753272] p 3525 N93-28978

FEASIBILITY
Study on technology for effective utilization of carbon dioxide in view of global environment [DE93-781440] p 3468 N93-28883
Reception at Ascension Island, South Atlantic, of the transmissions from the Heard Island feasibility test [PB93-176261] p 3394 N93-30662
CAESAR development plan 1992-1995 [BCRS-92-17] p 3463 N93-31009

FEASIBILITY ANALYSIS
Optically tiled flat panel displays. A feasibility study [AD-A262737] p 3592 N93-28590
Clustered Lance Booster (CLB) feasibility study [AD-A262746] p 3286 N93-28593
Information system for co-registration of CAESAR sea-images based on two dimensional image matching techniques (SCORE). Part 1: Introduction, user requirements, and feasibility tests [BCRS-90-40A-PT-1] p 3460 N93-29307
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion [DE93-010662] p 3464 N93-29844
SAR sensors on TACSATS: A feasibility assessment p 3286 N93-29909
Prefeasibility study on compressed air energy storage systems [VTT-TIED-1267] p 3465 N93-30111

FEDERAL BUDGETS
A perspective on acquisition of NASA space systems [AD-A263246] p 3610 N93-29499
Research, Development, Test and Evaluation (R, D, T, and E) programs (R-1), Department of Defense budget for fiscal year 1994 [PB93-169878] p 3611 N93-30936

FEEDBACK
Influence of optical feedback on the pulse behavior of semiconductor lasers [ETN-93-93798] p 3436 N93-28614
Study on decreasing torque noise resulting from feedback noise for the modified bang-bang controller [AD-A263178] p 3407 N93-29010
Optimal filtering and LQR theory with constraints on system and control matrices p 3357 N93-30234

FEEDBACK CONTROL
Closed-loop control with delayed information [INRIA-RR-1638] p 3541 N93-28638
Stabilization using low-gain PI control: SISO case [OUEL-1947/92] p 3541 N93-28898
Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079
Multivariable control of the Space Shuttle Remote Manipulator System using linearization by state feedback [NASA-CR-188248] p 3443 N93-29080
An autonomous vision-based mobile robot p 3443 N93-29082
Three-parameter tunable Tilt-Integral-Derivative (TID) controller [NASA-CASE-NPO-18492-1-CU] p 3542 N93-29176
A self-learning rule base for command following in dynamical systems p 3512 N93-29531
Robust control of intelligent rotor [AD-A263707] p 3259 N93-29985
Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization p 3279 N93-29989
Attitude stabilization of a rigid spacecraft using two momentum wheel actuators p 3280 N93-29990
Attitude stabilization of a rigid spacecraft using gas jet actuators operating in a failure mode p 3280 N93-29992
Planar reorientation of a free-free beam in space using embedded electromechanical actuators p 3280 N93-29993
Some results on feedback stabilization of a one-link flexible arm [INRIA-RR-1682] p 3543 N93-30116
Robust control via H-infinity optimization p 3354 N93-30216
Control system design and multiparameter variations p 3355 N93-30217
Robust boundary control of flexible structures governed by hybrid dynamics p 3285 N93-30249
Turbulent drag reduction: Studies of feedback control and flow over riblets p 3242 N93-30645
Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization p 3544 N93-30893

FEEDFORWARD CONTROL
Neural network simulations on massively parallel computers: Applications in chemical physics [DE93-006739] p 3538 N93-28894
Evolving neural network architecture [AD-A264802] p 3544 N93-30592

FEMALES
Materials education activities p 3291 N93-30958

FERMI SURFACES
Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples [DE93-608739] p 3601 N93-30776

FERMIONS
Understanding conformal field theory through parafermions and Chern Simons theory [DE93-010452] p 3604 N93-29806

FERROELECTRICITY
Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films [AD-A263664] p 3594 N93-29293
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics [AD-A263427] p 3332 N93-29337
Ferroelectric liquid crystal optical interconnect switching systems [AD-A263751] p 3596 N93-29859
Materials for adaptive structural acoustic control, volume 1 [AD-A264619] p 3562 N93-30121
Materials for adaptive structural acoustic control, volume 2 [AD-A264620] p 3563 N93-30385

FERROUS METALS
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-008] p 3322 N93-29012
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-007] p 3322 N93-29013
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-009] p 3322 N93-29015
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-012] p 3296 N93-29016
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-013] p 3296 N93-29017
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-014] p 3322 N93-29019
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-015] p 3322 N93-29020
JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-93-001] p 3296 N93-29021

FEYNMAN DIAGRAMS
A simple formula for reducing Feynman diagrams to scalar integrals [DE92-644717] p 3607 N93-30916
Invariant structures in gauge theories and confinement [DE92-644739] p 3607 N93-30924
Invariant structures and static forces in gauge theories [DE92-644740] p 3607 N93-30925

FIBER COMPOSITES
Mechanics of elevated temperature fatigue damage in fiber-reinforced ceramics [AD-A262403] p 3329 N93-28495
Probabilistic simulation of multi-scale composite behavior [NASA-TM-106196] p 3451 N93-28633
Aligned, short-fiber composites by novel flow processing methods [DE93-008701] p 3296 N93-28904
Ceramic matrix composites properties/microstresses with complete and partial interphase bond [NASA-TM-106136] p 3297 N93-29071
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes [NASA-TM-106076] p 3297 N93-29074
Factors influencing the interlaminar fracture toughness and its evaluation in composites [FFA-TN-1991-34] p 3451 N93-29076
Axial impact of composites p 3297 N93-29078
Method and apparatus for weaving a woven angle ply fabric [NASA-CASE-LAR-14048-1] p 3354 N93-29611
Interfacial studies of refractory glass-ceramic matrix/advanced SiC fiber reinforced composites [AD-A263264] p 3299 N93-29802
Effect of water immersion on fiber/matrix adhesion in thermoplastic composites [AD-A263646] p 3299 N93-29984
Mechanical properties of several magnesium and aluminum composites [AD-A262481] p 3299 N93-30137
Characterization of ceramic composite materials for gas turbine applications [DE93-009719] p 3259 N93-30168
Long discontinuous fiber composite structure: Forming and structural mechanics p 3301 N93-30437
First NASA Advanced Composites Technology Conference, part 2 [NASA-CP-3104-PT-2] p 3303 N93-30841
Studies of fiber-matrix adhesion on compression strength p 3304 N93-30846
The initiation, propagation, and effect of matrix microcracks in cross-ply and related laminates p 3304 N93-30847
Advanced fiber placement of composite fuselage structures p 3306 N93-30864
Tensile creep behavior of polycrystalline alumina fibers [NASA-TM-106269] p 3340 N93-30938
Mechanical properties of composite materials p 3290 N93-30951
Introduction to high performance composites p 3291 N93-30957

FIBER OPTICS
Gyroscope with excess noise subtraction [AD-D015698] p 3431 N93-29046
Hybrid data link [AD-D015714] p 3383 N93-29280
Velocity measurements of low Reynolds number tube flow using fiber-optic technology [DE93-009865] p 3422 N93-29335
Leaky coaxial cable signal transmission for remote facilities [DE93-007916] p 3383 N93-29348
Fiber-optic currents measurements [DE93-007970] p 3579 N93-29350
Characterization of a space orbited incoherent fiber optic bundle p 3583 N93-29698
Analyses of space environment effects on active fiber optic links orbited aboard the LDEF p 3583 N93-29699
Radiation and temperature effects on LDEF fiber optic samples p 3583 N93-29700
Wavelength-division multiplexed optical integrated circuit with vertical diffraction grating [NASA-CASE-NPO-18357-1-CU] p 3579 N93-29848
Fiber optic chemical sensors for characterizing the carbon cycle in ocean margin regions [DE93-011442] p 3489 N93-30056
Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102
Applications of the photorefractive effect and damage induced effects in fibers [AD-A264339] p 3580 N93-30205
Fiber-optic polarimetric strain gauge p 3375 N93-30341
Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics [DE93-009827] p 3433 N93-30510
Topical meeting of broadband analog and digital optoelectronics [AD-A264643] p 3581 N93-30522

FIBER ORIENTATION
Aligned, short-fiber composites by novel flow processing methods [DE93-008701] p 3296 N93-28904
Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens [NASA-TM-106219] p 3449 N93-29073
Long discontinuous fiber composite structure: Forming and structural mechanics p 3301 N93-30437

FIBER STRENGTH
Studies of fiber-matrix adhesion on compression strength p 3304 N93-30846

FIBERS
Hydrodynamic interactions among fibers in high efficiency filters [DE93-007117] p 3424 N93-30035

FIELD ALIGNED CURRENTS
Laboratory simulation of field-aligned currents [NASA-CR-193091] p 3476 N93-28538

FIELD EFFECT TRANSISTORS

Optically controlled active impedance element particularly suited for a microwave oscillator
[AD-D015723] p 3408 N93-29281

Low temperature (LT) GaAs and related materials
[AD-A263607] p 3298 N93-29282

Acoustic charge transport technology investigation for advanced development transponder
p 3386 N93-29602

Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

Test structure to microcircuit correlation
[AD-A264157] p 3412 N93-30152

Analog CMOS circuits for neural networks
p 3355 N93-30223

Modelling of channel thickness modulation effect in SI GaAs MESFET's p 3356 N93-30229

Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

FIELD EMISSION

Improved field emitter current densities and stability through the application of a proprietary process
[AD-A263464] p 3411 N93-29833

Improved field emitter current densities and stability through the application of a proprietary process
[AD-A264048] p 3411 N93-30031

FIELD OF VIEW

Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight
[AD-A264661] p 3499 N93-30542

FIELD STRENGTH

Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595

ELF propagation highlights p 3395 N93-30730

VLF/LF propagation measurements
p 3395 N93-30732

Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734

FIELD THEORY (PHYSICS)

Applications of unitarity in the standard model
p 3416 N93-28613

Understanding conformal field theory through parafermions and Chern Simons theory
[DE93-010452] p 3604 N93-29806

Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841

Quantum field theory in spaces with closed time-like curves
[DE93-010564] p 3605 N93-30481

Approximation formulae for functional integrals in P(phi)2-quantum field theory
[DE93-606067] p 3605 N93-30781

Phase structure of three- and four-dimensional phi(exp 4) field theory
[DE93-606069] p 3605 N93-30782

A covariant form of the Maxwell's equations in four-dimensional spaces with an arbitrary signature
[DE93-606070] p 3605 N93-30783

On the photonic chiral anomaly in an external gravitational field
[DE93-606082] p 3479 N93-30785

Beyond two dimensions
[DE93-606084] p 3606 N93-30786

Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796

Modern approach to relativity theory (radar formulation)
[DE93-606032] p 3606 N93-30804

Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917

Compensating fields and anomalies in supergravity
[DE92-644724] p 3637 N93-30919

Quantum group generalization of the heterotic QFT
[DE92-644727] p 3607 N93-30920

Abelian gauge theories on homogeneous spaces
[DE92-644730] p 3607 N93-30921

Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924

Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644743] p 3557 N93-30926

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644744] p 3557 N93-30927

Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928

On one-dimensional topological and conformal field theories
[DE92-644726] p 3558 N93-30986

Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988

Superconformal structures and holomorphic 1/2-superdifferentials on N = 1 super Riemann surfaces
[DE93-604133] p 3558 N93-30989

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

FIGHTER AIRCRAFT

X-31 demonstration of integrated flight and propulsion control for effective combat at extreme angles of attack
p 3260 N93-28851

Planning for air to air combat p 3501 N93-28852

A new class of mission support for combat air-crew
p 3501 N93-28854

Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1
p 3502 N93-28857

The physiological limitations of man in the high G environment p 3503 N93-28861

Requirements for pilot assistance in a thrust-vectoring combat aircraft p 3504 N93-28870

Design considerations for a night, air-to-surface attack capability on a dual role fighter p 3251 N93-28871

FILAMENT WINDING

Comparison of hand laid-up tape and filament wound composite cylinders and panels with and without impact damage p 3306 N93-30859

FILAMENTS

Improved measurement of thermal effects on microstructure p 3292 N93-30959

FILES

Programmer's reference guide to FDMS file formats
[PB93-182038] p 3354 N93-29663

FILLERS

Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839

Welding wire pressure sensor assembly
[NASA-CASE-MFS-26216-1] p 3442 N93-28951

FILM BOILING

Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures
[PB93-178598] p 3475 N93-30887

FILM COOLING

Small hydrogen/oxygen rocket flowfield behavior from heat flux measurements
[NASA-TM-106233] p 3286 N93-28619

Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions
p 3253 N93-29933

The effect of main stream flow angle on flame tube film cooling p 3257 N93-29953

Impingement/effusion cooling p 3257 N93-29954

The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade
p 3258 N93-29958

On the development of a film cooling layer
p 3258 N93-29959

Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960

A Navier-Stokes solver with different turbulence models applied to film-cooled turbine cascades
p 3258 N93-29962

Cooling predictions in turbofan engine components
p 3259 N93-29964

Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling
[AD-A264174] p 3425 N93-30155

FILM THICKNESS

An analysis of the 70-meter antenna hydrostatic bearing by means of computer simulation p 3386 N93-29601

Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372

FILTERS

Hydrodynamic interactions among fibers in high efficiency filters
[DE93-007117] p 3424 N93-30035

FILTRATION

Evaluation and optimization of a flexible filtration system for respiratory protection system 21
[AD-A262467] p 3493 N93-28758

FINANCIAL MANAGEMENT

The program manager's notebook
[AD-A263074] p 3609 N93-29142

FINE STRUCTURE

Analyses of data from fine structure and circulation studies in the Gulf of California
[AD-A262910] p 3486 N93-28885

Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099

Shear, strain, and thermohaline vertical fine structure in the upper ocean p 3488 N93-30046

FINITE DIFFERENCE THEORY

High performance dispersion model PHYSIC
[DE93-753303] p 3467 N93-28536

Advanced insulations for refrigerator/freezers: The potential for new shell designs incorporating polymer barrier construction
[DE93-010600] p 3353 N93-28570

Balanced approximation can be optimal
[OUEL-1950/92] p 3548 N93-28754

Solar flare MDH
[AD-A262275] p 3652 N93-28756

Filtering interpolators for image comparison algorithms
p 3463 N93-28797

A simple parallel prefix algorithm for compact finite-difference schemes
[NASA-CR-191448] p 3525 N93-28976

Pre- and postprocessing techniques for determining goodness of computational meshes
[NASA-CR-192553] p 3538 N93-29030

International Journal of Numerical Modeling: Electronic Networks, Devices, and Fields, volume 5, number 3, August 1992
[AD-A263765] p 3387 N93-29877

Difference methods for hyperbolic problems with emphasis on space-centered approximations
[ONERA-NT-1990-4] p 3550 N93-30136

Errors when shock waves interact due to numerical shock width
[DE93-010699] p 3426 N93-30484

Rocket-triggered lightning studies for the protection of critical assets
[DE93-009633] p 3484 N93-30651

A numerical solution of the two-center problem
[DE92-644674] p 3551 N93-30913

Numerical wave propagation and steady-state solutions p 3428 N93-30999

FINITE ELEMENT METHOD

Upwind finite element schemes for solving the Maxwell equations
[INRIA-RR-1601] p 3546 N93-28509

Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556

Design of an essentially non-oscillatory reconstruction procedure in finite-element type meshes
[INRIA-RR-1584] p 3547 N93-28615

Small hydrogen/oxygen rocket flowfield behavior from heat flux measurements
[NASA-TM-106233] p 3286 N93-28619

Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641

Solar flare MDH
[AD-A262275] p 3652 N93-28756

Design and evaluation of a uniaxial pull test for lithium hydride/deuteride
[DE93-010760] p 3451 N93-28832

Analysis for thermo-chemical decomposition of composite structures
[NASA-CR-193185] p 3295 N93-28843

Pre- and postprocessing techniques for determining goodness of computational meshes
[NASA-CR-192553] p 3538 N93-29030

Stabilized space-time finite element formulations for unsteady incompressible flows involving fluid-body interactions p 3419 N93-29040

Axial impact of composites p 3297 N93-29078

Design optimization of space structures
p 3278 N93-29122

Nonlinear analyses of composite aerospace structures in sonic fatigue
[NASA-CR-193124] p 3451 N93-29154

Accuracy of least-squares methods for the Navier-Stokes equations
[NASA-TM-106209] p 3421 N93-29208

Quiet by design: Numerical acousto-elastic analysis of aircraft structures
[ISBN-90-386-0042-9] p 3248 N93-29268

Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291

An experimental/analytical evaluation of biaxial sheet failure
[DE93-010620] p 3453 N93-29843

Mechanical behaviour of a closed collar model for an 11.5 T dipole
[NIKHEF-H/92-03] p 3576 N93-30019

On high resolution extensions of Lagrange-Galerkin finite-element schemes
[INRIA-RR-1703] p 3550 N93-30117
Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis
[AD-A264221] p 3453 N93-30147
Containment of explosions in spherical vessels
[DE93-005445] p 3446 N93-30211
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels
[DE93-006206] p 3454 N93-30213
Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374
Finite element approximation of the shallow water equations on the MASPAR
[AD-A264649] p 3489 N93-30525
Structural design, analysis, and code evaluation of an odd-shaped pressure vessel
[DE93-008182] p 3447 N93-30632
Nonlinear explicit transient finite element analysis on the Intel Delta
[DE93-009561] p 3535 N93-30647
Delaminations in composite plates under impact loads p 3304 N93-30849
Design and analysis of grid stiffened concepts for aircraft composite primary structural applications p 3306 N93-30861
A comparison of classical mechanics models and finite element simulation of elastically tailored wing boxes p 3306 N93-30863
Multiple methods integration for structural mechanics analysis and design p 3307 N93-30867
Structural design using neural networks p 3545 N93-31029

FINITE VOLUME METHOD
Upwind finite element schemes for solving the Maxwell equations
[INRIA-RR-1601] p 3546 N93-28509
Pre- and postprocessing techniques for determining goodness of computational meshes
[NASA-CR-192553] p 3538 N93-29030
Ablation problems using a finite control volume technique
[DE93-009861] p 3549 N93-29187
Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948
On high resolution extensions of Lagrange-Galerkin finite-element schemes
[INRIA-RR-1703] p 3550 N93-30117

FINNED BODIES
Recent applications of CFD to the aerodynamics of Army projectiles
[AD-A262953] p 3240 N93-29512
The effect of orthogonal-mode rotation on forced convection in a circular-sectioned tube fitted with full circumferential transverse ribs p 3254 N93-29937

FINS
Articulated fin/wing control system
[AD-D015712] p 3259 N93-29278

FIR FILTERS
Realization of high speed adaptive FIR digital filters p 3355 N93-30222

FIRE CONTROL
Research and development of an airborne multispectral scanner to measure fire, terrestrial and atmospheric characteristics (50 channel)
[NASA-CR-193121] p 3456 N93-28620
Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing p 3501 N93-28853
Head-steered sensor flight test results and implications p 3502 N93-28859
Design considerations for a night, air-to-surface attack capability on a dual role fighter p 3251 N93-28871

FIRE PREVENTION
Risk-based spacecraft fire safety experiments p 3267 N93-28738

FIRES
Risk-based spacecraft fire safety experiments p 3267 N93-28738
Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967
Generation of carbon monoxide in compartment fires
[PB93-146702] p 3244 N93-29211
Programmer's reference guide to FDMS file formats
[PB93-182038] p 3354 N93-29663

FISCHER-TROPSCH PROCESS
Development of alternative fuels from coal-derived syngas
[DE93-011629] p 3341 N93-28668
Design of a high activity and selectivity alcohol catalyst
[DE93-012277] p 3309 N93-28750

FISSION
Studies of fluctuation processes in nuclear collisions
[DE93-011263] p 3576 N93-30054

FISSION PRODUCTS
Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR)
[DE93-753349] p 3576 N93-30006

FLAME PROBES
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means p 3319 N93-30081

FLAME PROPAGATION
Studies in premixed combustion
[DE93-007955] p 3310 N93-29051
Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079
Studies of curvature, strain, and unsteady effects on premixed flames p 3316 N93-30646
NOx chemistry in natural gas flames
[PB93-175263] p 3317 N93-30760
Effects of buoyancy on gas jet diffusion flames
[NASA-CR-191109] p 3352 N93-31031

FLAME SPECTROSCOPY
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means p 3319 N93-30081

FLAME TEMPERATURE
A novel flame thermometer based on the doppler width of ro-vibrational transitions
[AD-A264515] p 3315 N93-30405

FLAMES
Tomographic analysis of line-of-sight infrared spectra of low-pressure flames
[AD-A263185] p 3309 N93-28514
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means p 3319 N93-30081
NOx chemistry in natural gas flames
[PB93-175263] p 3317 N93-30760

FLANGES
Development of an O atom gun
[AD-A264753] p 3570 N93-30558

FLASH
Conspicuity of aids to navigation. Part 1: Temporal patterns for flashing lights
[AD-A264626] p 3499 N93-30426

FLASH LAMPS
High-voltage pulse generator capable of 2000 J at 10 kV
[AD-A262034] p 3407 N93-28999
ND laser with co-doped ion(s) pumped by visible laser diodes
[AD-D015711] p 3437 N93-29277

FLASHOVER
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method
[ONERA-P-1990-4] p 3335 N93-30024

FLAT PLATES
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929
Fundamental studies of impingement cooling thermal boundary conditions p 3254 N93-29940
Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960
Design and analysis of grid stiffened concepts for aircraft composite primary structural applications p 3306 N93-30861

FLEXIBILITY
Lightweight flexible composite tent materials
[AD-A263021] p 3295 N93-28660

FLEXIBLE BODIES
Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261
Vibration localization in rotating shafts p 3454 N93-30626

FLEXIBLE SPACECRAFT
Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700
Control-structures interaction test of the LACE satellite p 3263 N93-28706
CSI-Star: A low-cost CSI orbital testbed p 3263 N93-28707
Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079
Efficient reorientation of a deformable body in space: A free-free beam example p 3280 N93-29994
Robust boundary control of flexible structures governed by hybrid dynamics p 3285 N93-30249

FLIGHT ALTITUDE
A concluding study of the altitude determination deficiencies of the Service Aircraft Instrumentation Package (SAIP)
[AD-A263515] p 3250 N93-29971

FLIGHT CHARACTERISTICS
The flight performance of the Galileo orbiter USO p 3386 N93-29603
Project ARES 2: High-altitude battery-powered aircraft p 3227 N93-29715

FLIGHT CLOTHING
Goggles emergency release apparatus
[AD-D015685] p 3507 N93-29607
CATS EYES adjustment procedures
[AD-A264069] p 3508 N93-29924

FLIGHT CONDITIONS
An automated observing system for passive evaluation of cloud cover and visibility
[AD-A263207] p 3481 N93-28875

FLIGHT CONTROL
Advanced Transport Operating System (ATOPS) Flight Management/Flight Controls (FM/FC) software description
[NASA-CR-191457] p 3250 N93-28621
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
X-31 demonstration of integrated flight and propulsion control for effective combat at extreme angles of attack p 3260 N93-28851
Virtual interface applications for airborne weapons systems p 3502 N93-28858
Head-steered sensor flight test results and implications p 3502 N93-28859
Overview of cockpit technology research and development programs for improvement of the man/machine interface: Review of the AGARD AVP Symposium held in Madrid, May 1992 p 3505 N93-28872
A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle
[AD-A262477] p 3248 N93-29409
Reference equations of motion for automatic rendezvous and capture
[NASA-CR-185676] p 3269 N93-29652
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information
[AD-A263874] p 3507 N93-29888
Handedness and motor programming effects of manual control and movement
[AD-A264022] p 3499 N93-30027
Virtual reality flight control display with six-degree-of-freedom controller and spherical orientation overlay
[NASA-CASE-NPO-18733-1-CU] p 3251 N93-30416
Analytical foundations of gain scheduling
[AD-A264682] p 3260 N93-30550
Flight control system design factors for applying automated testing techniques
[NASA-TM-4242] p 3260 N93-30764

FLIGHT CREWS
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 2: Evaluation of modeling and simulation techniques for predicting radiation induced performance decrements
[AD-A262872] p 3506 N93-29484
Field test of a computer-driven tool to measure psychological characteristics of aircrew
[AD-A264484] p 3499 N93-30425
Part 1: Executive summary p 3236 N93-30674
Helicopter simulation: An aircrew training and qualification perspective p 3236 N93-30676

FLIGHT INSTRUMENTS
Optical technologies for UV remote sensing instruments p 3582 N93-28788
Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy p 3648 N93-28812
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855

FLIGHT MANAGEMENT SYSTEMS
Advanced Transport Operating System (ATOPS) Flight Management/Flight Controls (FM/FC) software description
[NASA-CR-191457] p 3250 N93-28621

FLIGHT MECHANICS
Flight mechanical model for performance calculations and interactions between flight vehicle and ramjet in regard to the flight orbit
[ESA-TT-1267] p 3248 N93-29464

FLIGHT PATHS
Minimum Hamiltonian ascent trajectory evaluation (MASTRE) program (update to automatic flight trajectory design, performance prediction, and vehicle sizing for support of shuttle and shuttle derived vehicles) users manual
[NASA-CR-192556] p 3269 N93-28558

Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1 p 3502 N93-28857
Flight mechanical model for performance calculations and interactions between flight vehicle and ramjet in regard to the flight orbit
[ESA-TT-1267] p 3248 N93-29464
Two simulation studies of precision runway monitoring of independent approaches to closely spaced parallel runways
[AD-A263433] p 3261 N93-29815

FLIGHT PLANS
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
Application and integration of diverse technology in an aviation system: The National Aeronautical Information Processing System p 3247 N93-30339

FLIGHT SAFETY
FAA international conference on airplane ground deicing
[AD-A263617] p 3244 N93-29286

FLIGHT SIMULATION
Virtual interface applications for airborne weapons systems p 3502 N93-28858
Requirements for pilot assistance in a thrust-vectoring combat aircraft p 3504 N93-28870
A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle
[AD-A262477] p 3248 N93-29409
A fuzzy logic optimal control law solution to the CMMCA tracking problem
[AD-A262555] p 3542 N93-29420
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 2: Evaluation of modeling and simulation techniques for predicting radiation induced performance decrements
[AD-A262872] p 3506 N93-29484
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information
[AD-A263874] p 3507 N93-29888
Three-dimensional graphical representation of objects according to movement data in realtime
[ESA-TT-1258] p 3521 N93-30104
Virtual reality flight control display with six-degree-of-freedom controller and spherical orientation overlay
[NASA-CASE-NPO-18733-1-CU] p 3251 N93-30416
Helicopter simulation: An aircrew training and qualification perspective p 3236 N93-30676
Simulators for corporate pilot training and evaluation p 3236 N93-30678
Training effectiveness assessment: Where are we? p 3236 N93-30679
Current training: Where are we? p 3236 N93-30680
Helicopter simulator qualification p 3237 N93-30681
Helicopter simulation: Making it work p 3237 N93-30682
Helicopter training simulators: Key market factors p 3237 N93-30683
Validation and upgrading of physically based mathematical models p 3237 N93-30688
Frequency-response techniques for documentation and improvement of rotorcraft simulators p 3237 N93-30689
Bandwidth and SIMDUCE as simulator fidelity criteria p 3238 N93-30690
Methodology development for evaluation of selective-fidelity rotorcraft simulation p 3238 N93-30691

FLIGHT SIMULATORS
Rendering the out-the-window view for the AFIT virtual cockpit
[AD-A262599] p 3260 N93-28467
Toward reusable graphics components in Ada
[AD-A262568] p 3524 N93-28577
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
Utility of a ghost horizon and climb/dive ladder line tapering on a head-up display
[AD-A264401] p 3508 N93-30167
Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight
[AD-A264661] p 3499 N93-30542
Part 1: Executive summary p 3236 N93-30674
Helicopter simulator standards p 3236 N93-30675
Simulators for corporate pilot training and evaluation p 3236 N93-30678
Training effectiveness assessment: Where are we? p 3236 N93-30679
Current training: Where are we? p 3236 N93-30680
Helicopter simulator qualification p 3237 N93-30681
Helicopter simulation: Making it work p 3237 N93-30682
Training effectiveness assessment: Methodological problems and issues p 3237 N93-30684
Determining the transferability of flight simulator data p 3237 N93-30685
Progress through precedent: Going where no helicopter simulator has gone before p 3237 N93-30686
Transfer of training and simulator qualification or myth and folklore in helicopter simulation p 3237 N93-30687
Frequency-response techniques for documentation and improvement of rotorcraft simulators p 3237 N93-30689
Bandwidth and SIMDUCE as simulator fidelity criteria p 3238 N93-30690
Methodology development for evaluation of selective-fidelity rotorcraft simulation p 3238 N93-30691

FLIGHT TESTS
X-31 demonstration of integrated flight and propulsion control for effective combat at extreme angles of attack p 3260 N93-28851
Head-steered sensor flight test results and implications p 3502 N93-28859
Flight evaluation of a computer aided low-altitude helicopter flight guidance system p 3260 N93-28869
Helicopter approach capability using the differential global positioning system
[NASA-CR-193183] p 3245 N93-28936
Design study to simulate the development of a commercial transportation system p 3228 N93-29718
A concluding study of the altitude determination deficiencies of the Service Aircraft Instrumentation Package (SAIP)
[AD-A263515] p 3250 N93-29971
Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique
[PB93-180255] p 3242 N93-30387
Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique
[PB93-180263] p 3242 N93-30388
Postflight hardware evaluation 360T025 (RSRM-25, STS-46)
[NASA-CR-192562] p 3272 N93-30617
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix C: Nozzle PFORs
[NASA-CR-192565] p 3272 N93-30620
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix D: Nozzle postfire data
[NASA-CR-192580] p 3289 N93-30648
Determining the transferability of flight simulator data p 3237 N93-30685

FLIR DETECTORS
The design and development of the new RAF standard HUD format p 3502 N93-28856
Head-steered sensor flight test results and implications p 3502 N93-28859
Design considerations for a night, air-to-surface attack capability on a dual role fighter p 3251 N93-28871

FLOODS
Spatial Analysis and Modeling Systems (SAMS) p 3614 N93-29239

FLOW CHARACTERISTICS
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065
Flow phenomena in turbomachines
[AD-A263049] p 3420 N93-29141
Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer
[DE93-010741] p 3421 N93-29253
Cooling geometry optimization using liquid crystal technique p 3254 N93-29939
Flow and heat transfer between gas-turbine discs p 3256 N93-29950
Three-dimensional fiber-optic LDV measurements in the endwall region of a linear cascade of controlled-diffusion stator blades
[AD-A263513] p 3424 N93-29968
Laboratory studies of gravity wave/mean flow interactions
[AD-A264226] p 3478 N93-30174
Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique
[PB93-180255] p 3242 N93-30387
Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique
[PB93-180263] p 3242 N93-30388

FLOW COEFFICIENTS
Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures
[PB93-178598] p 3475 N93-30887

FLOW DISTORTION
Moment approach to fast ion neoclassical transport and viscous forces
[DE93-753305] p 3585 N93-28979
Methods for reducing turbulent flow aero-optical distortion
[AD-A263698] p 3423 N93-29353

FLOW DISTRIBUTION
Navier-Stokes analysis of radial turbine rotor performance
[NASA-CR-191153] p 3251 N93-28609
Small hydrogen/oxygen rocket flowfield behavior from heat flux measurements
[NASA-TM-106233] p 3286 N93-28619
Preliminary design of an intermittent smoke flow visualization system
[NASA-CR-186027] p 3248 N93-28693
Stabilized space-time finite element formulations for unsteady incompressible flows involving fluid-body interactions p 3419 N93-29040
Studies in premixed combustion
[DE93-007955] p 3310 N93-29051
Three-dimensional numerical simulation of gradual opening in a wave rotor passage
[NASA-CR-191157] p 3252 N93-29072
An experimental study of flow over a 6 to 1 prolate spheroid at incidence p 3239 N93-29124
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-193241] p 3421 N93-29213
Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer
[DE93-010741] p 3421 N93-29253
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929
Fluid flow and heat transfer in the entrance region of an annulus between independently rotating tubes with a turbulent axial flow p 3256 N93-29952
The effect of main stream flow angle on flame tube film cooling p 3257 N93-29953
The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade p 3258 N93-29958
On the development of a film cooling layer p 3258 N93-29959
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375
Two-dimensional and three-dimensional time-dependent MHD model of extended corona p 3653 N93-30496
Computation of a delta-wing roll-and-hold maneuver
[AD-A264704] p 3260 N93-30498
Strong parallel blade-vortex interaction and noise propagation in helicopter flight p 3563 N93-30980

FLOW EQUATIONS
Preliminary experimental results for a cryogenic brush seal configuration
[NASA-TM-106236] p 3416 N93-28627

FLOW GEOMETRY
An efficient spectral integration method for the solution of the Navier-Stokes equations
[FFA-TN-1992-28] p 3418 N93-29009

FLOW MEASUREMENT
Limitations of the ideal phase-Doppler system: Extension to spatially and temporally inhomogeneous particle flows with an application to diesel sprays
[DE93-009447] p 3416 N93-28595
Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
Compressible turbulence in a high-speed high Reynolds number mixing layer p 3242 N93-30583

FLOW STABILITY
Theory of tokamak edge turbulence: Drift-thermal instability-induced turbulence and ionization-driven drift wave turbulence p 3586 N93-29123
Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer
[DE93-010741] p 3421 N93-29253
Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326
Vertical slot convection: A linear study
[DE93-007643] p 3423 N93-29804

FLOW THEORY
Interfacial melting in cracked explosives p 3349 N93-30089

FLOW VELOCITY
A four-field approach towards developing a mechanistic model for multiphase flow [DE93-006572] p 3420 N93-29126
Gravity sensitivity of a resistojet water vaporizer [NASA-TM-106220] p 3288 N93-29194
Velocity measurements of low Reynolds number tube flow using fiber-optic technology [DE93-009865] p 3422 N93-29335
Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load [AD-A263496] p 3422 N93-29338
An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels p 3255 N93-29942
Modelling the dynamics of a large sea area [DE93-778330] p 3488 N93-30040
Fiber optic chemical sensors for characterizing the carbon cycle in ocean margin regions [DE93-011442] p 3489 N93-30056
Turbulence characteristics of an axisymmetric reacting flow [NASA-CR-4110] p 3242 N93-30373

FLOW VISUALIZATION
Preliminary design of an intermittent smoke flow visualization system [NASA-CR-186027] p 3248 N93-28693
Flow visualization on helicopter blades using acenaphthen [ESA-TT-1255] p 3422 N93-29273
Shear sensitive monomer-polymer laminate structure and method of using same [NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929
The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade p 3258 N93-29958
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A264341] p 3425 N93-30162
Contribution to the study of the interaction between acoustic waves and coherent structures induced by a prismatic cylinder in a rectangular cavity [ONERA-NT-1990-10] p 3314 N93-30203

FLUENCE
Neutron radiation induced degradation of diode characteristics [AD-A263277] p 3405 N93-28563

FLUID DYNAMICS
The MODE family of facility class experiments p 3263 N93-28705
Liquid Motion in a rotating tank Experiment (LME) p 3264 N93-28710
JPRS report: Science and technology. Central Eurasia: Engineering and equipment [JPRS-UEQ-93-004] p 3354 N93-29090
Generation of carbon monoxide in compartment fires [PB93-146702] p 3244 N93-29211
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle [AD-A262753] p 3477 N93-29405
Weakly nonlinear dynamics of near-CJ detonation waves [DE93-007344] p 3424 N93-29836
Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes [AD-A263469] p 3424 N93-29838
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions p 3253 N93-29934
The middeck 0-gravity dynamics experiment [NASA-CR-4500] p 3281 N93-30376

FLUID FILMS
Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling [AD-A263495] p 3423 N93-29352
Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling [AD-A264174] p 3425 N93-30155

FLUID FLOW
A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method [DE92-018262] p 3417 N93-28639
Studies of complexity in fluid systems [DE93-010776] p 3418 N93-28878
A four-field approach towards developing a mechanistic model for multiphase flow [DE93-006572] p 3420 N93-29126
Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer [DE93-010741] p 3421 N93-29253
Kinetics and energy transfer in nonequilibrium fluid flows [AD-A263612] p 3240 N93-29284
Velocity measurements of low Reynolds number tube flow using fiber-optic technology [DE93-009865] p 3422 N93-29335
Rotational fluid flow experiment p 3235 N93-29761
Vertical slot convection: A linear study [DE93-007643] p 3423 N93-29804
Fluid flow and heat transfer in the entrance region of an annulus between independently rotating tubes with a turbulent axial flow p 3256 N93-29952
Siphon breaker design requirements [DE93-011799] p 3425 N93-30132
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry [DE93-011734] p 3427 N93-30489

FLUID INJECTION
Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960
A Navier-Stokes solver with different turbulence models applied to film-cooled turbine cascades p 3258 N93-29962

FLUID JETS
The hydraulic analysis of cylindrical Flibe jets in a HYLIFE-2 ICF reactor [DE93-009234] p 3586 N93-29053

FLUID MANAGEMENT
Vented Tank Resupply Experiment (VTRE) for In-Space Technology Experiment Program (IN-STEP) p 3264 N93-28711
Tank Pressure Control Experiment (TPCE) p 3264 N93-28712

FLUID MECHANICS
Estimation of droplet collision frequency in a spray [DE93-007991] p 3416 N93-28566
A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method [DE92-018262] p 3417 N93-28639
Godunov-type schemes applied to detonation flows [NASA-CR-191447] p 3509 N93-28841
Methods for reducing turbulent flow aero-optical distortion [AD-A263698] p 3423 N93-29353
ICASE [NASA-CR-193257] p 3520 N93-29864
Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller [AD-A264057] p 3241 N93-29891

FLUID PRESSURE
Tank Pressure Control Experiment (TPCE) p 3264 N93-28712

FLUID-SOLID INTERACTIONS
The middeck 0-gravity dynamics experiment [NASA-CR-4500] p 3281 N93-30376

FLUIDS
Program for an improved hypersonic temperature-sensing probe [NASA-CR-186025] p 3431 N93-29066

FLUORIDES
Polyimides prepared from 3,5-diamino benzo trifluoride [NASA-CASE-LAR-14206-1] p 3331 N93-29083

FLUORINE ISOTOPES
Synthesis of new high performance lubricants and solid lubricants [DE93-012237] p 3330 N93-28748

FLUORINE ORGANIC COMPOUNDS
Synthesis of new high performance lubricants and solid lubricants [DE93-012237] p 3330 N93-28748
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene [NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506

FLUOROCARBONS
Synthesis of new high performance lubricants and solid lubricants [DE93-012237] p 3330 N93-28748

FLUX (RATE)
A new flux conserving Newton's method scheme for the two-dimensional, steady Navier-Stokes equations [NASA-TM-106160] p 3416 N93-28626
Utilization of NOAA/AVHRR data for energy balance of Lake Constance (Switzerland) p 3458 N93-28926
Radiation model predictions and validation using LDEF satellite data p 3573 N93-29641

FLUX DENSITY
Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays [DE93-008713] p 3593 N93-29094
Evaluation of multi-dimensional flux models for radiative transfer in cylindrical combustion chambers p 3257 N93-29955
Topics in inflationary universe medels and cosmic string theories p 3637 N93-30579
Fluids in porous media. [PB93-175198] p 3428 N93-30759

FLUX QUANTIZATION
Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355

FLUX VECTOR SPLITTING
Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions p 3421 N93-29177

FLY BY WIRE CONTROL
Project ARES 2: High-altitude battery-powered aircraft p 3227 N93-29715

FLYBY MISSIONS
Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770
Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779
Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781
Visible imaging on the Pluto fast flyby mission p 3646 N93-28799
Systematic processing of Clementine data for scientific analyses p 3624 N93-28803
Pluto fast flyby mission and science overview p 3649 N93-28818
Double swingby at Earth-Moon for increase of excess velocity [ETN-93-94177] p 3270 N93-30582

FLYING PLATFORMS
Hybrid data link [AD-D015714] p 3383 N93-29280

FOAMS
Acid solution absorption of extruded polyethylene foam [DE93-011701] p 3330 N93-28839
Thermal properties of organic and modified inorganic aerogels [DE93-009230] p 3311 N93-29263

FOCAL PLANE DEVICES
Polarization experiments with hadronic and electromagnetic probes [DE93-011375] p 3392 N93-30126
Development of ultra-low noise, high sensitivity planar metal grating coupled 3-5 multiquantum well infrared detectors for focal plane array staring IR sensor systems [AD-A264465] p 3599 N93-30536

FOCUSING
New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

FOG
Fog studies in the Alpine region with digital NOAA/AVHRR data p 3458 N93-28925

FOILS (MATERIALS)
Micrometeoroids and debris on LDEF p 3638 N93-29356
SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2 p 3318 N93-29367

FOKKER-PLANCK EQUATION
A Fokker-Planck operator for the emission and absorption of electron plasma waves in a magnetized plasma [DE93-009579] p 3584 N93-28598
An information theoretic approach to stochastic adaptive control application to manipulators with active inertia p 3359 N93-30247

FOLDING STRUCTURES
Optimal geometric design of robots for environments with obstacles p 3445 N93-30149

FOLIAGE
Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase [DE93-010081] p 3467 N93-28543

FORCE-FREE MAGNETIC FIELDS
A study of the physical mechanisms for filament eruption and coronal mass ejection via numerical simulation [NASA-CR-193180] p 3653 N93-28935

FORCED CONVECTION
Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module [DE93-007609] p 3405 N93-28641
The effect of orthogonal-mode rotation on forced convection in a circular-sectioned tube fitted with full circumferential transverse ribs p 3254 N93-29937
Turbulent flow and heat transfer in idealized blade cooling passages p 3254 N93-29938
Performance of thermal adhesives in forced convection p 3293 N93-30974

FOREARM
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261
Prosthetic elbow joint [NASA-CASE-MFS-28707-1] p 3508 N93-30566

FOREBODIES
Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack
[AD-A263905] p 3240 N93-29862
FORECASTING
Using a neural network to estimate solvent consumption
[PB93-173110] p 3467 N93-28873
Fuzzy forecasting and decision making in short dynamic time series p 3513 N93-29541
FOREST MANAGEMENT
The MAESTRO-1 campaign: Analyses of polarimetric SAR data of agricultural fields and forests
[BCRS-92-06] p 3460 N93-29320
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681
FORESTS
Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase
[DE93-010081] p 3467 N93-28543
Recording of forest surface in SAR-images with statistical methods in areas of pronounced relief
p 3457 N93-28920
Forest examination with polarimetric radar image data
p 3457 N93-28921
Atmospheric correction of LANDSAT-TM-data for forest inventory p 3459 N93-28929
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681
Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830
FORMALDEHYDE
Distribution of C1-C2 aldehydes in the free troposphere
[JUEL-2650] p 3475 N93-28475
FORMALISM
Non-scalar uncertainty: Uncertainty in dynamic systems p 3517 N93-29565
FORMING TECHNIQUES
Long discontinuous fiber composite structure: Forming and structural mechanics p 3301 N93-30437
Consolidation of graphite thermoplastic textile preforms for primary aircraft structure p 3302 N93-30439
Near net shape processing: A necessity for advanced materials applications p 3290 N93-30949
Thermoforming from a systems viewpoint
p 3293 N93-30967
FORTRAN
Installation of a new Fortran compiler and effective programming method on the vector supercomputer
[DE93-753322] p 3524 N93-28537
RTE: A UNIX library with on-line documentation and sample programs for microwave radiative transfer calculations
[PB93-180248] p 3386 N93-29680
FORWARD SCATTERING
Diffraction and holography with photoelectrons and Auger electrons: Some new directions
[DE93-007664] p 3313 N93-29766
Measurements of light scattering by small particles at an angle of zero degrees
[AD-A263856] p 3580 N93-29887
FOUNDRIES
Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961
FOUR BODY PROBLEM
Algorithm of numerical calculations of differential Yakubovsky equations for the (1 + 3) scattering problem
[DE92-644679] p 3535 N93-30915
FOURIER TRANSFORMATION
Tomographic analysis of line-of-sight infrared spectra of low-pressure flames
[AD-A263185] p 3309 N93-28514
Wavelet transform techniques and signal analysis
[DE93-007919] p 3382 N93-29244
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
The use of DFT windows in signal-to-noise ratio and harmonic distortion computations
[DE93-009800] p 3433 N93-30655
Application of the Fourier transform to short antennas
p 3398 N93-30750
FRACTALS
Multifractal analysis of radio lobes
p 3380 N93-28689
FRACTURE MECHANICS
The growth of small corrosion fatigue cracks in alloy 2024
[NASA-TM-107755] p 3451 N93-29069
Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments
[DE93-009202] p 3323 N93-29102
Mechanisms of fracture and creep of structural alloys
[AD-A263108] p 3324 N93-29799
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829
Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863
Dislocation roles in energetic crystal responses
p 3348 N93-30086
Damage growth in composite propellants
p 3348 N93-30088
Interfacial melting in cracked explosives
p 3349 N93-30089
DOE fundamentals handbook: Material science
[DE93-012225] p 3314 N93-30200
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels
[DE93-006206] p 3454 N93-30213
A ceramic fracture model for high velocity impact
[AD-A264728] p 3454 N93-30545
Evaluation of some scale effects in the response and failure of composite beams p 3308 N93-30874
Fracture of glass p 3293 N93-30969
FRACTURE STRENGTH
Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076
Materials characterization of cermet anodes tested in a pilot cell
[DE93-008924] p 3323 N93-29101
Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144
Improved silicon nitride for advanced heat engines
[NASA-CR-182193] p 3298 N93-29451
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829
Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials
p 3303 N93-30845
Studies of fiber-matrix adhesion on compression strength p 3304 N93-30846
A miniature fatigue test machine p 3291 N93-30956
FRACTURES (MATERIALS)
Environmental embrittlement of binary and Zr-doped Ni3Al
[DE93-008575] p 3321 N93-28679
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels
[DE93-006206] p 3454 N93-30213
FRACTURING
Transformation plasticity in ductile solids
[DE93-008636] p 3321 N93-28902
Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076
Mechanisms of fracture and creep of structural alloys
[AD-A263108] p 3324 N93-29799
Three-dimensional elastic stress analysis in materials with many inhomogeneities
[AD-A263736] p 3453 N93-29855
A ceramic fracture model for high velocity impact
[AD-A264728] p 3454 N93-30545
Fracture of glass p 3293 N93-30969
FRAGMENTATION
Catastrophic collisions: Laboratory impact experiments, hydrocode simulations, and the scaling problem
p 3635 N93-30411
FRAGMENTS
Amino acid sequences for the binding regions in serum albumin proteins
[NASA-CASE-MFS-28402-1] p 3491 N93-28952
FRAMES
Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357
FRAMING CAMERAS
A new multichannel soft x ray framing camera for fusion experiments
[DE93-009302] p 3432 N93-29773
FRANCE
Propulsion and detonics research in France
p 3344 N93-30070
FRAUNHOFER LINES
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
FREE BOUNDARIES
Planar reorientation of a free-free beam in space using embedded electromechanical actuators
p 3280 N93-29993
FREE CONVECTION
Analytical and experimental study of laminar free convective heat transfer from isothermal convex bodies of arbitrary shape
[ISBN-0-315-72512-5] p 3426 N93-30379
Performance of thermal adhesives in forced convection p 3293 N93-30974
FREE ELECTRON LASERS
Ultraviolet free electron laser facility preliminary design report
[DE93-009360] p 3435 N93-28594
A technique for single-pulse spectrum and pulse width measurements for an IR-FEL
[DE93-007732] p 3436 N93-28847
High resolution free-electron laser spectroscopy
[AD-A263734] p 3439 N93-29853
Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method
[AD-A263997] p 3439 N93-29867
Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator
[DE93-010461] p 3575 N93-29870
Nonlinear mode coupling in free electron lasers
[AD-A263999] p 3439 N93-29883
Experimental test of hole-coupled FEL resonator designs using a CW-HeNe laser
[DE93-010439] p 3440 N93-30530
FREE ENERGY
Transformation toughening
[DE93-011805] p 3321 N93-28631
A one-dimensional continuum model for shape-memory alloys
[AD-A262505] p 3321 N93-28656
Phase separation, antiferromagnetism, and superconductivity in superconducting-superoxygenated La(2-x)Sr(x)CuO(4+(delta))
[DE93-009852] p 3598 N93-30517
Effective interactions between concentration fluctuations and charge transfer in chemically ordering liquid alloys
[DE93-606724] p 3327 N93-30778
FREE FLOW
Heat transfer with moderate free stream turbulence
p 3254 N93-29936
FREE RADICALS
Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652
Rate constant determinations of reactions H + HNO from ab initio reaction path calculations
p 3319 N93-30099
FREE-PISTON ENGINES
Small Stirling dynamic isotope power system for robotic space missions
[NASA-TM-105785] p 3287 N93-28686
FREEZE DRYING
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A263240] p 3494 N93-29620
FREEZING
Advanced insulations for refrigerator/freezers: The potential for new shell designs incorporating polymer barrier construction
[DE93-010600] p 3353 N93-28570
Effects of freeze/thaw cycles on hydrostatically conditioned E-glass/J-2 composite
[AD-A262980] p 3298 N93-29425
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103
FREQUENCIES
The flight performance of the Galileo orbiter USO
p 3386 N93-29603
FREQUENCY CONTROL
Two-stage Doppler phasor corrected TCM/DMPSK for shadowed mobile satellite channels
p 3373 N93-30333
FREQUENCY CONVERTERS
Charge to frequency converter for ionization chambers belonging to the radiation protection system of AmPS/MEA
[DIGEL-1991-6] p 3577 N93-30837
FREQUENCY DISTRIBUTION
System overview on electromagnetic compensation for reflector antenna surface distortion
[NASA-TM-106217] p 3273 N93-29195

FREQUENCY DIVIDERS
High-speed, CMOS dual modulus frequency divider for RF frequency synthesis p 3359 N93-30245
FREQUENCY DIVISION MULTIPLE ACCESS
Comparison of multiple access techniques for bandwidth limited land-mobile satellite communications p 3370 N93-30314
FREQUENCY HOPPING
Widebanding techniques for VHF antennas 2 [AD-A263998] p 3387 N93-29882
Comparison of diversity combining, interleaving, and decoding techniques of a scintillated channel p 3362 N93-30266
Coarse synchronization in an EHF frequency-hopped satellite communications system p 3365 N93-30281
Coding for frequency hopped spread spectrum satellite communications p 3365 N93-30283
Temporal synchronization of frequency hopped DPSK p 3365 N93-30285
Performance of frequency hopped M-ary FSK in Rayleigh fading and partial-band jamming p 3368 N93-30303
FREQUENCY MEASUREMENT
Constant frequency pulsed phase-locked loop measuring device [NASA-CASE-LAR-13823-1] p 3431 N93-29084
FREQUENCY MODULATION
Laser radiation detection system [AD-D015724] p 3438 N93-29287
Theoretical bit error rate performance of the Kalman filter excisor for FM interference [AD-A263018] p 3383 N93-29407
FREQUENCY MULTIPLIERS
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter [AD-D015710] p 3437 N93-29276
FREQUENCY RANGES
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740
Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753
FREQUENCY RESPONSE
Frequency-response techniques for documentation and improvement of rotorcraft simulators p 3237 N93-30689
FREQUENCY SHIFT
Study of gain in C-band deflection cavities for a frequency-doubling magnicon amplifier [AD-A263132] p 3409 N93-29478
FREQUENCY SHIFT KEYING
Comparison of diversity combining, interleaving, and decoding techniques of a scintillated channel p 3362 N93-30266
Coding for frequency hopped spread spectrum satellite communications p 3365 N93-30283
Performance of frequency hopped M-ary FSK in Rayleigh fading and partial-band jamming p 3368 N93-30303
A dynamic bandwidth and phase linearity measurement technique for 4-channel MSK VLF antenna systems p 3398 N93-30748
FREQUENCY STABILITY
The flight performance of the Galileo orbiter USO p 3386 N93-29603
Improved field emitter current densities and stability through the application of a proprietary process [AD-A264048] p 3411 N93-30031
FREQUENCY STANDARDS
An improved linear ion trap physics package p 3384 N93-29587
Physics laboratory technical activities, 1992 [PB93-178648] p 3561 N93-30888
FREQUENCY SYNTHESIZERS
Advanced technologies for lightweight EHF tactical communications satellites p 3389 N93-29900
High-speed, CMOS dual modulus frequency divider for RF frequency synthesis p 3359 N93-30245
FRICTION
Fundamental studies of friction, lubrication, and wear by atomic force microscopy [AD-A264647] p 3446 N93-30524
Tribology: Friction, lubrication, and wear technology p 3292 N93-30965
Walkway friction: Experiment and analysis p 3293 N93-30966
FRICTION FACTOR
Dense inclined flows: Theory and experiments [DE93-011452] p 3417 N93-28630
Direct tension experiments on compacted granular materials p 3292 N93-30960
FRICTION REDUCTION
Effect of metallic-coating properties on the tribology of coated and oil-lubricated ceramics [DE93-010663] p 3330 N93-28666
FROST
Mathematical model of frost heave and thaw settlement in pavements [CRREL-REPT-93-2] p 3262 N93-30103
FUEL CELLS
Benchmark eigenvalue spectrum calculations with anisotropic effects [DE93-006387] p 3548 N93-28891
Polymer electrolyte fuel cells for transportation applications [DE93-008721] p 3464 N93-29147
Electrical relaxation in acid-form nafion [AD-A263558] p 3410 N93-29826
The electrolyte factor in O2 reduction electrocatalysis [AD-A263565] p 3313 N93-29828
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion [DE93-010662] p 3464 N93-29844
Power generation and transportation systems research department [PB93-178309] p 3352 N93-30663
FUEL COMBUSTION
Generation of carbon monoxide in compartment fires [PB93-146702] p 3244 N93-29211
High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures [AD-A263611] p 3311 N93-29283
Kinetic studies on gas-phase reaction mechanisms important to the combustion of energetic materials: The CO/N2O reaction p 3347 N93-30084
FUEL CONTAMINATION
Performance and cost evaluation of bioremediation techniques for fuel spills [PB93-175545] p 3474 N93-30762
FUEL INJECTION
Liquid fuel injection elements for rocket engines [NASA-CASE-MFS-28547-1] p 3289 N93-29847
FUEL PRODUCTION
A novel process for methanol synthesis [DE93-013070] p 3314 N93-30188
FUEL SPRAYS
Estimation of droplet collision frequency in a spray [DE93-007991] p 3416 N93-28566
Limitations of the ideal phase-Doppler system: Extension to spatially and temporally inhomogeneous particle flows with an application to diesel sprays [DE93-009447] p 3416 N93-28595
Modeling the effects of drop drag and breakup on fuel sprays [AD-A263650] p 3445 N93-29388
FUEL TANKS
APU diaphragm testing [NASA-TM-108254] p 3272 N93-29501
FUEL TESTS
Development of alternative fuels from coal-derived syngas [DE93-011629] p 3341 N93-28668
FUEL-AIR RATIO
Turbulence characteristics of an axisymmetric reacting flow [NASA-CR-4110] p 3242 N93-30373
FUELS
Tank issues: Design and placement of floating liquid monitoring wells [PB93-161149] p 3469 N93-29033
FULL SCALE TESTS
Modal survey of a full-scale F-18 wind tunnel model [AD-A262482] p 3240 N93-29410
FULLERENES
Theory of normal and superconducting properties of fullerene-based solids [DE93-007722] p 3592 N93-28582
Ambient-atmosphere compatible superconducting fullerenes [AD-A262025] p 3595 N93-29397
A tight binding model for the electronic structure of FCC and SC C60 [DE93-606214] p 3601 N93-30794
FUNCTION SPACE
On the energy-momentum tensors for field theories in spaces with affine connection and metric [DE92-644743] p 3557 N93-30926
Equivariant elliptic homology [DE92-641338] p 3557 N93-30981
FUNCTIONAL INTEGRATION
The quest for an integrated flying helmet p 3502 N93-28860
FUNCTIONALLY GRADIENT MATERIALS
A transient FGM interlayer based approach to joining ceramics [DE93-010415] p 3331 N93-29248
FUNCTIONALS
Hierarchical model of matching p 3519 N93-29580
Approximation formulae for functional integrals in P(phi)2-quantum field theory [DE93-606067] p 3605 N93-30781
FUSELAGES
Quiet by design: Numerical acousto-elastic analysis of aircraft structures [ISBN-90-386-0042-9] p 3248 N93-29268
Advanced technology commercial fuselage structure p 3300 N93-30432
Design and manufacturing concepts for thermoplastic structures p 3301 N93-30434
Structural evaluation of curved stiffened composite panels fabricated using a THERM-Xsm process p 3301 N93-30435
Noise transmission properties and control strategies for composite structures p 3301 N93-30436
Cost studies for commercial fuselage crown designs p 3302 N93-30440
Fabrication of the V-22 composite AFT fuselage using automated fiber placement p 3302 N93-30443
Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials p 3303 N93-30845
Mechanical and analytical screening of braided composites for transport fuselage applications p 3305 N93-30855
Developments in impact damage modeling for laminated composite structures p 3305 N93-30857
Multi-parameter optimization tool for low-cost commercial fuselage crown designs p 3305 N93-30858
Design and analysis of grid stiffened concepts for aircraft composite primary structural applications p 3306 N93-30861
Advanced fiber placement of composite fuselage structures p 3306 N93-30864
Process and assembly plans for low cost commercial fuselage structure p 3306 N93-30865
FUSES (ORDNANCE)
Analysis of an MCG/fuse/PFS experiment [DE93-007355] p 3410 N93-29812
FUSION REACTORS
Fast neutron cross section measurements [DE93-009053] p 3563 N93-28546
A study on radiation shielding analysis for toroidal field coils of a tokamak-type fusion reactor [DE93-753398] p 3585 N93-28981
The hydraulic analysis of cylindrical Flibe jets in a HYLIFE-2 ICF reactor [DE93-009234] p 3586 N93-29053
SIRIUS-P: An inertially confined direct drive laser fusion power reactor [DE93-012433] p 3439 N93-30186
Preliminary design study of a steady state tokamak device [DE93-764162] p 3589 N93-30397
FUZZY SETS
Soft computing in design and manufacturing of advanced materials [NASA-TM-106032] p 3295 N93-28624
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 1 [NASA-CP-10112-VOL-1] p 3509 N93-29516
An analysis of possible applications of fuzzy set theory to the actuarial credibility theory p 3510 N93-29517
Estimations of expectedness and potential surprise in possibility theory p 3510 N93-29518
Comparison of specificity and information for fuzzy domains p 3510 N93-29519
The axiomatic definition of a linguistic scale fuzziness degree, its major properties, and applications p 3510 N93-29520
Approximate reasoning using terminological models p 3510 N93-29522
A fuzzy clustering algorithm to detect planar and quadric shapes p 3511 N93-29524
A fuzzy measure approach to motion frame analysis for scene detection p 3511 N93-29525
Automatic rule generation for high-level vision p 3511 N93-29526
Encoding spatial images: A fuzzy set theory approach p 3511 N93-29527
Fuzzy forecasting and decision making in short dynamic time series p 3513 N93-29541
Intelligent virtual reality in the setting of fuzzy sets p 3513 N93-29544
An experimental methodology for a fuzzy set preference model p 3514 N93-29547
A fuzzy set preference model for market share analysis p 3514 N93-29548
Information compression in the context model p 3514 N93-29549
Intelligent fuzzy controller for event-driven real time systems p 3515 N93-29551
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 2 [NASA-CP-10112-VOL-2] p 3515 N93-29556
Adding dynamic rules to self-organizing fuzzy systems p 3515 N93-29557
Fuzzy learning under and about an unfamiliar fuzzy teacher p 3516 N93-29558
Some problems with the design of self-learning management systems p 3516 N93-29559

A neural fuzzy controller learning by fuzzy error propagation p 3516 N93-29560
Determining rules for closing customer service centers: A public utility company's fuzzy decision p 3516 N93-29561
The fusion of information via fuzzy integration p 3517 N93-29568
On the evaluation of fuzzy quantified queries in a database management system p 3517 N93-29569
A fuzzy case based reasoning tool for model based approach to rocket engine health monitoring p 3289 N93-29570
Genetic algorithms in adaptive fuzzy control p 3518 N93-29572
Fuzzy multiple linear regression: A computational approach p 3518 N93-29574
Incorporation of varying types of temporal data in a neural network p 3518 N93-29575
Fuzzy operators and cyclic behavior in formal neuronal networks p 3519 N93-29576
Neural networks: A simulation technique under uncertainty conditions p 3519 N93-29577
Hierarchical model of matching p 3519 N93-29580
On probability-possibility transformations p 3519 N93-29582
Inference in fuzzy rule bases with conflicting evidence p 3519 N93-29583
Gaussian membership functions are most adequate in representing uncertainty in measurements p 3520 N93-29584
A new way to use fuzzy sets in image sharpening p 3363 N93-30273

FUZZY SYSTEMS
New classification methods p 3459 N93-28932
A fuzzy logic optimal control law solution to the CMMCA tracking problem [AD-A262555] p 3542 N93-29420
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 1 [NASA-CP-10112-VOL-1] p 3509 N93-29516
The axiomatic definition of a linguistic scale fuzziness degree, its major properties, and applications p 3510 N93-29520
How to select combination operators for fuzzy expert systems using CRI p 3510 N93-29521
Quantitative analysis of properties and spatial relations of fuzzy image regions p 3510 N93-29523
A fuzzy clustering algorithm to detect planar and quadric shapes p 3511 N93-29524
A neuro-fuzzy architecture for real-time applications p 3511 N93-29529
A composite self tuning strategy for fuzzy control of dynamic systems p 3511 N93-29530
A self-learning rule base for command following in dynamical systems p 3512 N93-29531
Adaptive defuzzification for fuzzy systems modeling p 3512 N93-29532
Design issues of a reinforcement-based self-learning fuzzy controller for petrochemical process control p 3512 N93-29533
Character recognition using a neural network model with fuzzy representation p 3512 N93-29536
Designing a fuzzy scheduler for hard real-time systems p 3512 N93-29537
WARP: Weight Associative Rule Processor. A dedicated VLSI fuzzy logic megacell p 3513 N93-29538
Evaluation of fuzzy inference systems using fuzzy least squares p 3513 N93-29539
A model for amalgamation in group decision making p 3513 N93-29540
Distributed traffic signal control using fuzzy logic p 3513 N93-29543
Intelligent virtual reality in the setting of fuzzy sets p 3513 N93-29544
Fuzzy neural network methodology applied to medical diagnosis p 3498 N93-29546
An experimental methodology for a fuzzy set preference model p 3514 N93-29547
Fuzzy knowledge base construction through belief networks based on Lukasiewicz logic p 3515 N93-29550
Intelligent fuzzy controller for event-driven real time systems p 3515 N93-29551
Fuzzy coordinator in control problems p 3515 N93-29552
Tuning a fuzzy controller using quadratic response surfaces p 3515 N93-29553
The cognitive bases for the design of a new class of fuzzy logic controllers: The clearness transformation fuzzy logic controller p 3515 N93-29554
A fuzzy control design case: The fuzzy PLL p 3515 N93-29555
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 2 [NASA-CP-10112-VOL-2] p 3515 N93-29556
Adding dynamic rules to self-organizing fuzzy systems p 3515 N93-29557
Fuzzy learning under and about an unfamiliar fuzzy teacher p 3516 N93-29558
Fuzzy simulation in concurrent engineering p 3516 N93-29562
Inverse problems: Fuzzy representation of uncertainty generates a regularization p 3516 N93-29563
Quantification of human responses p 3500 N93-29564
A high performance, ad-hoc, fuzzy query processing system for relational databases p 3518 N93-29571
Genetic algorithms in adaptive fuzzy control p 3518 N93-29572
A genetic algorithms approach for altering the membership functions in fuzzy logic controllers p 3518 N93-29573
Fuzzy multiple linear regression: A computational approach p 3518 N93-29574
Incomplete fuzzy data processing systems using artificial neural network p 3519 N93-29578
Inference in fuzzy rule bases with conflicting evidence p 3519 N93-29583
Gaussian membership functions are most adequate in representing uncertainty in measurements p 3520 N93-29584
Life insurance risk assessment using a fuzzy logic expert system p 3520 N93-29585

G

GALACTIC COSMIC RAYS
Radioactivities induced in some LDEF samples p 3572 N93-29628
Revised prediction of LDEF exposure to trapped protons p 3572 N93-29633
LET spectra measurements of charged particles in the P0006 experiment on LDEF p 3573 N93-29637
Three-dimensional shielding effects on charged particle fluences measured in the P0006 experiment of LDEF p 3573 N93-29639
Progress report on the Heavy Ions in Space (HIIS) experiment p 3573 N93-29645

GALACTIC EVOLUTION
Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles [BONN-92-31] p 3632 N93-28473

GALACTIC RADIATION
The 12 UM contribution of nearby galaxies to the infrared background [AD-A264336] p 3654 N93-30419

GALACTIC STRUCTURE
Multiwavelength studies of classical nova shells p 3636 N93-30412

GALAXIES
On the meaning of delta T/T [DE93-008482] p 3653 N93-28962

GALERKIN METHOD
A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container [NASA-CR-193238] p 3594 N93-29214
On high resolution extensions of Lagrange-Galerkin finite-element schemes [INRIA-RR-1703] p 3550 N93-30117
Vibration localization in rotating shafts p 3454 N93-30626
Multiple methods integration for structural mechanics analysis and design p 3307 N93-30867

GALILEO SPACECRAFT
Galileo post-Gaspra cruise and Earth-2 encounter p 3385 N93-29597
The flight performance of the Galileo orbiter USO p 3386 N93-29603

GALLIUM
Uniaxially stressed Ge:Ga and Ge:Be [DE93-010426] p 3594 N93-29150

GALLIUM ARSENIDES
Luminescence study of ion-implanted and MBE-grown Er-doped GaAs and Al(x)Ga(1-x)As [AD-A262602] p 3591 N93-28471
Infrared rugates by molecular beam epitaxy p 3582 N93-28808
New III-V cell design approaches for very high efficiency [DE93-000097] p 3464 N93-28971
Ultrafast optical studies of surface reaction processes at semiconductor interfaces [DE93-009049] p 3593 N93-29096
Low temperature (LT) GaAs and related materials [AD-A263607] p 3298 N93-29282
Defect studies in low-temperature-grown GaAs [DE93-010405] p 3595 N93-29417
Low-cost, high-efficiency solar cells utilizing GaAs-on-Si technology [DE93-000096] p 3464 N93-29965
Fundamental studies of the morphology, chemistry, and electrical properties of metals on GaAs and other III-V semiconductor compounds [AD-A264417] p 3597 N93-30120
Growth and development of GaInAsP for use in high-efficiency solar cells [DE93-000098] p 3465 N93-30208
Modelling of channel thickness modulation effect in SI GaAs MESFET's p 3356 N93-30229
Unexpected increase in the thermal generation rate of bulk GaAs due to electron-beam metallization [DE93-009829] p 3598 N93-30511
Development of ultra-low noise, high sensitivity planar metal grating coupled 3-5 multiquantum well infrared detectors for focal plane array staring IR sensor systems [AD-A264465] p 3599 N93-30536
Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation [DE93-606332] p 3601 N93-30798

GALLIUM PHOSPHIDES
Growth and development of GaInAsP for use in high-efficiency solar cells [DE93-000098] p 3465 N93-30208
Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue [AD-A264523] p 3598 N93-30407

GAME THEORY
Artificial intelligence methodologies in flight related differential game, control and optimization problems [AD-A262405] p 3541 N93-28498

GAMMA RAY ASTRONOMY
A search for radiative neutrino decay from supernovae [NASA-CR-193118] p 3653 N93-30052
Rejection of archival photographic objects as optical counterparts of gamma ray bursters [MPE-PREPRINT-228] p 3631 N93-30642

GAMMA RAY SPECTRA
Collection, analysis, and archival of LDEF activation data p 3624 N93-29631

GAMMA RAY SPECTROMETERS
Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807
A team approach to the development of gamma ray and x ray remote sensing and in situ spectroscopy for planetary exploration missions p 3650 N93-28824
Instrumental neutron activation analysis developed for silicon integrated circuit technology [ETN-93-93581] p 3408 N93-29271
Sensitivity of LDEF foil analyses using ultra-low background germanium vs. large NaI(Tl) multidimensional spectrometers p 3318 N93-29627
A photon phreak digs the LDEF happening p 3572 N93-29629

GAMMA RAYS
Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles [BONN-92-31] p 3632 N93-28473
Modern Monte Carlo particle transport simulation for safety and radiation protection applications in accelerometer technology and in space science [JUEL-2609] p 3574 N93-29062
Limits on neutrino radiative decay from SN1987A [NASA-CR-193262] p 3653 N93-29164
Charged particle activation studies on the surface of LDEF spacecraft p 3572 N93-29630
A search for radiative neutrino decay from supernovae [NASA-CR-193118] p 3653 N93-30052
GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars [NASA-CR-193243] p 3635 N93-30053
A high resolution 14-bit ADC for Gammasphere Project [DE93-010446] p 3598 N93-30393
Mathematical simulation of the induced (gamma)-radiation in structural materials of spaceships. Time dependence [DE93-605312] p 3281 N93-31024

GARMENTS
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits [AD-A262862] p 3506 N93-29471

GAS ANALYSIS
Analysis of protocol gases: An on-going quality assurance audit [PB93-168839] p 3311 N93-29204
Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky [PB93-182244] p 3474 N93-30825

GAS CHROMATOGRAPHY
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800

High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures
[AD-A263611] p 3311 N93-29283

Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396

Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424

An investigation of resolution as encountered in various chromatographic operational modes
[AD-A262883] p 3312 N93-29510

Explosives detection systems for airport security gas chromatographic based devices p 3244 N93-30276

Carbon monoxide exposure of subjects with documented cardiac arrhythmias
[PB93-179943] p 3497 N93-30890

GAS COOLING

Coupling of 3D-Navier-Stokes external flow calculations and internal 3D-heat conduction calculations for cooled turbine blades p 3258 N93-29961

GAS DENSITY

Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles
[BONN-92-31] p 3632 N93-28473

Dense gas in the monoceros OB1 dark cloud and its relationship to star formation p 3636 N93-30502

Measurements of the energy spectrum of an intense microsecond relativistic electron beam in the beam-plasma experiments using a multi-foil analyzer
[DE93-606271] p 3590 N93-30768

GAS DETECTORS

Tank issues: Site characterization for external leak monitoring
[PB93-161156] p 3469 N93-29034

Explosives detection systems for airport security gas chromatographic based devices p 3244 N93-30276

Advanced signal processing requirement in an ion mobility explosives detector p 3320 N93-30277

Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures
[AD-A264179] p 3497 N93-30882

GAS DISCHARGE TUBES

Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158

GAS DISSOCIATION

A computer simulation of the production of an artificially ionized layer using the Arecibo facility
[DE93-010817] p 3478 N93-30487

GAS DYNAMICS

Analysis of unsteady wave processes in a rotating channel
[NASA-CR-191154] p 3251 N93-28617

Three-dimensional numerical simulation of gradual opening in a wave rotor passage
[NASA-CR-191157] p 3252 N93-29072

Non-linear wave phenomena in a gas-vapour mixture with phase transition
[ETN-93-93582] p 3422 N93-29319

Experimental MHD stability limit in the gas-dynamic trap
[DE93-606218] p 3591 N93-30780

Knot invariants and cellular automata
[AD-A264199] p 3607 N93-30884

GAS EXCHANGE

Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327

A preliminary review of global CO2 exchange between ocean and atmosphere
[AD-A264019] p 3472 N93-30015

GAS EXPANSION

Laser spectroscopy of hydrocarbon radicals
[DE93-012555] p 3436 N93-28653

GAS EXPLOSIONS

Weakly nonlinear dynamics of near-CJ detonation waves
[DE93-007344] p 3424 N93-29836

GAS FLOW

Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158

Non-linear wave phenomena in a gas-vapour mixture with phase transition
[ETN-93-93582] p 3422 N93-29319

Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326

Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads
[AD-A263497] p 3423 N93-29339

Modeling the effects of drop drag and breakup on fuel sprays
[AD-A263650] p 3445 N93-29388

Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456

Heat transfer with moderate free stream turbulence
p 3254 N93-29936

Atmospheric studies with SODAR at Kalpakkam
[DE93-605544] p 3480 N93-30992

GAS GENERATORS

Additional support for the TDK/MABL computer program
[NASA-CR-193037] p 3526 N93-29028

GAS GIANT PLANETS

Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing
p 3641 N93-28773

Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809

On symmetric central configurations with application to satellite motion about rings p 3652 N93-31000

GAS INJECTION

Additional support for the TDK/MABL computer program
[NASA-CR-193037] p 3526 N93-29028

GAS IONIZATION

Polarization dependence of the ionization of helium and neon by 120 femtosecond pulses at 614 nm
[DE93-010514] p 3564 N93-28762

Inner-shell photo-ionized x ray laser schemes
[DE93-009285] p 3438 N93-29309

Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine
[AD-A263810] p 3580 N93-29880

GAS JETS

Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569

Attitude stabilization of a rigid spacecraft using gas jet actuators operating in a failure mode
p 3280 N93-29992

Effects of buoyancy on gas jet diffusion flames
[NASA-CR-191109] p 3352 N93-31031

GAS LASERS

Low-pump-rate multi-millisecond atomic xenon laser
[DE93-011484] p 3437 N93-29180

GAS MIXTURES

Thermodynamic properties of natural gas mixtures
[PB93-162816] p 3604 N93-29428

Thermodynamic properties of natural gas mixtures
[PB93-176162] p 3604 N93-29794

Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures
[AD-A264179] p 3497 N93-30882

Methods for preparation of mixtures of gases in air at the parts-per-billion to parts-per-million concentration range for calibration of monitors
[DE92-642433] p 3317 N93-30982

GAS PRESSURE

Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534

Growing wheat to maturity in reduced gas pressures
[NASA-CR-193245] p 3491 N93-29216

GAS SPECTROSCOPY

Advanced signal processing requirement in an ion mobility explosives detector p 3320 N93-30277

GAS TEMPERATURE

Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine
[AD-A263810] p 3580 N93-29880

GAS TRANSPORT

Gas permeability of E/EP semicrystalline diblock copolymers
[AD-A263241] p 3329 N93-28560

Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197

Study of codeposition of aluminum-haffnium and deposition of yttrium by the cementation technique: Elaboration of Ni-Cr-Al and Ni-Cr-Al-Hf felt materials
[ONERA-NT-1990-9] p 3336 N93-30112

GAS TURBINE ENGINES

Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

Spurious symptom reduction in fault monitoring
[NASA-CR-191453] p 3542 N93-29192

Microwave processing of silicon nitride for advanced gas turbine applications
[DE93-007910] p 3334 N93-29767

Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927

Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane
p 3253 N93-29930

The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932

Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934

Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935

Heat transfer with moderate free stream turbulence
p 3254 N93-29936

Prediction of jet impingement cooling scheme characteristics (airfoil leading edge application)
p 3255 N93-29941

Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases
p 3255 N93-29943

The USAF Advanced Turbine Aerothermal Research Rig (ATARR) p 3255 N93-29945

Aerothermic calculations of flows in interdisc cavities of turbines p 3256 N93-29947

Modelling thermal behaviour of turbomachinery discs and casings p 3256 N93-29949

Flow and heat transfer between gas-turbine discs
p 3256 N93-29950

Heat transfer and leakage in high-speed rotating stepped labyrinth seals p 3256 N93-29951

The effect of main stream flow angle on flame tube film cooling p 3257 N93-29953

Impingement/effusion cooling p 3257 N93-29954

Characterization of ceramic composite materials for gas turbine applications
[DE93-009719] p 3259 N93-30168

GAS TURBINES

Use of local x ray computerized tomography for high-resolution, region-of-interest inspection of large ceramic components for engines
[DE93-005564] p 3449 N93-28943

Flow phenomena in turbomachines
[AD-A263049] p 3420 N93-29141

The effect of high temperature on wall shear in a two dimensional wall jet
[AD-A262982] p 3423 N93-29426

Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926

The effect of orthogonal-mode rotation on forced convection in a circular-sectioned tube fitted with full circumferential transverse ribs p 3254 N93-29937

Coupling of 3D-Navier-Stokes external flow calculations and internal 3D-heat conduction calculations for cooled turbine blades p 3258 N93-29961

Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing
[NASA-CR-191036] p 3448 N93-31039

GAS-GAS INTERACTIONS

Non-linear wave phenomena in a gas-vapour mixture with phase transition
[ETN-93-93582] p 3422 N93-29319

GAS-LIQUID INTERACTIONS

NASA in-step: Permeable membrane experiment
p 3267 N93-28736

GASEOUS DIFFUSION

Fiber optic chemical sensors for characterizing the carbon cycle in ocean margin regions
[DE93-011442] p 3489 N93-30056

GASEOUS ROCKET PROPELLANTS

A new facility for advanced rocket propulsion research
[NASA-TM-106193] p 3270 N93-28696

GAUGE INVARIANCE

Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542

Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876

Beyond two dimensions
[DE93-606084] p 3606 N93-30786

Abelian gauge theories on homogeneous spaces
[DE92-644730] p 3607 N93-30921

Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924

Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925

Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928

Normal equivariant forms of vector fields
[DE92-644845] p 3551 N93-30929
Superconformal structures and holomorphic 1/2-superdifferentials on N = 1 super Riemann surfaces
[DE93-604133] p 3558 N93-30989
A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

GAUGE THEORY
Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542
Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565
Neutrino mass
[DE93-010735] p 3566 N93-29315
Understanding conformal field theory through parafermions and Chern Simons theory
[DE93-010452] p 3604 N93-29806
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876
On the photonic chiral anomaly in an external gravitational field
[DE93-606082] p 3479 N93-30785
Abelian gauge theories on homogeneous spaces
[DE92-644730] p 3607 N93-30921
Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924
Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925

GAUSS EQUATION
Gaussian membership functions are most adequate in representing uncertainty in measurements
p 3520 N93-29584

GEIGER COUNTERS
Electronics for a neutron detector and a Geiger-Mueller detector for the radiation protection around MEA and AmPS
[DIGEL-1992-6] p 3413 N93-30838

GELS
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651
Thermodynamics of swelling and collapse of polyelectrolytic gels
[ETN-93-93485] p 3331 N93-29064
Thermal properties of organic and modified inorganic aerogels
[DE93-009230] p 3311 N93-29263
Crystallization of nanocomposite glasses made by the SSG process
[AD-A262892] p 3333 N93-29511

GENE EXPRESSION
Gene transcription and electromagnetic fields
[DE93-010854] p 3490 N93-28848

GENERAL AVIATION AIRCRAFT
Preliminary design studies of an advanced general aviation aircraft p 3228 N93-29717

GENERAL OVERVIEWS
Computer systems laboratory
[PB93-181873] p 3521 N93-29662

GENES
Molecular approach to hypothalamic rhythms
[AD-A264438] p 3496 N93-30421

GENETIC ALGORITHMS
Genetic algorithms in adaptive fuzzy control
p 3518 N93-29572
A genetic algorithms approach for altering the membership functions in fuzzy logic controllers
p 3518 N93-29573
Intelligent support for human computer interaction and decision-making in distribution planning and scheduling systems
[AD-A263985] p 3610 N93-30124
Use of a genetic algorithm to solve two-fluid flow problems on an NCUBE multiprocessor computer
[DE93-009630] p 3425 N93-30184

GENETIC CODE
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651
Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

GENETIC ENGINEERING
National collaboratories: Applying information technology for scientific research
[LC-93-83795] p 3612 N93-29129
Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

GENETICS
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651
Gene transcription and electromagnetic fields
[DE93-010854] p 3490 N93-28848
Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

GEOCHEMISTRY
Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769
A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800
Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807
Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405
IOC-UNEP review meeting on oceanographic processes of transport and distribution of pollutants in the sea
[DE93-605070] p 3490 N93-31019

GEOCHRONOLOGY
Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805

GEODESY
Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777
Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

GEODETIC ACCURACY
Exact trajectory determinator for ERS-1
p 3457 N93-28918

GEOGRAPHIC INFORMATION SYSTEMS
Near real-time GIS in deep-ocean exploration
[AD-A262073] p 3487 N93-29003
Geographic information system for fusion and analysis of high-resolution remote sensing and ground truth data
p 3614 N93-29234
National remote sensing programme 2 ACMS project. Phase 1: Validation. Part 1: Definition of validation experiment
[BCRS-92-10-PHASE-1-PT-1] p 3461 N93-29465
Data quality statements for spatial databases
[AD-A264125] p 3616 N93-30195
Toward a coordinated spatial data infrastructure for the nation
[B-149] p 3456 N93-30634

GEOGRAPHY
What's past is prologue: Supporting global change research with historical data
[DE93-005777] p 3472 N93-30009

GEOIDS
Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817

GEOLOGICAL FAULTS
Modeling earthquakes with local and regional broadband data p 3478 N93-30005

GEOLOGICAL SURVEYS
Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799
Applications of three-dimensional modeling in electromagnetic exploration p 3391 N93-30010
Toward a coordinated spatial data infrastructure for the nation
[B-149] p 3456 N93-30634

GEOLOGY
JPRS report: Science and technology. Central Eurasia: Earth science
[JPRS-UES-93-003] p 3456 N93-29089
Geoscience center research
[AD-A263465] p 3462 N93-29834
Hydrogeology and ground-water-quality conditions at the Reno County Landfill, South-Central Kansas, 1990-1991
[PB93-183085] p 3474 N93-30826

GEOMAGNETISM
SESC products and services user guide
[PB93-178879] p 3653 N93-29679
The cone structure and focusing of the electric field of VLF and LF waves at high altitudes of the ionosphere
p 3395 N93-30731

GEOMETRIC RECTIFICATION (IMAGERY)
Model-oriented correction of thematic mapper raw data p 3459 N93-28930
Preprocessing airborne remote sensing PARES calibration maintenance functional design document
[BCRS-92-07] p 3460 N93-29321

GEOMETRICAL OPTICS
Ultra-high resolution water window x ray microscope optics design and analysis
[NASA-CR-193225] p 3578 N93-29128
What is the center of the image?
[AD-A263550] p 3579 N93-29824
Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830

GEOMETRY
Topology of hybrid objects
[ETN-93-93594] p 3546 N93-28466
Representation and recognition with invariants and geometric constraint models
[AD-A263235] p 3529 N93-29493

GEOMORPHOLOGY
Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799
Geoscience center research
[AD-A263465] p 3462 N93-29834
Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

GEOPHYSICS
Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777
Atmospheric and Geophysical Sciences Program report, 1990-1991
[DE93-007390] p 3470 N93-29055
Geoscience center research
[AD-A263465] p 3462 N93-29834
Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes
[AD-A263469] p 3424 N93-29838
Applications of three-dimensional modeling in electromagnetic exploration p 3391 N93-30010

GEOPOTENTIAL
Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

GEORGIA
Summer 1990 Atlanta ozone precursor study (January 1993)
[PB93-167203] p 3470 N93-29200

GEOSAT SATELLITES
Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817

GEOSTROPHIC WIND
Using C-vector method to derive the three-dimensional circulation pattern near the East Greenland Polar Front
[AD-A261979] p 3487 N93-29437
Surface shear stress estimates from geostrophic winds for use in sensible and latent heat flux formulations
p 3483 N93-30044

GEOSYNCHRONOUS ORBITS
Origin of orbital debris impacts on LDEF's trailing surfaces p 3283 N93-29373
NOAA satellite programs and technology requirements
p 3627 N93-30710

GEOTECHNICAL ENGINEERING
Lunar regolith densification p 3276 N93-29115
Regolith-structure modeling p 3276 N93-29116
Systems engineering studies of lunar base construction p 3277 N93-29121
A field investigation of water and salt movement in permafrost and the active layer
[AD-A263706] p 3487 N93-29298

GEOTHERMAL TECHNOLOGY
Direct use geothermal applications for brazed plate heat exchangers
[DE93-008559] p 3465 N93-30011

GERMANIUM
Uniaxially stressed Ge:Ga and Ge:Be
[DE93-010426] p 3594 N93-29150

GERMANIUM COMPOUNDS
Development of Si(1-x)Ge(x) technology for microwave sensing applications
[NASA-TM-106157] p 3405 N93-28610
Fundamental studies of the mechanical behavior of microelectronics thin film materials
[AD-A264334] p 3337 N93-30417

GERMINATION
Final results of space exposed experiment developed for students p 3492 N93-29702
Continued results of the seeds in space experiment
p 3492 N93-29703

GET AWAY SPECIALS (STS)
Description of the Joint Damping Experiment (JDX)
p 3263 N93-28703

GIBBS FREE ENERGY
A simple model for ion solvation with non additive cores
[AD-A263075] p 3566 N93-29143

GIMBALS
Gravity referenced elevation encoder development
p 3385 N93-29592
Cryogenic magnetic bearing
[AD-A264716] p 3446 N93-30512

GLACIOLOGY
The German satellite ground station in Antarctica: Realization and first results p 3458 N93-28924

GLARE
Discomfort glare from high-intensity discharge headlamps: Effects of context and experience
[PB93-174720] p 3496 N93-30659
GLASS
Healing of lithographically introduced flaws in glass and glass containing ceramics
[DE93-010453] p 3330 N93-28761
Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368
Crystallization of nanocomposite glasses made by the SSG process
[AD-A262892] p 3333 N93-29511
Molecular dynamics of physical aging processes in polymer glasses
[AD-A263737] p 3334 N93-29856
Whisker toughening of ceramic materials: A review
[DE93-011565] p 3336 N93-30129
Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205
Fracture of glass p 3293 N93-30969
Temperature-dependent electrical conductivity of soda-lime glass p 3294 N93-30978
GLASS COATINGS
Inertial confinement fusion target component fabrication and technology development support
[DE93-010836] p 3585 N93-28836
GLASS FIBER REINFORCED PLASTICS
Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 2
[AD-A263814] p 3335 N93-29881
Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 1
[AD-A263813] p 3335 N93-29886
GLASS FIBERS
Effects of freeze/thaw cycles on hydrostatically conditioned E-glass/J-2 composite
[AD-A262980] p 3298 N93-29425
Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205
GLASS LASERS
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
GLASS TRANSITION TEMPERATURE
A 69 cent look at thermoplastic softening
p 3292 N93-30963
GLASSY CARBON
The design and testing of a high-temperature graphite dilatometer
[AD-A262185] p 3430 N93-28488
GLIDE PATHS
Evaluation of four advanced nozzle concepts for short takeoff and landing performance
[NASA-TP-3314] p 3239 N93-29165
GLOBAL AIR POLLUTION
Chemistry of the atmosphere: Its impact on global change. CHEMRAWN 7: Perspectives and recommendations
[PB93-180644] p 3488 N93-29670
GLOBAL ATMOSPHERIC RESEARCH PROGRAM
The distribution of the annual and semiannual cycles in the tropics
[DE92-642213] p 3485 N93-31006
GLOBAL POSITIONING SYSTEM
Flight evaluation of a computer aided low-altitude helicopter flight guidance system p 3260 N93-28869
Helicopter approach capability using the differential global positioning system
[NASA-CR-193183] p 3245 N93-28936
Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179
System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468
Embedded GPS: The Canadian Marconi approach
p 3247 N93-30330
Attitude determination using GPS: Development of an all solid-state guidance, navigation, and control sensor for air and space vehicles based on the global positioning system p 3246 N93-30605
Design and implementation of a Global Positioning System (GPS) supported area navigation system with electronic aircraft
[ILR-MITT-275(1992)] p 3246 N93-30671
Satellite calibration requirements
[AD-A264279] p 3281 N93-30817
GLOBAL WARMING
Global warming issue and global economic model
[DE93-781334] p 3468 N93-28881
Emission inventories: A global modeling perspective
[DE93-005817] p 3469 N93-28965
Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967
Global warming potential for SF6
[DE93-007394] p 3469 N93-28972
Trend survey on the elucidation of the global warming mechanism by the governments of major industrialized nations
[DE93-776427] p 3470 N93-29672
GLOBULAR CLUSTERS
Stellar encounters in globular clusters
p 3632 N93-28606
The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604
GLOVES
Biophysical model for handwear insulation testing
[AD-A262926] p 3505 N93-28884
GLOW DISCHARGES
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
GOGGLES
Goggles emergency release apparatus
[AD-D015685] p 3507 N93-29607
CATS EYES adjustment procedures
[AD-A264069] p 3508 N93-29924
The effects of superimposing symbology on a simulated night vision goggle display
[AD-A263458] p 3508 N93-30590
GOLD
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445
The mechanical response of gold substrates modified with self-assembling monolayer films
[AD-A262997] p 3452 N93-29515
Growth model of Au films on Ru(001)
[DE92-642126] p 3602 N93-30998
GOODNESS OF FIT
Modified goodness-of-fit tests for the Weibull distribution
[AD-A262552] p 3553 N93-28574
Modified Anderson-Darling and Cramer-Von Mises goodness-of-fit tests for the normal distribution
[AD-A262554] p 3553 N93-28575
A new goodness-of-fit test for the Weibull distribution based on spacings
[AD-A262615] p 3553 N93-28587
A modified Anderson Darling goodness-of-fit test for the gamma distribution with unknown scale and location parameters
[AD-A262486] p 3553 N93-28760
A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845
GOVERNMENT PROCUREMENT
How to compete for NASA contracts
[NASA-TM-109238] p 3610 N93-30644
GOVERNMENT/INDUSTRY RELATIONS
Defense conversion: Redirecting research and development
[OTA-ITE-552] p 3610 N93-29649
Technology Transfer and the Civil Space Program. Volume 2: Workshop proceedings
[NASA-TM-108250] p 3625 N93-30692
The NCAT process p 3626 N93-30697
National Technology Transfer Center
p 3626 N93-30700
Technology transfer within the government
p 3627 N93-30711
Technology transfer and Rockwell International
p 3627 N93-30712
NASP technology transfer p 3627 N93-30713
High performance computing and communications program p 3627 N93-30715
Technology transfer between the government and the aerospace industry p 3628 N93-30716
National Media Laboratory p 3628 N93-30717
Technology transfer to the broader economy
p 3628 N93-30719
A research experiment on facilitation and formation of joint research and development programs between government, industry, and universities: Overview, preliminary findings, and observations
p 3628 N93-30725
GOVERNMENTS
Trend survey on the elucidation of the global warming mechanism by the governments of major industrialized nations
[DE93-776427] p 3470 N93-29672
The 1992 World Administrative Radio Conference: Technology and Policy Implications
[OTA-TCT-549] p 3392 N93-30150
Interagency Advanced Power Group (IAPG) Meeting Compendium
[DE93-006189] p 3670 N93-30212
Profiles of major federal literacy programs
[PB93-163863] p 3608 N93-30657
GRADIENTS
Gradient estimation for regenerative processes
[AD-A263766] p 3555 N93-29878
The structure and dynamics of the vorticity and passive scalar fields at small scales in homogeneous isotropic turbulence p 3427 N93-30625
GRAIN BOUNDARIES
Environmental embrittlement of binary and Zr-doped Ni3Al
[DE93-008575] p 3321 N93-28679
The role of grain boundaries in hydrogen diffusion in metals at 25 C
[NASA-TM-108407] p 3322 N93-29043
Anelastic relaxations associated with local disordering in grain boundaries
[AD-A263101] p 3596 N93-29796
GRAIN SIZE
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A264191] p 3339 N93-30883
Tensile creep behavior of polycrystalline alumina fibers
[NASA-TM-106269] p 3340 N93-30938
GRAMMARS
Antirational transductions and their language families
[ETN-93-93794] p 3611 N93-28525
GRAND UNIFIED THEORY
Neutrino mass
[DE93-010735] p 3566 N93-29315
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
GRANULAR MATERIALS
Dense inclined flows: Theory and experiments
[DE93-011452] p 3417 N93-28630
Studies of complexity in fluid systems
[DE93-010776] p 3418 N93-28878
Direct tension experiments on compacted granular materials p 3292 N93-30960
GRAPH THEORY
Packing of Steiner trees: Polyhedric studies and application
[ETN-93-93796] p 3547 N93-28527
Resource utilization model for the algorithm to architecture mapping model
[NASA-CR-193122] p 3527 N93-29171
Neural networks: A simulation technique under uncertainty conditions p 3519 N93-29577
Polynomial space polynomial delay algorithms for listing families of graphs
[DE93-010677] p 3530 N93-29808
Placement of cells: Theory and solution of a quadratic 0/1 optimization problem
[ETN-93-94182] p 3413 N93-30616
GRAPHICAL USER INTERFACE
A new class of mission support for combat air-crew
p 3501 N93-28854
Index mappings for interactive editing of symbolic matrices
[DE93-009316] p 3549 N93-29060
RBSE: Product development team research activity deliverables
[NASA-CR-193115] p 3527 N93-29212
Graphical interface between the CIRSSE testbed and CimStation software with MCS/CTOS
[NASA-CR-193276] p 3527 N93-29218
Building a generalized distributed system model
[NASA-CR-193239] p 3527 N93-29219
Intelligent support for human computer interaction and decision-making in distribution planning and scheduling systems
[AD-A263985] p 3610 N93-30124
GRAPHITE
The design and testing of a high-temperature graphite dilatometer
[AD-A262185] p 3430 N93-28488
Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414

Apparatus for intercalating large quantities of fibrous structures
[NASA-CASE-LEW-15077-2] p 3298 N93-29609

NMR studies of molecules in liquid crystals and graphite
[DE93-010423] p 3569 N93-29805

Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004

Complex dielectric function of amorphous diamond films deposited by pulsed excimer (ArF) laser ablation of graphite
[AD-A264527] p 3598 N93-30408

Consolidation of graphite thermoplastic textile preforms for primary aircraft structure p 3302 N93-30439

Diamond nucleation of surfaces using carbon clusters
[AD-A264634] p 3599 N93-30548

GRAPHITE-EPOXY COMPOSITES

Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374

Delaminations in composite plates under impact loads
p 3304 N93-30849

Mechanical and analytical screening of braided composites for transport fuselage applications
p 3305 N93-30855

Comparison of hand laid-up tape and filament wound composite cylinders and panels with and without impact damage p 3306 N93-30859

Effects of bolt-hole contact on bearing-bypass damage-onset strength p 3307 N93-30870

Experimental behavior of graphite-epoxy Y-stiffened specimens loaded in compression p 3307 N93-30872

Evaluation of some scale effects in the response and failure of composite beams p 3308 N93-30874

GRAPHS (CHARTS)

Resource utilization model for the algorithm to architecture mapping model
[NASA-CR-193122] p 3527 N93-29171

Polynomial space polynomial delay algorithms for listing families of graphs
[DE93-010677] p 3530 N93-29808

Packing odd paths
[CWI-BS-R9207] p 3549 N93-29849

Thermoforming from a systems viewpoint
p 3293 N93-30967

GRASSLANDS

The estimation and scaling of land-surface fluxes of latent and sensible heat with remotely sensed data over a grassland site p 3462 N93-30045

GRATINGS (SPECTRA)

Ruled and holographic experiment (AO 138-5)
p 3434 N93-29696

Wavelength-division multiplexed optical integrated circuit with vertical diffraction grating
[NASA-CASE-NPO-18357-1-CU] p 3579 N93-29848

GRAVITATION

An algebraic approach to the quantization of constrained systems: Finite dimensional examples
p 3548 N93-28671

Dark matter: Theoretical perspectives
[DE93-008484] p 3633 N93-28676

The physiological limitations of man in the high G environment p 3503 N93-28861

On the meaning of delta T/T
[DE93-008482] p 3653 N93-28962

Gravity sensitivity of a resistojet water vaporizer
[NASA-TM-106220] p 3288 N93-29194

Gravity referenced elevation encoder development
p 3385 N93-29592

Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918

General scalar-tensor theories for induced gravity inflation
[DE93-602505] p 3479 N93-30940

Fourth-rank cosmology
[DE92-641346] p 3637 N93-30997

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

GRAVITATION THEORY

Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918

Compensating fields and anomalies in supergravity
[DE92-644724] p 3637 N93-30919

Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

GRAVITATIONAL COLLAPSE

Topics in General Relativity theory: Gravitational-wave measurements of black-hole parameters; gravitational collapse of a cylindrical body; and classical-particle evolution in the presence of closed, timelike curves
p 3603 N93-28690

Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

GRAVITATIONAL EFFECTS

Low-frequency vibration environment for five Shuttle missions
[NASA-TM-106059] p 3285 N93-28554

Dense inclined flows: Theory and experiments
[DE93-011452] p 3417 N93-28630

Sodium-Sulfur Cell Technology flight experiment (SSCT) p 3264 N93-28715

Heat pipe performance experiment
p 3265 N93-28722

NASA supporting studies for microgravity research on eye movements
[NASA-CR-193233] p 3493 N93-29041

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

Gravity sensitivity of a resistojet water vaporizer
[NASA-TM-106220] p 3288 N93-29194

Acquisition of physiological data during G-induced Loss of Consciousness (G-LOC)
[AD-A264492] p 3496 N93-30400

GRAVITATIONAL FIELDS

Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction
[NASA-CR-188249] p 3634 N93-29042

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817

On the photonic chiral anomaly in an external gravitational field
[DE93-606082] p 3479 N93-30785

Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644744] p 3557 N93-30927

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

GRAVITATIONAL LENSES

New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

GRAVITATIONAL PHYSIOLOGY

The physiological limitations of man in the high G environment p 3503 N93-28861

Issues on human acceleration tolerance after long-duration space flights
[NASA-TM-104753] p 3495 N93-29651

GRAVITATIONAL WAVES

Topics in General Relativity theory: Gravitational-wave measurements of black-hole parameters; gravitational collapse of a cylindrical body; and classical-particle evolution in the presence of closed, timelike curves
p 3603 N93-28690

Topics in inflationary universe medels and cosmic string theories p 3637 N93-30579

GRAVITY ANOMALIES

Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817

GRAVITY PROBE B

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

GRAVITY WAVES

Ocean waves in SAMSON/SWADE
[AD-A263681] p 3487 N93-29295

ARI: Internal gravity waves at abrupt topography
[AD-A263795] p 3477 N93-29879

Dynamics of small-scale oceanic motions
[AD-A263582] p 3488 N93-29914

Laboratory studies of gravity wave/mean flow interactions
[AD-A264226] p 3478 N93-30174

Numerical modeling and parameterization of gravity wave processes and effects in the atmosphere
[AD-A264331] p 3478 N93-30367

Acoustic-gravity waves from low-altitude localized disturbances
[AD-A264804] p 3479 N93-30593

GRAY GAS

Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions
[NASA-CR-193223] p 3604 N93-29168

GREASES

Synthetic lubricating oil greases containing metal chelates of Schiff bases
[AD-D015694] p 3333 N93-29458

GREEN'S FUNCTIONS

Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642

Coherent and semi-coherent neutron transfer reactions
[DE93-008336] p 3565 N93-28959

Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796

A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799

Algorithm of numerical calculations of differential Yakubovsky equations for the (1 + 3) scattering problem
[DE92-644679] p 3535 N93-30915

GREENHOUSE EFFECT

Assessment of energy technologies contributing to environmental conservation
[DE93-781439] p 3468 N93-28882

Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967

Global warming potential for SF6
[DE93-007394] p 3469 N93-28972

Clouds and radiation: A primier
[AD-A263136] p 3482 N93-29479

Quantifying and minimizing uncertainty of climate forcing by anthropogenic aerosols
[NASA-TM-108259] p 3472 N93-30043

Reception at Ascension Island, South Atlantic, of the transmissions from the Heard Island feasibility test
[PB93-176261] p 3394 N93-30662

GRID GENERATION (MATHEMATICS)

Design of an essentially non-oscillatory reconstruction procedure in finite-element type meshes
[INRIA-RR-1584] p 3547 N93-28615

A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method
[DE92-018262] p 3417 N93-28639

Solar flare MDH
[AD-A262275] p 3652 N93-28756

The three-dimensional Multi-Block Advanced Grid Generation System (3DMAGGS)
[NASA-TM-108985] p 3420 N93-29155

Grid Analysis and Display System (GrADS): A practical tool for earth science visualization p 3613 N93-29225

Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375

Computational fluid dynamics research on dynamically adaptive mesh methods for transonic flows
[AD-A264833] p 3428 N93-30630

Nonlinear explicit transient finite element analysis on the Intel Delta
[DE93-009561] p 3535 N93-30647

GRINDING (MATERIAL REMOVAL)

Tool grinding and spark testing p 3291 N93-30954

GROUND BASED CONTROL

TACSAT ground control and data collection
p 3388 N93-29895

GROUND EFFECT (COMMUNICATIONS)

Ground clutter measurements for surface-sited radar
[AD-A262472] p 3379 N93-28655

GROUND OPERATIONAL SUPPORT SYSTEM

TACSAT ground control and data collection
p 3388 N93-29895

GROUND SPEED

The 1990/1991 project summaries
p 3229 N93-29725

GROUND STATE

NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068

The ground state wavefunctions of a conformally invariant scalar field in different spacetime background
[DE93-606063] p 3606 N93-30808

GROUND STATIONS

QuickStar: System design, capabilities, and tactical applications of a small, smart space system
p 3284 N93-29905

VLF/LF propagation measurements
p 3395 N93-30732

GROUND SUPPORT SYSTEMS

DSN support of Mars Observer p 3385 N93-29598

Lunar lander ground support system
p 3230 N93-29729

GROUND TESTS

Heat pipe performance experiment
p 3265 N93-28722

The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766

TACSAT ground control and data collection
p 3388 N93-29895

GROUND TRUTH

Geographic information system for fusion and analysis of high-resolution remote sensing and ground truth data
p 3614 N93-29234

GROUND WATER

Tank issues: Design and placement of floating liquid monitoring wells
[PB93-161149] p 3469 N93-29033

Tank issues: Site characterization for external leak monitoring
[PB93-161156] p 3469 N93-29034

Annual report on monitoring of the unsaturated zone and recharge areas at INEL to the state of Idaho INLEL oversight committee
[DE93-012947] p 3473 N93-30187

Performance and cost evaluation of bioremediation techniques for fuel spills
[PB93-175545] p 3474 N93-30762

Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky
[PB93-182244] p 3474 N93-30825

Hydrogeology and ground-water-quality conditions at the Reno County Landfill, South-Central Kansas, 1990-1991
[PB93-183085] p 3474 N93-30826

GROUND WAVE PROPAGATION

Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics
[DE93-009827] p 3433 N93-30510

GROUND-AIR-GROUND COMMUNICATION

Enhancing availability, performance, and flexibility of air traffic control air-ground services p 3247 N93-30353

GROUP THEORY

Lie groups whose set of compact subgroups is inductive
[ETN-93-93791] p 3547 N93-28524

Differential calculus on quantum spaces and quantum groups
[DE93-010425] p 3551 N93-30392

Integrals of motion on the group of invariance of an interval in three-dimensional spaces
[DE93-606090] p 3606 N93-30797

On one-dimensional topological and conformal field theories
[DE92-644726] p 3558 N93-30986

GUIDANCE SENSORS

An auto-guiding system for mid-sized telescopes
p 3375 N93-30340

GUIDE VANES

Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane
p 3253 N93-29930

Aero-thermal design of a cooled transonic NGV and comparison with experimental results
p 3257 N93-29957

Coupling of 3D-Navier-Stokes external flow calculations and internal 3D-heat conduction calculations for cooled turbine blades p 3258 N93-29961

GULF OF CALIFORNIA (MEXICO)

Analyses of data from fine structure and circulation studies in the Gulf of California
[AD-A262910] p 3486 N93-28885

GULF OF MEXICO

Remote sensing survey of Mississippi River-Gulf Outlet, Breton Sound disposal area, Plaquemines Parish, Louisiana
[AD-A263097] p 3459 N93-29146

GYROSCOPES

Gyroscope with excess noise subtraction
[AD-D015698] p 3431 N93-29046

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179

Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922

GYROSCOPIC STABILITY

Stability, bifurcation, and control of Hamiltonian systems
[DE93-012103] p 3547 N93-28648

GYROSTABILIZERS

Stability, bifurcation, and control of Hamiltonian systems
[DE93-012103] p 3547 N93-28648

H

H-INFINITY CONTROL

Robust control via H-infinity optimization
p 3354 N93-30216

HADRONS

Maximizing the luminosity of hadron, supercolliders at 10-100 TeV
[DE93-009247] p 3574 N93-29103

Polarization experiments with hadronic and electromagnetic probes
[DE93-011375] p 3392 N93-30126

Multidimensional intermittency in hadronic collisions
[DE93-010562] p 3577 N93-30532

Single t-quark production in high energy (gamma)e collisions
[DE92-644947] p 3572 N93-30930

HALIDES

A simple model for ion solvation with non additive cores
[AD-A263075] p 3566 N93-29143

Study of codeposition of aluminum-haffnium and deposition of yttrium by the cementation technique: Elaboration of Ni-Cr-Al and Ni-Cr-Al-Hf felt materials
[ONERA-NT-1990-9] p 3336 N93-30112

HALL EFFECT

The fluctuation induced Hall effect
[DE93-010130] p 3585 N93-28912

Uniaxially stressed Ge:Ga and Ge:Be
[DE93-010426] p 3594 N93-29150

NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666

Regular and chaotic motion of two dimensional electrons in a strong magnetic field
[DE93-604091] p 3607 N93-30933

HAMILTONIAN FUNCTIONS

Self-consistent chaos in the beam-plasma instability
[DE93-009581] p 3584 N93-28599

Stability, bifurcation, and control of Hamiltonian systems
[DE93-012103] p 3547 N93-28648

A normally elliptic Hamiltonian bifurcation
[W-9201] p 3548 N93-28753

Balanced approximation can be optimal
[OUEL-1950/92] p 3548 N93-28754

Coherent and semi-coherent neutron transfer reactions
[DE93-008336] p 3565 N93-28959

Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays
[DE93-008713] p 3593 N93-29094

Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes
[AD-A263469] p 3424 N93-29838

Extracting infinite system properties from finite size clusters: Phase randomization/boundary condition averaging
[AD-A264712] p 3551 N93-30503

Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800

HANDBOOKS

The program manager's notebook
[AD-A263074] p 3609 N93-29142

LDEF space optics handbook p 3582 N93-29695

Handbook of frequently used acronyms and glossary of terms
[DE93-011388] p 3616 N93-30123

DOE fundamentals handbook: Chemistry
[DE93-012222] p 3314 N93-30198

DOE fundamentals handbook: Material science
[DE93-012224] p 3314 N93-30199

DOE fundamentals handbook: Material science
[DE93-012225] p 3314 N93-30200

Medical aspects of cold weather operations: A handbook for medical officers
[AD-A263559] p 3496 N93-30588

Air weather service master station catalog USAFETAC climatic database users handbook no. 6
[AD-A264761] p 3484 N93-30608

HANDEDNESS

Handedness and motor programming effects of manual control and movement
[AD-A264022] p 3499 N93-30027

HANDLING EQUIPMENT

New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583

Leaky coaxial cable signal transmission for remote facilities
[DE93-007916] p 3383 N93-29348

Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012

HANDWRITING

Comparison of crisp and fuzzy character networks in handwritten word recognition p 3514 N93-29545

HANKEL FUNCTIONS

Balanced approximation can be optimal
[OUEL-1950/92] p 3548 N93-28754

HARDNESS

Tailored interfaces for metal-matrix composites-fundamental considerations
[AD-A263048] p 3298 N93-29130

Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193

Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159

HARDNESS TESTS

Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961

HARMONIC GENERATIONS

Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer
[AD-A262189] p 3329 N93-28489

Dipolar orientational relaxation in guest/host amorphous polymer probed by second harmonic generation
[AD-A262006] p 3333 N93-29441

Isothermal annealing and relaxation of the second harmonic generation signal from a nonlinear optical polymer
[AD-A262007] p 3333 N93-29442

Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922

Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146

Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205

HARMONIC OSCILLATION

Bifurcations phenomena in a nonlinear oscillator: Approximate analytical studies versus computer simulation results p 3407 N93-29037

HARMONICS

The use of DFT windows in signal-to-noise ratio and harmonic distortion computations
[DE93-009800] p 3433 N93-30655

The distribution of the annual and semiannual cycles in the tropics
[DE92-642213] p 3485 N93-31006

HARTREE APPROXIMATION

Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711

HAWAII

Tidal and lunar data for Point Mugu, San Nicolas island, and the Barking Sanda area during 1993
[AD-A262725] p 3477 N93-29401

Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts)
[PB93-174993] p 3485 N93-30758

HAZARDS

Super critical water oxidation on energetic materials
[DE93-010704] p 3342 N93-29312

Sound attenuation characteristics of the standard DH-132A and SPH-4 helmets worn in combination with standard issue earplugs
[AD-A263011] p 3506 N93-29406

Microstructural modeling of electrical breakdown in solid fuel propellants
[AD-A263466] p 3342 N93-29835

DOE fundamentals handbook: Chemistry
[DE93-012222] p 3314 N93-30198

HAZE

Uplink laser propagation measurements through the sea surface, haze and clouds
[AD-A264687] p 3440 N93-30553

HEAD (ANATOMY)

Methods for characterizing the human head for the design of helmets
[AD-A263875] p 3507 N93-29889

HEAD MOVEMENT

Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight
[AD-A264661] p 3499 N93-30542

HEAD-UP DISPLAYS

Oculo-motor responses and virtual image displays
p 3503 N93-28862

Utility of a ghost horizon and climb/dive ladder line tapering on a head-up display
[AD-A264401] p 3508 N93-30167

HEARING
Programmable interactive system for cochlear implant electrode stimulation [AD-A262558] p 3494 N93-29421
HEAT AFFECTED ZONE
A review of hot cracking in austenitic stainless steel weldments [DE93-605280] p 3328 N93-31021
HEAT BALANCE
Influence of the Cold Buster (tm) sports bar on heat debt, mobilization and oxidation of energy substrates [AD-A262762] p 3493 N93-28939
HEAT ENGINES
Process optimization of Hexoloy SX-SiC towards improved mechanical properties [DE93-007913] p 3320 N93-28564
Theoretical and experimental study of thermoacoustic engines [AD-A261934] p 3561 N93-28995
Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392
The drive to cost-effective structural ceramics [DE93-009722] p 3335 N93-30047
HEAT EXCHANGERS
Preliminary endurance tests of water vaporizers for resistojet applications [NASA-TM-106222] p 3287 N93-28694
In-STEP Two-Phase Flow (TPF) thermal control experiment p 3265 N93-28719
Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load [AD-A263496] p 3422 N93-29338
Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392
Direct use geothermal applications for brazed plate heat exchangers [DE93-008559] p 3465 N93-30011
Materials studies for preventing corrosion in condensing environments [PB93-185478] p 3327 N93-30815
HEAT FLUX
Small hydrogen/oxygen rocket flowfield behavior from heat flux measurements [NASA-TM-106233] p 3286 N93-28619
Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions [NASA-CR-193223] p 3604 N93-29168
Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling [AD-A263495] p 3423 N93-29352
A generalized approach to the thermal analysis of the Long Duration Exposure Facility's flight experiments p 3428 N93-29624
Surface shear stress estimates from geostrophic winds for use in sensible and latent heat flux formulations p 3483 N93-30044
The estimation and scaling of land-surface fluxes of latent and sensible heat with remotely sensed data over a grassland site p 3462 N93-30045
Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling [AD-A264174] p 3425 N93-30155
On the ideality of using a step-function current in a metallic foil to simulate a step-function heat-flux source [AD-A264627] p 3413 N93-30539
Optimization for steady-state and hybrid operations of ITER by using scaling models of divertor heat load [DE93-764151] p 3590 N93-30649
HEAT GENERATION
Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation [DE93-606332] p 3601 N93-30798
HEAT MEASUREMENT
The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces p 3255 N93-29944
Analytical and experimental study of laminar free convective heat transfer from isothermal convex bodies of arbitrary shape [ISBN-0-315-72512-5] p 3426 N93-30379
HEAT OF FORMATION
Laser spectroscopy of hydrocarbon radicals [DE93-012555] p 3436 N93-28653
HEAT PIPES
Cryogenic Heat Pipe Experiment (CRYOHP) p 3265 N93-28721
Heat pipe performance experiment p 3265 N93-28722
Technology transfer personnel exchange at the Boeing Company [DE93-010190] p 3625 N93-29329
Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load [AD-A263496] p 3422 N93-29338
Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads [AD-A263497] p 3423 N93-29339
Long Duration Exposure Facility (LDEF) low temperature Heat Pipe Experiment Package (HEPP) flight results p 3429 N93-29701
Thermion: Verification of a thermionic heat pipe in microgravity p 3235 N93-29757
Improved heat removal by microscopic surface texturing of capillaries [AD-A263483] p 3424 N93-29966
Pulse mitigation and heat transfer enhancement techniques. Volume 5: Transient liquid movement in heat pipe wicks [AD-A264513] p 3426 N93-30403
HEAT PUMPS
Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392
Complex-compound heat pump: Topical report on phase 1 results [PB93-185460] p 3466 N93-30814
HEAT RESISTANT ALLOYS
Fundamental aspects in the design of passive alloys [DE93-009028] p 3320 N93-28545
Planning of a West Virginia University Research Center in the basic materials sciences [DE93-011731] p 3592 N93-28647
High temperature creep and oxidation resistant chromium silicide matrix alloy containing molybdenum [NASA-CASE-LEW-15697-1] p 3323 N93-29172
Platinum-modified diffusion aluminide coatings on nickel-base superalloys [AD-A263597] p 3325 N93-29981
Examination of formability to seamless tubes on Ni-Cr-W superalloy [DE93-764158] p 3326 N93-30396
Development of Ni-Cr-W superalloys for high temperature components in high temperature gas-cooled reactors, part 2 [DE93-764469] p 3326 N93-30399
Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F [AD-A263747] p 3327 N93-30812
HEAT SINKS
The microchannel heatsink with liquid nitrogen cooling [DE93-009258] p 3422 N93-29300
Semiconductor cooling apparatus [NASA-CASE-LEW-14162-3] p 3299 N93-29614
Performance of thermal adhesives in forced convection p 3293 N93-30974
HEAT STORAGE
Thermal energy storage flight experiment in microgravity p 3265 N93-28720
Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads [AD-A263497] p 3423 N93-29339
HEAT TOLERANCE
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits [AD-A262862] p 3506 N93-29471
HEAT TRANSFER
Analysis of electrothermal interactions in power semiconductor modules [ETN-93-93800] p 3591 N93-28470
Small hydrogen/oxygen rocket flowfield behavior from heat flux measurements [NASA-TM-106233] p 3286 N93-28619
Theoretical and experimental study of thermoacoustic engines [AD-A261934] p 3561 N93-28995
Flow phenomena in turbomachines [AD-A263049] p 3420 N93-29141
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade [NASA-TM-106187] p 3420 N93-29157
A manipulator kinematic design for high-vacuum operation [DE93-010264] p 3444 N93-29247
Transient response of embedded thermocouples [DE93-009889] p 3431 N93-29325
Technology transfer personnel exchange at the Boeing Company [DE93-010190] p 3625 N93-29329
Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load [AD-A263496] p 3422 N93-29338
Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads [AD-A263497] p 3423 N93-29339
Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling [AD-A263495] p 3423 N93-29352
Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392
Two-dimensional model for current and heat transport in solid-armature railguns [AD-A262014] p 3271 N93-29394
Semiconductor cooling apparatus [NASA-CASE-LEW-14162-3] p 3299 N93-29614
Heat Transfer and Cooling in Gas Turbines [AGARD-CP-527] p 3252 N93-29926
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928
Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931
The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932
Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions p 3253 N93-29933
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions p 3253 N93-29934
Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935
Heat transfer with moderate free stream turbulence p 3254 N93-29936
Cooling geometry optimization using liquid crystal technique p 3254 N93-29939
Fundamental studies of impingement cooling thermal boundary conditions p 3254 N93-29940
Prediction of jet impingement cooling scheme characteristics (airfoil leading edge application) p 3255 N93-29941
An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels p 3255 N93-29942
Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases p 3255 N93-29943
The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces p 3255 N93-29944
Transient thermal behaviour of a compressor rotor with axial cooling air flow and co-rotating or contra-rotating shaft p 3255 N93-29946
Flow and heat transfer between gas-turbine discs p 3256 N93-29950
Heat transfer and leakage in high-speed rotating stepped labyrinth seals p 3256 N93-29951
Fluid flow and heat transfer in the entrance region of an annulus between independently rotating tubes with a turbulent axial flow p 3256 N93-29952
Impingement/effusion cooling p 3257 N93-29954
Coupling of 3D-Navier-Stokes external flow calculations and internal 3D-heat conduction calculations for cooled turbine blades p 3258 N93-29961
Navier-Stokes analysis of three-dimensional flow and heat transfer inside turbine blade rows p 3259 N93-29963
Improved heat removal by microscopic surface texturing of capillaries [AD-A263483] p 3424 N93-29966
Direct use geothermal applications for brazed plate heat exchangers [DE93-008559] p 3465 N93-30011
Analysis of thermal bar using boundary-layer integral equations gradients [MATHS-REPT-A-177] p 3462 N93-30107
Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling [AD-A264174] p 3425 N93-30155
Pulse mitigation and heat transfer enhancement techniques. Volume 5: Transient liquid movement in heat pipe wicks [AD-A264513] p 3426 N93-30403
Quantum group and symmetry of the heat equation [DE93-607560] p 3605 N93-30779
Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures [PB93-178598] p 3475 N93-30887
HEAT TRANSFER COEFFICIENTS
Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane p 3253 N93-29930
Cooling geometry optimization using liquid crystal technique p 3254 N93-29939

Prediction of jet impingement cooling scheme characteristics (airfoil leading edge application)
p 3255 N93-29941
The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces
p 3255 N93-29944
Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures
[PB93-178598] p 3475 N93-30887

HEAT TRANSMISSION
Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158
Investigation of thermoacoustic muffler
[AD-A262009] p 3562 N93-29392

HEAT TREATMENT
Oxidation behavior in reaction-bonded aluminum-silicon alloy/alumina powder compacts
[DE93-010407] p 3298 N93-29191
Effect of lead addition on the formation of superconducting phases in Bi-Sr-Ca-Cu-O ceramics
[DE93-606893] p 3339 N93-30773
Thermoforming from a systems viewpoint
p 3293 N93-30967

HEATERS
Heating head for induction heating apparatus
[NASA-CASE-LAR-14429-1] p 3407 N93-29173
Performance of thermal adhesives in forced convection p 3293 N93-30974

HEATING
Errors when shock waves interact due to numerical shock width
[DE93-010699] p 3426 N93-30484

HEAVING
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103

HEAVY IONS
Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569
Studies of relativistic heavy ion collisions at the AGS (E814/E877)
[DE93-008541] p 3564 N93-28678
Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317
Heavy ion measurement on LDEF
p 3573 N93-29644
Progress report on the Heavy Ions in Space (HIIS) experiment p 3573 N93-29645
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807
Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002
Studies of fluctuation processes in nuclear collisions
[DE93-011263] p 3576 N93-30054
Pulse control in an accelerator for heavy-ion fusion
[DE93-009527] p 3576 N93-30390

HEAVY LIFT LAUNCH VEHICLES
Spacely's rockets: Personnel launch system/family of heavy lift launch vehicles p 3234 N93-29752

HEAVY NUCLEI
Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626
Progress report on the ultra heavy cosmic ray experiment (AO178) p 3654 N93-29646

HELICOPTERS
Flight evaluation of a computer aided low-altitude helicopter flight guidance system p 3260 N93-28869
Helicopter approach capability using the differential global positioning system
[NASA-CR-193183] p 3245 N93-28936
A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152
Aerodynamic characteristics of a rotorcraft airfoil designed for the tip region of a main rotor blade
[NASA-TM-4264] p 3240 N93-29450
External acoustical noise measurements for aviation systems
[AD-A263138] p 3562 N93-29480
Models for performance assessment of HF antennas on the CH-135/Twin Huey helicopter
p 3366 N93-30291
NASA/FAA helicopter simulator workshop
[NASA-CP-3156] p 3236 N93-30673
Part 1: Executive summary p 3236 N93-30674
Helicopter simulator standards p 3236 N93-30675
Helicopter simulation: An aircrew training and qualification perspective p 3236 N93-30676
Training effectiveness assessment: Where are we?
p 3236 N93-30679
Current training: Where are we? p 3236 N93-30680
Helicopter simulator qualification
p 3237 N93-30681
Helicopter simulation: Making it work
p 3237 N93-30682
Helicopter training simulators: Key market factors
p 3237 N93-30683
Training effectiveness assessment: Methodological problems and issues p 3237 N93-30684
Progress through precedent: Going where no helicopter simulator has gone before p 3237 N93-30686
Transfer of training and simulator qualification or myth and folklore in helicopter simulation
p 3237 N93-30687
Validation and upgrading of physically based mathematical models p 3237 N93-30688
Frequency-response techniques for documentation and improvement of rotorcraft simulators
p 3237 N93-30689
Bandwidth and SIMDUCE as simulator fidelity criteria
p 3238 N93-30690
Methodology development for evaluation of selective-fidelity rotorcraft simulation
p 3238 N93-30691
Strong parallel blade-vortex interaction and noise propagation in helicopter flight p 3563 N93-30980
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-193468] p 3400 N93-31036

HELIOSEISMOLOGY
XRONOS: A timing analysis software package. User's guide, version 3.00
[NASA-TM-109222] p 3532 N93-30023

HELIOSTATS
Thermal effects testing at the National Solar Thermal Test Facility
[DE93-009825] p 3465 N93-30391
Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

HELIUM
Polarization dependence of the ionization of helium and neon by 120 femtosecond pulses at 614 nm
[DE93-010514] p 3564 N93-28762
Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849

HELIUM ISOTOPES
Effects of internal helium on mechanical properties of Nitronic (tm) 40 stainless steel
[DE93-009902] p 3324 N93-29265
Reaction and reorientation of electronically excited H2(B)
[DE93-010435] p 3569 N93-29860

HELIUM-NEON LASERS
Measurement of a Michelson interferometer mirror velocity with a time interval analyzer
[AD-A263009] p 3430 N93-28659
Experimental test of hole-coupled FEL resonator designs using a CW-HeNe laser
[DE93-010439] p 3440 N93-30530

HELMET MOUNTED DISPLAYS
Low-cost helmet-mounted displays
[AD-A262616] p 3501 N93-28479
Head-steered sensor flight test results and implications p 3502 N93-28859
The quest for an integrated flying helmet
p 3502 N93-28860
Oculo-motor responses and virtual image displays
p 3503 N93-28862
Head mounted displays for virtual reality
[AD-A263498] p 3506 N93-29340

HELMETS
The quest for an integrated flying helmet
p 3502 N93-28860
Sound attenuation characteristics of the standard DH-132A and SPH-4 helmets worn in combination with standard issue earplugs
[AD-A263011] p 3506 N93-29406
Helmet visor support apparatus
[AD-D015684] p 3507 N93-29606
Methods for characterizing the human head for the design of helmets
[AD-A263875] p 3507 N93-29889

HEMODYNAMICS
Acquisition of physiological data during G-induced Loss of Consciousness (G-LOC)
[AD-A264492] p 3496 N93-30400

HEPTANES
NMR studies of molecules in liquid crystals and graphite
[DE93-010423] p 3569 N93-29805

HERMITIAN POLYNOMIAL
A diffusion approximation for a network of reservoirs with power law release rule
[AD-A263753] p 3550 N93-29872

HETEROCYCLIC COMPOUNDS
Thermodynamic properties for polycyclic systems by non-calorimetric methods
[DE93-011373] p 3603 N93-28747

HETERODYNING
Development of a 9.3 micrometer CW LIDAR for the study of atmospheric aerosol
[NASA-CR-193227] p 3381 N93-29105
Design of a high resolution spatial heterodyne interferometer
[AD-A262867] p 3285 N93-29461

HETEROGENEITY
Possibilistic measurement and set statistics
p 3517 N93-29567
Applications of transition metal compounds in the preparation of useful silicon-containing ceramics
[AD-A264028] p 3335 N93-30028
Organometallic and surface chemistry of mixed-metal systems
[DE93-012686] p 3325 N93-30059

HETEROJUNCTIONS
Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501
Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569
Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776

HEURISTIC METHODS
Inverse problems: Fuzzy representation of uncertainty generates a regularization p 3516 N93-29563
Planning collision free paths for two cooperating robots using a divide-and-conquer C-space traversal heuristic
[NASA-CR-193252] p 3542 N93-29771
Evolving neural network architecture
[AD-A264802] p 3544 N93-30592

HEXANITROSTILBENE
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069

HIERARCHIES
The meta model hierarchy: A framework for information systems concepts and techniques
[TR-92-17] p 3611 N93-28481
Fuzzy coordinator in control problems
p 3515 N93-29552
Hierarchical model of matching p 3519 N93-29580
AHP version 5.1 user's manual
[DE93-007050] p 3532 N93-30034

HIGH ALTITUDE
Beta-adrenergic blockade and lactate metabolism during exercise at high altitude
[AD-A263544] p 3495 N93-29820

HIGH ALTITUDE ENVIRONMENTS
The Environmental Symptoms Questionnaire (ESQ): Development and application
[AD-A264127] p 3495 N93-30196

HIGH CURRENT
High-current negative-ion beam transport
[DE93-010732] p 3575 N93-29809

HIGH ELECTRON MOBILITY TRANSISTORS
Development of Si(1-x)Ge(x) technology for microwave sensing applications
[NASA-TM-106157] p 3405 N93-28610
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-193137] p 3509 N93-28895

HIGH ENERGY ELECTRONS
Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446
Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787
Hard photon emission from high energy electrons and positrons in single crystals
[DE93-606328] p 3600 N93-30770

HIGH ENERGY FUELS
Nuclear isomers as ultra-high-energy-density materials
[DE93-009520] p 3568 N93-29784

HIGH ENERGY INTERACTIONS
Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969
Maximizing the luminosity of hadron, supercolliders at 10-100 TeV
[DE93-009247] p 3574 N93-29103
Elementary particle interactions
[DE93-005113] p 3568 N93-29764

Study of heavy-flavored particles [DE93-011535] p 3569 N93-30128

Requirements for a system to analyze HEP events using database computing [DE93-009960] p 3576 N93-30527

HIGH FIELD MAGNETS

Microstructural understanding and critical current optimization of advanced high field superconductors [DE93-011046] p 3592 N93-28643

HIGH LEVEL LANGUAGES

Applying high-level language paradigms to communications software for distributed systems [AD-A263001] p 3528 N93-29463

A C++ interface for programming on the Connection Machine [INRIA-RR-1698] p 3538 N93-29487

Implementation of parallel algorithms [AD-A263126] p 3529 N93-29496

NESL: A nested data-parallel language (Version 2.6) [AD-A263548] p 3530 N93-29822

HIGH POWER LASERS

All solid-state high power visible laser [NASA-CR-193163] p 3436 N93-28623

Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers [DE93-008706] p 3586 N93-29093

Fusion laser oscillator and pulse-forming system using integrated optics [DE93-009286] p 3588 N93-29780

Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method [AD-A263997] p 3439 N93-29867

HIGH PRESSURE

High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures [AD-A263611] p 3311 N93-29283

Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

Sensitive detection of new superconductors created at ultra high pressures [AD-A264340] p 3597 N93-30161

Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures [AD-A264179] p 3497 N93-30882

HIGH PRESSURE OXYGEN

Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing [NASA-CR-191036] p 3448 N93-31039

HIGH RESOLUTION

Ultra-high resolution water window x ray microscope optics design and analysis [NASA-CR-193225] p 3578 N93-29128

Geographic information system for fusion and analysis of high-resolution remote sensing and ground truth data p 3614 N93-29234

Design of a high resolution spatial heterodyne interferometer [AD-A262867] p 3285 N93-29461

High resolution free-electron laser spectroscopy [AD-A263734] p 3439 N93-29853

HIGH REYNOLDS NUMBER

The development of a mixing layer under the action of weak streamwise vortices [NASA-TM-106089] p 3418 N93-28947

High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade [NASA-TM-106187] p 3420 N93-29157

High-Reynolds-number test of a 5-percent-thick low-aspect-ratio semispan wing in the Langley 0.3-meter transonic cryogenic tunnel: Wing pressure distributions [NASA-TM-4227] p 3240 N93-29449

Vortex shedding by blunt/bluff bodies at high Reynolds numbers. Volume 4: Rectangles [AD-A264154] p 3241 N93-30151

Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 1: Data analysis [AD-A264151] p 3241 N93-30171

Vortex shedding by Blunt/Bluff bodies at high reynolds numbers. Volume 2: Cylinders, octagon, hexagon [AD-A264152] p 3241 N93-30172

Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 3. Cubes [AD-A264153] p 3242 N93-30173

Compressible turbulence in a high-speed high Reynolds number mixing layer p 3242 N93-30583

HIGH SPEED

Flash x ray system: Techniques and applications [DE93-011477] p 3430 N93-28645

The development of a parachute system for aerial delivery from high speed cargo aircraft [DE93-008339] p 3239 N93-29035

Weakly nonlinear dynamics of near-CJ detonation waves [DE93-007344] p 3424 N93-29836

The HSCT mission analysis of waverider designs [NASA-CR-193467] p 3243 N93-31037

HIGH SPEED PHOTOGRAPHY

High-voltage pulse generator capable of 2000 J at 10 kV [AD-A262034] p 3407 N93-28999

Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136

HIGH STRENGTH

Lightweight flexible composite tent materials [AD-A263021] p 3295 N93-28660

HIGH STRENGTH ALLOYS

Fundamental aspects in the design of passive alloys [DE93-009028] p 3320 N93-28545

Mechanisms of fracture and creep of structural alloys [AD-A263108] p 3324 N93-29799

HIGH STRENGTH STEELS

Transformation plasticity in ductile solids [DE93-008636] p 3321 N93-28902

Bainitic stabilization of austenite in low alloy steels [DE93-008275] p 3321 N93-28957

The growth of small corrosion fatigue cracks in alloy 2024 [NASA-TM-107755] p 3451 N93-29069

HIGH TEMPERATURE

Mechanics of elevated temperature fatigue damage in fiber-reinforced ceramics [AD-A262403] p 3329 N93-28495

Healing of lithographically introduced flaws in glass and glass containing ceramics [DE93-010453] p 3330 N93-28761

A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800

Program for an improved hypersonic temperature-sensing probe [NASA-CR-186025] p 3431 N93-29066

High temperature creep and oxidation resistant chromium silicide matrix alloy containing molybdenum [NASA-CASE-LEW-15697-1] p 3323 N93-29172

Novel polymer compositions for high-temperature membrane applications, phase 1 [PB93-174126] p 3331 N93-29201

Aluminium-high strength material by mechanical alloying and reaction milling: Basics of processing and characterisation of material [ESA-TT-1249] p 3324 N93-29272

Synthesis and properties of a cation-conducting, high temperature polymer electrolyte [AD-A263557] p 3334 N93-29825

Study of codeposition of aluminum-haffnium and deposition of yttrium by the cementation technique: Elaboration of Ni-Cr-Al and Ni-Cr-Al-Hf felt materials [ONERA-NT-1990-9] p 3336 N93-30112

Constitutive laws for deformation and dynamic recrystallization in cubic metals [DE93-010740] p 3326 N93-30486

Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g) [AD-A264297] p 3601 N93-30819

Design, synthesis, and chemical processing of hierarchical ceramic structures for aerospace applications [AD-A264227] p 3339 N93-30885

HIGH TEMPERATURE AIR

Characterization and optimization of a Hot Air Solder-Leveling System [DE93-010188] p 3332 N93-29328

Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931

HIGH TEMPERATURE ENVIRONMENTS

Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F [AD-A263747] p 3327 N93-30812

HIGH TEMPERATURE FLUIDS

Vibrational spectroscopy of shock-compressed fluids p 3318 N93-30072

HIGH TEMPERATURE GASES

Kinetic studies on gas-phase reaction mechanisms important to the combustion of energetic materials: The CO/N2O reaction p 3347 N93-30084

Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing [NASA-CR-191036] p 3448 N93-31039

HIGH TEMPERATURE PLASMAS

Edge plasma control by RF electric field in Compact Helical System (CHS) [DE93-753242] p 3583 N93-28532

Development of coherent x ray lasers [DE93-009288] p 3437 N93-29104

Inner-shell photo-ionized x ray laser schemes [DE93-009285] p 3438 N93-29309

A new multichannel soft x ray framing camera for fusion experiments [DE93-009302] p 3432 N93-29773

HIGH TEMPERATURE RESEARCH

Research and development of an airborne multispectral scanner to measure fire, terrestrial and atmospheric characteristics (50 channel) [NASA-CR-193121] p 3456 N93-28620

A high-temperature furnace for applications in microgravity p 3229 N93-29723

HIGH TEMPERATURE SUPERCONDUCTORS

ORNL superconducting technology program for electric energy systems [DE93-009588] p 3404 N93-28523

Processing, fabrication, and demonstration of HTS integrated microwave circuits [AD-A263161] p 3406 N93-28940

Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays [DE93-008713] p 3593 N93-29094

Symposium on high temperature superconductors: Materials research for emerging technologies [AD-A263120] p 3409 N93-29495

Submillimeter and microwave residual losses in epitaxial films of Y-Ba-Cu-O and Tl-Ca-Ba-Cu-O [DE93-010430] p 3596 N93-29868

Sensitive detection of new superconductors created at ultra high pressures [AD-A264340] p 3597 N93-30161

The Road to Room Temperature Superconductivity Workshop [AD-A264633] p 3561 N93-30519

Guideway structural design and power/propulsion/braking in relation to guideways, volume 1 [PB93-169902] p 3447 N93-30820

A dynamical model of structural phase transition in La2CuO4 [DE93-605325] p 3602 N93-31025

HIGH TEMPERATURE TESTS

Ion-beam-assisted deposition of wear-resistant coatings [DE93-011529] p 3330 N93-28687

Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components [DE93-753271] p 3299 N93-30004

HIGH VACUUM

A manipulator kinematic design for high-vacuum operation [DE93-010264] p 3444 N93-29247

HIGH VOLTAGES

LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690

Optimum design of multiwire cages for high-voltage applications [AD-A264310] p 3400 N93-30995

HILBERT SPACE

Classification theorem for principal fibre bundles, Berry's phase, and exact cycle evolution [DE93-011114] p 3556 N93-28601

Nth roots of normal contractions [DE92-644725] p 3557 N93-30985

HILBERT TRANSFORMATION

The general theory of convolutional codes p 3385 N93-29595

HILSCH TUBES

The structure and dynamics of the vorticity and passive scalar fields at small scales in homogeneous isotropic turbulence p 3427 N93-30625

HIPPOCAMPUS

Multiple neuron recording in the hippocampus of freely moving animals [AD-A264807] p 3492 N93-30594

HISTORIES

The prehistory of ESRO, 1959 - 1960 [ESA-HSR-1] p 3660 N93-29500

What's past is prologue: Supporting global change research with historical data [DE93-005777] p 3472 N93-30009

HMX

Thermal decomposition of nitramines p 3318 N93-30065

Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069

HODOGRAPHS

Case study of the operational usefulness of the sharp workstation in forecasting a mesocyclone-induced cold sector tornado event in California [PB93-178697] p 3485 N93-30889

HODOSCOPES

Spin dependent phenomena in medium energy physics [DE93-010972] p 3565 N93-28849

HOLDERS

System for testing bearings [NASA-CASE-MFS-28589-1] p 3445 N93-29618

HOLE BURNING

4D interconnect experimental development [AD-A264298] p 3540 N93-30895

HOLE GEOMETRY (MECHANICS)

Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591

HOLE MOBILITY

Uniaxially stressed Ge:Ga and Ge:Be [DE93-010426] p 3594 N93-29150

HOLES (ELECTRON DEFICIENCIES)

Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids [AD-A264711] p 3598 N93-30501

Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids [AD-A264714] p 3600 N93-30569

HOLES (MECHANICS)

Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591

Mold bolt and means for achieving close tolerances between bolts and bolt holes [NASA-CASE-MFS-28720-1] p 3447 N93-30567

HOLMIUM

Holmium quasi-two level laser [AD-D015706] p 3440 N93-30427

HOLOGRAPHIC INTERFEROMETRY

The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces p 3255 N93-29944

HOLOGRAPHIC SPECTROSCOPY

Imaging spectrometers using concave holographic gratings p 3434 N93-28783

HOLOGRAPHY

Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779

Development of coherent x ray lasers [DE93-009288] p 3437 N93-29104

Iterative encoding methods for computer generated holograms [AD-A263705] p 3431 N93-29297

Diffraction and holography with photoelectrons and Auger electrons: Some new directions [DE93-007664] p 3313 N93-29766

4D interconnect experimental development [AD-A264298] p 3540 N93-30895

HOMOGENEITY

Abelian gauge theories on homogeneous spaces [DE92-644730] p 3607 N93-30921

HOMOGENEOUS TURBULENCE

The structure and dynamics of the vorticity and passive scalar fields at small scales in homogeneous isotropic turbulence p 3427 N93-30625

HOMOLOGY

Equivariant elliptic homology [DE92-641338] p 3557 N93-30981

HOMOMORPHISMS

Equivariant elliptic homology [DE92-641338] p 3557 N93-30981

HONEYCOMB STRUCTURES

Beta/gamma Monte Carlo transport in repetitive structures of satellite systems [DE93-007610] p 3281 N93-30509

HORIZON

Utility of a ghost horizon and climb/dive ladder line tapering on a head-up display [AD-A264401] p 3508 N93-30167

HORMONES

Molecular approach to hypothalamic rhythms [AD-A264438] p 3496 N93-30421

HORN ANTENNAS

Wide-bandwidth high-resolution search for extraterrestrial intelligence [NASA-CR-193137] p 3509 N93-28895

HOT CORROSION

Platinum-modified diffusion aluminide coatings on nickel-base superalloys [AD-A263597] p 3325 N93-29981

Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F [AD-A263747] p 3327 N93-30812

HOT ISOSTATIC PRESSING

Development of adherent ceramic coatings to reduce contact stress damage of ceramics [DE93-012518] p 3336 N93-30182

Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g) [AD-A264297] p 3601 N93-30819

HOT WORKING

Examination of formability to seamless tubes on Ni-Cr-W superalloy [DE93-764158] p 3326 N93-30396

HOUSINGS

Boron carbide aluminum cermets for external pressure housing applications [AD-A262749] p 3333 N93-29404

Elastic stability considerations for deep submergence ceramic pressure housing [AD-A264824] p 3454 N93-30598

HTPB PROPELLANTS

Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080

HUBBLE SPACE TELESCOPE

Digital image compression using artificial neural networks p 3624 N93-28811

HULLS (STRUCTURES)

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 2 [AD-A263814] p 3335 N93-29881

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 1 [AD-A263813] p 3335 N93-29886

HUMAN BEHAVIOR

Visualization techniques for analyzing control of human movement: Affine mappings between multi-dimensional spaces p 3508 N93-30204

HUMAN BEINGS

Comparative mutagenesis of human cells in vivo and in vitro [DE93-012269] p 3490 N93-28651

Sudden loading and fatigue effects on the human spine [PB93-167526] p 3493 N93-29199

HUMAN FACTORS ENGINEERING

Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies [AGARD-CP-520] p 3501 N93-28850

A new class of mission support for combat air-crew p 3501 N93-28854

The design and development of the new RAF standard HUD format p 3502 N93-28856

Operator and automation capability analysis: Picking the right team p 3503 N93-28864

Ergonomic development of digital map displays p 3503 N93-28866

System automation and pilot-vehicle-interface for unconstrained low-altitude night attack p 3503 N93-28867

Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA [DE93-001923] p 3505 N93-28942

NASA supporting studies for microgravity research on eye movements [NASA-CR-193233] p 3493 N93-29041

Anthropometric data from launch and entry suited test subjects for the design of a recumbent seating system [NASA-TM-104769] p 3505 N93-29044

Exercise/recreation facility for a lunar or Mars analog p 3230 N93-29733

Mars habitat p 3233 N93-29747

Selenia: A habitability study for the development of a third generation lunar base p 3233 N93-29748

An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information [AD-A263874] p 3507 N93-29888

Handedness and motor programming effects of manual control and movement [AD-A264022] p 3499 N93-30027

Managing operational intelligence overload: Guidelines for avoiding decision paralysis [AD-A264184] p 3610 N93-30158

Discomfort glare from high-intensity discharge headlamps: Effects of context and experience [PB93-174720] p 3496 N93-30659

HUMAN PERFORMANCE

Human capabilities and limitations in situation awareness p 3503 N93-28863

Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA [DE93-001923] p 3505 N93-28942

The dynamics of visual representation, attention, encoding, and retrieval processes [AD-A264674] p 3500 N93-30543

Determinants of performance rating accuracy: A field study [AD-A264726] p 3500 N93-30575

The quality assurance liaison: Combined technical and quality assurance support [DE93-008725] p 3450 N93-30636

HUMAN REACTIONS

Armstrong Laboratory space visual function tester program p 3267 N93-28739

The meteorological database [DE93-007289] p 3481 N93-29054

HUMAN TOLERANCES

Issues on human acceleration tolerance after long-duration space flights [NASA-TM-104753] p 3495 N93-29651

HUMIDITY

Environmental effects on stitched RTM composites [NASA-CR-193221] p 3297 N93-29107

Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits [AD-A262862] p 3506 N93-29471

HUNGARY

Remote sensing in Czechoslovakia and Hungary: An analysis of the possible co-operation of The Netherlands with Czechoslovakia and Hungary in the field of remote sensing [BCRS-92-12] p 3461 N93-29466

HURRICANES

Rhode Island hurricanes and tropical storms: A fifty-six year summary, 1936-1991 [PB93-162006] p 3481 N93-29198

Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts) [PB93-174993] p 3485 N93-30758

HYBRID CIRCUITS

Analysis of electrothermal interactions in power semiconductor modules [ETN-93-93800] p 3591 N93-28470

HYBRID COMPOSITES

Nonlinear analyses of composite aerospace structures in sonic fatigue [NASA-CR-193124] p 3451 N93-29154

HYBRID PROPULSION

Battery testing at Argonne National Laboratory [DE93-009204] p 3407 N93-29036

The ANL electric vehicle battery R/D program for DOE-EHP [DE93-010658] p 3408 N93-29311

HYDRAULIC EQUIPMENT

Siphon breaker design requirements [DE93-011799] p 3425 N93-30132

Experimental and analytical investigation of finger-follower cam systems p 3446 N93-30378

HYDRAULICS

The hydraulic analysis of cylindrical Flibe jets in a HYLIFE-2 ICF reactor [DE93-009234] p 3586 N93-29053

HYDRAZINES

APU diaphragm testing. Test plan [NASA-TM-108251] p 3271 N93-29387

APU diaphragm testing [NASA-TM-108254] p 3272 N93-29501

HYDRAZOIC ACID

Spectroscopic probes of vibrationally excited molecules at chemically significant energies [DE93-012328] p 3564 N93-28652

HYDRIDES

A study of the chemical mechanism in lubrication [DE93-012230] p 3330 N93-28650

HYDROCARBON COMBUSTION

Rate constant determinations of reactions H + HNO from ab initio reaction path calculations p 3319 N93-30099

HYDROCARBON FUELS

High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures [AD-A263611] p 3311 N93-29283

HYDROCARBONS

Laser spectroscopy of hydrocarbon radicals [DE93-012555] p 3436 N93-28653

Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1 [PB93-173797] p 3468 N93-28899

High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures [AD-A263611] p 3311 N93-29283

Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide [PB93-173805-VOL-2] p 3471 N93-29861

Carborane-(silane or siloxane)-unsaturated hydrocarbon based thermosetting polymers [AD-D015718] p 3338 N93-30580

Carborane-(siloxane or silane)-unsaturated hydrocarbon based polymers [AD-D015717] p 3338 N93-30586

Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky [PB93-182244] p 3474 N93-30825

HYDROCHLORIC ACID

Polymeric materials for use in wet hydrochloric acid environments [DE93-010881] p 3330 N93-28600

HYDROCYANIC ACID

Thermal oxidation of HCN by NO2 in shock waves p 3318 N93-30064

Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069

HYDRODYNAMIC EQUATIONS

The basics of weather models
[AD-A263386] p 3483 N93-29850

HYDRODYNAMICS

A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578

Macrostatistical hydrodynamics
[DE93-012289] p 3417 N93-28751

Numerical modelling of the cold plasma with time-dependent, magnetohydrodynamic methods
[KFK-5053] p 3586 N93-29081

Implementation of a single-material version of PAGOSA on MIMD hypercubes
[SAND-92-0640] p 3526 N93-29127

Computational simulations of a soft x ray projection lithography laser plasma source
[DE93-009625] p 3437 N93-29264

Articulated fin/wing control system
[AD-D015712] p 3259 N93-29278

Hydrodynamic interactions among fibers in high efficiency filters
[DE93-007117] p 3424 N93-30035

Chemical dynamics simulations as a probe to the initiation and propagation of condensed phase detonations p 3318 N93-30071

Towards a better hydro for dynamic mix calculations
[DE93-010702] p 3426 N93-30485

Godunov-type methods for the equations of compressible fluid mechanics
[KFK-5058] p 3428 N93-31020

HYDROELECTRIC POWER STATIONS

Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2
[PB93-174779] p 3465 N93-30001

HYDROELECTRICITY

Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2
[PB93-174779] p 3465 N93-30001

New hydrogen technologies
[DE93-778353] p 3343 N93-30042

HYDROGEN

Photodissociation of HBr/LiF(001): A quantum mechanical model
[NASA-CR-193119] p 3603 N93-28933

FI-STM investigation of atomic hydrogen adsorption on the Si(100)2x1 surface
[AD-A262748] p 3567 N93-29403

Rate constant determinations of reactions H + HNO from ab initio reaction path calculations
p 3319 N93-30099

HYDROGEN ATOMS

Exotic atoms
[DE93-010242] p 3564 N93-28611

HYDROGEN BONDS

Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146

HYDROGEN EMBRITTLEMENT

Low temperature environmental embrittlement in ordered intermetallics
[DE93-009711] p 3324 N93-29786

HYDROGEN FUELS

New hydrogen technologies
[DE93-778353] p 3343 N93-30042

HYDROGEN IONS

High-current negative-ion beam transport
[DE93-010732] p 3575 N93-29809

Partial cross sections in H(-) photodetachment
[DE93-011570] p 3569 N93-30130

HYDROGEN OXYGEN ENGINES

Small hydrogen/oxygen rocket flowfield behavior from heat flux measurements
[NASA-TM-106233] p 3286 N93-28619

Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-192561] p 3287 N93-28680

Advanced engine study program
[NASA-CR-187217] p 3287 N93-28946

HYDROGEN PLASMA

High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606

HYDROGEN PRODUCTION

Hydrogen and sulfur production from hydrogen sulfide wastes
[DE93-008658] p 3310 N93-29052

New hydrogen technologies
[DE93-778353] p 3343 N93-30042

HYDROGEN SULFIDE

Hydrogen and sulfur production from hydrogen sulfide wastes
[DE93-008658] p 3310 N93-29052

Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446

Rates and mechanisms of reaction of hydrogen sulfide with iron chelates
[PB93-184299] p 3312 N93-29665

Acid gas treating by aqueous alkanolamines
[PB93-176188] p 3471 N93-29676

Direct use geothermal applications for brazed plate heat exchangers
[DE93-008559] p 3465 N93-30011

Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658

Hydrogen sulfide decomposition into hydrogen and sulfur by quinone cycles, part 1
[PB93-175297] p 3317 N93-30761

HYDROGENATION

Design of a high activity and selectivity alcohol catalyst
[DE93-012277] p 3309 N93-28750

HYDROGENOLYSIS

A novel process for methanol synthesis
[DE93-013070] p 3314 N93-30188

HYDROGEOLOGY

Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky
[PB93-182244] p 3474 N93-30825

Hydrogeology and ground-water-quality conditions at the Reno County Landfill, South-Central Kansas, 1990-1991
[PB93-183085] p 3474 N93-30826

HYDROGRAPHY

System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468

A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region
[AD-A263490] p 3488 N93-29819

Reception at Ascension Island, South Atlantic, of the transmissions from the Heard Island feasibility test
[PB93-176261] p 3394 N93-30662

Hydrographic observations in the western tropical and subtropical north Atlantic Ocean: Atlantic Climate Change Program (ACCP) and Western Tropical Atlantic Experiment (WESTRAX) during 1990
[PB93-184760] p 3489 N93-30827

HYDROLOGICAL CYCLE

Steady-state and transient modeling of tracer and nutrient distributions in the global ocean
[DE93-011043] p 3486 N93-28670

HYDROLOGY

Tank issues: Site characterization for external leak monitoring
[PB93-161156] p 3469 N93-29034

A diffusion approximation for a network of reservoirs with power law release rule
[AD-A263753] p 3550 N93-29872

HYDROLOGY MODELS

Geoscience center research
[AD-A263465] p 3462 N93-29834

A diffusion approximation for a network of reservoirs with power law release rule
[AD-A263753] p 3550 N93-29872

Annual report on monitoring of the unsaturated zone and recharge areas at INEL to the state of Idaho INLEL oversight committee
[DE93-012947] p 3473 N93-30187

HYDROLYSIS

Technical bases for precipitate hydrolysis process operating parameters, revision 1
[DE93-009894] p 3309 N93-28553

HYDROSTATIC PRESSURE

Hydrostatic and uniaxial behavior of a high density polyurethane foam (FR-3720) at various temperatures
[DE93-011486] p 3330 N93-28838

An analysis of the 70-meter antenna hydrostatic bearing by means of computer simulation p 3386 N93-29601

Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598

HYDROSTATICS

Hydrostatic and uniaxial behavior of a high density polyurethane foam (FR-3720) at various temperatures
[DE93-011486] p 3330 N93-28838

Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598

HYDROXYL RADICALS

Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146

HYGRAL PROPERTIES

Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076

HYPERBOLIC DIFFERENTIAL EQUATIONS

Numerical modelling of the cold plasma with time-dependent, magnetohydrodynamic methods
[KFK-5053] p 3586 N93-29081

Finite element approximation of the shallow water equations on the MASPAR
[AD-A264649] p 3489 N93-30525

HYPERBOLIC FUNCTIONS

Difference methods for hyperbolic problems with emphasis on space-centered approximations
[ONERA-NT-1990-4] p 3550 N93-30136

HYPERCUBE MULTIPROCESSORS

Design of a hardware discrete event simulation coprocessor
[AD-A262614] p 3537 N93-28478

A multiarchitecture parallel-processing development environment
[NASA-TM-106180] p 3538 N93-28628

Implementation of a multidomain Navier-Stokes code on the Intel iPSC2 hypercube
[FFA-TN-1992-37] p 3418 N93-28994

Implementation of a single-material version of PAGOSA on MIMD hypercubes
[SAND-92-0640] p 3526 N93-29127

Multiprocessing systems: Reliability modelling and analysis using multimode components and dependent failures
[AD-A264230] p 3540 N93-30364

HYPERFINE STRUCTURE

Theoretical hyperfine structure constants for transition metal atoms and ions
[DE93-012325] p 3566 N93-29183

HYPERNUCLEI

Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569

HYPERSONIC AIRCRAFT

ASUR p 3228 N93-29720

HYPERSONIC FLOW

Development of a 3-D Implicit Euler Code for Hypersonic and High Supersonic Flows
[ONERA-RSF-23/1123-AY-230A] p 3417 N93-28744

Inviscid quasi one-dimensional nonequilibrium flow
[FFA-TN-1992-35] p 3418 N93-28993

Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375

HYPERSONIC SPEED

Hypersonic lateral and directional stability characteristics of aeroassist flight experiment configuration in air and CF4
[NASA-TM-4435] p 3239 N93-29166

HYPERSONICS

Program for an improved hypersonic temperature-sensing probe
[NASA-CR-186025] p 3431 N93-29066

Hypersonic lateral and directional stability characteristics of aeroassist flight experiment configuration in air and CF4
[NASA-TM-4435] p 3239 N93-29166

HYPERVELOCITY IMPACT

Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355

Micrometeoroids and debris on LDEF
p 3638 N93-29356

Three-D crater analysis of LDEF impact features from stereo imagery p 3283 N93-29359

Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361

Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364

Hypervelocity impact facility for simulating materials exposure to impact by space debris
p 3283 N93-29365

SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2
p 3318 N93-29367

Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368

Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370

Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF)
p 3638 N93-29371

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces p 3638 N93-29378
The production and evolution of plasma and associated magnetic fields during hypervelocity impacts: Implications for planetary paleomagnetism p 3589 N93-30000
Hypervelocity impact testing of the Space Station utility distribution system carrier [NASA-TM-104771] p 3289 N93-30507

HYPERVELOCITY LAUNCHERS
ASUR p 3228 N93-29720

HYPERVELOCITY PROJECTILES
Ablative shielding for hypervelocity projectiles [NASA-CASE-MSC-21884-1] p 3331 N93-29088
SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2 p 3318 N93-29367
Interplanetary meteoroid debris in LDEF metal craters p 3638 N93-29372

HYPOKINESIA
Issues on human acceleration tolerance after long-duration space flights [NASA-TM-104753] p 3495 N93-29651

HYPOTHALAMUS
Control and circadian behavior by transplanted suprachiasmatic nuclei [AD-A264553] p 3496 N93-30382
Molecular approach to hypothalamic rhythms [AD-A264438] p 3496 N93-30421

HYPOTHESES
Handedness and motor programming effects of manual control and movement [AD-A264022] p 3499 N93-30027

I

ICE
Development of an airborne MMW FM-CW radar for mapping river ice [AD-A262655] p 3379 N93-28588
Dynamic ice structure interaction: Theory and applications [VTT-PUBS-90] p 3353 N93-28632
Drill/borescope system for the Mars Polar Pathfinder p 3647 N93-28805
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136
A passive infrared ice detection technique for helicopter applications [NASA-CR-193187] p 3244 N93-29152

ICE ENVIRONMENTS
The German satellite ground station in Antarctica: Realization and first results p 3458 N93-28924

ICE FORMATION
A passive infrared ice detection technique for helicopter applications [NASA-CR-193187] p 3244 N93-29152

ICE MAPPING
Development of an airborne MMW FM-CW radar for mapping river ice [AD-A262655] p 3379 N93-28588

ICE PREVENTION
FAA international conference on airplane ground deicing [AD-A263617] p 3244 N93-29286

ICE REPORTING
Leadex data report. Part 2: Rawinsonde and ice station data [AD-A263218] p 3483 N93-29491

IDEAL FLUIDS
Fourth-rank cosmology [DE92-641346] p 3637 N93-30997

IDEAL GAS
The thermodynamic properties of thianthrene and phenoxathiin [DE93-000124] p 3603 N93-28964
Tables of experimental data used for the correlation of the thermophysical properties of ethane [PB93-173417] p 3313 N93-29768

IGNITION
Design of the Nova Upgrade laser system for ignition fusion experiments [DE93-009077] p 3436 N93-29097
High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures [AD-A263611] p 3311 N93-29283
Fusion laser oscillator and pulse-forming system using integrated optics [DE93-009286] p 3588 N93-29780
Microstructural modeling of electrical breakdown in solid fuel propellants [AD-A263466] p 3342 N93-29835
Combustion/explosion chemistry of bulk materials p 3343 N93-30062
Strategies for understanding the deflagration-to-detonation transition p 3319 N93-30077
Pressure dependence of the reaction propagation rate of TATB to 40 GPa p 3319 N93-30082

IMAGE ANALYSIS
Multiscale morphological filtering for analysis of noisy and complex images p 3582 N93-28789
A planetary version of PC-McIDAS p 3614 N93-29236
Multisensor image analysis system [AD-A263679] p 3528 N93-29294
Quantitative analysis of properties and spatial relations of fuzzy image regions p 3510 N93-29523
A fuzzy clustering algorithm to detect planar and quadric shapes p 3511 N93-29524
Automatic rule generation for high-level vision p 3511 N93-29526
Encoding spatial images: A fuzzy set theory approach p 3511 N93-29527
Image segmentation using fuzzy LVQ clustering networks p 3511 N93-29528
Character recognition using a neural network model with fuzzy representation p 3512 N93-29536
Comparison of crisp and fuzzy character networks in handwritten word recognition p 3514 N93-29545
Modeling the bidirectional reflectance and spectra [AD-A263570] p 3462 N93-29830
Mixed limit theorems for pattern analysis [AD-A263735] p 3549 N93-29854
Neural network cloud classification research [AD-A264628] p 3484 N93-30176
Quantization effects in segmentation of range images p 3363 N93-30270
Recursive-batch estimation of structure and motion from stereo image sequences p 3363 N93-30271
Automatic detection of explosives using x ray imaging p 3244 N93-30275
Design and implementation of an interactive isochromatic fringe-analysis system using machine-vision techniques p 3369 N93-30305
Morphological and order statistic filters: A comparative study p 3375 N93-30345
Qualitative methods in computer vision [AD-A264335] p 3533 N93-30418

IMAGE CLASSIFICATION
Image classification using Markov random fields with two new relaxation methods: Deterministic pseudo annealing and modified metropolis dynamics [INRIA-RR-1606] p 3553 N93-28510

IMAGE CONTRAST
Digital image processing of descanned terrestrial ground photographs p 3459 N93-28928
Image enhancement using an analog device neural network p 3376 N93-30346

IMAGE ENHANCEMENT
Characterization of laboratory generated turbulence by optical phase measurements [AD-A262596] p 3480 N93-28465
Resolution-enhanced mapping spectrometer p 3434 N93-28794
Development of a new technique for image reconstruction, enhancement, and visualization [AD-A263145] p 3528 N93-29483
A new way to use fuzzy sets in image sharpening p 3363 N93-30273
Image enhancement using an analog device neural network p 3376 N93-30346

IMAGE FILTERS
Multiscale morphological filtering for analysis of noisy and complex images p 3582 N93-28789
Filtering interpolators for image comparison algorithms p 3463 N93-28797
Cloud classification from satellite imagery using neural computing p 3367 N93-30297
Semi-blind restoration of images distorted by random time varying point spread functions p 3375 N93-30344
Morphological and order statistic filters: A comparative study p 3375 N93-30345
Segmentation of SAR images p 3376 N93-30348

IMAGE INTENSIFIERS
Honeywell's compact, wide-angle UV-visible imaging sensor p 3582 N93-28806
Development of a new technique for image reconstruction, enhancement, and visualization [AD-A263145] p 3528 N93-29483

IMAGE PROCESSING
Coarse image motion for saccade control [OUEL-1916/92] p 3523 N93-28485
Image classification using Markov random fields with two new relaxation methods: Deterministic pseudo annealing and modified metropolis dynamics [INRIA-RR-1606] p 3553 N93-28510
Clementine sensor processing system p 3285 N93-28778
Filtering interpolators for image comparison algorithms p 3463 N93-28797
Systematic processing of Clementine data for scientific analyses p 3624 N93-28803
Digital image compression using artificial neural networks p 3624 N93-28811
A corner matching and tracking strategy applied to videophony [OUEL-1933/92] p 3380 N93-28896
A modular head/eye platform for real-time reactive vision [OUEL-1941/92] p 3505 N93-28897
Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR) [DLR-MITT-92-09] p 3456 N93-28915
The German PAF (Processing and Archiving Facilities) for ERS-1 p 3457 N93-28916
The interferometric SAR technology and its usability in the framework of ERS-1 p 3457 N93-28919
Forest examination with polarimetric radar image data p 3457 N93-28921
Digital image processing of descanned terrestrial ground photographs p 3459 N93-28928
Atmospheric correction of LANDSAT-TM-data for forest inventory p 3459 N93-28929
Model-oriented correction of thematic mapper raw data p 3459 N93-28930
Evidence-based classification of satellite image data p 3459 N93-28931
SAVS: A Space Data Analysis and Visualization System p 3614 N93-29235
Multisensor image analysis system [AD-A263679] p 3528 N93-29294
Information system for co-registration of CAESAR sea-images based on two dimensional image matching techniques (SCORE). Part 1: Introduction, user requirements, and feasibility tests [BCRS-90-40A-PT-1] p 3460 N93-29307
Preprocessing airborne remote sensing PARES calibration maintenance functional design document [BCRS-92-07] p 3460 N93-29321
The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction [DE93-010304] p 3567 N93-29416
Automated satellite image navigation [AD-A262868] p 3269 N93-29475
Automatic rule generation for high-level vision p 3511 N93-29526
Multiple image multipoint matching for automatic aerotriangulation p 3461 N93-29615
A new multichannel soft x ray framing camera for fusion experiments [DE93-009302] p 3432 N93-29773
What's past is prologue: Supporting global change research with historical data [DE93-005777] p 3472 N93-30009
Computing with neural maps: Application to perceptual and cognitive function [AD-A264056] p 3499 N93-30033
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2 [ISBN-0-9694170-1-2] p 3354 N93-30215
Feature segmentation using a multiple-stack based chain coding algorithm p 3359 N93-30243
An architecture for an analog VLSI neural network for early computer vision processing p 3359 N93-30244
Modelling and simulation of human retinal vision processing p 3363 N93-30269
A single band processor for the computation of range from optical absorbance p 3363 N93-30272
A new way to use fuzzy sets in image sharpening p 3363 N93-30273
On the implementation of the BIRIS range sensor for applications in robotic control and autonomous navigation p 3366 N93-30286
Applications of digital 3-D imaging p 3366 N93-30287
A robust multi-operator 3-D edge detection approach for range image segmentation p 3366 N93-30288
Recognizing partially overlapping objects p 3366 N93-30289
Segmentation of SAR images p 3376 N93-30348
Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System [DE93-006283] p 3412 N93-30370
Multiscale and multigrid information representation, extraction and fusion [AD-A264623] p 3393 N93-30386
Analysis and computation for vortex dynamics and rarefied gases [AD-A264705] p 3427 N93-30499

Infrared imaging array integrated in three dimensions directly on top of silicon circuits
[AD-A264707] p 3581 N93-30500
Laser based 3D volumetric display system
[AD-A264825] p 3441 N93-30599
Principal components of natural images: An analytical solution
[AD-A264800] p 3489 N93-30603
Transputers, parallel processing in embedded systems for image compression in space applications
[NLR-TP-89242-U] p 3522 N93-30840
An algorithm for simple and complex feature detection: From retina to primary visual cortex
[AD-A264306] p 3497 N93-30897

IMAGE RECONSTRUCTION
Three dimensional reconstruction of complex shapes based on the Delaunay triangulation
[INRIA-RR-1697] p 3547 N93-28616
The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction
[DE93-010304] p 3567 N93-29416
Development of a new technique for image reconstruction, enhancement, and visualization
[AD-A263145] p 3528 N93-29483
Quantization effects in segmentation of range images
p 3363 N93-30270
Recursive-batch estimation of structure and motion from stereo image sequences p 3363 N93-30271
Semi-blind restoration of images distorted by random time varying point spread functions
p 3375 N93-30344

IMAGE RESOLUTION
Characterization of laboratory generated turbulence by optical phase measurements
[AD-A262596] p 3480 N93-28465
Improved real-time imaging spectrometer
[NASA-CASE-NPO-18410-1-CU] p 3578 N93-29086
X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869
Method and apparatus for imaging an object in or through a scattering medium by using multiple-wave mixing
[AD-D015707] p 3581 N93-30410
MR-CDF: Managing multi-resolution scientific data
p 3618 N93-30456
Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight
[AD-A264661] p 3499 N93-30542
Multiresolution analysis of SAR data
[AD-A264727] p 3393 N93-30576
Laser based 3D volumetric display system
[AD-A264825] p 3441 N93-30599

IMAGERY
The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766

IMAGES
A tutorial on exit pupils and eye rotation with virtual image optical displays
[AD-A262399] p 3494 N93-29400
What is the center of the image?
[AD-A263550] p 3579 N93-29824
The Visible Human Project of the National Library of Medicine: Remote access and distribution of a multi-gigabyte data set p 3617 N93-30453

IMAGING RADAR
Similarities between synthetic aperature radar and ground probing radar imaging p 3376 N93-30347

IMAGING SPECTROMETERS
Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781
Imaging spectrometers using concave holographic gratings p 3434 N93-28783
Resolution-enhanced mapping spectrometer
p 3434 N93-28794
Ultraviolet imaging spectrometer p 3582 N93-28827
Improved real-time imaging spectrometer
[NASA-CASE-NPO-18410-1-CU] p 3578 N93-29086

IMAGING TECHNIQUES
Low-cost helmet-mounted displays
[AD-A262616] p 3501 N93-28479
Coarse image motion for saccade control
[OUEL-1916/92] p 3523 N93-28485
Recognizing parameterized objects from range data
[OUEL-1918/92] p 3523 N93-28486
Three dimensional reconstruction of complex shapes based on the Delaunay triangulation
[INRIA-RR-1697] p 3547 N93-28616
Preliminary design of an intermittent smoke flow visualization system
[NASA-CR-186027] p 3248 N93-28693
Polarimetric multispectral imaging technology
p 3434 N93-28774
Clementine sensor processing system
p 3285 N93-28778
Imaging spectrometers using concave holographic gratings p 3434 N93-28783
The Ultraviolet Plume Instrument (UVPI)
p 3285 N93-28784
Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799
Systematic processing of Clementine data for scientific analyses p 3624 N93-28803
Honeywell's compact, wide-angle UV-visible imaging sensor p 3582 N93-28806
A compact imaging detector of polarization and spectral content p 3582 N93-28810
Diffusion bonding
[DE93-011480] p 3442 N93-28837
A technique for single-pulse spectrum and pulse width measurements for an IR-FEL
[DE93-007732] p 3436 N93-28847
The multiplicity of T Tauri stars in the star forming regions Taurus-Auriga and Ophiuchus-Scorpius: A 2.2 micron speckle imaging survey p 3634 N93-28945
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969
What is underneath? Moving atoms and molecules to find out
[AD-A263363] p 3567 N93-29332
Optical slope/height measurements of small scale waves within the SAXON-FPN experiment
[AD-A262572] p 3487 N93-29422
Image segmentation using fuzzy LVQ clustering networks p 3511 N93-29528
Quantification of thermographic mapping techniques
[AD-A264020] p 3391 N93-30016
Applications of mesoscopic physics
[DE93-012104] p 3597 N93-30141
The AFOSR Workshop on the Future of EEG and MEG
[AD-A264338] p 3495 N93-30160
Method and apparatus for imaging an object in or through a scattering medium by using multiple-wave mixing
[AD-D015707] p 3581 N93-30410
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry
[DE93-011734] p 3427 N93-30489
A new tubeless nanosecond streak camera based on optical deflection and direct CCD imaging
[DE93-011893] p 3433 N93-30491
Infrared imaging array integrated in three dimensions directly on top of silicon circuits
[AD-A264707] p 3581 N93-30500
Observing and modelling F-region ionospheric dynamics using the OII 7320A emission p 3479 N93-30564

IMIDES
Synthesis of oligoimides and oligoimide anion radicals
[AD-A263129] p 3290 N93-29474

IMINES
Synthesis and polymerization of azaethylenes and aza-1,3-dienes
[AD-A263651] p 3332 N93-29290
Synthetic lubricating oil greases containing metal chelates of Schiff bases
[AD-D015694] p 3333 N93-29458

IMPACT
Comparison of impact results for several polymeric composites over a wide range of low impact velocities
p 3304 N93-30848

IMPACT DAMAGE
Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368
LDEF data: Comparisons with existing models
p 3283 N93-29375
Developments in impact damage modeling for laminated composite structures p 3305 N93-30857
Comparison of hand laid-up tape and filament wound composite cylinders and panels with and without impact damage p 3306 N93-30859
Experimental behavior of graphite-epoxy Y-stiffened specimens loaded in compression p 3307 N93-30872

IMPACT LOADS
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494
Molecular dynamics of detonation in crystals with defects p 3350 N93-30097
Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374
A ceramic fracture model for high velocity impact
[AD-A264728] p 3454 N93-30545
Delaminations in composite plates under impact loads
p 3304 N93-30849

IMPACT MELTS
Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368

IMPACT RESISTANCE
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494

IMPACT STRENGTH
The effect of material strength on segment penetration behavior
[AD-A263262] p 3453 N93-29801
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829

IMPACT TESTS
The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886
Axial impact of composites p 3297 N93-29078
The effect of material strength on segment penetration behavior
[AD-A263262] p 3453 N93-29801
Dislocation roles in energetic crystal responses
p 3348 N93-30086
Catastrophic collisions: Laboratory impact experiments, hydrocode simulations, and the scaling problem
p 3635 N93-30411
Hypervelocity impact testing of the Space Station utility distribution system carrier
[NASA-TM-104771] p 3289 N93-30507
Comparison of impact results for several polymeric composites over a wide range of low impact velocities
p 3304 N93-30848

IMPACT TOLERANCES
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494

IMPACTORS
Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770
Axial impact of composites p 3297 N93-29078
Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355
Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364
LDEF data: Comparisons with existing models
p 3283 N93-29375
Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces
p 3638 N93-29378

IMPEDANCE
Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

IMPEDANCE MEASUREMENT
Plasma diagnostics by antenna impedance measurements p 3400 N93-28820

IMPEDANCE PROBES
Plasma diagnostics by antenna impedance measurements p 3400 N93-28820

IMPINGEMENT
Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases
p 3255 N93-29943

IMPLANTED ELECTRODES (BIOLOGY)
Programmable interactive system for cochlear implant electrode stimulation
[AD-A262558] p 3494 N93-29421

IMPLOSIONS
Analysis of an MCG/fuse/PFS experiment
[DE93-007355] p 3410 N93-29812

IMPULSES
Wideband propagation measurements for wireless indoor communication
[PB93-175123] p 3382 N93-29202

IMPURITIES
Operational results of pilot cell test with cermet inert anodes
[DE93-009338] p 3322 N93-29061

IN SITU MEASUREMENT
In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques
[DE93-007699] p 3405 N93-28581
A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800
A team approach to the development of gamma ray and x ray remote sensing and in situ spectroscopy for planetary exploration missions p 3650 N93-28824
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331

In-situ temperature and concentration measurements of organosilicon decomposition in a chemical vapor deposition reactor
[ONERA-P-1990-3] p 3313 N93-30109
Oceanographic research towers in european waters
[AD-A264795] p 3489 N93-30612

IN-FLIGHT MONITORING
Spurious symptom reduction in fault monitoring
[NASA-CR-191453] p 3542 N93-29192

INCIDENT RADIATION
Measurement of projectile surface temperature by means of its infrared radiation: A preliminary study
[AD-A264053] p 3432 N93-30032

INCOHERENT SCATTER RADAR
The dynamic cusp at low altitudes: A case study combining Viking, DMSP, and Sondrestrom incoherent scatter radar observations
[NASA-CR-193152] p 3476 N93-28842
Observing and modelling F-region ionospheric dynamics using the OII 7320A emission p 3479 N93-30564

INCOMPRESSIBLE FLOW
The numerical solution of low Mach number flow in confined regions by Richardson extrapolation
[TRITA-NA-9207] p 3238 N93-29005
An efficient spectral integration method for the solution of the Navier-Stokes equations
[FFA-TN-1992-28] p 3418 N93-29009
Stabilized space-time finite element formulations for unsteady incompressible flows involving fluid-body interactions p 3419 N93-29040
Accuracy of least-squares methods for the Navier-Stokes equations
[NASA-TM-106209] p 3421 N93-29208
Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes
[AD-A263469] p 3424 N93-29838
A parallel implicit incompressible flow solver using unstructured meshes
[AD-A263395] p 3424 N93-29851

INCOMPRESSIBLE FLUIDS
Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes
[AD-A263469] p 3424 N93-29838

INCONEL (TRADEMARK)
An experimental investigation of radioactivity induced by ions associated with the operation of pulsed-power accelerators
[DE93-011478] p 3575 N93-29151

INDENTATION
Comparison of impact results for several polymeric composites over a wide range of low impact velocities
p 3304 N93-30848

INDEPENDENT VARIABLES
A closed-form formula for the manipulator regressor
p 3355 N93-30218

INDIUM ARSENIDES
Growth and development of GaInAsP for use in high-efficiency solar cells
[DE93-000098] p 3465 N93-30208

INDIUM PHOSPHIDES
Texturing of InP surfaces for device applications
[NASA-TM-106061] p 3321 N93-28618
Low temperature (LT) GaAs and related materials
[AD-A263607] p 3298 N93-29282
Fundamental studies of the morphology, chemistry, and electrical properties of metals on GaAs and other III-V semiconductor compounds
[AD-A264417] p 3597 N93-30120
Growth and development of GaInAsP for use in high-efficiency solar cells
[DE93-000098] p 3465 N93-30208

INDUCTION HEATING
Heating head for induction heating apparatus
[NASA-CASE-LAR-14429-1] p 3407 N93-29173

INDUSTRIAL PLANTS
Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961

INDUSTRIAL WASTES
Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1
[PB93-173797] p 3468 N93-28899
Hydrogen and sulfur production from hydrogen sulfide wastes
[DE93-008658] p 3310 N93-29052
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012

INDUSTRIES
ORNL superconducting technology program for electric energy systems
[DE93-009588] p 3404 N93-28523
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-010658] p 3408 N93-29311
The role of the University Licensing Office in transferring intellectual property to industry p 3626 N93-30698
High performance computing and communications program p 3627 N93-30715
National Media Laboratory p 3628 N93-30717
A research experiment on facilitation and formation of joint research and development programs between government, industry, and universities: Overview, preliminary findings, and observations
p 3628 N93-30725

INELASTIC SCATTERING
Neutron scattering studies of the structures and lattice dynamics of the alkali metals
[DE93-008272] p 3593 N93-28956
Applications of mesoscopic physics
[DE93-012104] p 3597 N93-30141
A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799

INERTIAL CONFINEMENT FUSION
Inertial confinement fusion target component fabrication and technology development support
[DE93-010836] p 3585 N93-28836
The hydraulic analysis of cylindrical Flibe jets in a HYLIFE-2 ICF reactor
[DE93-009234] p 3586 N93-29053
SIRIUS-P: An inertially confined direct drive laser fusion power reactor
[DE93-012433] p 3439 N93-30186

INERTIAL NAVIGATION
Flight evaluation of a computer aided low-altitude helicopter flight guidance system p 3260 N93-28869
System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468
High reliability, maintenance-free INS battery development
[AD-A264521] p 3412 N93-30406

INFERENCE
Study on various problems in statistical planning and inference
[AD-A262484] p 3554 N93-29411
Parametric likelihood inference for record breaking problems
[AD-A262546] p 3549 N93-29413
How to select combination operators for fuzzy expert systems using CRI p 3510 N93-29521
Evaluation of fuzzy inference systems using fuzzy least squares p 3513 N93-29539
Comparison between the performance of two classes of fuzzy controllers p 3517 N93-29566
Inference in fuzzy rule bases with conflicting evidence
p 3519 N93-29583
Some statistical inference problems in linear models and variance components models and their applications
[AD-A264062] p 3555 N93-29923

INFILTRATION
Infiltration/cure modeling of resin transfer molded composite materials using advanced fiber architectures
p 3303 N93-30843

INFLATABLE STRUCTURES
In-step inflatable antenna experiment
p 3263 N93-28701
Developing an inflatable solar array
p 3264 N93-28714

INFLATING
A computational model that couples aerodynamic and structural dynamic behavior of parachutes during the opening process
[AD-A264115] p 3241 N93-30119

INFORMATION
Formal definition of a conceptual language for the description and manipulation of information models
[TR-92-16] p 3523 N93-28503
Comparison of specificity and information for fuzzy domains p 3510 N93-29519
The axiomatic definition of a linguistic scale fuzziness degree, its major properties, and applications
p 3510 N93-29520
Automatic rule generation for high-level vision
p 3511 N93-29526
Information compression in the context model
p 3514 N93-29549
Managing operational intelligence overload: Guidelines for avoiding decision paralysis
[AD-A264184] p 3610 N93-30158

INFORMATION DISSEMINATION
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 28: The technical communication practices of Russian and US aerospace engineers and scientists
[NASA-TM-108249] p 3612 N93-28948
National collaboratories: Applying information technology for scientific research
[LC-93-83795] p 3612 N93-29129
The 9th FLICC Forum on Federal Information Policies
[PB93-184687] p 3624 N93-29668
LDEF archival system plan p 3624 N93-29704
NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 29: The US government technical report and the transfer of federally funded aerospace R and D
[NASA-TM-109221] p 3615 N93-29709
NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 30: The electronic transfer of information and aerospace knowledge diffusion
[NASA-TM-109223] p 3616 N93-30036
NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 31: The information-seeking behavior of engineers
[NASA-TM-109224] p 3616 N93-30037
Residual acceleration data on IML-1: Development of a data reduction and dissemination plan
[NASA-CR-193224] p 3281 N93-30038
Interagency Advanced Power Group (IAPG) Meeting Compendium
[DE93-006189] p 3670 N93-30212
High-speed data duplication/data distribution: An adjunct to the mass storage equation
p 3619 N93-30459
National Media Laboratory media testing results
p 3620 N93-30465
Technology Transfer and the Civil Space Program. Volume 2: Workshop proceedings
[NASA-TM-108250] p 3625 N93-30692
Technology transfer p 3626 N93-30699
Technology transfer needs and experiences: The NASA Research Center perspective p 3626 N93-30703
Technology transfer and space science missions
p 3626 N93-30705
Technology transfer within NASA
p 3627 N93-30708
Technology transfer and Rockwell International
p 3627 N93-30712
Plasma Physics Network Newsletter, no. 5
[DE93-606216] p 3591 N93-30795

INFORMATION FLOW
Resource utilization model for the algorithm to architecture mapping model
[NASA-CR-193122] p 3527 N93-29171
Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413

INFORMATION MANAGEMENT
Security classification of information
[DE93-012416] p 3612 N93-28840
The 9th FLICC Forum on Federal Information Policies
[PB93-184687] p 3624 N93-29668
Storage systems for national information assets
[DE93-009303] p 3615 N93-29783
The future role of the Director of Information Management (DOIM) organization within the DOD corporate information management initiative
[AD-A264118] p 3616 N93-30193

INFORMATION PROCESSING (BIOLOGY)
Cognitive and Neural Sciences Division 1992 programs
[AD-A263400] p 3654 N93-29258
Quantification of human responses
p 3500 N93-29564
The dynamics of visual representation, attention, encoding, and retrieval processes
[AD-A264674] p 3500 N93-30543
Multiple neuron recording in the hippocampus of freely moving animals
[AD-A264807] p 3492 N93-30594
Principal components of natural images: An analytical solution
[AD-A264800] p 3489 N93-30603

INFORMATION RETRIEVAL
On the evaluation of fuzzy quantified queries in a database management system p 3517 N93-29569
Geoscience center research
[AD-A263465] p 3462 N93-29834
Electron trapping data storage system and applications p 3622 N93-30474

INFORMATION SYSTEMS
The meta model hierarchy: A framework for information systems concepts and techniques
[TR-92-17] p 3611 N93-28481
Natural language generation
[AD-A262578] p 3524 N93-28579
The Backgrounds Data Center p 3624 N93-28814
National collaboratories: Applying information technology for scientific research
[LC-93-83795] p 3612 N93-29129
Hanford Environmental Information System (HEIS) user's manual, volume 1
[DE93-007465] p 3470 N93-29135
NSSDC data listing
[NASA-TM-108264] p 3612 N93-29167
Distributed Virtual System (DIVIRS) Project
[NASA-CR-193234] p 3526 N93-29169

Summer 1990 Atlanta ozone precursor study (January 1993) [PB93-167203] p 3470 N93-29200

Initial graphics exchange specification hybrid microcircuit application protocol [PB93-175404] p 3407 N93-29203

Applied Information Systems Research Program Workshop [NASA-TM-108773] p 3613 N93-29222

Applied Information Systems Research Program Workshop p 3613 N93-29223

Program plan for an experimenter's laboratory for visualized interactive science p 3613 N93-29224

A distributed system for visualizing and analyzing multivariate and multidisciplinary data p 3613 N93-29226

Data reduction expert assistant p 3613 N93-29227

Overview of the System of Experts for Intelligent Data Management (SEIDAM) p 3613 N93-29228

The scientific modeling assistant: An advanced software tool for scientific model building p 3613 N93-29229

National Center for Supercomputer Applications p 3614 N93-29232

Colorado Center for Astrodynamics Research (CCAR) p 3614 N93-29233

SAVS: A Space Data Analysis and Visualization System p 3614 N93-29235

A planetary version of PC-McIDAS p 3614 N93-29236

Interactive interface to NCAR graphics p 3614 N93-29237

VIEWCACHE: An incremental database access method for autonomous interoperable databases p 3614 N93-29238

Introduction to cadet center for advanced data evaluation technology p 3614 N93-29240

Flight Projects Office Information Systems Testbed (FIST) p 3615 N93-29241

Information system for co-registration of CAESAR sea-images based on two dimensional image matching techniques (SCORE). Part 1: Introduction, user requirements, and feasibility tests [BCRS-90-40A-PT-1] p 3460 N93-29307

Preprocessing airborne remote sensing PARES calibration maintenance functional design document [BCRS-92-07] p 3460 N93-29321

Head mounted displays for virtual reality [AD-A263498] p 3506 N93-29340

Energy efficient drivepower, volume 2 [DE93-012437] p 3410 N93-29814

Activities report of PTT Research [ISBN-9-07-212514-2] p 3392 N93-30025

NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 30: The electronic transfer of information and aerospace knowledge diffusion [NASA-TM-109223] p 3616 N93-30036

Meteorological information for aviation: A systems approach p 3367 N93-30298

Application and integration of diverse technology in an aviation system: The National Aeronautical Information Processing System p 3247 N93-30339

Introduction to the National Information Display Laboratory p 3628 N93-30718

Minimum security requirements for multi-user operating systems [PB93-185999] p 3522 N93-30832

Office of Water Environmental and Program Information Systems Compendium, FY 1992 [PB93-186203] p 3462 N93-30833

A prototype of a faculty and staff executive information system [AD-A264852] p 3623 N93-30907

Scientific research abstracts in the Republic of China, 1991 (science and technology) p 3670 N93-30911

INFORMATION THEORY

Information-theoretic performance bounding of Bayesian identifiers [DE93-010705] p 3554 N93-28763

Theory and applications of random fields [AD-A262829] p 3555 N93-29454

Multiscale and multigrid information representation, extraction and fusion [AD-A264623] p 3393 N93-30386

INFORMATION TRANSFER

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 28: The technical communication practices of Russian and US aerospace engineers and scientists [NASA-TM-108249] p 3612 N93-28948

NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 29: The US government technical report and the transfer of federally funded aerospace R and D [NASA-TM-109221] p 3615 N93-29709

NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 30: The electronic transfer of information and aerospace knowledge diffusion [NASA-TM-109223] p 3616 N93-30036

NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 31: The information-seeking behavior of engineers [NASA-TM-109224] p 3616 N93-30037

INFRARED ASTRONOMY

Near-infrared spectroscopy as an astrophysical tool p 3632 N93-28607

Far infrared supplement. Third edition: Catalog of infrared observations (lambda greater than or equal to 4.6 micrometers) [NASA-RP-1295] p 3629 N93-29156

The 12 UM contribution of nearby galaxies to the infrared background [AD-A264336] p 3654 N93-30419

Activities report for the Laboratory for Space Research Groningen (Netherlands) [ETN-93-93688] p 3631 N93-30638

Near-infrared line imaging of NGC 6240: Global shock and nuclear starburst [MPE-PREPRINT-226] p 3631 N93-30641

Infrared spectroscopy and imaging of starburst galaxies and AGNs [MPE-PREPRINT-229] p 3632 N93-30643

INFRARED ASTRONOMY SATELLITE

A characterization of young stellar objects in Bok globules: Infrared imaging, spectral energy distributions, and molecular outflows p 3636 N93-30563

INFRARED DETECTORS

Miniature long-life space cryocoolers p 3378 N93-28825

The infrared measurement for the reentry-body-translation [AD-A263100] p 3278 N93-29134

A passive infrared ice detection technique for helicopter applications [NASA-CR-193187] p 3244 N93-29152

Measurement of projectile surface temperature by means of its infrared radiation: A preliminary study [AD-A264053] p 3432 N93-30032

Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

Infrared imaging array integrated in three dimensions directly on top of silicon circuits [AD-A264707] p 3581 N93-30500

Development of ultra-low noise, high sensitivity planar metal grating coupled 3-5 multiquantum well infrared detectors for focal plane array staring IR sensor systems [AD-A264465] p 3599 N93-30536

INFRARED IMAGERY

Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779

Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781

Multiscale morphological filtering for analysis of noisy and complex images p 3582 N93-28789

Quantification of thermographic mapping techniques [AD-A264020] p 3391 N93-30016

Infrared imaging array integrated in three dimensions directly on top of silicon circuits [AD-A264707] p 3581 N93-30500

A characterization of young stellar objects in Bok globules: Infrared imaging, spectral energy distributions, and molecular outflows p 3636 N93-30563

INFRARED INSPECTION

Logarithmic time scale in thermographic Non Destructive Evaluation (NDE) of materials p 3359 N93-30246

INFRARED LASERS

Experimental test of hole-coupled FEL resonator designs using a CW-HeNe laser [DE93-010439] p 3440 N93-30530

INFRARED PHOTOMETRY

The faintest stars p 3630 N93-30493

INFRARED RADIATION

Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781

Infrared rugates by molecular beam epitaxy p 3582 N93-28808

A technique for single-pulse spectrum and pulse width measurements for an IR-FEL [DE93-007732] p 3436 N93-28847

Leadex data report. Part 1: Weather analysis and satellite images [AD-A263217] p 3481 N93-28876

The infrared measurement for the reentry-body-translation [AD-A263100] p 3278 N93-29134

Far infrared supplement. Third edition: Catalog of infrared observations (lambda greater than or equal to 4.6 micrometers) [NASA-RP-1295] p 3629 N93-29156

A program to determine the pointing angle to a specular point [AD-A262777] p 3630 N93-29460

Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

On the photonic chiral anomaly in an external gravitational field [DE93-606082] p 3479 N93-30785

INFRARED SIGNATURES

A passive infrared ice detection technique for helicopter applications [NASA-CR-193187] p 3244 N93-29152

A program to determine the pointing angle to a specular point [AD-A262777] p 3630 N93-29460

INFRARED SPACE OBSERVATORY (ISO)

Activities report for the Laboratory for Space Research Groningen (Netherlands) [ETN-93-93688] p 3631 N93-30638

INFRARED SPECTRA

Tomographic analysis of line-of-sight infrared spectra of low-pressure flames [AD-A263185] p 3309 N93-28514

Spectroscopic probes of vibrationally excited molecules at chemically significant energies [DE93-012328] p 3564 N93-28652

Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781

Far infrared supplement. Third edition: Catalog of infrared observations (lambda greater than or equal to 4.6 micrometers) [NASA-RP-1295] p 3629 N93-29156

In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper [AD-A263421] p 3323 N93-29259

Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

The faintest stars p 3630 N93-30493

INFRARED SPECTROMETERS

Measurement of a Michelson interferometer mirror velocity with a time interval analyzer [AD-A263009] p 3430 N93-28659

Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779

Transcutaneous analyte measuring methods [AD-A262861] p 3494 N93-29509

INFRARED SPECTROSCOPY

Tomographic analysis of line-of-sight infrared spectra of low-pressure flames [AD-A263185] p 3309 N93-28514

Near-infrared spectroscopy as an astrophysical tool p 3632 N93-28607

In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper [AD-A263421] p 3323 N93-29259

High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures [AD-A263611] p 3311 N93-29283

A novel flame thermometer based on the doppler width of ro-vibrational transitions [AD-A264515] p 3315 N93-30405

Surface chemistry of hydrogen-passivated porous silicon-oxidation of surface Si-H groups by acetone [AD-A264655] p 3315 N93-30526

Activities report for the Laboratory for Space Research Groningen (Netherlands) [ETN-93-93688] p 3631 N93-30638

INFRARED TELESCOPES

Sodium guide star adaptive optics system for astronomical imaging in the visible and near-infrared [DE93-009543] p 3630 N93-29785

An auto-guiding system for mid-sized telescopes p 3375 N93-30340

INFRARED TRACKING

Subnanoradian, groundbased tracking of spaceborne lasers p 3442 N93-28823

INITIATORS

Synthesis of chiral molybdenum ROMP initiators and all-cis highly tactic Poly-2,3-R2Norbornadiene (R = CF3 or CO2Me) [AD-A264133] p 3336 N93-30169

INJECTION
Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931
INJECTION LOCKING
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772
INJECTION MOLDING
Improved silicon nitride for advanced heat engines [NASA-CR-182193] p 3298 N93-29451
Resin transfer molding for advanced composite primary aircraft structures p 3301 N93-30438
Wetting and dispersion in ceramic/polymer melt injection molding systems [DE93-013240] p 3338 N93-30601
INJECTORS
Liquid fuel injection elements for rocket engines [NASA-CASE-MFS-28547-1] p 3289 N93-29847
INJURIES
Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy [AD-A262483] p 3493 N93-28759
Sudden loading and fatigue effects on the human spine [PB93-167526] p 3493 N93-29199
INLET AIRFRAME CONFIGURATIONS
Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack [AD-A263905] p 3240 N93-29862
INLET FLOW
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet [NASA-TM-106240] p 3252 N93-29162
Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions p 3421 N93-29177
Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack [AD-A263905] p 3240 N93-29862
INLET TEMPERATURE
Flow phenomena in turbomachines [AD-A263049] p 3420 N93-29141
The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932
INORGANIC CHEMISTRY
Gordon Research Conferences, 1991 [AD-A264275] p 3317 N93-30816
INORGANIC COMPOUNDS
Thermal properties of organic and modified inorganic aerogels [DE93-009230] p 3311 N93-29263
Studies in Lewis acid and superacid ionic liquids [AD-A264683] p 3316 N93-30551
Carborane-(silane or siloxane)-unsaturated hydrocarbon based thermosetting polymers [AD-D015718] p 3338 N93-30580
Carborane-(siloxane or silane)-unsaturated hydrocarbon based polymers [AD-D015717] p 3338 N93-30586
Standard and reference materials for marine science, third edition [PB93-185684] p 3489 N93-30830
INPUT/OUTPUT ROUTINES
Concurrent clean language manual, version 0.8 [TR-92-18] p 3522 N93-28482
A parallel processing system for intensive I/O p 3362 N93-30262
RAID 7 disk array p 3537 N93-30462
Using Transparent Informed Prefetching (TIP) to reduce file read latency p 3522 N93-30480
INSPECTION
Reliability assessment at airline inspection facilities. Volume 2: Protocol for an eddy current inspection reliability experiment [DOT/FAA/CT-92/12-VOL-2] p 3449 N93-28685
Inservice diagnostic methods for solenoid-operated valves [DE93-007823] p 3443 N93-28968
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136
INSTALLING
Installation of a new Fortran compiler and effective programming method on the vector supercomputer [DE93-753322] p 3524 N93-28537
Transient response of embedded thermocouples [DE93-009889] p 3431 N93-29325
FDDI installation and performance analysis [AD-A263263] p 3529 N93-29497
Atmospheric studies with SODAR at Kalpakkam [DE93-605544] p 3480 N93-30992
INSTRUCTORS
Proposal to develop guides for high school teachers on global systems science [DE93-008759] p 3624 N93-29100
Summer Faculty Research Program (SFRP), volume 1 [AD-A261988] p 3608 N93-29440
Filling the gaps: An overview of data on education in grades K through 12 [PB93-176550] p 3608 N93-30821
INSTRUMENT APPROACH
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information [AD-A263874] p 3507 N93-29888
INSTRUMENT FLIGHT RULES
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
INSTRUMENT LANDING SYSTEMS
Two simulation studies of precision runway monitoring of independent approaches to closely spaced parallel runways [AD-A263433] p 3261 N93-29815
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information [AD-A263874] p 3507 N93-29888
INSTRUMENTS
Sources sought for innovative scientific instrumentation for scientific lunar rovers p 3434 N93-28804
INSULATION
Lightweight flexible composite tent materials [AD-A263021] p 3295 N93-28660
Spacecraft glow and the EISG/skirt experiment p 3266 N93-28728
Thermal properties of organic and modified inorganic aerogels [DE93-009230] p 3311 N93-29263
Postflight hardware evaluation 360T025 (RSRM-25, STS-46) [NASA-CR-192562] p 3272 N93-30617
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix A: Insulation PFORs [NASA-CR-192563] p 3272 N93-30618
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix E: Insulation postfire data [NASA-CR-192566] p 3272 N93-30621
INTEGERS
Packing odd paths [CWI-BS-R9207] p 3549 N93-29849
Nth roots of normal contractions [DE92-644725] p 3557 N93-30985
INTEGRAL EQUATIONS
Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations [AD-A263763] p 3550 N93-29876
Scattering through apertures and by three-dimensional structures. Application to the measurement of the surface impedance of conductive materials [ONERA-P-1990-2] p 3392 N93-30018
Sound wave scattering from an elastic spherical shell [AD-A264039] p 3562 N93-30029
Application of integral and differential equation methods for various EM interaction problems [AD-A264821] p 3394 N93-30597
INTEGRALS
Approximation formulae for functional integrals in P(phi)2-quantum field theory [DE93-606067] p 3605 N93-30781
Integrals of motion on the group of invariance of an interval in three-dimensional spaces [DE93-606090] p 3606 N93-30797
A simple formula for reducing Feynman diagrams to scalar integrals [DE92-644717] p 3607 N93-30916
Quantum group generalization of the heterotic QFT [DE92-644727] p 3607 N93-30920
INTEGRATED CIRCUITS
Packing of Steiner trees: Polyhedric studies and application [ETN-93-93796] p 3547 N93-28527
Measurement of a Michelson interferometer mirror velocity with a time interval analyzer [AD-A263009] p 3430 N93-28659
Processing, fabrication, and demonstration of HTS integrated microwave circuits [AD-A263161] p 3406 N93-28940
Handshake circuits: An intermediary between communicating processes and VLSI [ETN-93-93579] p 3408 N93-29269
Instrumental neutron activation analysis developed for silicon integrated circuit technology [ETN-93-93581] p 3408 N93-29271
Optically controlled active impedance element particularly suited for a microwave oscillator [AD-D015723] p 3408 N93-29281
New developments in vacuum microelectronics [AD-A263103] p 3410 N93-29798
Wavelength-division multiplexed optical integrated circuit with vertical diffraction grating [NASA-CASE-NPO-18357-1-CU] p 3579 N93-29848
Total dose tests for the PROMICS-3 instrument [VTT-TIED-1203] p 3411 N93-30108
Test structure to microcircuit correlation [AD-A264157] p 3412 N93-30152
A single chip high-speed CMOS Viterbi decoder p 3358 N93-30238
Fault tolerance and testing for WSI systems p 3361 N93-30258
Generation of configurable self-synchronizing synchronous CMOS static RAMs p 3361 N93-30259
Infrared imaging array integrated in three dimensions directly on top of silicon circuits [AD-A264707] p 3581 N93-30500
Effects of device scaling and geometry on MOS radiation hardness assurance [DE93-009832] p 3413 N93-30516
Laboratory experiments in integrated circuit fabrication p 3292 N93-30962
Design and integration of high bit rate four phase monolithic demodulators and modulators at X band [LAAS-92354] p 3414 N93-31030
INTEGRATED OPTICS
Fusion laser oscillator and pulse-forming system using integrated optics [DE93-009286] p 3588 N93-29780
Wavelength-division multiplexed optical integrated circuit with vertical diffraction grating [NASA-CASE-NPO-18357-1-CU] p 3579 N93-29848
INTEGRATORS
Photorefractive integrators and correlators [AD-A264200] p 3597 N93-30144
INTELLIGENCE
The AFOSR Workshop on the Future of EEG and MEG [AD-A264338] p 3495 N93-30160
Centralized maintenance evaluation [AD-A264400] p 3544 N93-30886
INTERACTING GALAXIES
Models of star formation in interacting and merging disk galaxies p 3635 N93-30148
INTERACTIONS
Dynamic ice structure interaction: Theory and applications [VTT-PUBS-90] p 3353 N93-28632
INTERACTIVE CONTROL
Controls of interaction dynamics of orbital assembly p 3275 N93-29111
INTERCALATION
Apparatus for intercalating large quantities of fibrous structures [NASA-CASE-LEW-15077-2] p 3298 N93-29609
INTERFACES
DOKMA: A document oriented communication model for medical applications as a basis of a role system in the medical field [ETN-93-93799] p 3492 N93-28469
A survey of network interface designs [MEMO-INF-92-59] p 3379 N93-28502
Handshake circuits: An intermediary between communicating processes and VLSI [ETN-93-93579] p 3408 N93-29269
INTERFACIAL TENSION
Heat pipe performance experiment p 3265 N93-28722
INTERFEROMETERS
Precision optical interferometry in space [NASA-CR-193264] p 3630 N93-29163
Design of a high resolution spatial heterodyne interferometer [AD-A262867] p 3285 N93-29461
Investigations of self-pumped phase conjugate laser beams and coherence length [AD-A263438] p 3438 N93-29789
Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics [DE93-009827] p 3433 N93-30510
INTERFEROMETRY
Limitations of the ideal phase-Doppler system: Extension to spatially and temporally inhomogeneous particle flows with an application to diesel sprays [DE93-009447] p 3416 N93-28595
The interferometric SAR technology and its usability in the framework of ERS-1 p 3457 N93-28919
Development of coherent x ray lasers [DE93-009288] p 3437 N93-29104
Precision optical interferometry in space [NASA-CR-193264] p 3630 N93-29163

Interferometric tracking system for the tracking and data relay satellite
[NASA-CR-193274] p 3382 N93-29217

Precise tracking of the Magellan and Pioneer Venus orbiters by Same-Beam Interferometry. Part 2: Orbit determination analysis p 3270 N93-29589

INTERGRANULAR CORROSION

Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893

INTERIOR BALLISTICS

The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762

INTERLAMINAR STRESS

Influence of ply waviness on stiffness and strength reduction of composite laminates
[AD-A263224] p 3294 N93-28559

Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076

INTERLAYERS

A transient FGM interlayer based approach to joining ceramics
[DE93-010415] p 3331 N93-29248

INTERMETALLICS

Refractory metal disilicides research
[AD-A262416] p 3320 N93-28499

Transformation toughening
[DE93-011805] p 3321 N93-28631

The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886

Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144

Low temperature environmental embrittlement in ordered intermetallics
[DE93-009711] p 3324 N93-29786

Improvement in ductility of the intermetallic compound Ti3Al
[ESA-TT-1276] p 3325 N93-30105

Reactive sintering of Ni3Al intermetallic alloys under compressive stress
[DE93-009729] p 3327 N93-30652

Magnetic character investigation of higher alcohol synthesis Cu-Co-Cr catalysts
[DE93-009732] p 3316 N93-30653

Radiation effects in FCC metals and intermetallic compounds: A molecular dynamics computer simulation study
[DE93-009546] p 3600 N93-30668

INTERMITTENCY

Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934

Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

INTERMODULATION

Analytical predictions of the intermodulation noise of semiconductor laser diode p 3361 N93-30256

INTERMOLECULAR FORCES

Molecular dynamics of detonation in crystals with defects p 3350 N93-30097

The calculation of electrostatic interactions and their role in determining the energies and geometries of molecular HE crystals
[DE92-040374] p 3570 N93-30448

INTERNAL FRICTION

Anelastic relaxations associated with local disordering in grain boundaries
[AD-A263101] p 3596 N93-29796

INTERNAL PRESSURE

Research and development of carbon black anodes for lithium secondary cells
[DE93-781331] p 3406 N93-28746

INTERNAL WAVES

Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes
[AD-A263469] p 3424 N93-29838

ARI: Internal gravity waves at abrupt topography
[AD-A263795] p 3477 N93-29879

Dynamics of small-scale oceanic motions
[AD-A263582] p 3488 N93-29914

The IUTAM Symposium on Breaking Waves
[AD-A264196] p 3489 N93-30143

The wake software suite: User's guide
[AD-A264181] p 3425 N93-30156

Laboratory studies of gravity wave/mean flow interactions
[AD-A264226] p 3478 N93-30174

INTERNATIONAL COOPERATION

Earth observation from space: Competition or cooperation?
[AD-A262044] p 3459 N93-29000

Contributions to the American Meteorological Society's 26th International Conference on Radar Meteorology
[AD-A263385] p 3481 N93-29257

Remote sensing in Czechoslovakia and Hungary: An analysis of the possible co-operation of The Netherlands with Czechoslovakia and Hungary in the field of remote sensing
[BCRS-92-12] p 3461 N93-29466

Decision maker's guide to international space
[ANSER-STDN-93-4] p 3669 N93-29710

Proceedings of the meeting of the Intergovernmental US-Russian Business Development Committee's Standards Working Group
[PB93-179968] p 3610 N93-30822

INTERNATIONAL LAW

The environment as an operational center of gravity
[AD-A264170] p 3472 N93-30154

INTERNATIONAL TRADE

Proceedings of the meeting of the Intergovernmental US-Russian Business Development Committee's Standards Working Group
[PB93-179968] p 3610 N93-30822

INTERPLANETARY DUST

Further analysis of LDEF FRECOPA micrometeoroid remnants p 3638 N93-29360

Derivation of particulate directional information from analysis of elliptical impact craters on LDEF
p 3283 N93-29362

Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF)
p 3638 N93-29371

Interplanetary meteoroid debris in LDEF metal craters
p 3638 N93-29372

Long Duration Exposure Facility (LDEF) attitude measurements of the Interplanetary Dust Experiment
p 3638 N93-29377

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces
p 3638 N93-29378

Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379

INTERPLANETARY MAGNETIC FIELDS

Mithras studies of the boundary between open and closed field lines
[AD-A264758] p 3479 N93-30562

INTERPLANETARY SPACE

Project WISH: The Emerald City p 3232 N93-29744

INTERPLANETARY SPACECRAFT

Subnanoradian, groundbased tracking of spaceborne lasers p 3442 N93-28823

Space transfer concepts and analyses for exploration missions, phase 3
[NASA-CR-192584] p 3268 N93-31034

INTERPOLATION

Filtering interpolators for image comparison algorithms
p 3463 N93-28797

Time-interpolation method for digital beamformers
[AD-D015709] p 3383 N93-29275

INTERPRETATION

Quantification of human responses
p 3500 N93-29564

INTERPROCESSOR COMMUNICATION

A survey of network interface designs
[MEMO-INF-92-59] p 3379 N93-28502

Implementation of a single-material version of PAGOSA on MIMD hypercubes
[SAND-92-0640] p 3526 N93-29127

Efficient wiring of reconfigurable parallel processors
[DE93-009847] p 3538 N93-29186

A parallel processing system for intensive I/O
p 3362 N93-30262

Task allocation and real-time considerations for the Robot Controller Test Station (RCTS)
p 3364 N93-30278

On analytical performance modelling of software for distributed systems p 3364 N93-30279

Parcels with TAGS
[PB93-181824] p 3535 N93-30824

INTERSECTIONS

Distributed traffic signal control using fuzzy logic
p 3513 N93-29543

The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis
[DE93-007537] p 3313 N93-29837

A method for intersection line calculation between parametric surfaces
[ETN-93-94178] p 3551 N93-30572

INTERSTELLAR GAS

The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380

INTERSTELLAR MATTER

The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380

CO lines toward NGC 2024 and other star forming regions: A closer look at the warm gas component
[MPE-PREPRINT-223] p 3637 N93-30639

INTERSTITIALS

Method for preparation of a microporous structure with layered interstitial surface treatment
[NASA-CASE-MSC-21487-2] p 3296 N93-29023

INVARIANCE

Representation and recognition with invariants and geometric constraint models
[AD-A263235] p 3529 N93-29493

Integrals of motion on the group of invariance of an interval in three-dimensional spaces
[DE93-606090] p 3606 N93-30797

Scaling properties of localized quantum chaos
[DE93-606031] p 3606 N93-30803

The ground state wavefunctions of a conformally invariant scalar field in different spacetime background
[DE93-606063] p 3606 N93-30808

Enhanced convergence adaptive detection
[AD-A264100] p 3399 N93-30879

Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917

On one-dimensional topological and conformal field theories
[DE92-644726] p 3558 N93-30986

INVENTORIES

World commercial aircraft accidents
[DE93-010892] p 3243 N93-28571

INVERSE KINEMATICS

Dual arm generalized compliant motion with shared control
[NASA-CASE-NPO-18738-1-CU] p 3443 N93-28954

Planning collision free paths for two cooperating robots using a divide-and-conquer C-space traversal heuristic
[NASA-CR-193252] p 3542 N93-29771

INVERSE SCATTERING

On the method of determining relations
[DE93-606041] p 3551 N93-30765

INVESTMENT CASTING

Development of a CFD code for casting simulation
[NASA-CR-192577] p 3427 N93-30492

INVISCID FLOW

Inviscid quasi one-dimensional nonequilibrium flow
[FFA-TN-1992-35] p 3418 N93-28993

Three-dimensional numerical simulation of gradual opening in a wave rotor passage
[NASA-CR-191157] p 3252 N93-29072

Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077

Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions
p 3421 N93-29177

Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-193241] p 3421 N93-29213

Numerical computation of inviscid flow around nose tip of Space Shuttle with NND scheme
[AD-A264012] p 3421 N93-29260

An upwind method for the solution of the 3D Euler and Navier-Stokes equations on adaptively refined meshes
[AD-A262863] p 3423 N93-29472

Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack
[AD-A263905] p 3240 N93-29862

Hydrodynamic interactions among fibers in high efficiency filters
[DE93-007117] p 3424 N93-30035

IO

Remote measurement of planetary magnetic fields by the Hanle effect p 3645 N93-28793

IODIDES

Characterization of copper iodide thin films fabricated via laser assisted molecular beam epitaxy
[AD-A262823] p 3596 N93-29430

ION ACCELERATORS

Accelerator research studies
[DE93-009353] p 3573 N93-28522

Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317

Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002

ION ACOUSTIC WAVES

Plasma diffusion through multidipole magnetic fields
[DE93-608548] p 3591 N93-31007

ION BEAMS

An experimental investigation of radioactivity induced by ions associated with the operation of pulsed-power accelerators
[DE93-011478] p 3575 N93-29151

High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301

Investigation of ion beam mixing of iron marker layers in aluminum oxide by RBS
[DE93-010727] p 3594 N93-29314
Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363
High-current negative-ion beam transport
[DE93-010732] p 3575 N93-29809
Improved heat removal by microscopic surface texturing of capillaries
[AD-A263483] p 3424 N93-29966
Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002
Pulse control in an accelerator for heavy-ion fusion
[DE93-009527] p 3576 N93-30390
Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation
[DE93-606332] p 3601 N93-30798

ION CURRENTS
NPB cesium space experiment p 3267 N93-28733

ION CYCLOTRON RADIATION
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
Fundamental studies of fusion plasmas
[DE93-013144] p 3589 N93-30189

ION DISTRIBUTION
Ion ring distribution produced by a magnetosonic wave
[DE93-754311] p 3590 N93-30533

ION EMISSION
Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066
Scanning ionic microscopy with high spatial resolution: Parallel acquisition of elementary images by high resolution mass spectrometry
[ONERA-NT-1990-7] p 3314 N93-30139

ION EXCHANGE MEMBRANE ELECTROLYTES
Thermodynamics of swelling and collapse of polyelectrolytic gels
[ETN-93-93485] p 3331 N93-29064
Electrical relaxation in acid-form nafion
[AD-A263558] p 3410 N93-29826
The electrolyte factor in O2 reduction electrocatalysis
[AD-A263565] p 3313 N93-29828

ION EXCHANGING
Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839

ION IMPACT
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334

ION IMPLANTATION
Luminescence study of ion-implanted and MBE-grown Er-doped GaAs and Al(x)Ga(1-x)As
[AD-A262602] p 3591 N93-28471
Surface modification of tribological components in transportation
[DE93-008647] p 3442 N93-28903
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301

ION IRRADIATION
An experimental investigation of radioactivity induced by ions associated with the operation of pulsed-power accelerators
[DE93-011478] p 3575 N93-29151

ION MICROSCOPES
Scanning ionic microscopy with high spatial resolution: Parallel acquisition of elementary images by high resolution mass spectrometry
[ONERA-NT-1990-7] p 3314 N93-30139

ION MOTION
Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099

ION SCATTERING
Diffraction and holography with photoelectrons and Auger electrons: Some new directions
[DE93-007664] p 3313 N93-29766

ION SOURCES
NPB cesium space experiment p 3267 N93-28733
A high field optical-pumping spin-exchange polarized deuterium source
[DE93-009208] p 3574 N93-28970
An RF driven H(-) source and a low energy beam injection system for RFQ operation
[DE93-010438] p 3575 N93-29302
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
Measurement of work function of a plasma grid in a cesium seeded negative ion source
[DE93-764153] p 3589 N93-30190

ION TEMPERATURE
Self-organized profile relaxation by ion temperature gradient instability in toroidal plasmas
[DE93-009580] p 3585 N93-28910

ION TRAPS (INSTRUMENTATION)
An improved linear ion trap physics package
p 3384 N93-29587

IONIC COLLISIONS
Studies of relativistic heavy ion collisions at the AGS (E814/E877)
[DE93-008541] p 3564 N93-28678

IONIC MOBILITY
Advanced signal processing requirement in an ion mobility explosives detector p 3320 N93-30277

IONIC REACTIONS
A simple model for ion solvation with non additive cores
[AD-A263075] p 3566 N93-29143

IONIZATION
Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534
Laser spectroscopy of hydrocarbon radicals
[DE93-012555] p 3436 N93-28653
The emulsion chamber technology experiment
p 3268 N93-28743

IONIZATION CHAMBERS
Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849
Charge to frequency converter for ionization chambers belonging to the radiation protection system of AmPS/MEA
[DIGEL-1991-6] p 3577 N93-30837

IONIZATION CROSS SECTIONS
The production and destruction of negative ions
[DE93-010527] p 3564 N93-28665

IONIZED GASES
Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534

IONIZING RADIATION
New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583
Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730
Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626
Development and application of a 3-D geometry/mass model for LDEF satellite ionizing radiation assessments
p 3573 N93-29640
Radiation model predictions and validation using LDEF satellite data p 3573 N93-29641
Future directions for LDEF ionizing radiation modeling and assessments p 3573 N93-29642

IONOSPHERIC CONDUCTIVITY
ELF propagation highlights p 3395 N93-30730
Studies of the propagation of Low Frequency (LF) radio waves p 3396 N93-30738

IONOSPHERIC DISTURBANCES
USU center of excellence in theory and analysis of the geo-plasma environment
[AD-A264750] p 3590 N93-30585
Acoustic-gravity waves from low-altitude localized disturbances
[AD-A264804] p 3479 N93-30593
Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729
A long wave TE/TM noise prediction model
p 3397 N93-30742
Performance statistics bulletin. High latitude meteor scatter propagation, May, June, July 1989
[AD-A264003] p 3399 N93-30757

IONOSPHERIC ELECTRON DENSITY
Ionospheric structure specifications and systems effects
[AD-A263573] p 3476 N93-29343

IONOSPHERIC HEATING
Results of the joint HIPAS/NUWC campaigns to investigate ELF generated by auroral electrojet modulation p 3398 N93-30746

IONOSPHERIC PROPAGATION
A comparison of trans-equatorial ionosphere propagation predictions from AMBCOM with measured data
[AD-A264006] p 3391 N93-29987
Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729
Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734
Studies of the propagation of Low Frequency (LF) radio waves p 3396 N93-30738
A long wave TE/TM noise prediction model
p 3397 N93-30742

IONS
Moment approach to fast ion neoclassical transport and viscous forces
[DE93-753305] p 3585 N93-28979
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
Molecular dynamics modeling of electric double layers with spectroscopic applications
[AD-A263168] p 3568 N93-29489
Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146
Conjugated substituted ionic polyacetylenes
[AD-A264702] p 3337 N93-30497
Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551

IRON
Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812
Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133
Investigation of ion beam mixing of iron marker layers in aluminum oxide by RBS
[DE93-010727] p 3594 N93-29314

IRON ALLOYS
Effects of internal helium on mechanical properties of Nitronic (tm) 40 stainless steel
[DE93-009902] p 3324 N93-29265

IRON COMPOUNDS
Rates and mechanisms of reaction of hydrogen sulfide with iron chelates
[PB93-184299] p 3312 N93-29665

IRON ISOTOPES
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807

IRRADIATION
Smart skin structures for identifying and locating laser irradiation
[DE93-005464] p 3436 N93-28887
Defect studies in low-temperature-grown GaAs
[DE93-010405] p 3595 N93-29417
Charged particle activation studies on the surface of LDEF spacecraft p 3572 N93-29630

ISCCP PROJECT
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model
[DE93-007365] p 3477 N93-29346

ISLANDS
Reception at Ascension Island, South Atlantic, of the transmissions from the Heard Island feasibility test
[PB93-176261] p 3394 N93-30662

ISOMERIZATION
Applications of density functional theory to calculation of reaction energetics p 3351 N93-30098

ISOMERS
Nuclear isomers as ultra-high-energy-density materials
[DE93-009520] p 3568 N93-29784

ISOTHERMAL PROCESSES
Isothermal and shock compression of high density ammonium nitrate and ammonium perchlorate
[DE93-000682] p 3315 N93-30209

ISOTHERMS
Analysis of thermal bar using boundary-layer integral equations gradients
[MATHS-REPT-A-177] p 3462 N93-30107
Fluids in porous media.
[PB93-175198] p 3428 N93-30759

ISOTOPE SEPARATION
High-efficiency high-reliability optical components for a large, high-average-power visible laser system
[DE93-009225] p 3437 N93-29098
Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207

ISOTOPES
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405
Standard and reference materials for marine science, third edition
[PB93-185684] p 3489 N93-30830

ISOTOPIC SPIN
Study of heavy-flavored particles
[DE93-011535] p 3569 N93-30128

ISOTROPIC TURBULENCE
The structure and dynamics of the vorticity and passive scalar fields at small scales in homogeneous isotropic turbulence p 3427 N93-30625

ITERATION
A genetic algorithms approach for altering the membership functions in fuzzy logic controllers
p 3518 N93-29573

ITERATIVE SOLUTION

BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems [DE93-011391] p 3524 N93-28644

Iterative encoding methods for computer generated holograms [AD-A263705] p 3431 N93-29297

A numerical solution of the two-center problem [DE92-644674] p 3551 N93-30913

Fixed point iterations for quasi-contractive maps in uniformly smooth Banach spaces [DE92-641348] p 3552 N93-30942

IUE

IUE observations of cataclysmic variable [NASA-CR-193188] p 3629 N93-28634

J

J INTEGRAL

Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis [AD-A264221] p 3453 N93-30147

J-52 ENGINE

An analysis of the correlation between the J52 engine component improvement program and improved maintenance parameters [AD-A262062] p 3251 N93-28984

JACOBI MATRIX METHOD

A functional implementation of the Jacobi eigen-solver [DE93-007349] p 3549 N93-29769

JAMMING

Modified Acousto-Optic Adaptive Processor (Mod-AOAP) [AD-A261983] p 3381 N93-28997

Coarse synchronization in an EHF frequency-hopped satellite communications system p 3365 N93-30281

Adaptive jammer nulling in EHF communications satellites p 3365 N93-30284

Performance of frequency hopped M-ary FSK in Rayleigh fading and partial-band jamming p 3368 N93-30303

Adaptive airborne radar simulation with equalization filter taps [AD-A264722] p 3393 N93-30514

JAPAN

NSF Tokyo reports: Japanese R and D projects on micro- and nanofabrication and related basic research projects [PB93-181261] p 3410 N93-29671

JET AIRCRAFT NOISE

Jet mixer noise suppressor using acoustic feedback [NASA-CASE-LEW-15170-1] p 3561 N93-28953

Some aspects of the aeroacoustics of high-speed jets [NASA-CR-191458] p 3418 N93-28975

JET CONTROL

Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079

JET ENGINE FUELS

Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development [AD-A262747] p 3342 N93-29402

JET FLOW

A numerical study of confined turbulent jets [NASA-TM-106197] p 3420 N93-29161

Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931

Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935

Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960

Plasma/particle interaction in subsonic argon/helium thermal plasma jets [DE93-010808] p 3589 N93-30181

Effects of buoyancy on gas jet diffusion flames [NASA-CR-191109] p 3352 N93-31031

JET IMPINGEMENT

Fundamental studies of impingement cooling thermal boundary conditions p 3254 N93-29940

Prediction of jet impingement cooling scheme characteristics (airfoil leading edge application) p 3255 N93-29941

The +vbar breakout during approach to Space Station Freedom [NASA-TM-104772] p 3269 N93-30135

JET MIXING FLOW

On the development of a film cooling layer p 3258 N93-29959

JFET

Growth, characterization and device development in monocrystalline diamond films [AD-A263204] p 3593 N93-28874

JOINTS (JUNCTIONS)

Ceramic matrix composites properties/microstresses with complete and partial interphase bond [NASA-TM-106136] p 3297 N93-29071

Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix B: Case, seals, and joints PFORs [NASA-CR-192564] p 3272 N93-30619

Development of an experimental method to determine the axial rigidity of a strut-node joint p 3290 N93-30950

JOSEPHSON JUNCTIONS

Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays [DE93-008713] p 3593 N93-29094

Response of a Nb/Al2O3/Nb tunnel junction to picosecond electrical pulses [DE93-010416] p 3594 N93-29249

JP-4 JET FUEL

Performance and cost evaluation of bioremediation techniques for fuel spills [PB93-175545] p 3474 N93-30762

JP-8 JET FUEL

The chronic effects of jP-8 jet fuel exposure on the lungs [AD-A264162] p 3495 N93-30153

JUDGMENTS

Quantification of human responses p 3500 N93-29564

JUNCTION DIODES

Neutron radiation induced degradation of diode characteristics [AD-A263277] p 3405 N93-28563

Widebanding techniques for VHF antennas 2 [AD-A263998] p 3387 N93-29882

Laboratory experiments in integrated circuit fabrication p 3292 N93-30962

K

K-EPSILON TURBULENCE MODEL

A numerical study of confined turbulent jets [NASA-TM-106197] p 3420 N93-29161

Turbulent flow and heat transfer in idealized blade cooling passages p 3254 N93-29938

Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960

Turbulence characteristics of an axisymmetric reacting flow [NASA-CR-4110] p 3242 N93-30373

The numerical simulation of circulation controlled airfoil flowfields p 3243 N93-30947

KALMAN FILTERS

An autonomous vision-based mobile robot p 3443 N93-29082

Theoretical bit error rate performance of the Kalman filter excisor for FM interference [AD-A263018] p 3383 N93-29407

Optimal filtering and LQR theory with constraints on system and control matrices p 3357 N93-30234

KAPTON (TRADEMARK)

An explosively actuated electrical switch using Kapton insulation [AD-A263835] p 3411 N93-30021

KARHUNEN-LOEVE EXPANSION

Frequency domain speech compression using the Karhunen-Loeve Transform [AD-A262613] p 3379 N93-28476

KEELS

Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials p 3303 N93-30845

KELVIN-HELMHOLTZ INSTABILITY

Electrodynamics of the dayside cleft region based on ground observations at Svalbard [AD-A263571] p 3477 N93-29831

KINEMATIC EQUATIONS

Attitude stabilization of a rigid spacecraft using gas jet actuators operating in a failure mode p 3280 N93-29992

KINEMATICS

The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672

A manipulator kinematic design for high-vacuum operation [DE93-010264] p 3444 N93-29247

Research on reconfigurable and reliable manipulators [DE93-010244] p 3444 N93-29330

System analysis for a kinematic positioning system based on the global positioning system [AD-A262830] p 3245 N93-29468

Input relegation control for gross motion of a kinematically redundant manipulator [DE93-005301] p 3446 N93-30210

KINETIC ENERGY

Dense inclined flows: Theory and experiments [DE93-011452] p 3417 N93-28630

Spectral energetics of the lower thermosphere p 3477 N93-29467

Applications of density functional theory to calculation of reaction energetics p 3351 N93-30098

KINETIC EQUATIONS

Moment approach to fast ion neoclassical transport and viscous forces [DE93-753305] p 3585 N93-28979

Bounds on internal state variables in viscoplasticity [NASA-TM-106215] p 3451 N93-29196

KINETIC THEORY

An extension of a kinetic theory of polymer crystallization through the exclusion of negative barriers [AD-A264810] p 3334 N93-29660

A computer simulation of the production of an artificially ionized layer using the Arecibo facility [DE93-010817] p 3478 N93-30487

Quantum-kinetic Green function and macroscopic wave function [DE93-606040] p 3606 N93-30796

KINETICS

Additional support for the TDK/MABL computer program [NASA-CR-193037] p 3526 N93-29028

Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers [DE93-008706] p 3586 N93-29093

Constitutive laws for deformation and dynamic recrystallization in cubic metals [DE93-010740] p 3326 N93-30486

Growth model of Au films on Ru(001) [DE92-642126] p 3602 N93-30998

KLYSTRONS

Accelerator research studies [DE93-009353] p 3573 N93-28522

Development of high power microwave source [DE93-753316] p 3436 N93-28980

Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator [DE93-010461] p 3575 N93-29870

Improved design concepts for millimeter wave power sources [AD-A264060] p 3411 N93-29922

Microwave emission from relativistic electron beams [AD-A264102] p 3400 N93-30880

KNOWLEDGE BASED SYSTEMS

Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855

Cognitive interface considerations for intelligent cockpits p 3503 N93-28865

DataHub knowledge based assistance for science visualization and analysis using large distributed databases p 3613 N93-29230

The axiomatic definition of a linguistic scale fuzziness degree, its major properties, and applications p 3510 N93-29520

Fuzzy knowledge base construction through belief networks based on Lukasiewicz logic p 3515 N93-29550

Life insurance risk assessment using a fuzzy logic expert system p 3520 N93-29585

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)

Introduction to cadet center for advanced data evaluation technology p 3614 N93-29240

Parallel inferencing method and apparatus for rule-based expert systems [NASA-CASE-NPO-18004-1-CU] p 3521 N93-29504

Approximate reasoning using terminological models p 3510 N93-29522

Fuzzy knowledge base construction through belief networks based on Lukasiewicz logic p 3515 N93-29550

KNOWLEDGE REPRESENTATION

The axiomatic definition of a linguistic scale fuzziness degree, its major properties, and applications p 3510 N93-29520

Approximate reasoning using terminological models p 3510 N93-29522

Quantitative analysis of properties and spatial relations of fuzzy image regions p 3510 N93-29523

Fuzzy knowledge base construction through belief networks based on Lukasiewicz logic p 3515 N93-29550

Determining rules for closing customer service centers: A public utility company's fuzzy decision p 3516 N93-29561

Inverse problems: Fuzzy representation of uncertainty generates a regularization p 3516 N93-29563

KRYPTON

Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

KUWAIT

Atmospheric and Geophysical Sciences Division: G-Division did you know? [DE93-007412] p 3469 N93-28967

L

LABORATORIES

Applied research in America [DE93-011725] p 3625 N93-28646

National collaboratories: Applying information technology for scientific research [LC-93-83795] p 3612 N93-29129

Testing in combined dynamic environments [DE93-010679] p 3278 N93-29250

Thermal effects testing at the National Solar Thermal Test Facility [DE93-009825] p 3465 N93-30391

Introduction to the National Information Display Laboratory p 3628 N93-30718

Physics laboratory technical activities, 1992 [PB93-178648] p 3561 N93-30888

LABYRINTH SEALS

Heat Transfer and Cooling in Gas Turbines [AGARD-CP-527] p 3252 N93-29926

Heat transfer and leakage in high-speed rotating stepped labyrinth seals p 3256 N93-29951

LACTATES

Beta-adrenergic blockade and lactate metabolism during exercise at high altitude [AD-A263544] p 3495 N93-29820

LAGRANGE COORDINATES

Godunov-type methods for the equations of compressible fluid mechanics [KFK-5058] p 3428 N93-31020

LAGRANGIAN FUNCTION

Stability, bifurcation, and control of Hamiltonian systems [DE93-012103] p 3547 N93-28648

Towards a better hydro for dynamic mix calculations [DE93-010702] p 3426 N93-30485

An adaptive Lagrangian method for computing 1-D reacting flows and the theory of Riemann invariant manifolds for the compressible Euler equations p 3428 N93-30902

On the energy-momentum tensors for field theories in spaces with affine connection and metric [DE92-644743] p 3557 N93-30926

Beltrami parametrization and gauging of Virasoro and w-infinity algebras [DE92-644844] p 3557 N93-30928

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions [DE92-641339] p 3480 N93-31002

LAMINAR BOUNDARY LAYER

Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927

Measurement of turbulent spots and intermittency modelling at gas-turbine conditions p 3253 N93-29934

Analytical and experimental study of laminar free convective heat transfer from isothermal convex bodies of arbitrary shape [ISBN-0-315-72512-5] p 3426 N93-30379

LAMINAR FLOW

A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method [DE92-018262] p 3417 N93-28639

High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade [NASA-TM-106187] p 3420 N93-29157

Flow visualization on helicopter blades using acenaphthen [ESA-TT-1255] p 3422 N93-29273

Evolution of flow disturbances in cocurrent gas-liquid flows [DE93-010083] p 3422 N93-29326

Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948

Detailed studies of soot formation in laminar diffusion flames for application to modeling studies [AD-A264827] p 3317 N93-30667

Effects of buoyancy on gas jet diffusion flames [NASA-CR-191109] p 3352 N93-31031

LAMINAR HEAT TRANSFER

Analytical and experimental study of laminar free convective heat transfer from isothermal convex bodies of arbitrary shape [ISBN-0-315-72512-5] p 3426 N93-30379

LAMINATES

Influence of ply waviness on stiffness and strength reduction of composite laminates [AD-A263224] p 3294 N93-28559

A thermal stress solution for multilayered composite cylinders [AD-A262579] p 3295 N93-28657

Metal Matrix Laminate Tailoring (MMLT) code: User's manual [NASA-TM-106052] p 3295 N93-28681

Composite laminate stiffnesses and their sensitivities [DLR-FB-92-16] p 3296 N93-29007

Modification of spectral distributions by multilayer structures [DE93-009308] p 3310 N93-29059

Ceramic matrix composites properties/microstresses with complete and partial interphase bond [NASA-TM-106136] p 3297 N93-29071

Axial impact of composites p 3297 N93-29078

Environmental effects on stitched RTM composites [NASA-CR-193221] p 3297 N93-29107

A transient FGM interlayer based approach to joining ceramics [DE93-010415] p 3331 N93-29248

Analysis of LDEF micrometeoroid/debris data and damage to composite materials p 3309 N93-29366

An investigation of graphite peek composite under compression with a centrally located circular discontinuity [AD-A262549] p 3298 N93-29414

Shear sensitive monomer-polymer laminate structure and method of using same [NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613

First NASA Advanced Composites Technology Conference, part 2 [NASA-CP-3104-PT-2] p 3303 N93-30841

Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials p 3303 N93-30845

Comparison of impact results for several polymeric composites over a wide range of low impact velocities p 3304 N93-30848

Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850

Characterization of multiaxial warp knit composites p 3304 N93-30851

Developments in impact damage modeling for laminated composite structures p 3305 N93-30857

Advanced fiber placement of composite fuselage structures p 3306 N93-30864

Progressive failure methodologies for predicting residual strength and life of laminated composites p 3307 N93-30866

Effects of bolt-hole contact on bearing-bypass damage-onset strength p 3307 N93-30870

Mechanical properties of composite materials p 3290 N93-30951

LANCE MISSILE

Clustered Lance Booster (CLB) feasibility study [AD-A262746] p 3286 N93-28593

LAND MOBILE SATELLITE SERVICE

Comparison of multiple access techniques for bandwidth limited land-mobile satellite communications p 3370 N93-30314

LAND USE

Land use database for the Netherlands using LANDSAT Thematic Mapper pictures [BCRS-91-32] p 3463 N93-30839

LANDAU-GINZBURG EQUATIONS

The onset of vortex turbulence [DE93-010424] p 3417 N93-28663

LANDFILLS

Hydrogeology and ground-water-quality conditions at the Reno County Landfill, South-Central Kansas, 1990-1991 [PB93-183085] p 3474 N93-30826

LANDING

An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information [AD-A263874] p 3507 N93-29888

LANDSAT SATELLITES

Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR) [DLR-MITT-92-09] p 3456 N93-28915

Atmospheric correction of LANDSAT-TM-data for forest inventory p 3459 N93-28929

Interim report on Landsat national archive activities p 3618 N93-30455

LANGUAGE PROGRAMMING

The concurrent clean system user's manual and PABCstat user's manual, version 0.8 [TR-92-19] p 3523 N93-28484

LANGUAGES

Antirational transductions and their language families [ETN-93-93794] p 3611 N93-28525

The 1991 neural information processing systems: Natural and synthetic [AD-A264754] p 3623 N93-30559

LANTHANUM ISOTOPES

Reaction mechanism studies of heavy ion induced nuclear reactions [DE93-010496] p 3569 N93-29807

LAPLACE TRANSFORMATION

Comparison of analytical transport and stochastic solutions for neutron slowing down in an infinite medium [DE93-010799] p 3565 N93-28833

A multigrid extension of the FFT for the numerical inversion of Fourier and LaPlace transforms [TRITA-NA-9204] p 3548 N93-29024

LARGE SCALE INTEGRATION

On-board B-ISDN fast packet switching architectures. Phase 2: Development. Proof-of-concept architecture definition report [NASA-CR-191151] p 3273 N93-29884

LARGE SPACE STRUCTURES

Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700

Description of the Joint Damping Experiment (JDX) p 3263 N93-28703

Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079

Space construction activities [NASA-CR-192690] p 3274 N93-29108

Interaction dynamics of on-orbit construction p 3274 N93-29109

Controls of interaction dynamics of orbital assembly p 3275 N93-29111

Structural load control during construction p 3275 N93-29113

Systems engineering studies of on-orbit assembly operation p 3275 N93-29114

Dynamics and robust control of sampled data systems for large space structures [AD-A264192] p 3281 N93-30142

LARVAE

Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase [DE93-010081] p 3467 N93-28543

LASER ABLATION

Complex dielectric function of amorphous diamond films deposited by pulsed excimer (ArF) laser ablation of graphite [AD-A264527] p 3598 N93-30408

LASER ALTIMETERS

Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780

LASER APPLICATIONS

Discharge of electrically charged clouds [AD-A263212] p 3480 N93-28518

Polarization dependence of the ionization of helium and neon by 120 femtosecond pulses at 614 nm [DE93-010514] p 3564 N93-28762

Spin dependent phenomena in medium energy physics [DE93-010972] p 3565 N93-28849

Enhanced noncontacting laser extensometer for biaxial strain measurements [AD-A263170] p 3430 N93-28989

Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results [AD-A261939] p 3486 N93-28996

High-efficiency high-reliability optical components for a large, high-average-power visible laser system [DE93-009225] p 3437 N93-29098

An investigation of stereolithography as a means of prototyping from a cad database [AD-A263410] p 3613 N93-29210

Characterization of copper iodide thin films fabricated via laser assisted molecular beam epitaxy [AD-A262823] p 3596 N93-29430

SWAT system performance predictions [AD-A262857] p 3579 N93-29470

Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes [AD-A263250] p 3438 N93-29800

Atmospheric transverse coherence length measurement system for laser communications [AD-A263563] p 3439 N93-29827

Advanced coordinate measuring machine at Sandia National Laboratories [DE93-010618] p 3432 N93-29842

Electro-optic characterisation of extremely wide bandwidth electrical signals [AD-A264202] p 3392 N93-30145

Method and apparatus for imaging an object in or through a scattering medium by using multiple-wave mixing [AD-D015707] p 3581 N93-30410

Uplink laser propagation measurements through the sea surface, haze and clouds [AD-A264687] p 3440 N93-30553

Laser based 3D volumetric display system [AD-A264825] p 3441 N93-30599

LASER BEAMS

Proposal for a universal particle detector experiment p 3286 N93-28795

SWAT 2 overview [AD-A262905] p 3578 N93-29139

SWAT laboratory test results
[AD-A262906] p 3578 N93-29140
Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207
An investigation of stereolithography as a means of prototyping from a cad database
[AD-A263410] p 3613 N93-29210
Laser radiation detection system
[AD-D015724] p 3438 N93-29287
Investigations of self-pumped phase conjugate laser beams and coherence length
[AD-A263438] p 3438 N93-29789
Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator
[DE93-010461] p 3575 N93-29870
Analysis of possibilities for using laser scattering for MeV electron beam diagnostics
[DE93-606223] p 3441 N93-30767
Theoretical-experimental study of the non-thermal effects of the polarized laser radiation in living tissues
[DE93-607212] p 3441 N93-30775

LASER CAVITIES
Problems in the implementation of x ray optics with x ray lasers
[DE93-009297] p 3438 N93-29781
Investigations of self-pumped phase conjugate laser beams and coherence length
[AD-A263438] p 3438 N93-29789
Intracavity-pumped 2.1 micrometer Ho(3+): YAG laser
[AD-D015728] p 3441 N93-30587

LASER DOPPLER VELOCIMETERS
Three-dimensional fiber-optic LDV measurements in the endwall region of a linear cascade of controlled-diffusion stator blades
[AD-A263513] p 3424 N93-29968
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry
[DE93-011734] p 3427 N93-30489

LASER FUSION
Inertial confinement fusion target component fabrication and technology development support
[DE93-010836] p 3585 N93-28836
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
Fusion laser oscillator and pulse-forming system using integrated optics
[DE93-009286] p 3588 N93-29780
SIRIUS-P: An inertially confined direct drive laser fusion power reactor
[DE93-012433] p 3439 N93-30186

LASER GUIDANCE
Sodium guide star adaptive optics system for astronomical imaging in the visible and near-infrared
[DE93-009543] p 3630 N93-29785

LASER HEATING
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes
[AD-A263250] p 3438 N93-29800
Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080
Laser gas alloying of titanium materials
[ETN-93-93805] p 3325 N93-30115

LASER INDUCED FLUORESCENCE
Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652
The photodissociation and reaction dynamics of vibrationally excited molecules
[DE93-010896] p 3565 N93-28879
Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer
[DE93-010741] p 3421 N93-29253
Sodium guide star adaptive optics system for astronomical imaging in the visible and near-infrared
[DE93-009543] p 3630 N93-29785
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means
p 3319 N93-30081
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667

LASER MATERIALS
Development of coherent x ray lasers
[DE93-009288] p 3437 N93-29104
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276

LASER OUTPUTS
Smart skin structures for identifying and locating laser irradiation
[DE93-005464] p 3436 N93-28887
High-efficiency high-reliability optical components for a large, high-average-power visible laser system
[DE93-009225] p 3437 N93-29098
Low-pump-rate multi-millisecond atomic xenon laser
[DE93-011484] p 3437 N93-29180
Operating manual for single-shot autocorrelator
[AD-A262016] p 3438 N93-29395
Construction and operation of a gas transport CO2 laser
[AD-A263102] p 3438 N93-29797
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007
High-repetition rate x ray lasers and applications
[DE93-011882] p 3440 N93-30394
Research studies on short wavelength by selective auger processes
[AD-A264493] p 3440 N93-30401
Holmium quasi-two level laser
[AD-D015706] p 3440 N93-30427
Uplink laser propagation measurements through the sea surface, haze and clouds
[AD-A264687] p 3440 N93-30553
A variable reflectivity output coupler for optically pumped far infrared lasers
[MPE-PREPRINT-225] p 3441 N93-30640
Analysis of possibilities for using laser scattering for MeV electron beam diagnostics
[DE93-606223] p 3441 N93-30767

LASER PLASMA INTERACTIONS
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
Development of coherent x ray lasers
[DE93-009288] p 3437 N93-29104

LASER PLASMAS
Computational simulations of a soft x ray projection lithography laser plasma source
[DE93-009625] p 3437 N93-29264

LASER POWER BEAMING
The lightcraft project p 3233 N93-29749
ASPEC: Solar power satellite p 3233 N93-29750
Power beaming to communication satellites in GEO
[DE93-007608] p 3279 N93-29840

LASER PROPULSION
The lightcraft project p 3233 N93-29749

LASER PUMPING
Low-pump-rate multi-millisecond atomic xenon laser
[DE93-011484] p 3437 N93-29180
ND laser with co-doped ion(s) pumped by visible laser diodes
[AD-D015711] p 3437 N93-29277
Research studies on short wavelength by selective auger processes
[AD-A264493] p 3440 N93-30401
Tunable CW diode-pumped Tm,Ho:YLiF4 laser operating at or near room temperature
[NASA-CASE-NPO-18611-1-CU] p 3440 N93-30415
Holmium quasi-two level laser
[AD-D015706] p 3440 N93-30427
Intracavity-pumped 2.1 micrometer Ho(3+): YAG laser
[AD-D015728] p 3441 N93-30587
A variable reflectivity output coupler for optically pumped far infrared lasers
[MPE-PREPRINT-225] p 3441 N93-30640

LASER RANGE FINDERS
Recognizing parameterized objects from range data
[OUEL-1918/92] p 3523 N93-28486

LASER SPECTROMETERS
Measurement of the rotation Raman spectra of nitrogen, oxygen, and water vapor under conditions of a temperature humidity lidar
[GKSS-92/E/32] p 3485 N93-31018

LASER SPECTROSCOPY
Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652
Laser spectroscopy of hydrocarbon radicals
[DE93-012555] p 3436 N93-28653
Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769
Aerosol particle analysis by Raman scattering technique
[DE93-005587] p 3309 N93-28880
High resolution free-electron laser spectroscopy
[AD-A263734] p 3439 N93-29853
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007
Single-shot femtosecond spectroscopy: A methodology for observation of solid-state chemical reactions
p 3319 N93-30075
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means
p 3319 N93-30081
Computer control of pulsed tunable dye lasers
[DE93-605896] p 3441 N93-30801
Pulsed laser photoacoustic spectrometer for study of solid materials
[DE93-605290] p 3441 N93-31023

LASER TARGETS
Inertial confinement fusion target component fabrication and technology development support
[DE93-010836] p 3585 N93-28836
A new multichannel soft x ray framing camera for fusion experiments
[DE93-009302] p 3432 N93-29773
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101

LASER WEAPONS
Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method
[AD-A263997] p 3439 N93-29867

LASERS
Laser based 3D volumetric display system
[AD-A264825] p 3441 N93-30599

LATE STARS
Spherically symmetric model atmospheres for late-type giant stars
[ISBN-0-315-72632-6] p 3633 N93-28673

LATENT HEAT
A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152
Surface shear stress estimates from geostrophic winds for use in sensible and latent heat flux formulations
p 3483 N93-30044
The estimation and scaling of land-surface fluxes of latent and sensible heat with remotely sensed data over a grassland site p 3462 N93-30045

LATERAL STABILITY
Hypersonic lateral and directional stability characteristics of aeroassist flight experiment configuration in air and CF4
[NASA-TM-4435] p 3239 N93-29166
Vehicle dynamic stability and rollover
[PB93-185437] p 3447 N93-30828

LATTICE PARAMETERS
Bainitic stabilization of austenite in low alloy steels
[DE93-008275] p 3321 N93-28957

LATTICE VIBRATIONS
Neutron scattering studies of the structures and lattice dynamics of the alkali metals
[DE93-008272] p 3593 N93-28956
High pressure studies of hydrated nafion membranes: Dielectric relaxation and deuteron NMR
[AD-A263511] p 3332 N93-29342
Knot invariants and cellular automata
[AD-A264199] p 3607 N93-30884
A dynamical model of structural phase transition in La2CuO4
[DE93-605325] p 3602 N93-31025

LAUNCH DATES
Payload flight assignments. NASA mixed fleet
[NASA-TM-108255] p 3268 N93-30133

LAUNCH VEHICLE CONFIGURATIONS
ASUR p 3228 N93-29720

LAUNCH VEHICLES
Space transportation analysis and design (Reissue A)
[AD-A262752] p 3271 N93-28487
Natural environmental service support to NASA vehicle, technology, and sensor development programs
[NASA-CR-192554] p 3469 N93-29029
Launch vehicles for lightweight TACSAT deployment
p 3271 N93-29903
An overview of DARPA's advanced space technology program p 3269 N93-29908
Payload flight assignments. NASA mixed fleet
[NASA-TM-108255] p 3268 N93-30133
A representative survey of US space systems and methods for estimating their costs
[AD-A264159] p 3272 N93-30881

LAUNCH WINDOWS
SeaWiFS technical report series. Volume 2: Analysis of orbit selection for SeaWiFS: Ascending versus descending node
[NASA-TM-104566-VOL-2] p 3486 N93-28497

LAUNCHING SITES
Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation
[NASA-CR-193016] p 3272 N93-31033

LAWS
Pollution prevention: A regulatory update
[DE93-009727] p 3472 N93-30180

LAY-UP
Advanced fiber placement of composite fuselage structures p 3306 N93-30864

LEAD ACID BATTERIES
High reliability, maintenance-free INS battery development
[AD-A264521] p 3412 N93-30406

Technical examination and simulation of a photovoltaic system: Solar generator, battery, download
[ETN-93-94179] p 3466 N93-30573

LEAD ALLOYS
Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems
[DE93-753130] p 3320 N93-28529

LEAD TITANATES
Materials for adaptive structural acoustic control, volume 2
[AD-A264620] p 3563 N93-30385

LEAD ZIRCONATE TITANATES
Materials for adaptive structural acoustic control, volume 1
[AD-A264619] p 3562 N93-30121
Materials for adaptive structural acoustic control, volume 2
[AD-A264620] p 3563 N93-30385

LEADING EDGES
SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2
p 3318 N93-29367
Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370
Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379
Prediction of jet impingement cooling scheme characteristics (airfoil leading edge application)
p 3255 N93-29941
Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375

LEAKAGE
Tank issues: Design and placement of floating liquid monitoring wells
[PB93-161149] p 3469 N93-29033
Tank issues: Site characterization for external leak monitoring
[PB93-161156] p 3469 N93-29034
Valve malfunction detection apparatus
[NASA-CASE-MFS-29904-1] p 3432 N93-29503
Heat transfer and leakage in high-speed rotating stepped labyrinth seals p 3256 N93-29951

LEARNING
Cognitive and Neural Sciences Division 1992 programs
[AD-A263400] p 3654 N93-29258
Parallel processing and learning: Variability and chaos in self-organization of activity in groups of neurons
[AD-A264224] p 3539 N93-30361
Profiles of major federal literacy programs
[PB93-163863] p 3608 N93-30657

LEAST SQUARES METHOD
Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179
Enhanced reduction of velocity data obtained during CETA flight experiment
[NASA-TM-4460] p 3431 N93-29209
Evaluation of fuzzy inference systems using fuzzy least squares p 3513 N93-29539
QR decomposition based least squares lattice algorithm p 3358 N93-30239

LENGTH
Crack length determination by ultrasonic methods
[DE93-008075] p 3450 N93-28567
Atmospheric transverse coherence length measurement system for laser communications
[AD-A263563] p 3439 N93-29827

LENNARD-JONES POTENTIAL
Molecular dynamics of detonation in crystals with defects p 3350 N93-30097

LENS ANTENNAS
Recent advances in bootlace lens design
p 3374 N93-30336

LENS DESIGN
Development of a 9.3 micrometer CW LIDAR for the study of atmospheric aerosol
[NASA-CR-193227] p 3381 N93-29105

LENSES
A compact imaging detector of polarization and spectral content p 3582 N93-28810
A study of the effects of lens focal length on remote driver performance
[AD-A263191] p 3505 N93-28941
Ultra-high resolution water window x ray microscope optics design and analysis
[NASA-CR-193225] p 3578 N93-29128

LEPTONS
New limits on generation-1 leptoquarks
[DE93-008138] p 3567 N93-29351
Planck scale effects in neutrino physics
[DE93-606133] p 3571 N93-30793

LESIONS
Analysis of visual loss from retinal lesions
[AD-A264692] p 3496 N93-30494

LEVITATION
Forces on a magnet moving past figure-eight coils
[DE93-009965] p 3561 N93-29189

LEWIS BASE
Coordination compounds of aluminum as precursors to aluminum nitride
[AD-A264700] p 3327 N93-30574

LEWIS NUMBERS
Studies in premixed combustion
[DE93-007955] p 3310 N93-29051

LIBRARIES
BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems
[DE93-011391] p 3524 N93-28644
A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846
RBSE: Product development team research activity deliverables
[NASA-CR-193115] p 3527 N93-29212
Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396
The 9th FLICC Forum on Federal Information Policies
[PB93-184687] p 3624 N93-29668
Proposal for a numerical array library
[DE93-010678] p 3623 N93-30482

LIBRATIONAL MOTION
The dynamics and control of space tethers
p 3274 N93-28629

LICENSING
The role of the University Licensing Office in transferring intellectual property to industry p 3626 N93-30698

LIE GROUPS
Lie groups whose set of compact subgroups is inductive
[ETN-93-93791] p 3547 N93-28524
Deformations of the Lie algebras L1(H(2)) and L1(W(2))
[MEMO-1056] p 3547 N93-28667
Computer algebra tools for higher symmetry analysis of nonlinear evolution equations
[DE93-606089] p 3535 N93-30787
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Positive energy representations of the conformal quantum algebra
[DE93-606064] p 3551 N93-30809
Connections between quantized affine algebras and superalgebras
[DE93-606065] p 3551 N93-30810
Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917
Abelian gauge theories on homogeneous spaces
[DE92-644730] p 3607 N93-30921
Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924
Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925
Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928
Normal equivariant forms of vector fields
[DE92-644845] p 3551 N93-30929
The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

LIFE (DURABILITY)
Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669
The design and lifetime calculation of MHD generator walls based on subcritical crack growth in ceramics
[ISBN-90-9004009-9] p 3332 N93-29267

LIFE SCIENCES
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
JPRS report: Science and technology. Central Eurasia: Life sciences
[JPRS-ULS-93-005] p 3490 N93-28683
JPRS report: Science and technology. Central Eurasia: Life sciences
[JPRS-ULS-92-027] p 3490 N93-28684

LIFE SUPPORT SYSTEMS
Evaluation of test methods and requirements for respiratory protection systems 21
[AD-A262466] p 3501 N93-28757
Mathematical modeling and control law development for the atmospheric monitoring and control system of the Controlled Environment Research Chamber (CERC) at NASA Ames Research Center
[AD-A261978] p 3261 N93-29436
Selenia: A habitability study for the development of a third generation lunar base p 3233 N93-29748
Technology transfer in the NASA Ames Advanced Life Support Division p 3628 N93-30724

LIFT
Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller
[AD-A264057] p 3241 N93-29891

LIFT AUGMENTATION
Tailored composite wings with elastically produced chordwise camber p 3308 N93-30876
The numerical simulation of circulation controlled airfoil flowfields p 3243 N93-30947

LIGANDS
Organometallic and surface chemistry of mixed-metal systems
[DE93-012686] p 3325 N93-30059
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610
Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816

LIGHT (VISIBLE RADIATION)
Response of energetic solids to light, heat and shock pulses
[AD-A263702] p 3342 N93-29296
Conspicuity of aids to navigation. Part 1: Temporal patterns for flashing lights
[AD-A264626] p 3499 N93-30426

LIGHT AMPLIFIERS
All solid-state high power visible laser
[NASA-CR-193163] p 3436 N93-28623

LIGHT BEAMS
SWAT 2 overview
[AD-A262905] p 3578 N93-29139
SWAT laboratory test results
[AD-A262906] p 3578 N93-29140
Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007

LIGHT ELEMENTS
A compact imaging detector of polarization and spectral content p 3582 N93-28810
Further analysis of LDEF FRECOPA micrometeoroid remnants p 3638 N93-29360

LIGHT EMITTING DIODES
Fiber-optic currents measurements
[DE93-007970] p 3579 N93-29350
Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455
Visible light emitting materials and injection devices
[AD-A263499] p 3601 N93-30811

LIGHT MODULATION
Spatial Light Modulators (SLMs) surface quality
[AD-A263249] p 3579 N93-29656
Electro-optic characterisation of extremely wide bandwidth electrical signals
[AD-A264202] p 3392 N93-30145
Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372
Subpicosecond electrooptic sampling
[AD-A264635] p 3581 N93-30520
Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609

LIGHT SCATTERING
Loading and testing a light scattering cell with a binary fluid mixture near its critical composition
[NASA-CR-193147] p 3415 N93-28557
Measurements of light scattering by small particles at an angle of zero degrees
[AD-A263856] p 3580 N93-29887
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667
Analysis of possibilities for using laser scattering for MeV electron beam diagnostics
[DE93-606223] p 3441 N93-30767

LIGHT SOURCES
Undulator Spectromicroscopy Facility at the Advanced Light Source
[DE93-007964] p 3261 N93-28490

X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869

A quality monitor and monitoring technique employing optically stimulated electron emission
[NASA-CASE-LAR-15063-1] p 3449 N93-30414

Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609

LIGHTNING

Discharge of electrically charged clouds
[AD-A263212] p 3480 N93-28518

Proceedings of the Thunder and Lighting Seminar and the 3D Lightning Warning Workshop
[AD-A262766] p 3482 N93-29304

Thunderstorm forecast study for Eglin AFB, Florida
[AD-A263423] p 3483 N93-29810

Stand alone lightning detection equipment used at Canadian Forces air bases p 3367 N93-30295

Rocket-triggered lightning studies for the protection of critical assets
[DE93-009633] p 3484 N93-30651

Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737

A long wave TE/TM noise prediction model
p 3397 N93-30742

LIGHTNING SUPPRESSION

Characteristic and development report SA3581/MC4196 Lightning Arrestor Connector (LAC)
[DE93-010610] p 3412 N93-30118

LINE OF SIGHT

Tomographic analysis of line-of-sight infrared spectra of low-pressure flames
[AD-A263185] p 3309 N93-28514

Design considerations for a night, air-to-surface attack capability on a dual role fighter p 3251 N93-28871

An automated observing system for passive evaluation of cloud cover and visibility
[AD-A263207] p 3481 N93-28875

LINE SPECTRA

Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers
[DE93-008706] p 3586 N93-29093

CO lines toward NGC 2024 and other star forming regions: A closer look at the warm gas component
[MPE-PREPRINT-223] p 3637 N93-30639

Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

LINEAR ACCELERATORS

Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533

Ultraviolet free electron laser facility preliminary design report
[DE93-009360] p 3435 N93-28594

NPB cesium space experiment p 3267 N93-28733

Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768

Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830

TESLA test cell cryostat support post thermal and structural analysis
[DE93-008365] p 3407 N93-29048

Study of gain in C-band deflection cavities for a frequency-doubling magnicon amplifier
[AD-A263132] p 3409 N93-29478

Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method
[AD-A263997] p 3439 N93-29867

Pulse control in an accelerator for heavy-ion fusion
[DE93-009527] p 3576 N93-30390

LINEAR ARRAYS

Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

Tolerance theory of phased array antennas: A statistical approach p 3369 N93-30307

LINEAR ENERGY TRANSFER (LET)

LET spectra measurements of charged particles in the P0006 experiment on LDEF p 3573 N93-29637

LINEAR EQUATIONS

BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems
[DE93-011391] p 3524 N93-28644

Simplified Linear Equation Solvers: User's manual
[DE93-011975] p 3550 N93-30140

LINEAR FILTERS

Synchronization of the LAPTV adative filter with input statistics p 3358 N93-30242

LINEAR PROGRAMMING

Packing of Steiner trees: Polyhedric studies and application
[ETN-93-93796] p 3547 N93-28527

Estimating test range capacity
[AD-A262493] p 3270 N93-28938

Modelling temporal abductive explanation
[AD-A263096] p 3526 N93-29145

Dynamic factorization in large-scale optimization
[AD-A263993] p 3528 N93-29345

Automated modeling of physical systems
[NASA-CR-193256] p 3531 N93-29873

LINEAR QUADRATIC REGULATOR

Dynamics and robust control of sampled data systems for large space structures
[AD-A264192] p 3281 N93-30142

Optimal filtering and LQR theory with constraints on system and control matrices p 3357 N93-30234

LINEAR SYSTEMS

BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems
[DE93-011391] p 3524 N93-28644

Division by polynomial matrix and its application to multivariable linear systems p 3357 N93-30233

LINEARITY

A dynamic bandwidth and phase linearity measurement technique for 4-channel MSK VLF antenna systems
p 3398 N93-30748

LINEARIZATION

The semiclassical stability of de Sitter spacetime
[DESY-92-131] p 3603 N93-28472

Multivariable control of the Space Shuttle Remote Manipulator System using linearization by state feedback
[NASA-CR-188248] p 3443 N93-29080

LINGUISTICS

Antirational transductions and their language families
[ETN-93-93794] p 3611 N93-28525

The axiomatic definition of a linguistic scale fuzziness degree, its major properties, and applications
p 3510 N93-29520

Fuzzy neural network methodology applied to medical diagnosis p 3498 N93-29546

An experimental methodology for a fuzzy set preference model p 3514 N93-29547

A fuzzy set preference model for market share analysis p 3514 N93-29548

Intelligent fuzzy controller for event-driven real time systems p 3515 N93-29551

A neural fuzzy controller learning by fuzzy error propagation p 3516 N93-29560

Quantification of human responses
p 3500 N93-29564

Neural networks: A simulation technique under uncertainty conditions p 3519 N93-29577

LINKAGES

Joint drive development for the Space Station Remote Manipulator System p 3370 N93-30313

LIPIDS

Micropipet manipulation of lipid membranes: Direct measurement of the material properties of a cohesive structure that is only two molecules thick
p 3291 N93-30953

LIQUEFACTION

Hybrid oxygen system
[AD-A262417] p 3500 N93-28464

LIQUID ALLOYS

Effective interactions between concentration fluctuations and charge transfer in chemically ordering liquid alloys
[DE93-606724] p 3327 N93-30778

LIQUID COOLING

Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641

Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471

Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling
[AD-A264174] p 3425 N93-30155

LIQUID CRYSTALS

Low-cost helmet-mounted displays
[AD-A262616] p 3501 N93-28479

Optically tiled flat panel displays. A feasibility study
[AD-A262737] p 3592 N93-28590

Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films
[AD-A263664] p 3594 N93-29293

Shear sensitive monomer-polymer laminate structure and method of using same
[NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613

NMR studies of molecules in liquid crystals and graphite
[DE93-010423] p 3569 N93-29805

Ferroelectric liquid crystal optical interconnect switching systems
[AD-A263751] p 3596 N93-29859

Cooling geometry optimization using liquid crystal technique p 3254 N93-29939

Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases
p 3255 N93-29943

Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596

Physical chemical studies on molecular composite compositions
[AD-A264834] p 3339 N93-30898

LIQUID FLOW

A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126

Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326

Pulse mitigation and heat transfer enhancement techniques. Volume 5: Transient liquid movement in heat pipe wicks
[AD-A264513] p 3426 N93-30403

LIQUID METAL FAST BREEDER REACTORS

Compatibility studies of AISI type 316 stainless steel with lead-lithium eutectic alloy
[DE93-605281] p 3328 N93-31022

LIQUID METALS

Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems
[DE93-753130] p 3320 N93-28529

A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214

LIQUID NITROGEN

The microchannel heatsink with liquid nitrogen cooling
[DE93-009258] p 3422 N93-29300

Cryogenic magnetic bearing
[AD-A264716] p 3446 N93-30512

LIQUID OXYGEN

Hybrid oxygen system
[AD-A262417] p 3500 N93-28464

LIQUID PHASE SINTERING

Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976

LIQUID PROPELLANT ROCKET ENGINES

Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1] p 3289 N93-29847

Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 3338 N93-30565

Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing
[NASA-CR-191036] p 3448 N93-31039

LIQUID ROCKET PROPELLANTS

A new facility for advanced rocket propulsion research
[NASA-TM-106193] p 3270 N93-28696

LIQUID SLOSHING

The MODE family of facility class experiments
p 3263 N93-28705

Liquid Motion in a rotating tank Experiment (LME)
p 3264 N93-28710

The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376

LIQUID SODIUM

Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load
[AD-A263496] p 3422 N93-29338

LIQUID-GAS MIXTURES

Combined centrifugal force/gravity gas/liquid separator system
[AD-D015726] p 3444 N93-29288

Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326

Prediction of gas-liquid two-phase flow regime in microgravity
[NASA-TM-106274] p 3352 N93-30939

LIQUID-SOLID INTERFACES

Analytical applications of electrified interfaces between two immiscible solutions
[AD-A263085] p 3311 N93-29132

Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256

LIQUIDS

Examination of shock induced chemical reactions in liquids using time-resolved optical spectroscopy
p 3318 N93-30073

Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359

Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551

LITHIUM

In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques [DE93-007699] p 3405 N93-28581

Research and development of carbon black anodes for lithium secondary cells [DE93-781331] p 3406 N93-28746

Design and evaluation of a uniaxial pull test for lithium hydride/deuteride [DE93-010760] p 3451 N93-28832

Alkali metal carbon dioxide electrochemical system for energy storage and/or conversion of carbon dioxide to oxygen [NASA-CASE-LEW-14973-1] p 3464 N93-28974

Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry [AD-A263098] p 3311 N93-29133

Research and development of lithium secondary batteries for load conditioner use, volume 2 [DE93-781329] p 3410 N93-29673

Characterization of lithium electrode surface in lithium secondary batteries by in situ Raman spectroscopic methods [AD-A263728] p 3411 N93-29986

LITHIUM ALLOYS

Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems [DE93-753130] p 3320 N93-28529

LITHIUM HYDRIDES

Design and evaluation of a uniaxial pull test for lithium hydride/deuteride [DE93-010760] p 3451 N93-28832

LITHIUM NIOBATES

Holographic data storage crystals for the LDEF p 3435 N93-29697

LITHIUM SULFUR BATTERIES

Approach to extending the cycle life of lithium secondary battery [DE93-776266] p 3406 N93-28983

Battery testing at Argonne National Laboratory [DE93-009204] p 3407 N93-29036

Temperature compensated lithium battery energy monitor [AD-D015680] p 3409 N93-29605

LITHOGRAPHY

Healing of lithographically introduced flaws in glass and glass containing ceramics [DE93-010453] p 3330 N93-28761

An investigation of stereolithography as a means of prototyping from a cad database [AD-A263410] p 3613 N93-29210

Computational simulations of a soft x ray projection lithography laser plasma source [DE93-009625] p 3437 N93-29264

Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists [AD-A263130] p 3432 N93-29476

LITHOSPHERE

Optimism experiment and development of space-qualified seismometers in France p 3646 N93-28796

LOAD TESTING MACHINES

System for testing bearings [NASA-CASE-MFS-28589-1] p 3445 N93-29618

LOAD TESTS

Wind loads on canopy roofs [RR-CE132] p 3451 N93-29106

Load test set-up for the Airmass Sunburst Ultra-Light Aircraft p 3249 N93-29776

Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate p 3350 N93-30094

Development of an experimental method to determine the axial rigidity of a strut-node joint p 3290 N93-30950

LOADS (FORCES)

Dynamic ice structure interaction: Theory and applications [VTT-PUBS-90] p 3353 N93-28632

Wind loads on canopy roofs [RR-CE132] p 3451 N93-29106

DSS-14 subreflector actuator dynamics during the Landers earthquake p 3386 N93-29600

Energy efficient drivepower [DE93-012436] p 3411 N93-30058

LOCAL AREA NETWORKS

FDDI installation and performance analysis [AD-A263263] p 3529 N93-29497

Gigabit network communications research [AD-A264895] p 3536 N93-31026

LOCKING

Prosthetic elbow joint [NASA-CASE-MFS-28707-1] p 3508 N93-30566

LOCOMOTIVES

Engineman stress and fatigue: Pilot tests [PB93-175008] p 3507 N93-29675

LOGARITHMS

Logarithmic time scale in thermographic Non Destructive Evaluation (NDE) of materials p 3359 N93-30246

LOGIC

Modelling temporal abductive explanation [AD-A263096] p 3526 N93-29145

LOGIC CIRCUITS

Hierarchical model of matching p 3519 N93-29580

Performance enhancement of dynamic CMOS logic circuits p 3361 N93-30257

Electronics mixed-mode simulation [AD-A264734] p 3534 N93-30577

LOGIC DESIGN

Intelligent fuzzy controller for event-driven real time systems p 3515 N93-29551

LOGIC PROGRAMMING

Automated reasoning with function evaluation for COCOLOG [INRIA-RR-1713] p 3529 N93-29488

LOGISTICS MANAGEMENT

The program manager's notebook [AD-A263074] p 3609 N93-29142

Intelligent support for human computer interaction and decision-making in distribution planning and scheduling systems [AD-A263985] p 3610 N93-30124

LONG DURATION EXPOSURE FACILITY

Thermal control paints on LDEF: Results of M0003 sub-experiment 18 [AD-A263252] p 3329 N93-28561

LDEF materials data bases [NASA-TM-107757] p 3290 N93-29067

LDEF: 69 Months in Space. Second Post-Retrieval Symposium, part 2 [NASA-CP-3194-PT-2] p 3654 N93-29354

Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355

Micrometeoroids and debris on LDEF p 3638 N93-29356

Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357

Predicted and observed directional dependence of meteoroid/debris impacts on LDEF thermal blankets p 3638 N93-29358

Three-D crater analysis of LDEF impact features from stereo imagery p 3283 N93-29359

Further analysis of LDEF FRECOPA micrometeoroid remnants p 3638 N93-29360

Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey p 3638 N93-29361

Derivation of particulate directional information from analysis of elliptical impact craters on LDEF p 3283 N93-29362

Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364

Hypervelocity impact facility for simulating materials exposure to impact by space debris p 3283 N93-29365

Analysis of LDEF micrometeoroid/debris data and damage to composite materials p 3309 N93-29366

SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2 p 3318 N93-29367

Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368

Scanning electron microscope/energy dispersive x ray analysis of impact residues in LDEF tray clamps p 3283 N93-29369

Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment p 3638 N93-29370

Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF) p 3638 N93-29371

Interplanetary meteoroid debris in LDEF metal craters p 3638 N93-29372

Origin of orbital debris impacts on LDEF's trailing surfaces p 3283 N93-29373

Damage areas on selected LDEF aluminum surfaces p 3283 N93-29374

LDEF data: Comparisons with existing models p 3283 N93-29375

New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

Long Duration Exposure Facility (LDEF) attitude measurements of the Interplanetary Dust Experiment p 3638 N93-29377

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces p 3638 N93-29378

Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379

The Interstellar Gas Experiment: Analysis in progress p 3639 N93-29380

Follow up on the crystal growth experiments of the LDEF p 3602 N93-29381

LDEF: 69 Months in Space. Part 1: Second Post-Retrieval Symposium [NASA-CP-3194-PT-1] p 3660 N93-29621

Refinements on the pinhole camera measurements of the LDEF attitude p 3283 N93-29622

LDEF microenvironments, observed and predicted p 3283 N93-29623

A generalized approach to the thermal analysis of the Long Duration Exposure Facility's flight experiments p 3428 N93-29624

EnviroNET: On-line information for LDEF p 3624 N93-29625

Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626

Sensitivity of LDEF foil analyses using ultra-low background germanium vs. large NaI(Tl) multidimensional spectrometers p 3318 N93-29627

Radioactivities induced in some LDEF samples p 3572 N93-29628

A photon phreak digs the LDEF happening p 3572 N93-29629

Charged particle activation studies on the surface of LDEF spacecraft p 3572 N93-29630

Collection, analysis, and archival of LDEF activation data p 3624 N93-29631

Induced activation study of LDEF p 3572 N93-29632

Revised prediction of LDEF exposure to trapped protons p 3572 N93-29633

A measurement of the radiation dose to LDEF by passive dosimetry p 3572 N93-29634

LDEF: Dosimetric measurement results (AO 138-7 experiment) p 3573 N93-29635

Absorbed dose measurements and predictions on LDEF p 3573 N93-29636

LET spectra measurements of charged particles in the P0006 experiment on LDEF p 3573 N93-29637

Light-heavy ion measurements in CR-39 located on the Earth side of LDEF p 3573 N93-29638

Three-dimensional shielding effects on charged particle fluences measured in the P0006 experiment of LDEF p 3573 N93-29639

Development and application of a 3-D geometry/mass model for LDEF satellite ionizing radiation assessments p 3573 N93-29640

Radiation model predictions and validation using LDEF satellite data p 3573 N93-29641

Future directions for LDEF ionizing radiation modeling and assessments p 3573 N93-29642

Cosmogenic radionuclides on LDEF: An unexpected Be-10 result p 3573 N93-29643

Heavy ion measurement on LDEF p 3573 N93-29644

Progress report on the Heavy Ions in Space (HIIS) experiment p 3573 N93-29645

Progress report on the ultra heavy cosmic ray experiment (AO178) p 3654 N93-29646

LDEF: 69 Months in Space. Part 4: Second Post-Retrieval Symposium [NASA-CP-3194-PT-4] p 3665 N93-29682

Overview of the Systems Special Investigation Group investigation p 3318 N93-29683

Post-flight analyses of the crystals from the M0003-14 quartz crystal microbalance experiment p 3602 N93-29684

Radiation sensitivity of quartz crystal oscillators experiment for the Long Duration Exposure Facility (LDEF), part 2 p 3414 N93-29685

LEO effects on candidate solar cell cover materials p 3467 N93-29687

New results from FRECOPA analysis p 3448 N93-29688

Degradation of electro-optic components aboard LDEF p 3582 N93-29689

LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690

In orbit degradation of EUV optical components in the wavelength range 10-40 nm AO 138-3 p 3582 N93-29691

Degradation of optical components in a space environment p 3582 N93-29692

Studies of effects on optical components and sensors: LDEF experiments AO-147 (ERB components) and S-0014 (APEX) p 3582 N93-29693

Effects of long term space environment exposure on optical substrates and coatings (S0050-2) p 3582 N93-29694

LDEF space optics handbook p 3582 N93-29695

Ruled and holographic experiment (AO 138-5) p 3434 N93-29696

Holographic data storage crystals for the LDEF p 3435 N93-29697

Characterization of a space orbited incoherent fiber optic bundle p 3583 N93-29698

Analyses of space environment effects on active fiber optic links orbited aboard the LDEF p 3583 N93-29699

Radiation and temperature effects on LDEF fiber optic samples p 3583 N93-29700

Long Duration Exposure Facility (LDEF) low temperature Heat Pipe Experiment Package (HEPP) flight results p 3429 N93-29701

Final results of space exposed experiment developed for students p 3492 N93-29702

Continued results of the seeds in space experiment p 3492 N93-29703

LDEF archival system plan p 3624 N93-29704

Retrievable payload carrier, next generation Long Duration Exposure Facility: Update 1992 p 3283 N93-29705

Next generation optical instruments and space experiment based on the LDEF thermal control surfaces experiment (S0069) p 3583 N93-29706

An LDEF 2 dust instrument for discrimination between orbital debris and natural particles in near-Earth space p 3286 N93-29707

Future radiation measurements in low Earth orbit p 3654 N93-29708

LONG DURATION SPACE FLIGHT

Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1 [NASA-TM-108408] p 3331 N93-29193

Issues on human acceleration tolerance after long-duration space flights [NASA-TM-104753] p 3495 N93-29651

LONG TERM EFFECTS

Degradation of electro-optic components aboard LDEF p 3582 N93-29689

Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study [PB93-181618] p 3474 N93-30823

LONG WAVE RADIATION

The distribution of the annual and semiannual cycles in the tropics [DE92-642213] p 3485 N93-31006

LORAN

Wind measurement accuracy of a loran radiosonde [AD-A263572] p 3483 N93-29832

LORENTZ FORCE

Some problems of relativistic electrodynamics [DE92-644738] p 3400 N93-30923

LORENTZ TRANSFORMATIONS

A new exact solution to the classical equations of motion of the relativistic string with massive ends [DE92-644736] p 3557 N93-30922

Relativity theory in (2 + 2)-space [DE92-644671] p 3608 N93-30983

LOSSES

World commercial aircraft accidents [DE93-010892] p 3243 N93-28571

Signal-to-noise ratio losses in full spectrum combining of signals with a downconverted subcarrier p 3386 N93-29599

Analysis of visual loss from retinal lesions [AD-A264692] p 3496 N93-30494

LOUDNESS

Subjective response to simulated sonic booms with ground reflections [NASA-TM-107764] p 3561 N93-28692

LOW ALTITUDE

Acoustic-gravity waves from low-altitude localized disturbances [AD-A264804] p 3479 N93-30593

LOW ASPECT RATIO WINGS

High-Reynolds-number test of a 5-percent-thick low-aspect-ratio semispan wing in the Langley 0.3-meter transonic cryogenic tunnel: Wing pressure distributions [NASA-TM-4227] p 3240 N93-29449

LOW COST

Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700

Selection and static calibration of the Marsh J1678 pressure gauge p 3249 N93-29779

Planar active antennas and quasi-optical power combining arrays using FET's and slots [AD-A263759] p 3387 N93-29875

QuickStar: System design, capabilities, and tactical applications of a small, smart space system p 3284 N93-29905

LOW FREQUENCIES

The cone structure and focusing of the electric field of VLF and LF waves at high altitudes of the ionosphere p 3395 N93-30731

Studies of the propagation of Low Frequency (LF) radio waves p 3396 N93-30738

Comparative study of undersea fields produced by various dipoles p 3397 N93-30740

LOW PASS FILTERS

Theoretical bit error rate performance of the Kalman filter excisor for FM interference [AD-A263018] p 3383 N93-29407

LOW PRESSURE

Tomographic analysis of line-of-sight infrared spectra of low-pressure flames [AD-A263185] p 3309 N93-28514

Growing wheat to maturity in reduced gas pressures [NASA-CR-193245] p 3491 N93-29216

NOx chemistry in natural gas flames [PB93-175263] p 3317 N93-30760

LOW REYNOLDS NUMBER

Accelerated motion of rigid spheres in unsteady flows at low to moderate Reynolds numbers p 3416 N93-28612

A new flux conserving Newton's method scheme for the two-dimensional, steady Navier-Stokes equations [NASA-TM-106160] p 3416 N93-28626

Velocity measurements of low Reynolds number tube flow using fiber-optic technology [DE93-009865] p 3422 N93-29335

LOW SPEED

Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller [AD-A264057] p 3241 N93-29891

LOW SPEED WIND TUNNELS

Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions p 3253 N93-29933

On the development of a film cooling layer p 3258 N93-29959

LOW TEMPERATURE

Low temperature (LT) GaAs and related materials [AD-A263607] p 3298 N93-29282

Defect studies in low-temperature-grown GaAs [DE93-010405] p 3595 N93-29417

An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination [AD-A264293] p 3492 N93-30818

LOW TEMPERATURE ENVIRONMENTS

Novel low temperature superconducting bolometers [DE93-010433] p 3430 N93-28664

A field investigation of water and salt movement in permafrost and the active layer [AD-A263706] p 3487 N93-29298

Microwave processing of silicon nitride for advanced gas turbine applications [DE93-007910] p 3334 N93-29767

LOWER IONOSPHERE

Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737

LUBRICANTS

A study of the chemical mechanism in lubrication [DE93-012230] p 3330 N93-28650

LUBRICATING OILS

Synthetic lubricating oil greases containing metal chelates of Schiff bases [AD-D015694] p 3333 N93-29458

LUBRICATION

Fundamental studies of friction, lubrication, and wear by atomic force microscopy [AD-A264647] p 3446 N93-30524

Tribology: Friction, lubrication, and wear technology p 3292 N93-30965

LUMINAIRES

Discomfort glare from high-intensity discharge headlamps: Effects of context and experience [PB93-174720] p 3496 N93-30659

Improved measurement of thermal effects on microstructure p 3292 N93-30959

LUMINESCENCE

Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid [DE93-007362] p 3593 N93-28966

LUMINOSITY

Maximizing the luminosity of hadron, supercolliders at 10-100 TeV [DE93-009247] p 3574 N93-29103

The 12 UM contribution of nearby galaxies to the infrared background [AD-A264336] p 3654 N93-30419

LUMINOUS INTENSITY

Large amplitude striations in an RF discharge [DE93-753244] p 3379 N93-28534

Polarimetric multispectral imaging technology p 3434 N93-28774

Near-infrared line imaging of NGC 6240: Global shock and nuclear starburst [MPE-PREPRINT-226] p 3631 N93-30641

LUNAR BASED EQUIPMENT

Lunar science: Using the Moon as a testbed p 3650 N93-28821

The 1990-1991 project summaries p 3230 N93-29730

LUNAR BASES

Indigenous lunar construction materials p 3277 N93-29120

Systems engineering studies of lunar base construction p 3277 N93-29121

Earth to lunar CELSS evolution p 3229 N93-29727

Selenia: A habitability study for the development of a third generation lunar base p 3233 N93-29748

The 1990-1991 project summaries p 3234 N93-29755

GENESIS 2: Advanced lunar outpost p 3235 N93-29760

LUNAR CONSTRUCTION EQUIPMENT

Space construction activities [NASA-CR-192690] p 3274 N93-29108

Lunar crane system p 3277 N93-29118

Indigenous lunar construction materials p 3277 N93-29120

Systems engineering studies of lunar base construction p 3277 N93-29121

LUNAR ENVIRONMENT

Lunar science: Using the Moon as a testbed p 3650 N93-28821

LUNAR EXPLORATION

Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768

LUNAR GRAVITATION

Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction [NASA-CR-188249] p 3634 N93-29042

LUNAR LANDING MODULES

The 1990/1991 project summaries p 3229 N93-29725

Lunar lander ground support system p 3230 N93-29729

Project UM-HAUL: A self-unloading reusable lunar lander p 3232 N93-29740

B and T: Lunar landers p 3234 N93-29751

RS Landers: Lunar lander p 3234 N93-29753

LUNAR MAGNETIC FIELDS

The production and evolution of plasma and associated magnetic fields during hypervelocity impacts: Implications for planetary paleomagnetism p 3589 N93-30000

LUNAR MAPS

Imaging spectrometers using concave holographic gratings p 3434 N93-28783

LUNAR PHASES

Tidal and lunar data for Point Mugu, San Nicolas island, and the Barking Sanda area during 1993 [AD-A262725] p 3477 N93-29401

LUNAR PHOTOGRAPHS

Systematic processing of Clementine data for scientific analyses p 3624 N93-28803

LUNAR RESOURCES

Use of particle beams for lunar prospecting p 3650 N93-28822

Method for producing oxygen from lunar materials [NASA-CASE-MSC-21759-1] p 3312 N93-29617

LUNAR ROCKS

Regolith-structure modeling p 3276 N93-29116

Lunar regolith penetrators and cutters p 3276 N93-29117

Indigenous lunar construction materials p 3277 N93-29120

Method for producing oxygen from lunar materials [NASA-CASE-MSC-21759-1] p 3312 N93-29617

LUNAR ROVING VEHICLES

Sources sought for innovative scientific instrumentation for scientific lunar rovers p 3434 N93-28804

Lunar rovers and local positioning system p 3277 N93-29119

LUNAR SHELTERS

Indigenous lunar construction materials p 3277 N93-29120

LUNAR SOIL

Method for producing oxygen from lunar materials [NASA-CASE-MSC-21759-1] p 3312 N93-29617

LUNAR SPACECRAFT

Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction [NASA-CR-188249] p 3634 N93-29042

LUNAR SURFACE

Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768

Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769
Sources sought for innovative scientific instrumentation for scientific lunar rovers p 3434 N93-28804
Use of particle beams for lunar prospecting
p 3650 N93-28822
The production and evolution of plasma and associated magnetic fields during hypervelocity impacts: Implications for planetary paleomagnetism p 3589 N93-30000

LUNAR SURFACE VEHICLES
The 1990-1991 project summaries
p 3230 N93-29730

LUNGS
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153

M

M STARS
Magnetic activity in low mass stars
[DE93-009073] p 3632 N93-28547
Spectroscopic and photometric studies of main sequence M stars and a search for late-type dwarfs in the solar vicinity p 3629 N93-28608

MACH NUMBER
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28
[NASA-TP-3313] p 3239 N93-29160
Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack
[AD-A263905] p 3240 N93-29862
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934

MACHINE LEARNING
Robotics and artificial intelligence for hazardous environments
[DE93-008271] p 3541 N93-29047
Overview of the System of Experts for Intelligent Data Management (SEIDAM) p 3613 N93-29228
A self-learning rule base for command following in dynamical systems p 3512 N93-29531
Learning characteristics of a space-time neural network as a tether skiprope observer p 3512 N93-29534
Fuzzy learning under and about an unfamiliar fuzzy teacher p 3516 N93-29558
Some problems with the design of self-learning management systems p 3516 N93-29559
A conjugate gradients/trust regions algorithms for training multilayer perceptrons for nonlinear mapping
p 3519 N93-29581
An accelerated training method for back propagation networks
[NASA-CASE-MSC-21625-1] p 3498 N93-29610
Analog CMOS circuits for neural networks
p 3355 N93-30223
A motion detector based on a neural network
p 3356 N93-30224
An artificial neural network model for periodic trajectory generation p 3356 N93-30225
Drive-reinforcement learning system applications
[AD-A264514] p 3446 N93-30404
Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561

MACHINE TOOLS
A virtual environment for manufacturing systems
[AD-A263128] p 3528 N93-29473

MACHINING
A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765
A simple model for explosives formulation
[DE93-010703] p 3341 N93-29251
Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424

MAGELLANIC CLOUDS
The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604

MAGNESIUM ALLOYS
Mechanical properties of several magnesium and aluminum composites
[AD-A262481] p 3299 N93-30137
Constitutive laws for deformation and dynamic recrystallization in cubic metals
[DE93-010740] p 3326 N93-30486

MAGNESIUM OXIDES
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092
The effect of Bi2 O3 on the electrical properties of Zr O2: 3 percent Mg O ceramic solid electrolytes
[DE93-607029] p 3339 N93-30774

MAGNESIUM TITANATES
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092

MAGNET COILS
Forces on a magnet moving past figure-eight coils
[DE93-009965] p 3561 N93-29189

MAGNETIC ANOMALIES
Remote sensing survey of Mississippi River-Gulf Outlet, Breton Sound disposal area, Plaquemines Parish, Louisiana
[AD-A263097] p 3459 N93-29146
Spacecraft surface charging handbook
[AD-A262778] p 3279 N93-29305
Heavy ion measurement on LDEF
p 3573 N93-29644

MAGNETIC BEARINGS
Cryogenic magnetic bearing
[AD-A264716] p 3446 N93-30512

MAGNETIC CONTROL
Magnetically operated check valve
[NASA-CASE-MSC-22046-1] p 3442 N93-28501

MAGNETIC CORES
The production and evolution of plasma and associated magnetic fields during hypervelocity impacts: Implications for planetary paleomagnetism p 3589 N93-30000

MAGNETIC DIPOLES
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740
Results of the joint HIPAS/NUWC campaigns to investigate ELF generated by auroral electrojet modulation p 3398 N93-30746

MAGNETIC DISKS
Goddard Conference on Mass Storage Systems and Technologies, Volume 1
[NASA-CP-3198] p 3616 N93-30449
RAID 7 disk array p 3537 N93-30462
Tutorial: Performance and reliability in redundant disk arrays p 3537 N93-30463
Striped tertiary storage arrays p 3620 N93-30464

MAGNETIC EFFECTS
Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158
Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776
Regular and chaotic motion of two dimensional electrons in a strong magnetic field
[DE93-604091] p 3607 N93-30933

MAGNETIC FIELD CONFIGURATIONS
Laboratory simulation of field-aligned currents
[NASA-CR-193091] p 3476 N93-28538
Nonlinear coupling of tearing fluctuations in the Madison Symmetric Torus
[DE93-010131] p 3584 N93-28602
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
Plasma diffusion through multidipole magnetic fields
[DE93-608548] p 3591 N93-31007

MAGNETIC FIELD RECONNECTION
Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749
Solar flare MDH
[AD-A262275] p 3652 N93-28756
Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303
Electrodynamics of the dayside cleft region based on ground observations at Svalbard
[AD-A263571] p 3477 N93-29831
Mithras studies of the boundary between open and closed field lines
[AD-A264758] p 3479 N93-30562

MAGNETIC FIELDS
Theory of normal and superconducting properties of fullerene-based solids
[DE93-007722] p 3592 N93-28582
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
Multifractal analysis of radio lobes
p 3380 N93-28689
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Coherent and semi-coherent neutron transfer reactions
[DE93-008336] p 3565 N93-28959
Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays
[DE93-008713] p 3593 N93-29094
Forces on a magnet moving past figure-eight coils
[DE93-009965] p 3561 N93-29189
Experimental study of location and identification of ferrous spheroids using a smart total field magnetometer
[AD-A263661] p 3324 N93-29391
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807
Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method
[AD-A263997] p 3439 N93-29867
Pattern measurements of US Navy ELF antennas
p 3399 N93-30752
Measurement of magnetic field penetration depth in niobium polycrystalline films by polarized neutron reflection method
[DE93-606390] p 3600 N93-30771
Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776
Neutrino oscillations and a new Faraday effect
[DE93-606111] p 3571 N93-30789
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Electric magnetic duality in string theory
[DE93-606061] p 3606 N93-30807
Modification of the S-band phase shifter model 331A-3 of Electromagnetic Sciences Inc.
[DIGEL-1992-5] p 3399 N93-30836
Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880

MAGNETIC FLUX
Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays
[DE93-008713] p 3593 N93-29094
Analysis of an MCG/fuse/PFS experiment
[DE93-007355] p 3410 N93-29812
Microsecond ribbon relativistic electron beam in a plane undulator and generation of microwave radiation
[DE93-605693] p 3400 N93-30993

MAGNETIC LEVITATION VEHICLES
Guideway structural design and power/propulsion/braking in relation to guideways, volume 1
[PB93-169902] p 3447 N93-30820

MAGNETIC MATERIALS
Operational results of pilot cell test with cermet inert anodes
[DE93-009338] p 3322 N93-29061

MAGNETIC MEASUREMENT
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
Remote measurement of planetary magnetic fields by the Hanle effect p 3645 N93-28793
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Measurement of magnetic field penetration depth in niobium polycrystalline films by polarized neutron reflection method
[DE93-606390] p 3600 N93-30771

MAGNETIC MIRRORS
Experimental MHD stability limit in the gas-dynamic trap
[DE93-606218] p 3591 N93-30780

MAGNETIC MOMENTS
Magnetic character investigation of higher alcohol synthesis Cu-Co-Cr catalysts
[DE93-009732] p 3316 N93-30653

MAGNETIC PROPERTIES
A detailed technology roadmap for superconductivity
p 3526 N93-29045

MAGNETIC RECORDING
Goddard Conference on Mass Storage Systems and Technologies, Volume 1
[NASA-CP-3198] p 3616 N93-30449
The modern high rate digital cassette recorder
p 3435 N93-30468
Evolution of a high-performance storage system based on magnetic tape instrumentation recorders
p 3435 N93-30470

MAGNETIC RESONANCE
Image segmentation using fuzzy LVQ clustering networks p 3511 N93-29528

MAGNETIC SIGNATURES
Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

MAGNETIC STORMS
Spacecraft surface charging handbook
[AD-A262778] p 3279 N93-29305
SESC products and services user guide
[PB93-178879] p 3653 N93-29679
MAGNETIC SUSPENSION
Forces on a magnet moving past figure-eight coils
[DE93-009965] p 3561 N93-29189
Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205
Cryogenic magnetic bearing
[AD-A264716] p 3446 N93-30512
Guideway structural design and power/propulsion/braking in relation to guideways, volume 1
[PB93-169902] p 3447 N93-30820
MAGNETIC TAPES
Goddard Conference on Mass Storage Systems and Technologies, Volume 1
[NASA-CP-3198] p 3616 N93-30449
GE networked mass storage solutions supporting IEEE network mass storage model p 3618 N93-30458
Striped tertiary storage arrays p 3620 N93-30464
Mass optical storage-tape (MOST)
p 3621 N93-30471
MAGNETIC VARIATIONS
Magnetic activity in low mass stars
[DE93-009073] p 3632 N93-28547
MAGNETIZATION
Enhancements of the critical currents of YBaCuO single crystals by neutron (n) and proton (p) irradiation
[DE93-007892] p 3592 N93-28661
MAGNETOACOUSTIC WAVES
Elemental compositions of high-energy ions produced by magnetosonic waves in quiescent plasmas
[DE93-753241] p 3588 N93-29434
Ion ring distribution produced by a magnetosonic wave
[DE93-754311] p 3590 N93-30533
MAGNETOHYDRODYNAMIC FLOW
Analysis of an MCG/fuse/PFS experiment
[DE93-007355] p 3410 N93-29812
Two-dimensional and three-dimensional time-dependent MHD model of extended corona
p 3653 N93-30496
MAGNETOHYDRODYNAMIC GENERATORS
Magnetohydrodynamic projects at the CDIF
[DE93-012195] p 3584 N93-28649
The design and lifetime calculation of MHD generator walls based on subcritical crack growth in ceramics
[ISBN-90-9004009-9] p 3332 N93-29267
Transient tests on an MHD thruster
[DE93-008656] p 3587 N93-29299
MAGNETOHYDRODYNAMIC STABILITY
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532
Self-consistent chaos in the beam-plasma instability
[DE93-009581] p 3584 N93-28599
Solar flare MDH
[AD-A262275] p 3652 N93-28756
Self-organized profile relaxation by ion temperature gradient instability in toroidal plasmas
[DE93-009580] p 3585 N93-28910
Collective transport of alpha particles due to Alfven wave instability
[DE93-009578] p 3587 N93-29148
Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303
Ionospheric structure specifications and systems effects
[AD-A263573] p 3476 N93-29343
A novel approach for new radiation sources based on solid state plasma instabilities
[AD-A263699] p 3588 N93-29382
Vertical slot convection: A linear study
[DE93-007643] p 3423 N93-29804
Experimental MHD stability limit in the gas-dynamic trap
[DE93-606218] p 3591 N93-30780
MAGNETOHYDRODYNAMIC WAVES
Collective transport of alpha particles due to Alfven wave instability
[DE93-009578] p 3587 N93-29148
Elemental compositions of high-energy ions produced by magnetosonic waves in quiescent plasmas
[DE93-753241] p 3588 N93-29434
MAGNETOHYDRODYNAMICS
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
Magnetohydrodynamic projects at the CDIF
[DE93-012195] p 3584 N93-28649
Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749
Solar flare MDH
[AD-A262275] p 3652 N93-28756
A study of the physical mechanisms for filament eruption and coronal mass ejection via numerical simulation
[NASA-CR-193180] p 3653 N93-28935
Transient tests on an MHD thruster
[DE93-008656] p 3587 N93-29299
MAGNETOMETERS
Optimism experiment and development of space-qualified seismometers in France
p 3646 N93-28796
Experimental study of location and identification of ferrous spheroids using a smart total field magnetometer
[AD-A263661] p 3324 N93-29391
MAGNETOPLASMADYNAMICS
Engineering consideration for the self-energizing magnetoplasmadynamic (MPD): Type fusion plasma thruster
[AD-A262785] p 3288 N93-29289
MAGNETOSPHERE-IONOSPHERE COUPLING
Laboratory simulation of field-aligned currents
[NASA-CR-193091] p 3476 N93-28538
USU center of excellence in theory and analysis of the geo-plasma environment
[AD-A264750] p 3590 N93-30585
MAGNETOSPHERES
GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars
[NASA-CR-193243] p 3635 N93-30053
MAGNETS
New technologies for UV detectors
p 3582 N93-28786
Mechanical behaviour of a closed collar model for an 11.5 T dipole
[NIKHEF-H/92-03] p 3576 N93-30019
MAIN SEQUENCE STARS
Spectroscopic and photometric studies of main sequence M stars and a search for late-type dwarfs in the solar vicinity p 3629 N93-28608
MAINTENANCE
New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583
Inservice diagnostic methods for solenoid-operated valves
[DE93-007823] p 3443 N93-28968
An analysis of the correlation between the J52 engine component improvement program and improved maintenance parameters
[AD-A262062] p 3251 N93-28984
Energy efficient drivepower: An overview
[DE93-012435] p 3411 N93-30057
Centralized maintenance evaluation
[AD-A264400] p 3544 N93-30886
MALES
Field trial of caffeine on physical performance at altitude: An attempt to overcome the challenge
[AD-A264260] p 3497 N93-30894
MALFUNCTIONS
Valve malfunction detection apparatus
[NASA-CASE-MFS-29904-1] p 3432 N93-29503
MAN ENVIRONMENT INTERACTIONS
Emission inventories: A global modeling perspective
[DE93-005817] p 3469 N93-28965
Overview of the DOE Atmospheric Chemistry Program's Ozone Project
[DE93-007416] p 3471 N93-29770
MAN MACHINE SYSTEMS
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing
p 3501 N93-28853
A new class of mission support for combat air-crew
p 3501 N93-28854
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
The design and development of the new RAF standard HUD format p 3502 N93-28856
Virtual interface applications for airborne weapons systems p 3502 N93-28858
Operator and automation capability analysis: Picking the right team p 3503 N93-28864
System automation and pilot-vehicle-interface for unconstrained low-altitude night attack
p 3503 N93-28867
Computer assisted evaluation for air close combat based on time interval characterization p 3504 N93-28868
Overview of cockpit technology research and development programs for improvement of the man/machine interface: Review of the AGARD AVP Symposium held in Madrid, May 1992
p 3505 N93-28872
Anthropometric data from launch and entry suited test subjects for the design of a recumbent seating system
[NASA-TM-104769] p 3505 N93-29044
Design and implementation of a Global Positioning System (GPS) supported area navigation system with electronic aircraft
[ILR-MITT-275(1992)] p 3246 N93-30671
MAN-COMPUTER INTERFACE
Dynamic object oriented interaction and its implementation in the framework in an interface management system
[ETN-93-93795] p 3523 N93-28526
Natural language generation
[AD-A262578] p 3524 N93-28579
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
A new class of mission support for combat air-crew
p 3501 N93-28854
The design and development of the new RAF standard HUD format p 3502 N93-28856
A distributed system for visualizing and analyzing multivariate and multidisciplinary data
p 3613 N93-29226
A C++ interface for programming on the Connection Machine
[INRIA-RR-1698] p 3538 N93-29487
Intelligent virtual reality in the setting of fuzzy sets
p 3513 N93-29544
Software testing using the IEEE standards
[DE93-009833] p 3532 N93-30050
Intelligent support for human computer interaction and decision-making in distribution planning and scheduling systems
[AD-A263985] p 3610 N93-30124
MANAGEMENT ANALYSIS
Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study
[PB93-181618] p 3474 N93-30823
MANAGEMENT METHODS
Performance measurement systems: A best practices study
[AD-A262180] p 3506 N93-29444
MANAGEMENT PLANNING
The program manager's notebook
[AD-A263074] p 3609 N93-29142
Overview of the DOE Atmospheric Chemistry Program's Ozone Project
[DE93-007416] p 3471 N93-29770
The 1991-1992 aviation system capacity plan
[AD-A263436] p 3261 N93-29788
The 1992 town meetings: Toward a shared vision
[NASA-NP-205] p 3608 N93-30134
The NCAT process p 3626 N93-30697
Technology transfer p 3627 N93-30707
Technology transfer within the government
p 3627 N93-30709
Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances
[PB93-185551] p 3475 N93-30829
Planning and progress of EPA's pollution prevention research program
[PB93-185767] p 3475 N93-30831
MANAGEMENT SYSTEMS
Some problems with the design of self-learning management systems p 3516 N93-29559
Design of biomass management systems and components for closed loop life support systems
p 3230 N93-29728
Measurements over distributed high performance computing and storage systems p 3622 N93-30476
MANGANESE
Design of a high activity and selectivity alcohol catalyst
[DE93-012277] p 3309 N93-28750
MANGANESE OXIDES
Design of a high activity and selectivity alcohol catalyst
[DE93-012277] p 3309 N93-28750
MANIFOLDS (MATHEMATICS)
Topology of hybrid objects
[ETN-93-93594] p 3546 N93-28466
A covariant form of the Maxwell's equations in four-dimensional spaces with an arbitrary signature
[DE93-606070] p 3605 N93-30783
Abelian gauge theories on homogeneous spaces
[DE92-644730] p 3607 N93-30921
Topology and statistics in zero dimensions
[DE93-604080] p 3607 N93-30932
Equivariant elliptic homology
[DE92-641338] p 3557 N93-30981

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

MANIPULATORS

New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583

Vision-based control of holonomic robots for 3-dimensional rigid-body positioning using camera-space manipulation p 3578 N93-29178

A manipulator kinematic design for high-vacuum operation
[DE93-010264] p 3444 N93-29247

A portable modular architecture for robotic manipulator control
[DE93-010819] p 3444 N93-29254

An architecture for robotic system integration
[DE93-010829] p 3444 N93-29316

Research on reconfigurable and reliable manipulators
[DE93-010244] p 3444 N93-29330

Advanced design for orbital debris removal in support of solar system exploration p 3229 N93-29724

Planning collision free paths for two cooperating robots using a divide-and-conquer C-space traversal heuristic
[NASA-CR-193252] p 3542 N93-29771

Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210

A closed-form formula for the manipulator regressor
p 3355 N93-30218

An information theoretic approach to stochastic adaptive control application to manipulators with active inertia
p 3359 N93-30247

Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261

A testbed for autonomous reflexive grasping
[AD-A264557] p 3446 N93-30384

Drive-reinforcement learning system applications
[AD-A264514] p 3446 N93-30404

Micropipet manipulation of lipid membranes: Direct measurement of the material properties of a cohesive structure that is only two molecules thick
p 3291 N93-30953

MANNED MARS MISSIONS

The 1990/1991 project summaries
p 3229 N93-29725

Mars integrated transportation system multistage Mars mission p 3232 N93-29741

Single-stage Mars mission p 3232 N93-29742

Mars habitat p 3233 N93-29747

MANNED REENTRY

Anthropometric data from launch and entry suited test subjects for the design of a recumbent seating system
[NASA-TM-104769] p 3505 N93-29044

MANNED SPACE FLIGHT

Analysis of orbital system logistics in the cis-lunar space with particular consideration of life cycle costs
[ETN-93-93484] p 3268 N93-29063

Technology transfer from the viewpoint of a NASA prime contractor p 3626 N93-30701

MANNED SPACECRAFT

Computerized atmospheric trace contaminant control simulation for manned spacecraft
[NASA-TM-108409] p 3505 N93-28977

Delta Advanced Reusable Transport (DART): An alternative manned spacecraft p 3231 N93-29735

Taurus Lightweight Manned Spacecraft Earth orbiting vehicle p 3231 N93-29736

Spacely's rockets: Personnel launch system/family of heavy lift launch vehicles p 3234 N93-29752

A representative survey of US space systems and methods for estimating their costs
[AD-A264159] p 3272 N93-30881

MANUAL CONTROL

Handedness and motor programming effects of manual control and movement
[AD-A264022] p 3499 N93-30027

MANUALS

Operating manual for single-shot autocorrelator
[AD-A262016] p 3438 N93-29395

Programmer's reference guide to FDMS file formats
[PB93-182038] p 3354 N93-29663

DOE fundamentals handbook: Chemistry
[DE93-012222] p 3314 N93-30198

DOE fundamentals handbook: Material science
[DE93-012224] p 3314 N93-30199

DOE fundamentals handbook: Material science
[DE93-012225] p 3314 N93-30200

MANUFACTURING

Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564

Lightweight flexible composite tent materials
[AD-A263021] p 3295 N93-28660

Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325

The 17th Annual Electronics Manufacturing Seminar proceedings
[AD-A261963] p 3409 N93-29435

Issues, concepts, and standard techniques in assessing accuracy of coordinate measuring machines
[PB93-184331] p 3354 N93-29666

Lessons learned for composite structures
p 3302 N93-30444

Memory driven feature-based design
[AD-A264697] p 3534 N93-30495

Process and assembly plans for low cost commercial fuselage structure p 3306 N93-30865

Silicon Film(trademark) photovoltaic manufacturing technology
[DE93-010008] p 3466 N93-30891

Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961

Thermoforming from a systems viewpoint
p 3293 N93-30967

MANY BODY PROBLEM

How to write fast and clear parallel programs using algebra
[DE93-000797] p 3524 N93-28640

Numerical simulation of quantum many-body systems
[DE93-008300] p 3603 N93-28958

Implementation of parallel algorithms
[AD-A263126] p 3529 N93-29496

Nonlinear attitude control of planar structures in space using only internal controls p 3280 N93-29991

Extracting infinite system properties from finite size clusters: Phase randomization/boundary condition averaging
[AD-A264712] p 3551 N93-30503

Schroedinger equations of higher (greater than 2) order
[DE92-644677] p 3552 N93-30984

MANY ELECTRON EFFECTS

Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642

MAPPING

Near real-time GIS in deep-ocean exploration
[AD-A262073] p 3487 N93-29003

Toward a coordinated spatial data infrastructure for the nation
[B-149] p 3456 N93-30634

MAPS

Estimating the parameters of chaotic maps
[AD-A262574] p 3556 N93-29423

Data quality statements for spatial databases
[AD-A264125] p 3616 N93-30195

MARINE METEOROLOGY

Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model
[DE93-007365] p 3477 N93-29346

Ocean aerosol measurements and models in the straits of Florida (The KEY-90 experiment)
[AD-A264777] p 3487 N93-29659

Oceanographic research towers in european waters
[AD-A264795] p 3489 N93-30612

Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665

MARINE RESOURCES

Building alliances to restore coastal environments: A coastal America progress report
[PB93-169464] p 3470 N93-29674

MARINE TECHNOLOGY

Conspicuity of aids to navigation. Part 1: Temporal patterns for flashing lights
[AD-A264626] p 3499 N93-30426

MARKET RESEARCH

Design of a turbofan powered regional transport aircraft p 3228 N93-29721

Helicopter training simulators: Key market factors
p 3237 N93-30683

US space commerce, 1991 p 3625 N93-30695

MARKETING

A fuzzy set preference model for market share analysis p 3514 N93-29548

Evaluation of environmental marketing terms in the United States
[PB93-175784] p 3474 N93-30660

MARKOV CHAINS

Easy-to-apply results for establishing convergence of Markov chains in Bayesian analysis
[AD-A264015] p 3555 N93-29979

MARKOV PROCESSES

Flow control using the theory of zero sum Markov games
[INRIA-RR-1597] p 3553 N93-28507

Asymptotic properties of constrained Markov decision processes
[INRIA-RR-1598] p 3553 N93-28508

Image classification using Markov random fields with two new relaxation methods: Deterministic pseudo annealing and modified metropolis dynamics
[INRIA-RR-1606] p 3553 N93-28510

Optimal control of the M/G/1 queue with repeated vacations of the server
[INRIA-RR-1637] p 3541 N93-28637

Closed-loop control with delayed information
[INRIA-RR-1638] p 3541 N93-28638

Speech recognition by recursive stochastic modelling
[ISBN-90-9005038-8] p 3382 N93-29266

Easy-to-apply results for establishing convergence of Markov chains in Bayesian analysis
[AD-A264015] p 3555 N93-29979

Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413

MARS (PLANET)

Optimism experiment and development of space-qualified seismometers in France
p 3646 N93-28796

Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812

MARS ATMOSPHERE

The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements
p 3649 N93-28815

The thermal structure, dust loading, and meridional transport in the Martian atmosphere during late southern summer p 3651 N93-29616

The 1990/1991 project summaries
p 3229 N93-29725

MARS CRATERS

Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

MARS ENVIRONMENT

An integrated XRF/XRD instrument for Mars exobiology and geology experiments p 3645 N93-28792

The MESUR mission p 3649 N93-28816

Planetary protection issues for the MESUR mission: Probability of growth (Pg)
[NASA-CP-3167] p 3651 N93-30214

MARS LANDING

Mars integrated transportation system multistage Mars mission p 3232 N93-29741

Single-stage Mars mission p 3232 N93-29742

Mars Aquarius Mission and Titan Explorer
p 3235 N93-29756

MARS OBSERVER

DSN support of Mars Observer p 3385 N93-29598

MARS PROBES

The MESUR mission p 3649 N93-28816

MARS SAMPLE RETURN MISSIONS

Benefits of in situ propellant utilization for a Mars sample return mission
[NASA-TM-106243] p 3341 N93-28695

Mars sample return mission: Two alternate scenarios
p 3233 N93-29746

MARS SURFACE

The APX spectrometer for Martian missions
p 3434 N93-28776

Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777

Optimism experiment and development of space-qualified seismometers in France
p 3646 N93-28796

Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800

Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805

Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812

The MESUR mission p 3649 N93-28816

Mars Aquarius Mission and Titan Explorer
p 3235 N93-29756

Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

MARS VOLCANOES

Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

MARTENSITE

International Conference on Martensitic Transformations (ICOMAT 92)
[AD-A262739] p 3321 N93-28591

Transformation toughening
[DE93-011805] p 3321 N93-28631

MARTENSITIC TRANSFORMATION
International Conference on Martensitic Transformations (ICOMAT 92)
[AD-A262739] p 3321 N93-28591
Transformation toughening
[DE93-011805] p 3321 N93-28631
Transformation plasticity in ductile solids
[DE93-008636] p 3321 N93-28902
MASKS
Evaluation and optimization of a flexible filtration system for respiratory protection system 21
[AD-A262467] p 3493 N93-28758
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A263464] p 3411 N93-29833
MASS
QuickStar: System design, capabilities, and tactical applications of a small, smart space system
p 3284 N93-29905
MASS FLOW
Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456
Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack
[AD-A263905] p 3240 N93-29862
MASS RATIOS
Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317
MASS SPECTRA
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066
1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568
MASS SPECTROMETERS
Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798
A low-cost, lightweight, and miniaturized Time-Of-Flight Mass Spectrometer (TOFMS) p 3434 N93-28817
Scanning ionic microscopy with high spatial resolution: Parallel acquisition of elementary images by high resolution mass spectrometry
[ONERA-NT-1990-7] p 3314 N93-30139
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
MASS SPECTROSCOPY
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798
High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures
[AD-A263611] p 3311 N93-29283
Mass spectrometric investigation of 2-methoxyethanol and 2-ethoxyethanol clusters: Magic numbers and structural implications
[AD-A262822] p 3312 N93-29429
Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066
Detonation mass spectrometry p 3319 N93-30076
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means
p 3319 N93-30081
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667
MASS TRANSFER
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197
Velocity measurements of low Reynolds number tube flow using fiber-optic technology
[DE93-009865] p 3422 N93-29335
Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists
[AD-A263130] p 3432 N93-29476
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929
The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces
p 3255 N93-29944
Complex-compound heat pump: Topical report on phase 1 results
[PB93-185460] p 3466 N93-30814
MASSIVELY PARALLEL PROCESSORS
Parallel computation and the basis system
[DE93-008755] p 3537 N93-28544
BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems
[DE93-011391] p 3524 N93-28644
Implementation of a single-material version of PAGOSA on MIMD hypercubes
[SAND-92-0640] p 3526 N93-29127
Computing for magnetic fusion energy research: An updated vision
[DE93-010394] p 3587 N93-29190
The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction
[DE93-010304] p 3567 N93-29416
High performance computing: Advanced Research Projects Agency should do more to foster program goals. Report to the Chairman, Committee on Armed Services, House of Representatives
[GAO/IMTEC-93-24] p 3533 N93-30202
LANL High-Performance Data System (HPDS)
p 3622 N93-30478
Infrared imaging array integrated in three dimensions directly on top of silicon circuits
[AD-A264707] p 3581 N93-30500
Finite element approximation of the shallow water equations on the MASPAR
[AD-A264649] p 3489 N93-30525
Massively parallel spatial light modulation-based optical signal processing
[AD-A264846] p 3581 N93-30905
MATCHED FILTERS
Enhanced convergence adaptive detection
[AD-A264100] p 3399 N93-30879
MATERIAL ABSORPTION
Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839
MATERIALS HANDLING
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
Graphical programming: On-line robot simulation for telerobotic control
[DE93-009796] p 3447 N93-30654
Micropipet manipulation of lipid membranes: Direct measurement of the material properties of a cohesive structure that is only two molecules thick
p 3291 N93-30953
MATERIALS RECOVERY
Hydrogen and sulfur production from hydrogen sulfide wastes
[DE93-008658] p 3310 N93-29052
Tool grinding and spark testing p 3291 N93-30954
MATERIALS SCIENCE
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-008] p 3322 N93-29012
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-007] p 3322 N93-29013
JPRS report: Science and technology. Central Eurasia: Materials science

JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-001] p 3296 N93-29021
LDEF materials data bases
[NASA-TM-107757] p 3290 N93-29067
DOE fundamentals handbook: Material science
[DE93-012225] p 3314 N93-30200
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-003] p 3327 N93-30623
National Educators' Workshop. Update 92: Standard Experiments in Engineering Materials Science and Technology
[NASA-CP-3201] p 3290 N93-30948
Near net shape processing: A necessity for advanced materials applications p 3290 N93-30949
New materials: Fountainhead for new technologies and new science p 3291 N93-30952
Materials education activities p 3291 N93-30958
Experiments in materials science from household items p 3293 N93-30971
Taguchi method of experimental design in materials education p 3294 N93-30975
Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979
MATERIALS TESTS
LDEF materials data bases
[NASA-TM-107757] p 3290 N93-29067
Results of a round robin test program: Complex modulus properties of a polymeric damping material
[AD-A263619] p 3332 N93-29344
Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964
The characterization of materials using x ray diffraction p 3293 N93-30968
Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979
MATHEMATICAL LOGIC
Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA
[DE93-001923] p 3505 N93-28942
A fuzzy logic optimal control law solution to the CMMCA tracking problem
[AD-A262555] p 3542 N93-29420
Fuzzy knowledge base construction through belief networks based on Lukasiewicz logic
p 3515 N93-29550
Polynomial space polynomial delay algorithms for listing families of graphs
[DE93-010677] p 3530 N93-29808
MATHEMATICAL MODELS
High performance dispersion model PHYSIC
[DE93-753303] p 3467 N93-28536
Magnetic activity in low mass stars
[DE93-009073] p 3632 N93-28547
Deformation mechanisms in Be(sub 12)X compounds
[DE93-009080] p 3320 N93-28548
Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556
A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578
Influence of optical feedback on the pulse behavior of semiconductor lasers
[ETN-93-93798] p 3436 N93-28614
The dynamics and control of space tethers
p 3274 N93-28629
Closed-loop control with delayed information
[INRIA-RR-1638] p 3541 N93-28638
A one-dimensional continuum model for shape-memory alloys
[AD-A262505] p 3321 N93-28656
Control-structures interaction test of the LACE satellite
p 3263 N93-28706
Liquid Motion in a rotating tank Experiment (LME)
p 3264 N93-28710
Orbital Debris Environment Monitor (ODEM)
p 3267 N93-28735
Numerical simulation of perfect fluid flows around complex 3D configurations by a multidomain solver using the MUSCL approach p 3417 N93-28745
Analysis for thermo-chemical decomposition of composite structures
[NASA-CR-193185] p 3295 N93-28843
Global warming issue and global economic model
[DE93-781334] p 3468 N93-28881
Biophysical model for handwear insulation testing
[AD-A262926] p 3505 N93-28884
A study of the physical mechanisms for filament eruption and coronal mass ejection via numerical simulation
[NASA-CR-193180] p 3653 N93-28935
Composite laminate stiffnesses and their sensitivities
[DLR-FB-92-16] p 3296 N93-29007
Studies in premixed combustion
[DE93-007955] p 3310 N93-29051
The meteorological database
[DE93-007289] p 3481 N93-29054
Atmospheric and Geophysical Sciences Program report, 1990-1991
[DE93-007390] p 3470 N93-29055

A survey of problems in divertor and edge plasma theory
[DE93-007531] p 3586 N93-29056
An experimental study of flow over a 6 to 1 prolate spheroid at incidence p 3239 N93-29124
A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126
A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161
Resource utilization model for the algorithm to architecture mapping model
[NASA-CR-193122] p 3527 N93-29171
Optical coherent phase diversity systems
[ISBN-90-9004897-9] p 3578 N93-29270
Non-linear wave phenomena in a gas-vapour mixture with phase transition
[ETN-93-93582] p 3422 N93-29319
Integrated approaches to parallelism in optimization and solution of inverse problems
[AD-A262259] p 3452 N93-29349
Modeling the effects of drop drag and breakup on fuel sprays
[AD-A263650] p 3445 N93-29388
Experimental study of location and identification of ferrous spheroids using a smart total field magnetometer
[AD-A263661] p 3324 N93-29391
Two-dimensional model for current and heat transport in solid-armature railguns
[AD-A262014] p 3271 N93-29394
Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399
Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402
Mitigation of shock waves in a cylindrical tunnel by foam
[AD-A262491] p 3423 N93-29419
Mathematical modeling and control law development for the atmospheric monitoring and control system of the Controlled Environment Research Chamber (CERC) at NASA Ames Research Center
[AD-A261978] p 3261 N93-29436
Flight mechanical model for performance calculations and interactions between flight vehicle and ramjet in regard to the flight orbit
[ESA-TT-1267] p 3248 N93-29464
Evaluating the bias of alternative cost progress models: Tests using aerospace industry acquisition programs
[AD-A262870] p 3624 N93-29477
Representation and recognition with invariants and geometric constraint models
[AD-A263235] p 3529 N93-29493
LDEF microenvironments, observed and predicted
p 3283 N93-29623
A generalized approach to the thermal analysis of the Long Duration Exposure Facility's flight experiments
p 3428 N93-29624
Radioactivities induced in some LDEF samples
p 3572 N93-29628
Development and application of a 3-D geometry/mass model for LDEF satellite ionizing radiation assessments
p 3573 N93-29640
Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830
Weakly nonlinear dynamics of near-CJ detonation waves
[DE93-007344] p 3424 N93-29836
The basics of weather models
[AD-A263386] p 3483 N93-29850
Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863
Automated modeling of physical systems
[NASA-CR-193256] p 3531 N93-29873
International Journal of Numerical Modeling: Electronic Networks, Devices, and Fields, volume 5, number 3, August 1992
[AD-A263765] p 3387 N93-29877
Some statistical inference problems in linear models and variance components models and their applications
[AD-A264062] p 3555 N93-29923
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934
Modelling thermal behaviour of turbomachinery discs and casings p 3256 N93-29949
Evaluation of multi-dimensional flux models for radiative transfer in cylindrical combustion chambers
p 3257 N93-29955
Calculations of reactive turbulent flows in aeronautical chambers p 3257 N93-29956
A Navier-Stokes solver with different turbulence models applied to film-cooled turbine cascades
p 3258 N93-29962
Analysis of a simulation of the seasonal cycle in the tropical Pacific Ocean in an eddy-resolving global ocean model
[AD-A264007] p 3488 N93-29977
Rapidly activated dynamic phase transitions in nonlinear solids
[AD-A263601] p 3299 N93-29982
Nonlinear attitude control of planar structures in space using only internal controls p 3280 N93-29991
Space station attitude disturbance arising from internal motions p 3280 N93-29995
Modeling earthquakes with local and regional broadband data p 3478 N93-30005
Applications of three-dimensional modeling in electromagnetic exploration p 3391 N93-30010
A preliminary review of global CO2 exchange between ocean and atmosphere
[AD-A264019] p 3472 N93-30015
Modelling the dynamics of a large sea area
[DE93-778330] p 3488 N93-30040
Advances in the identification of electrochemical transfer function models using Prony analysis
[DE93-009424] p 3550 N93-30041
A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052
Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079
Damage growth in composite propellants
p 3348 N93-30088
Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103
Dynamics and robust control of sampled data systems for large space structures
[AD-A264192] p 3281 N93-30142
Models of star formation in interacting and merging disk galaxies p 3635 N93-30148
Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210
Containment of explosions in spherical vessels
[DE93-005445] p 3446 N93-30211
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261
Environmental studies: Mathematical, computational and statistical analyses
[AD-A264223] p 3473 N93-30360
Numerical modeling and parameterization of gravity wave processes and effects in the atmosphere
[AD-A264331] p 3478 N93-30367
Simulation, characterization and control of forced unsteady viscous flows using Navier-Stokes equations
[AD-A264333] p 3425 N93-30369
Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System
[DE93-006283] p 3412 N93-30370
Young open clusters as probes of the star formation process p 3635 N93-30377
Analytical and experimental study of laminar free convective heat transfer from isothermal convex bodies of arbitrary shape
[ISBN-0-315-72512-5] p 3426 N93-30379
Catastrophic collisions: Laboratory impact experiments, hydrocode simulations, and the scaling problem
p 3635 N93-30411
The calculation of electrostatic interactions and their role in determining the energies and geometries of molecular HE crystals
[DE92-040374] p 3570 N93-30448
Analysis of cache for streaming tape drive
p 3435 N93-30477
Two-dimensional and three-dimensional time-dependent MHD model of extended corona
p 3653 N93-30496
A correlated k-distribution model of the atmospheric heating rates for overlapping spectra of CO2 and H2O
[DE93-007391] p 3474 N93-30504
A ceramic fracture model for high velocity impact
[AD-A264728] p 3454 N93-30545
Procedures for applying Ada quality prediction models
[AD-A264730] p 3534 N93-30546
An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547
Topics in inflationary universe medels and cosmic string theories p 3637 N93-30579
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667
Validation and upgrading of physically based mathematical models p 3237 N93-30688
Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729
Scaling properties of localized quantum chaos
[DE93-606031] p 3606 N93-30803
Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances
[PB93-185551] p 3475 N93-30829
Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918
General scalar-tensor theories for induced gravity inflation
[DE93-602505] p 3479 N93-30940
Fourth-rank cosmology
[DE92-641346] p 3637 N93-30997
Manifold shape: From differential geometry to mathematical morphology
[CS-9204] p 3552 N93-31012
The contact mechanical nonlinearities of a mathematical model of a railway wheel rolling over corrugated rail
[ILR-MITT-266(1991)] p 3454 N93-31015
The steady-state tangential contact problem for a falling drop type of contact area on corrugated rail by simplified theory of rolling contact
[ILR-MITT-267(1991)] p 3455 N93-31016
Theoretical and experimental investigation of slack cable/mass system dynamics p 3455 N93-31028
Structural design using neural networks
p 3545 N93-31029

MATHEMATICAL PROGRAMMING
Research in mathematics and computer science, March 1, 1991 - September 30, 1992
[DE93-011492] p 3509 N93-28573

MATHEMATICS
ICASE
[NASA-CR-193257] p 3520 N93-29864

MATRICES (MATHEMATICS)
A summary of block schemes for reducing a general matrix to Hessenberg form
[DE93-010621] p 3525 N93-28877
A simple parallel prefix algorithm for compact finite-difference schemes
[NASA-CR-191448] p 3525 N93-28976
Index mappings for interactive editing of symbolic matrices
[DE93-009316] p 3549 N93-29060
Exploiting the memory hierarchy in sequential and parallel sparse Cholesky factorization
[AD-A262849] p 3539 N93-29508
Division by polynomial matrix and its application to multivariable linear systems p 3357 N93-30233
A robust model for finding optimal evolutionary trees
[DE93-010682] p 3491 N93-30483
Coupled-channel analysis of low energy nucleon-antinucleon interactions
[DE93-606115] p 3571 N93-30791
Connections between quantized affine algebras and superalgebras
[DE93-606065] p 3551 N93-30810
Manifold shape: From differential geometry to mathematical morphology
[CS-9204] p 3552 N93-31012

MATRIX MATERIALS
Probabilistic simulation of multi-scale composite behavior
[NASA-TM-106196] p 3451 N93-28633
Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens
[NASA-TM-106219] p 3449 N93-29073
Processing and property evaluation of silver or aluminum matrix YBa2Cu3O(6+x) superconducting materials
[AD-A263382] p 3595 N93-29333
Advanced fiber/matrix material systems
p 3305 N93-30854
Introduction to high performance composites
p 3291 N93-30957

MATTER (PHYSICS)
Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960
Borel sum rules for octet baryons in nuclear medium
[DE93-753245] p 3604 N93-29242

MAXIMUM ENTROPY METHOD
Bayesian linear analysis with application to removal of atmospheric influences on optical remote sensing images
[BCRS-92-19] p 3463 N93-31011

MAXIMUM LIKELIHOOD ESTIMATES
A modified Anderson Darling goodness-of-fit test for the gamma distribution with unknown scale and location parameters
[AD-A262486] p 3553 N93-28760
A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845
New classification methods p 3459 N93-28932
Parametric likelihood inference for record breaking problems
[AD-A262546] p 3549 N93-29413
MAXWELL EQUATION
Upwind finite element schemes for solving the Maxwell equations
[INRIA-RR-1601] p 3546 N93-28509
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876
A covariant form of the Maxwell's equations in four-dimensional spaces with an arbitrary signature
[DE93-606070] p 3605 N93-30783
MEAN
Monte Carlo simulation of magnitude-angle error sources
[AD-A263738] p 3555 N93-29857
MEAN SQUARE VALUES
A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844
Iterative encoding methods for computer generated holograms
[AD-A263705] p 3431 N93-29297
Estimating the parameters of chaotic maps
[AD-A262574] p 3556 N93-29423
MEASURE AND INTEGRATION
Parametric likelihood inference for record breaking problems
[AD-A262546] p 3549 N93-29413
A remark on the invariant measure for the nonlinear Schroedinger equation
[DE93-609840] p 3552 N93-30946
MEASUREMENT
An algebraic approach to the quantization of constrained systems: Finite dimensional examples
p 3548 N93-28671
MEASURING INSTRUMENTS
Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084
Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402
Method of continuously determining crack length
[NASA-CASE-LAR-14480-1-CU] p 3452 N93-29612
Selection and static calibration of the Marsh J1678 pressure gauge p 3249 N93-29779
Advanced coordinate measuring machine at Sandia National Laboratories
[DE93-010618] p 3432 N93-29842
Measurement of electromagnetic properties of composite materials
[AD-A264725] p 3303 N93-30555
VLF propagation measurements in the Canadian Arctic p 3396 N93-30733
Satellite calibration requirements
[AD-A264279] p 3281 N93-30817
MECHANICAL DEVICES
Chaos in mechanical systems with especial reference to rotorcraft and missiles
[AD-A263703] p 3604 N93-29384
Rotational fluid flow experiment p 3235 N93-29761
MECHANICAL DRIVES
The design and modelling of a comb-drive-based microengine for mechanism drive applications
[DE93-009826] p 3443 N93-29185
Joint drive development for the Space Station Remote Manipulator System p 3370 N93-30313
MECHANICAL ENGINEERING
Integrated approaches to parallelism in optimization and solution of inverse problems
[AD-A262259] p 3452 N93-29349
The 1990-1991 project summaries
p 3230 N93-29731
MECHANICAL IMPEDANCE
Trajectory generation for dual-arm robots using artificial impedance approach p 3370 N93-30310
MECHANICAL MEASUREMENT
Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368
MECHANICAL PROPERTIES
Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564
Soft computing in design and manufacturing of advanced materials
[NASA-TM-106032] p 3295 N93-28624
Probabilistic simulation of multi-scale composite behavior
[NASA-TM-106196] p 3451 N93-28633
Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641
Hydrostatic and uniaxial behavior of a high density polyurethane foam (FR-3720) at various temperatures
[DE93-011486] p 3330 N93-28838
Silicon crystal under bending
[DE93-010522] p 3593 N93-28888
Aligned, short-fiber composites by novel flow processing methods
[DE93-008701] p 3296 N93-28904
Bainitic stabilization of austenite in low alloy steels
[DE93-008275] p 3321 N93-28957
Effects of internal helium on mechanical properties of Nitronic (tm) 40 stainless steel
[DE93-009902] p 3324 N93-29265
Low temperature (LT) GaAs and related materials
[AD-A263607] p 3298 N93-29282
Advanced NDE technology program
[AD-A262008] p 3449 N93-29443
Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863
Mechanical behaviour of a closed collar model for an 11.5 T dipole
[NIKHEF-H/92-03] p 3576 N93-30019
Observation of reaction intermediates in crystalline RDX p 3318 N93-30067
Energetic material response to abnormal environments p 3350 N93-30095
Characterization of ceramic composite materials for gas turbine applications
[DE93-009719] p 3259 N93-30168
DOE fundamentals handbook: Material science
[DE93-012224] p 3314 N93-30199
Fundamental studies of the mechanical behavior of microelectronics thin film materials
[AD-A264334] p 3337 N93-30417
The electrodeposition of low contraction chromium using high/low current pulsing
[AD-A264475] p 3327 N93-30538
Wetting and dispersion in ceramic/polymer melt injection molding systems
[DE93-013240] p 3338 N93-30601
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-003] p 3327 N93-30623
Mechanical properties of composite materials
p 3290 N93-30951
Micropipet manipulation of lipid membranes: Direct measurement of the material properties of a cohesive structure that is only two molecules thick
p 3291 N93-30953
Direct tension experiments on compacted granular materials p 3292 N93-30960
A 69 cent look at thermoplastic softening
p 3292 N93-30963
MECHANICS (PHYSICS)
Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291
MEDICAL EQUIPMENT
Transcutaneous analyte measuring methods
[AD-A262861] p 3494 N93-29509
MEDICAL SERVICES
Medical aspects of cold weather operations: A handbook for medical officers
[AD-A263559] p 3496 N93-30588
MELTING
Effects of freeze/thaw cycles on hydrostatically conditioned E-glass/J-2 composite
[AD-A262980] p 3298 N93-29425
Interfacial melting in cracked explosives
p 3349 N93-30089
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103
Visualizing weld metal solidification using organic analogs p 3293 N93-30973
MELTS (CRYSTAL GROWTH)
A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214
MEMBRANE STRUCTURES
Novel polymer compositions for high-temperature membrane applications, phase 1
[PB93-174126] p 3331 N93-29201
MEMBRANES
NASA in-step: Permeable membrane experiment
p 3267 N93-28736
Membrane-based photochemical systems as models for photosynthetic cells
[DE93-009758] p 3310 N93-28911
High pressure studies of hydrated nafion membranes: Dielectric relaxation and deuteron NMR
[AD-A263511] p 3332 N93-29342
Integrated approaches to parallelism in optimization and solution of inverse problems
[AD-A262259] p 3452 N93-29349
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153
Development of an O atom gun
[AD-A264753] p 3570 N93-30558
Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658
MEMORY
Cognitive and Neural Sciences Division 1992 programs
[AD-A263400] p 3654 N93-29258
Representations of shape in object recognition and long-term visual memory
[AD-A264342] p 3499 N93-30163
MEMORY (COMPUTERS)
Exploiting the memory hierarchy in sequential and parallel sparse Cholesky factorization
[AD-A262849] p 3539 N93-29508
Using synthetic-perturbation techniques for tuning shared memory programs
[PB93-178572] p 3539 N93-29677
An adaptive algorithm for linear associative memory problem p 3360 N93-30255
RAID 7 disk array p 3537 N93-30462
Memory driven feature-based design
[AD-A264697] p 3534 N93-30495
The midway distributed shared memory system
[AD-A264645] p 3534 N93-30523
Massively parallel spatial light modulation-based optical signal processing
[AD-A264846] p 3581 N93-30905
MENTAL PERFORMANCE
Expertise, text coherence, and constraint satisfaction: Effects on harmony and settling rate — mental representations
[AD-A262703] p 3498 N93-28901
Predicting aircrew training performance with psychometric g
[AD-A264021] p 3498 N93-30026
Representations of shape in object recognition and long-term visual memory
[AD-A264342] p 3499 N93-30163
Neural mechanisms of attention
[AD-A264345] p 3544 N93-30165
The air traffic controller's mental model and it's implications for equipment design and trainee selection
p 3372 N93-30322
Independent research and independent exploratory development programs
[AD-A264735] p 3544 N93-30556
MERIDIONAL FLOW
The thermal structure, dust loading, and meridional transport in the Martian atmosphere during late southern summer p 3651 N93-29616
MESOMETEOROLOGY
Leadex data report. Part 1: Weather analysis and satellite images
[AD-A263217] p 3481 N93-28876
MESON-MESON INTERACTIONS
Meson-meson interactions and phi-enhancement in nucleus collisions
[DE93-010725] p 3565 N93-28831
MESONS
Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969
MESOPAUSE
Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519
MESOSCALE PHENOMENA
Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197
Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448

MESSAGE PROCESSING
Parcels with TAGS
[PB93-181824] p 3535 N93-30824
METABOLISM
Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy
[AD-A262483] p 3493 N93-28759
Regulation of alternative CO2 fixation pathways in procaryotic and eucaryotic photosynthetic organisms
[DE93-012109] p 3491 N93-29181
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A263240] p 3494 N93-29620
Beta-adrenergic blockade and lactate metabolism during exercise at high altitude
[AD-A263544] p 3495 N93-29820
METAL AIR BATTERIES
The electrolyte factor in O2 reduction electrocatalysis
[AD-A263565] p 3313 N93-29828
METAL BONDING
Diffusion bonding
[DE93-011480] p 3442 N93-28837
A transient FGM interlayer based approach to joining ceramics
[DE93-010415] p 3331 N93-29248
METAL COATINGS
Effect of metallic-coating properties on the tribology of coated and oil-lubricated ceramics
[DE93-010663] p 3330 N93-28666
Fundamental studies of the morphology, chemistry, and electrical properties of metals on GaAs and other III-V semiconductor compounds
[AD-A264417] p 3597 N93-30120
METAL COMBUSTION
Homogeneous gas phase kinetic model with gradient sensitivity analysis for high temperature particulate boron combustion in fluorine enriched environments
p 3319 N93-30090
METAL CRYSTALS
Anelastic relaxations associated with local disordering in grain boundaries
[AD-A263101] p 3596 N93-29796
METAL FATIGUE
The growth of small corrosion fatigue cracks in alloy 2024
[NASA-TM-107755] p 3451 N93-29069
An experimental/analytical evaluation of biaxial sheet failure
[DE93-010620] p 3453 N93-29843
A miniature fatigue test machine p 3291 N93-30956
METAL FILMS
Diffusion bonding
[DE93-011480] p 3442 N93-28837
Real time self-directed MBE flux control incorporation in situ ellipsometry, phase 1
[AD-A263501] p 3595 N93-29341
Characterization of copper iodide thin films fabricated via laser assisted molecular beam epitaxy
[AD-A262823] p 3596 N93-29430
Structure, adhesion, and stability of metal/oxide and oxide/oxide interfaces
[DE93-012930] p 3325 N93-30060
The electrodeposition of low contraction chromium using high/low current pulsing
[AD-A264475] p 3327 N93-30538
Change of solar cell element properties influenced by adsorbed atoms
[DE93-606694] p 3466 N93-30777
METAL FOILS
The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380
Sensitivity of LDEF foil analyses using ultra-low background germanium vs. large NaI(Tl) multidimensional spectrometers p 3318 N93-29627
On the ideality of using a step-function current in a metallic foil to simulate a step-function heat-flux source
[AD-A264627] p 3413 N93-30539
The adhesion of AgI molecules to gaseous metallic silver cluster cations
[AD-A264820] p 3338 N93-30628
METAL GRINDING
Tool grinding and spark testing p 3291 N93-30954
METAL HALIDES
Conjugated polymers from cyclohexadienediol monomers
[AD-A264837] p 3340 N93-30900
METAL HYDRIDES
Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669
METAL IONS
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133
Theoretical hyperfine structure constants for transition metal atoms and ions
[DE93-012325] p 3566 N93-29183
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301
Adsorption of hydrated halide ions on charged electrodes: Molecular dynamics simulation
[AD-A263137] p 3568 N93-29619
METAL JOINTS
Evaluation of polyaryl adhesives in elastomer-stainless steel joints
[DE93-009794] p 3329 N93-28551
METAL MATRIX COMPOSITES
Metal Matrix Laminate Tailoring (MMLT) code: User's manual
[NASA-TM-106052] p 3295 N93-28681
The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886
Design of interfaces in metal matrix composites
[AD-A262052] p 3296 N93-29001
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074
Tailored interfaces for metal-matrix composites-fundamental considerations
[AD-A263048] p 3298 N93-29130
Processing and property evaluation of silver or aluminum matrix YBa2Cu3O(6+x) superconducting materials
[AD-A263382] p 3595 N93-29333
Mechanical properties of several magnesium and aluminum composites
[AD-A262481] p 3299 N93-30137
METAL OXIDE SEMICONDUCTORS
Proposal for a universal particle detector experiment
p 3286 N93-28795
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962
METAL OXIDES
Structure, adhesion, and stability of metal/oxide and oxide/oxide interfaces
[DE93-012930] p 3325 N93-30060
Colloid and interface chemistry aspects of ceramics
[AD-A264685] p 3337 N93-30552
METAL PARTICLES
Homogeneous gas phase kinetic model with gradient sensitivity analysis for high temperature particulate boron combustion in fluorine enriched environments
p 3319 N93-30090
METAL PLATES
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325
Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374
METAL POWDER
Aluminium-high strength material by mechanical alloying and reaction milling: Basics of processing and characterisation of material
[ESA-TT-1249] p 3324 N93-29272
Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976
METAL PROPELLANTS
Propulsion and detonics research in France
p 3344 N93-30070
METAL SHEETS
Diffusion bonding
[DE93-011480] p 3442 N93-28837
An experimental/analytical evaluation of biaxial sheet failure
[DE93-010620] p 3453 N93-29843
METAL SURFACES
Microtextured metals for stray-light suppression in the Clementine startracker p 3286 N93-28785
Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002
Surface diffusion: Atomistics and surface morphology (summary of MRS Symposium B panel discussion)
[DE93-009862] p 3594 N93-29188
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370
Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374
Molecular dynamics modeling of electric double layers with spectroscopic applications
[AD-A263168] p 3568 N93-29489
The mechanical response of gold substrates modified with self-assembling monolayer films
[AD-A262997] p 3452 N93-29515
Interfacial viscosity measurements of adsorbed monolayers on metal surfaces
[AD-A263288] p 3324 N93-29803
Improved heat removal by microscopic surface texturing of capillaries
[AD-A263483] p 3424 N93-29966
Materials studies for preventing corrosion in condensing environments
[PB93-185478] p 3327 N93-30815
METAL WORKING
Examination of formability to seamless tubes on Ni-Cr-W superalloy
[DE93-764156] p 3326 N93-30396
METAL-GAS SYSTEMS
The role of grain boundaries in hydrogen diffusion in metals at 25 C
[NASA-TM-108407] p 3322 N93-29043
METALLIC GLASSES
Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359
METALLIZING
Metallization at detonation fronts in solids
p 3319 N93-30087
Unexpected increase in the thermal generation rate of bulk GaAs due to electron-beam metallization
[DE93-009829] p 3598 N93-30511
Adhesion of thick film Au to alumina ceramics
[DE93-009802] p 3339 N93-30656
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962
METALLOGRAPHY
Improved measurement of thermal effects on microstructure p 3292 N93-30959
METALORGANIC CHEMICAL VAPOR DEPOSITION
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A262966] p 3384 N93-29514
Atomic layer epitaxy of semiconductor heterostructures
[AD-A264755] p 3599 N93-30560
METALS
DOE fundamentals handbook: Material science
[DE93-012224] p 3314 N93-30199
Constitutive laws for deformation and dynamic recrystallization in cubic metals
[DE93-010740] p 3326 N93-30486
Colloid and interface chemistry aspects of ceramics
[AD-A264685] p 3337 N93-30552
Radiation effects in FCC metals and intermetallic compounds: A molecular dynamics computer simulation study
[DE93-009546] p 3600 N93-30668
Tool grinding and spark testing p 3291 N93-30954
Visualizing weld metal solidification using organic analogs p 3293 N93-30973
Temperature-dependent electrical conductivity of soda-lime glass p 3294 N93-30978
METASTABLE STATE
Defect studies in low-temperature-grown GaAs
[DE93-010405] p 3595 N93-29417
Nuclear isomers as ultra-high-energy-density materials
[DE93-009520] p 3568 N93-29784
Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359
The adhesion of AgI molecules to gaseous metallic silver cluster cations
[AD-A264820] p 3338 N93-30628
METATHESIS
Synthesis of chiral molybdenum ROMP initiators and all-cis highly tactic Poly-2,3-R2Norbornadiene (R = CF3 or CO2Me)
[AD-A264133] p 3336 N93-30169
METEOR TRAILS
Performance statistics bulletin. High latitude meteor scatter propagation, May, June, July 1989
[AD-A264003] p 3399 N93-30757
METEORITE COLLISIONS
Proposal for a universal particle detector experiment
p 3286 N93-28795
Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355
Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361
Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368
Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF)
p 3638 N93-29371
The production and evolution of plasma and associated magnetic fields during hypervelocity impacts: Implications for planetary paleomagnetism p 3589 N93-30000

Hypervelocity impact testing of the Space Station utility distribution system carrier
[NASA-TM-104771] p 3289 N93-30507

METEORITE CRATERS

Three-D crater analysis of LDEF impact features from stereo imagery p 3283 N93-29359

Further analysis of LDEF FRECOPA micrometeoroid remnants p 3638 N93-29360

Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361

Derivation of particulate directional information from analysis of elliptical impact craters on LDEF
p 3283 N93-29362

Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364

Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368

Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370

Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF)
p 3638 N93-29371

Interplanetary meteoroid debris in LDEF metal craters
p 3638 N93-29372

Origin of orbital debris impacts on LDEF's trailing surfaces p 3283 N93-29373

Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374

LDEF data: Comparisons with existing models
p 3283 N93-29375

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces
p 3638 N93-29378

METEORITES

Scanning electron microscope/energy dispersive x ray analysis of impact residues in LDEF tray clamps
p 3283 N93-29369

METEORITIC DAMAGE

Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361

Analysis of LDEF micrometeoroid/debris data and damage to composite materials p 3309 N93-29366

Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374

Hypervelocity impact testing of the Space Station utility distribution system carrier
[NASA-TM-104771] p 3289 N93-30507

METEORITIC DIAMONDS

Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364

METEOROID CONCENTRATION

Predicted and observed directional dependence of meteoroid/debris impacts on LDEF thermal blankets
p 3638 N93-29358

Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

METEOROID HAZARDS

Space optical and low-frequency radio searches for Earth-crossing asteroids and comets
[DE93-008716] p 3634 N93-29246

Predicted and observed directional dependence of meteoroid/debris impacts on LDEF thermal blankets
p 3638 N93-29358

METEOROID PROTECTION

Ablative shielding for hypervelocity projectiles
[NASA-CASE-MSC-21884-1] p 3331 N93-29088

Hypervelocity impact testing of the Space Station utility distribution system carrier
[NASA-TM-104771] p 3289 N93-30507

METEOROIDS

Proceedings of the Near-Earth-Object Interception Workshop
[NASA-TM-108236] p 3556 N93-28572

Space optical and low-frequency radio searches for Earth-crossing asteroids and comets
[DE93-008716] p 3634 N93-29246

Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355

Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357

Three-D crater analysis of LDEF impact features from stereo imagery p 3283 N93-29359

Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361

Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF)
p 3638 N93-29371

Interplanetary meteoroid debris in LDEF metal craters
p 3638 N93-29372

LDEF data: Comparisons with existing models
p 3283 N93-29375

New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

Performance statistics bulletin. High latitude meteor scatter propagation, May, June, July 1989
[AD-A264003] p 3399 N93-30757

METEOROLOGICAL CHARTS

Fog studies in the Alpine region with digital NOAA/AVHRR data p 3458 N93-28925

METEOROLOGICAL INSTRUMENTS

The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements
p 3649 N93-28815

The MESUR mission p 3649 N93-28816

METEOROLOGICAL PARAMETERS

Seasonal snowfall statistics for selected stations
[AD-A263173] p 3481 N93-28991

The meteorological database
[DE93-007289] p 3481 N93-29054

Leadex data report. Part 2: Rawinsonde and ice station data
[AD-A263218] p 3483 N93-29491

The basics of weather models
[AD-A263386] p 3483 N93-29850

TACSAT meteorological payloads
p 3391 N93-29913

Meteorological information for aviation: A systems approach p 3367 N93-30298

Air weather service master station catalog USAFETAC climatic database users handbook no. 6
[AD-A264761] p 3484 N93-30608

METEOROLOGICAL RADAR

Contributions to the American Meteorological Society's 26th International Conference on Radar Meteorology
[AD-A263385] p 3481 N93-29257

METEOROLOGICAL SERVICES

Cloudiest year study: An analysis of the 3DNEPH and RTNEPH databases
[AD-A263409] p 3483 N93-29967

Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts)
[PB93-174993] p 3485 N93-30758

METEOROLOGY

Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519

High performance dispersion model PHYSIC
[DE93-753303] p 3467 N93-28536

Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR)
[DLR-MITT-92-09] p 3456 N93-28915

JPRS report: Science and technology. Central Eurasia: Earth science
[JPRS-UES-93-003] p 3456 N93-29089

Prognostic cloud water in the Los Alamos general circulation model
[DE93-007381] p 3482 N93-29347

Geoscience center research
[AD-A263465] p 3462 N93-29834

Syllabus physical meteorology, part 1
[KNMI-TR-140-PT-1] p 3484 N93-30114

Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation
[NASA-CR-193016] p 3272 N93-31033

METHANATION

Benefits of in situ propellant utilization for a Mars sample return mission
[NASA-TM-106243] p 3341 N93-28695

METHANE

NOx chemistry in natural gas flames
[PB93-175263] p 3317 N93-30760

METHOD OF MOMENTS

An analysis of the Generalized Lambda Distribution
[AD-A262485] p 3555 N93-29447

Scattering through apertures and by three-dimensional structures. Application to the measurement of the surface impedance of conductive materials
[ONERA-P-1990-2] p 3392 N93-30018

Characterizing transient vibrations using band limited temporal moments
[DE93-009639] p 3453 N93-30185

Application of integral and differential equation methods for various EM interaction problems
[AD-A264821] p 3394 N93-30597

Antenna modeling and analysis for ELF/VLF/LF applications p 3398 N93-30751

Optimum design of multiwire cages for high-voltage applications
[AD-A264310] p 3400 N93-30995

METHOXY SYSTEMS

Mass spectrometric investigation of 2-methoxyethanol and 2-ethoxyethanol clusters: Magic numbers and structural implications
[AD-A262822] p 3312 N93-29429

METHYL ALCOHOL

Design of a high activity and selectivity alcohol catalyst
[DE93-012277] p 3309 N93-28750

High octane ethers from synthesis gas-derived alcohols
[DE93-012470] p 3341 N93-28752

A novel process for methanol synthesis
[DE93-013070] p 3314 N93-30188

Magnetic character investigation of higher alcohol synthesis Cu-Co-Cr catalysts
[DE93-009732] p 3316 N93-30653

METRIC SPACE

Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644743] p 3557 N93-30926

Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

METROLOGY

Issues, concepts, and standard techniques in assessing accuracy of coordinate measuring machines
[PB93-184331] p 3354 N93-29666

Proceedings of the meeting of the Intergovernmental US-Russian Business Development Committee's Standards Working Group
[PB93-179968] p 3610 N93-30822

Physics laboratory technical activities, 1992
[PB93-178648] p 3561 N93-30888

Thermoforming from a systems viewpoint
p 3293 N93-30967

MICE

Photoreceptors regulating circadian behavior: A mouse model
[AD-A264881] p 3497 N93-30908

MICHELSON INTERFEROMETERS

Measurement of a Michelson interferometer mirror velocity with a time interval analyzer
[AD-A263009] p 3430 N93-28659

MICROBIOLOGY

Planetary protection issues for the MESUR mission: Probability of growth (Pg)
[NASA-CP-3167] p 3651 N93-30214

MICROBURSTS (METEOROLOGY)

Aircraft guidance for wind shear avoidance: Decision-making under uncertainty p 3246 N93-31005

MICROCHANNEL PLATES

New technologies for UV detectors
p 3582 N93-28786

A new multichannel soft x ray framing camera for fusion experiments
[DE93-009302] p 3432 N93-29773

MICROCHANNELS

The microchannel heatsink with liquid nitrogen cooling
[DE93-009258] p 3422 N93-29300

MICROCOMPUTERS

Study on the concurrent calculation with a multitransputer network
[DE93-753191] p 3524 N93-28531

Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

MICROCRACKS

Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems
[DE93-753130] p 3320 N93-28529

Three-dimensional elastic stress analysis in materials with many inhomogeneities
[AD-A263736] p 3453 N93-29855

Damage growth in composite propellants
p 3348 N93-30088

The initiation, propagation, and effect of matrix microcracks in cross-ply and related laminates
p 3304 N93-30847

MICROELECTRONICS

Field-emitter arrays for RF vacuum microelectronics
[AD-A262677] p 3404 N93-28483

Electronics research report
[AD-A262733] p 3405 N93-28589

Initial graphics exchange specification hybrid microcircuit application protocol
[PB93-175404] p 3407 N93-29203

NSF Tokyo reports: Japanese R and D projects on micro- and nanofabrication and related basic research projects
[PB93-181261] p 3410 N93-29671

New developments in vacuum microelectronics
[AD-A263103] p 3410 N93-29798

Improved field emitter current densities and stability through the application of a proprietary process
[AD-A264048] p 3411 N93-30031

Test structure to microcircuit correlation
[AD-A264157] p 3412 N93-30152

An application protocol for CAD to CAD transfer of electronic information
[AD-A264554] p 3533 N93-30383

RF vacuum microelectronics
[AD-A264528] p 3412 N93-30409

Adhesion of thick film Au to alumina ceramics
[DE93-009802] p 3339 N93-30656

Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

MICROGRAVITY APPLICATIONS

Low-frequency vibration environment for five Shuttle missions
[NASA-TM-106059] p 3285 N93-28554

NASA in-step: Permeable membrane experiment
p 3267 N93-28736

A high-temperature furnace for applications in microgravity p 3229 N93-29723

MICROHARDNESS

Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094

MICROMECHANICS

The design and modelling of a comb-drive-based microengine for mechanism drive applications
[DE93-009826] p 3443 N93-29185

An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414

Three-dimensional elastic stress analysis in materials with many inhomogeneities
[AD-A263736] p 3453 N93-29855

Long discontinuous fiber composite structure: Forming and structural mechanics p 3301 N93-30437

Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850

MICROMETEORITES

Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368

MICROMETEOROIDS

Micrometeoroids and debris on LDEF
p 3638 N93-29356

Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361

Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370

Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374

LDEF data: Comparisons with existing models
p 3283 N93-29375

Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379

MICROMINIATURIZATION

NSF Tokyo reports: Japanese R and D projects on micro- and nanofabrication and related basic research projects
[PB93-181261] p 3410 N93-29671

MICROMOTORS

The design and modelling of a comb-drive-based microengine for mechanism drive applications
[DE93-009826] p 3443 N93-29185

MICROORGANISMS

Process for selectively recovering algae and protozoa
[NASA-CASE-MFS-26124-1-NPO] p 3491 N93-29174

Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665

MICROPARTICLES

Aerosol particle analysis by Raman scattering technique
[DE93-005587] p 3309 N93-28880

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces
p 3638 N93-29378

Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379

Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A264191] p 3339 N93-30883

MICROPOROSITY

Method for preparation of a microporous structure with layered interstitial surface treatment
[NASA-CASE-MSC-21487-2] p 3296 N93-29023

The synthesis and ab initio structure determination of Zn4O(BO3)2: A microporous zincoborate built up from fused 3-ring and 5-ring sub-units
[AD-A262504] p 3594 N93-29138

Ordered molecular arrays as templates: A new approach to synthesis of mesoporous materials
[AD-A264631] p 3570 N93-30540

Fluids in porous media.
[PB93-175198] p 3428 N93-30759

MICROPROCESSORS

Study on the concurrent calculation with a multitransputer network
[DE93-753191] p 3524 N93-28531

Parallel software tools at Langley Research Center
[NASA-TM-108995] p 3520 N93-29070

Digital hardware architecture implementation
[AD-A263219] p 3521 N93-29492

MICROSCOPES

Ultra-high resolution water window x ray microscope optics design and analysis
[NASA-CR-193225] p 3578 N93-29128

X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869

The x ray microscopy resource center at the advanced light source
[DE93-010443] p 3433 N93-30531

MICROSCOPY

X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869

Atomic force microscopy of ammmonium perchlorate
p 3349 N93-30091

Fundamental studies of friction, lubrication, and wear by atomic force microscopy
[AD-A264647] p 3446 N93-30524

The x ray microscopy resource center at the advanced light source
[DE93-010443] p 3433 N93-30531

MICROSTRIP ANTENNAS

Planar microstrip YAGI antenna array
[NASA-CASE-NPO-17873-2-CU] p 3384 N93-29507

MICROSTRIP TRANSMISSION LINES

Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

MICROSTRUCTURE

Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564

Microstructural understanding and critical current optimization of advanced high field superconductors
[DE93-011046] p 3592 N93-28643

Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144

Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291

Some effects of composition and microstructure on the B2 in equilibrium to DO3 ordered phase transition in Fe3Al alloys
[DE93-009724] p 3325 N93-29813

Microstructural modeling of electrical breakdown in solid fuel propellants
[AD-A263466] p 3342 N93-29835

Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863

Microstructural basis for enhanced shock-induced chemistry in single crystals of ammonium perchlorate
p 3319 N93-30092

Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094

Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159

The 2-6 semiconductor superlattices
[AD-A264343] p 3597 N93-30164

DOE fundamentals handbook: Material science
[DE93-012224] p 3314 N93-30199

The electrodeposition of low contraction chromium using high/low current pulsing
[AD-A264475] p 3327 N93-30538

Durability of Quick Reaction Satellite Antenna (QRSA) trunnion castings
[AD-A264095] p 3281 N93-30813

Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g)
[AD-A264297] p 3601 N93-30819

Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850

Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A264191] p 3339 N93-30883

A miniature fatigue test machine p 3291 N93-30956

Improved measurement of thermal effects on microstructure p 3292 N93-30959

A review of hot cracking in austenitic stainless steel weldments
[DE93-605280] p 3328 N93-31021

MICROWAVE AMPLIFIERS

Field-emitter arrays for RF vacuum microelectronics
[AD-A262677] p 3404 N93-28483

Study of gain in C-band deflection cavities for a frequency-doubling magnicon amplifier
[AD-A263132] p 3409 N93-29478

High-power Ka-band amplifier p 3385 N93-29590

Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765

MICROWAVE ANTENNAS

High-power Ka-band amplifier p 3385 N93-29590

Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252

MICROWAVE CIRCUITS

Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A263161] p 3406 N93-28940

Optically controlled active impedance element particularly suited for a microwave oscillator
[AD-D015723] p 3408 N93-29281

Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

International Journal of Numerical Modeling: Electronic Networks, Devices, and Fields, volume 5, number 3, August 1992
[AD-A263765] p 3387 N93-29877

Design and integration of high bit rate four phase monolithic demodulators and modulators at X band
[LAAS-92354] p 3414 N93-31030

MICROWAVE COUPLING

Coupling gain computation between antennas on circular cylinders at SHF/EHF frequencies p 3369 N93-30309

MICROWAVE EMISSION

A computer simulation of the production of an artificially ionized layer using the Arecibo facility
[DE93-010817] p 3478 N93-30487

Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880

MICROWAVE EQUIPMENT

Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408

MICROWAVE FREQUENCIES

Phase transition studies in barium and strontium titanates at microwave frequencies p 3293 N93-30970

MICROWAVE IMAGERY

Leadex data report. Part 1: Weather analysis and satellite images
[AD-A263217] p 3481 N93-28876

Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448

MICROWAVE LANDING SYSTEMS

Evaluation of category 3 MLS designs
p 3247 N93-30358

MICROWAVE OSCILLATORS

Development of high power microwave source
[DE93-753316] p 3436 N93-28980

Optically controlled active impedance element particularly suited for a microwave oscillator
[AD-D015723] p 3408 N93-29281

Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922

Advanced microwave frequency sources and filters based on superconducting Photonic Band Gap (PBG) structures
[AD-A264404] p 3597 N93-30175

MICROWAVE RADIOMETERS

Miniature modular microwave end-to-end receiver
[NASA-CASE-NPO-18713-1-CU] p 3381 N93-29087

RTE: A UNIX library with on-line documentation and sample programs for microwave radiative transfer calculations
[PB93-180248] p 3386 N93-29680

MICROWAVE RESONANCE
An improved linear ion trap physics package
p 3384 N93-29587
MICROWAVE TRANSMISSION
Development of Si(1-x)Ge(x) technology for microwave sensing applications
[NASA-TM-106157] p 3405 N93-28610
Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765
Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252
Radiation-hardened microwave communications system
[DE93-007915] p 3394 N93-30631
MICROWAVES
On the meaning of delta T/T
[DE93-008482] p 3653 N93-28962
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092
Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158
Microwave processing of ceramics
[DE93-010708] p 3332 N93-29252
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics
[AD-A263427] p 3332 N93-29337
Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408
Microwave processing of silicon nitride for advanced gas turbine applications
[DE93-007910] p 3334 N93-29767
Submillimeter and microwave residual losses in epitaxial films of Y-Ba-Cu-O and Tl-Ca-Ba-Cu-O
[DE93-010430] p 3596 N93-29868
Quantification of thermographic mapping techniques
[AD-A264020] p 3391 N93-30016
A computer simulation of the production of an artificially ionized layer using the Arecibo facility
[DE93-010817] p 3478 N93-30487
Microsecond ribbon relativistic electron beam in a plane undulator and generation of microwave radiation
[DE93-605693] p 3400 N93-30993
MICROYIELD STRENGTH
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829
MIE SCATTERING
Uplink laser propagation measurements through the sea surface, haze and clouds
[AD-A264687] p 3440 N93-30553
MILITARY AIRCRAFT
Project summary p 3227 N93-29714
MILITARY OPERATIONS
T(lc2)acS(lc3)ats for Surveillance Verification and C3I
[AGARD-CP-522] p 3387 N93-29892
Tactical satellites p 3284 N93-29893
Evolution or revolution: The Catch 22 of TACSATs
p 3269 N93-29894
TACSAT ground control and data collection
p 3388 N93-29895
TACSAT meteorological payloads
p 3391 N93-29913
The environment as an operational center of gravity
[AD-A264170] p 3472 N93-30154
Managing operational intelligence overload: Guidelines for avoiding decision paralysis
[AD-A264184] p 3610 N93-30158
Medical aspects of cold weather operations: A handbook for medical officers
[AD-A263559] p 3496 N93-30588
MILITARY SPACECRAFT
Tactical satellites p 3284 N93-29893
Evolution or revolution: The Catch 22 of TACSATs
p 3269 N93-29894
TACSAT ground control and data collection
p 3388 N93-29895
TACSAT-spacecraft bus concept and design: Application of a multimission bus for TACSAT in LEO
p 3284 N93-29896
Tactical satellites for air command and control
p 3284 N93-29898
Considerations for NATO satellite communications in the post-2000 era p 3388 N93-29899
Advanced technologies for lightweight EHF tactical communications satellites p 3389 N93-29900
Synchronization techniques for medium data rate EHF MILSATCOM systems p 3389 N93-29901
SAR sensors on TACSATS: A feasibility assessment
p 3286 N93-29909
A TACSAT SAR concept p 3286 N93-29910
Cost effective TacSats for military support
p 3285 N93-29912
Canadian EHF MILSATCOM research and development project p 3362 N93-30264
SAW technology for on-board processing in military satellite communications p 3362 N93-30265
FASSET: A development model for a Canadian EHF MILSATCOM system p 3363 N93-30268
MILITARY TECHNOLOGY
Cognitive interface considerations for intelligent cockpits p 3503 N93-28865
System automation and pilot-vehicle-interface for unconstrained low-altitude night attack
p 3503 N93-28867
Computer assisted evaluation for air close combat based on time interval characterization p 3504 N93-28868
A study of the effects of lens focal length on remote driver performance
[AD-A263191] p 3505 N93-28941
Advanced Construction Technology Center research
[AD-A263654] p 3432 N93-29390
Summer Faculty Research Program (SFRP), volume 1
[AD-A261988] p 3608 N93-29440
Defense conversion: Redirecting research and development
[OTA-ITE-552] p 3610 N93-29649
Concept formulation process aid for trade-off determination: Operator's guide
[AD-A263756] p 3531 N93-29874
An overview of DARPA's advanced space technology program p 3269 N93-29908
Low cost TACSAT for NATO surveillance
p 3285 N93-29911
Cost effective TacSats for military support
p 3285 N93-29912
TACSAT meteorological payloads
p 3391 N93-29913
Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753
MILKY WAY GALAXY
Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles
[BONN-92-31] p 3632 N93-28473
Young open clusters as probes of the star formation process p 3635 N93-30377
MILLIMETER WAVES
Novel low temperature superconducting bolometers
[DE93-010433] p 3430 N93-28664
Superconducting submillimeter and millimeter wave detectors
[DE93-007656] p 3431 N93-29149
Department of defense advisory group on electron devices: Appendix to special technology area review on microwave packaging technology
[AD-A262136] p 3408 N93-29408
Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922
MILLING MACHINES
A virtual environment for manufacturing systems
[AD-A263128] p 3528 N93-29473
MIMD (COMPUTERS)
Implementation of a single-material version of PAGOSA on MIMD hypercubes
[SAND-92-0640] p 3526 N93-29127
Special purpose parallel computer architecture for real-time control and simulation in robotic applications
[NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608
Using synthetic-perturbation techniques for tuning shared memory programs
[PB93-178572] p 3539 N93-29677
Data parallelism
[DE93-009300] p 3539 N93-29782
MIMO (CONTROL SYSTEMS)
An adaptive controller for a class of MIMO non-minimum phase systems with disturbance rejection design
p 3359 N93-30248
MINERAL DEPOSITS
Standard and reference materials for marine science, third edition
[PB93-185684] p 3489 N93-30830
MINERAL EXPLORATION
Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812
MINERALOGY
Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769
The APX spectrometer for Martian missions
p 3434 N93-28776
A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800
Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812
Interplanetary meteoroid debris in LDEF metal craters
p 3638 N93-29372
MINERALS
Frequency dependent electrical properties of minerals and partial-melts
[DE93-009254] p 3410 N93-29793
MINIATURIZATION
Miniature modular microwave end-to-end receiver
[NASA-CASE-NPO-18713-1-CU] p 3381 N93-29087
MINIMAL SURFACES
The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis
[DE93-007537] p 3313 N93-29837
MINKOWSKI SPACE
Geometrical approach to the dynamics of a relativistic string in the D-dimensional Minkowski space
[DE93-606071] p 3605 N93-30784
The ground state wavefunctions of a conformally invariant scalar field in different spacetime background
[DE93-606063] p 3606 N93-30808
Positive energy representations of the conformal quantum algebra
[DE93-606064] p 3551 N93-30809
A new exact solution to the classical equations of motion of the relativistic string with massive ends
[DE92-644736] p 3557 N93-30922
Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925
MINORITIES
Materials education activities p 3291 N93-30958
MIRRORS
Measurement of a Michelson interferometer mirror velocity with a time interval analyzer
[AD-A263009] p 3430 N93-28659
Optical technologies for UV remote sensing instruments p 3582 N93-28788
Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207
Problems in the implementation of x ray optics with x ray lasers
[DE93-009297] p 3438 N93-29781
MIS (SEMICONDUCTORS)
Metallization at detonation fronts in solids
p 3319 N93-30087
MISSILE CONFIGURATIONS
Clustered Lance Booster (CLB) feasibility study
[AD-A262746] p 3286 N93-28593
MISSILE CONTROL
Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing
p 3501 N93-28853
MISSILE TRACKING
A fuzzy logic optimal control law solution to the CMMCA tracking problem
[AD-A262555] p 3542 N93-29420
MISSILES
Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284
Chaos in mechanical systems with especial reference to rotorcraft and missiles
[AD-A263703] p 3604 N93-29384
Tactical satellites p 3284 N93-29893
MISSION PLANNING
Planning for air to air combat p 3501 N93-28852
A new class of mission support for combat air-crew
p 3501 N93-28854
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
Mars integrated transportation system multistage Mars mission p 3232 N93-29741
Antares: A low cost modular launch vehicle for the future p 3235 N93-29759
Launch vehicles for lightweight TACSAT deployment
p 3271 N93-29903
The 1992 town meetings: Toward a shared vision
[NASA-NP-205] p 3608 N93-30134
Technology transfer within the NASA Goddard Space Flight Center p 3626 N93-30704
Technology coordination p 3626 N93-30706
Space transfer concepts and analyses for exploration missions, phase 3
[NASA-CR-192584] p 3268 N93-31034
MIST
Systems description of MIVOS (mist forecast system), part 1
[KNMI-TR-141-PT-1] p 3483 N93-30013
MIXERS
Tank Pressure Control Experiment (TPCE)
p 3264 N93-28712

MIXING
Tank Pressure Control Experiment/Thermal Phenomena (TPCE/TP) p 3264 N93-28713
Methods for preparation of mixtures of gases in air at the parts-per-billion to parts-per-million concentration range for calibration of monitors [DE92-642433] p 3317 N93-30982

MIXING LAYERS (FLUIDS)
The development of a mixing layer under the action of weak streamwise vortices [NASA-TM-106089] p 3418 N93-28947
Jet mixer noise suppressor using acoustic feedback [NASA-CASE-LEW-15170-1] p 3561 N93-28953
Compressible turbulence in a high-speed high Reynolds number mixing layer p 3242 N93-30583

MIXING LENGTH FLOW THEORY
Theory of tokamak edge turbulence: Drift-thermal instability-induced turbulence and ionization-driven drift wave turbulence p 3586 N93-29123
Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960

MIXTURES
Some problems in the mechanics of solids with phase mixtures [AD-A263652] p 3311 N93-29291

MOBILE COMMUNICATION SYSTEMS
In-step inflatable antenna experiment p 3263 N93-28701
A slotted Aloha satellite channel simulator p 3360 N93-30250
Teleglobe's international Mobile Earth Terminal service p 3371 N93-30317
The evolution of global mobile communications p 3376 N93-30349

MODAL RESPONSE
Dynamical analysis of highly excited molecular spectra [DE93-010771] p 3564 N93-28604
Modal survey of a full-scale F-18 wind tunnel model [AD-A262482] p 3240 N93-29410

MODEL REFERENCE ADAPTIVE CONTROL
Controls for space structures p 3275 N93-29112
Adaptive motion control of mobile robots p 3545 N93-30903
On neural networks in identification and control of dynamic systems [NASA-TM-107702] p 3455 N93-31038

MODELS
The meta model hierarchy: A framework for information systems concepts and techniques [TR-92-17] p 3611 N93-28481
Formal definition of a conceptual language for the description and manipulation of information models [TR-92-16] p 3523 N93-28503
Introduction to cadet center for advanced data evaluation technology p 3614 N93-29240
Mass storage system reference model, Version 4 p 3617 N93-30450

MODEMS
Signal processor based MSAT trellis coded M-DPSK with adaptive Doppler phasor correction p 3373 N93-30332

MODULATION
Modelling of channel thickness modulation effect in SI GaAs MESFET's p 3356 N93-30229
An error control protocol based on trellis coded modulations p 3358 N93-30237

MODULATION TRANSFER FUNCTION
Optical system analysis for the ground based EXVM [NASA-CR-192588] p 3582 N93-31035

MODULATORS
Upgrading the LAMPF 201 MHz RF generators [DE93-010715] p 3406 N93-28830
Constant Average Power Single Sideband (CAPSSB) modulation p 3373 N93-30331
Complex apparatus and results of active experiment Electron-1 with injection of electronic beam in the ionosphere [DE93-605452] p 3480 N93-30991

MODULUS OF ELASTICITY
Aligned, short-fiber composites by novel flow processing methods [DE93-008701] p 3296 N93-28904
Some problems in the mechanics of solids with phase mixtures [AD-A263652] p 3311 N93-29291
Results of a round robin test program: Complex modulus properties of a polymeric damping material [AD-A263619] p 3332 N93-29344

MOIRE INTERFEROMETRY
Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis [AD-A264221] p 3453 N93-30147

MOISTURE CONTENT
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model [DE93-007365] p 3477 N93-29346
Effects of freeze/thaw cycles on hydrostatically conditioned E-glass/J-2 composite [AD-A262980] p 3298 N93-29425

MOLDING MATERIALS
Preliminary properties of a resin from ethynyl terminated materials p 3303 N93-30842

MOLDS
Development of a CFD code for casting simulation [NASA-CR-192577] p 3427 N93-30492
Infiltration/cure modeling of resin transfer molded composite materials using advanced fiber architectures p 3303 N93-30843
Development of stitching reinforcement for transport wing panels p 3304 N93-30852
Development of resins for composites by resin transfer molding p 3305 N93-30853

MOLECULAR BEAM EPITAXY
Luminescence study of ion-implanted and MBE-grown Er-doped GaAs and Al(x)Ga(1-x)As [AD-A262602] p 3591 N93-28471
Infrared rugates by molecular beam epitaxy p 3582 N93-28808
Real time self-directed MBE flux control incorporation in situ ellipsometry, phase 1 [AD-A263501] p 3595 N93-29341
Defect studies in low-temperature-grown GaAs [DE93-010405] p 3595 N93-29417
Characterization of copper iodide thin films fabricated via laser assisted molecular beam epitaxy [AD-A262823] p 3596 N93-29430
The 2-6 semiconductor superlattices [AD-A264343] p 3597 N93-30164
Visible light emitting materials and injection devices [AD-A263499] p 3601 N93-30811

MOLECULAR BEAMS
Low temperature (LT) GaAs and related materials [AD-A263607] p 3298 N93-29282

MOLECULAR BIOLOGY
Proceedings of a Workshop on Molecular Nuclear Medicine [DE93-010828] p 3493 N93-28835
Defining protein electrostatic recognition processes [AD-A264838] p 3571 N93-30901
The Gordon Research Conference on Pineal Cell Biology [AD-A264840] p 3497 N93-30904

MOLECULAR CLOUDS
A characterization of young stellar objects in Bok globules: Infrared imaging, spectral energy distributions, and molecular outflows p 3636 N93-30563
CO lines toward NGC 2024 and other star forming regions: A closer look at the warm gas component [MPE-PREPRINT-223] p 3637 N93-30639

MOLECULAR COLLISIONS
Elastic and reactive collisions of atoms and molecules with neutral alkali clusters [DE93-009313] p 3566 N93-29206
Reaction and reorientation of electronically excited H2(B) [DE93-010435] p 3569 N93-29860

MOLECULAR DIFFUSION
The role of grain boundaries in hydrogen diffusion in metals at 25 C [NASA-TM-108407] p 3322 N93-29043

MOLECULAR EXCITATION
Spectroscopic probes of vibrationally excited molecules at chemically significant energies [DE93-012328] p 3564 N93-28652
The photodissociation and reaction dynamics of vibrationally excited molecules [DE93-010896] p 3565 N93-28879
Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid [DE93-007362] p 3593 N93-28966
Magnetic resonance studies of photo-induced electron transfer reactions [DE93-012239] p 3311 N93-29182
Reaction and reorientation of electronically excited H2(B) [DE93-010435] p 3569 N93-29860
Triplet states and optical absorptions in finite polyenes and conjugated polymers [AD-A264552] p 3337 N93-30381

MOLECULAR GASES
Environmental Verification Experiment for the Explorer Platform (EVEEP) p 3266 N93-28726
Return flux experiment p 3266 N93-28727
Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions [NASA-CR-193223] p 3604 N93-29168
Vibrational spectroscopy of shock-compressed fluids p 3318 N93-30072
Detonation mass spectrometry p 3319 N93-30076

MOLECULAR INTERACTIONS
NMR studies of molecules in liquid crystals and graphite [DE93-010423] p 3569 N93-29805
The calculation of electrostatic interactions and their role in determining the energies and geometries of molecular HE crystals [DE92-040374] p 3570 N93-30448

MOLECULAR IONS
Mass spectrometric investigation of 2-methoxyethanol and 2-ethoxyethanol clusters: Magic numbers and structural implications [AD-A262822] p 3312 N93-29429

MOLECULAR PHYSICS
Fast multipole method in simulations of aqueous systems [AD-A263422] p 3567 N93-29336
Molecular dynamics modeling of electric double layers with spectroscopic applications [AD-A263168] p 3568 N93-29489
Adsorption of hydrated halide ions on charged electrodes: Molecular dynamics simulation [AD-A263137] p 3568 N93-29619
Dynamics and photoexcitation in MX and MXX' chain solids [AD-A264823] p 3561 N93-29711
Molecular dynamics of detonation in crystals with defects p 3350 N93-30097
Thermodynamic and structural properties of metallic glasses and supercooled liquids [ISBN-0-315-72443-9] p 3605 N93-30359

MOLECULAR RELAXATION
Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer [AD-A262189] p 3329 N93-28489
Quantum dynamics of X2BC van der Waals clusters [DE93-006416] p 3565 N93-28892
Kinetics of nitric oxide formation behind 3 to 4 KM/S shock waves [AD-A263653] p 3312 N93-29389
Dynamics and photoexcitation in MX and MXX' chain solids [AD-A264823] p 3561 N93-29711
Reaction and reorientation of electronically excited H2(B) [DE93-010435] p 3569 N93-29860

MOLECULAR SPECTRA
Dynamical analysis of highly excited molecular spectra [DE93-010771] p 3564 N93-28604
Vibrational spectroscopy of shock-compressed fluids p 3318 N93-30072
Examination of shock induced chemical reactions in liquids using time-resolved optical spectroscopy p 3318 N93-30073

MOLECULAR SPECTROSCOPY
Single-shot femtosecond spectroscopy: A methodology for observation of solid-state chemical reactions p 3319 N93-30075
Detonation mass spectrometry p 3319 N93-30076

MOLECULAR STRUCTURE
Quantum dynamics of X2BC van der Waals clusters [DE93-006416] p 3565 N93-28892
What is underneath? Moving atoms and molecules to find out [AD-A263363] p 3567 N93-29332
Mass spectrometric investigation of 2-methoxyethanol and 2-ethoxyethanol clusters: Magic numbers and structural implications [AD-A262822] p 3312 N93-29429
Molecular dynamics modeling of electric double layers with spectroscopic applications [AD-A263168] p 3568 N93-29489
Observation of phase-separated nanometer scale molecular domains in mixed self-assembled monolayers [AD-A263470] p 3569 N93-29839
Atomic force microscopy of ammmonium perchlorate p 3349 N93-30091
Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate [AD-A264220] p 3597 N93-30146
Organometallic compounds and polymers with second and third order nonlinear optical properties [AD-A264774] p 3338 N93-30610
The adhesion of AgI molecules to gaseous metallic silver cluster cations [AD-A264820] p 3338 N93-30628
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies [AD-A264827] p 3317 N93-30667
Design, synthesis, and chemical processing of hierarchical ceramic structures for aerospace applications [AD-A264227] p 3339 N93-30885

Physical chemical studies on molecular composite compositions
[AD-A264834] p 3339 N93-30898

MOLECULAR THEORY

The 26th International Quantum Chemistry Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A264206] p 3315 N93-30534

MOLECULES

Synthesis of cubane based energetic molecules
[AD-A263271] p 3564 N93-28562

Dynamical analysis of highly excited molecular spectra
[DE93-010771] p 3564 N93-28604

Return flux experiment p 3266 N93-28727

The photodissociation and reaction dynamics of vibrationally excited molecules
[DE93-010896] p 3565 N93-28879

NMR studies of molecules in liquid crystals and graphite
[DE93-010423] p 3569 N93-29805

Observation of phase-separated nanometer scale molecular domains in mixed self-assembled monolayers
[AD-A263470] p 3569 N93-29839

Use of statistics in computational chemistry
[AD-A264307] p 3315 N93-30365

MOLNIYA SATELLITES

Terrain and coverage prediction analyses for non-geostationary orbit EHF satellite communications
p 3389 N93-29902

MOLTEN SALTS

Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551

Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816

MOLYBDENUM ALLOYS

High temperature creep and oxidation resistant chromium silicide matrix alloy containing molybdenum
[NASA-CASE-LEW-15697-1] p 3323 N93-29172

MOLYBDENUM COMPOUNDS

Synthesis of chiral molybdenum ROMP initiators and all-cis highly tactic Poly-2,3-R2Norbornadiene (R = CF3 or CO2Me)
[AD-A264133] p 3336 N93-30169

MOMENTS OF INERTIA

Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777

Vibration localization in rotating shafts
p 3454 N93-30626

MOMENTUM THEORY

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644744] p 3557 N93-30927

MOMENTUM TRANSFER

Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446

MONATOMIC GASES

The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380

FI-STM investigation of atomic hydrogen adsorption on the Si(100)2x1 surface
[AD-A262748] p 3567 N93-29403

MONATOMIC MOLECULES

A simple model for ion solvation with non additive cores
[AD-A263075] p 3566 N93-29143

MONEL (TRADEMARK)

Crack length determination by ultrasonic methods
[DE93-008075] p 3450 N93-28567

MONITORS

Environmental Verification Experiment for the Explorer Platform (EVEEP) p 3266 N93-28726

Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205

Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402

Computer-controlled alignment for a 2000-line color monitor p 3247 N93-30324

MONOCHROMATORS

Measurement of the rotation Raman spectra of nitrogen, oxygen, and water vapor under conditions of a temperature humidity lidar
[GKSS-92/E/32] p 3485 N93-31018

MONOIDS

Antirational transductions and their language families
[ETN-93-93794] p 3611 N93-28525

MONOMERS

Shear sensitive monomer-polymer laminate structure and method of using same
[NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613

Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007

Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue
[AD-A264523] p 3598 N93-30407

Conjugated polymers from cyclohexadienediol monomers
[AD-A264837] p 3340 N93-30900

MONOMOLECULAR FILMS

The mechanical response of gold substrates modified with self-assembling monolayer films
[AD-A262997] p 3452 N93-29515

Interfacial viscosity measurements of adsorbed monolayers on metal surfaces
[AD-A263288] p 3324 N93-29803

MONOPOLE ANTENNAS

Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882

MONOPOLES

Computation of far-field helicopter rotor tone noise
[ONERA-P-1990-5] p 3562 N93-30110

MONOPULSE RADAR

Evolution of radar data processing in the French air traffic control system p 3247 N93-30325

MONSOONS

A functional implementation of the Jacobi eigen-solver
[DE93-007349] p 3549 N93-29769

MONTE CARLO METHOD

Modified goodness-of-fit tests for the Weibull distribution
[AD-A262552] p 3553 N93-28574

A modified Anderson Darling goodness-of-fit test for the gamma distribution with unknown scale and location parameters
[AD-A262486] p 3553 N93-28760

Information-theoretic performance bounding of Bayesian identifiers
[DE93-010705] p 3554 N93-28763

Meson-meson interactions and phi-enhancement in nucleus collisions
[DE93-010725] p 3565 N93-28831

Comparison of analytical transport and stochastic solutions for neutron slowing down in an infinite medium
[DE93-010799] p 3565 N93-28833

A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844

A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845

Numerical simulation of quantum many-body systems
[DE93-008300] p 3603 N93-28958

Modern Monte Carlo particle transport simulation for safety and radiation protection applications in accelerometer technology and in space science
[JUEL-2609] p 3574 N93-29062

Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068

Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A263076] p 3382 N93-29131

On the value of function evaluation location information in Monte Carlo simulation
[AD-A263662] p 3554 N93-29292

Fast multipole method in simulations of aqueous systems
[AD-A263422] p 3567 N93-29336

Parametric likelihood inference for record breaking problems
[AD-A262546] p 3549 N93-29413

SWAT system performance predictions
[AD-A262857] p 3579 N93-29470

NetStat: A probabilistic network connectivity analysis tool
[AD-A262836] p 3529 N93-29647

Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787

Monte Carlo simulation of magnitude-angle error sources
[AD-A263738] p 3555 N93-29857

Direct Monte Carlo simulation of the chemical equilibrium composition of detonation products
[DE92-040372] p 3315 N93-30447

Beta/gamma Monte Carlo transport in repetitive structures of satellite systems
[DE93-007610] p 3281 N93-30509

Multidimensional intermittency in hadronic collisions
[DE93-010562] p 3577 N93-30532

Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation
[DE93-606332] p 3601 N93-30798

MOON

Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807

Lunar science: Using the Moon as a testbed
p 3650 N93-28821

MOONQUAKES

Lunar regolith densification p 3276 N93-29115

MORPHOLOGY

Multiscale morphological filtering for analysis of noisy and complex images p 3582 N93-28789

Follow up on the crystal growth experiments of the LDEF p 3602 N93-29381

Atomic layer epitaxy of semiconductor heterostructures
[AD-A264755] p 3599 N93-30560

Eutectic solidification of Al-U at slowly cooling rates (10 C per second)
[DE92-640082] p 3328 N93-30941

Manifold shape: From differential geometry to mathematical morphology
[CS-9204] p 3552 N93-31012

MOSSBAUER EFFECT

Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812

MOTHS

Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase
[DE93-010081] p 3467 N93-28543

MOTION PERCEPTION

A motion detector based on a neural network
p 3356 N93-30224

MOTION SIMULATION

Three-dimensional graphical representation of objects according to movement data in realtime
[ESA-TT-1258] p 3521 N93-30104

Visualization techniques for analyzing control of human movement: Affine mappings between multi-dimensional spaces p 3508 N93-30204

MOUNTAINS

Field trial of caffeine on physical performance at altitude: An attempt to overcome the challenge
[AD-A264260] p 3497 N93-30894

MSM (SEMICONDUCTORS)

Infrared imaging array integrated in three dimensions directly on top of silicon circuits
[AD-A264707] p 3581 N93-30500

MUFFLERS

Investigation of thermoacoustic muffler
[AD-A262009] p 3562 N93-29392

MULLITES

Oxidation behavior in reaction-bonded aluminum-silicon alloy/alumina powder compacts
[DE93-010407] p 3298 N93-29191

MULTIBEAM ANTENNAS

Status of the Canadian military Multibeam Antenna (MBA) development for EHF SATCOM
p 3374 N93-30334

Comparison and design of multiple beam antenna feed networks p 3374 N93-30335

MULTIGRID METHODS

Implementation of a multidomain Navier-Stokes code on the Intel iPSC2 hypercube
[FFA-TN-1992-37] p 3418 N93-28994

A multigrid extension of the FFT for the numerical inversion of Fourier and LaPlace transforms
[TRITA-NA-9204] p 3548 N93-29024

The three-dimensional Multi-Block Advanced Grid Generation System (3DMAGGS)
[NASA-TM-108985] p 3420 N93-29155

The sensitivity of ageostrophic circulations to model resolution: A case study using NGM forecasts of ERICA IOP-4
[AD-A262011] p 3482 N93-29393

A multilevel approach to minimum cost network flows
[AD-A264008] p 3550 N93-29978

MULTIMEDIA

Natural language generation
[AD-A262578] p 3524 N93-28579

A fuzzy measure approach to motion frame analysis for scene detection p 3511 N93-29525

Review of the effectiveness of video media in instruction
[AD-A264228] p 3392 N93-30362

A prototype of a faculty and staff executive information system
[AD-A264852] p 3623 N93-30907

MULTIPATH TRANSMISSION

Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252

Adaptive airborne radar simulation with equalization filter taps
[AD-A264722] p 3393 N93-30514

MULTIPHASE FLOW

A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126

Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326
MULTIPHOTON ABSORPTION
Discharge of electrically charged clouds
[AD-A263212] p 3480 N93-28518
MULTIPLEXING
A dual polarized broadband multifrequency Earth station feed p 3371 N93-30319
MULTIPLIERS
Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design
[DE93-753270] p 3584 N93-28535
MULTIPOLES
Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077
Fast multipole method in simulations of aqueous systems
[AD-A263422] p 3567 N93-29336
MULTIPROCESSING (COMPUTERS)
A multiarchitecture parallel-processing development environment
[NASA-TM-106180] p 3538 N93-28628
A modular head/eye platform for real-time reactive vision
[OUEL-1941/92] p 3505 N93-28897
Preemptive scheduling with variable profile, precedence constraints and due dates
[INRIA-RR-1622] p 3538 N93-28937
Distributed Virtual System (DIVIRS) Project
[NASA-CR-193234] p 3526 N93-29169
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
Using synthetic-perturbation techniques for tuning shared memory programs
[PB93-178572] p 3539 N93-29677
Use of a genetic algorithm to solve two-fluid flow problems on an NCUBE multiprocessor computer
[DE93-009630] p 3425 N93-30184
Task allocation and real-time considerations for the Robot Controller Test Station (RCTS)
p 3364 N93-30278
A multiprocessor architecture for realtime robot control p 3372 N93-30327
Multiprocessing systems: Reliability modelling and analysis using multimode components and dependent failures
[AD-A264230] p 3540 N93-30364
The midway distributed shared memory system
[AD-A264645] p 3534 N93-30523
Promoting high-performance computing and communications
[ISBN-0-16-041828-3] p 3522 N93-30570
Multiprocessing MCNP on an IBM RS/6000 cluster
[DE93-008712] p 3540 N93-30633
Gigabit network communications research
[AD-A264895] p 3536 N93-31026
MULTIPROGRAMMING
Multiprocessing MCNP on an IBM RS/6000 cluster
[DE93-008712] p 3540 N93-30633
MULTISENSOR APPLICATIONS
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
The fusion of information via fuzzy integration
p 3517 N93-29568
MULTISPECTRAL BAND SCANNERS
Research and development of an airborne multispectral scanner to measure fire, terrestrial and atmospheric characteristics (50 channel)
[NASA-CR-193121] p 3456 N93-28620
The MAESTRO-1 campaign: Analyses of polarimetric SAR data of agricultural fields and forests
[BCRS-92-06] p 3460 N93-29320
MULTISPECTRAL LINEAR ARRAYS
CAESAR development plan 1992-1995
[BCRS-92-17] p 3463 N93-31009
MULTISPECTRAL PHOTOGRAPHY
Systematic processing of Clementine data for scientific analyses p 3624 N93-28803
Remote sensing for water quality monitoring in the Tennessee Valley: Field tests of two systems
[DE93-008997] p 3462 N93-30637
MULTISTATIC RADAR
Application of integral and differential equation methods for various EM interaction problems
[AD-A264821] p 3394 N93-30597
MULTIVARIABLE CONTROL
Multivariable control of the Space Shuttle Remote Manipulator System using linearization by state feedback
[NASA-CR-188248] p 3443 N93-29080
MULTIVARIATE STATISTICAL ANALYSIS
A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844
Some statistical inference problems in linear models and variance components models and their applications
[AD-A264062] p 3555 N93-29923
Procedures for applying Ada quality prediction models
[AD-A264730] p 3534 N93-30546
MUON SPIN ROTATION
Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849
MUONS
Exotic atoms
[DE93-010242] p 3564 N93-28611
Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849
MUSCULAR FATIGUE
Sudden loading and fatigue effects on the human spine
[PB93-167526] p 3493 N93-29199
MUSCULAR FUNCTION
Visualization techniques for analyzing control of human movement: Affine mappings between multi-dimensional spaces p 3508 N93-30204
MUSCULOSKELETAL SYSTEM
The physiological limitations of man in the high G environment p 3503 N93-28861
MUTATIONS
Comparative mutagenesis of human cells in vivo and in vitro
[DE93-012269] p 3490 N93-28651
Control and circadian behavior by transplanted suprachiasmatic nuclei
[AD-A264553] p 3496 N93-30382

N

NAP-OF-THE-EARTH NAVIGATION
Flight evaluation of a computer aided low-altitude helicopter flight guidance system p 3260 N93-28869
NAPHTHALENE
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929
NASA PROGRAMS
Proceedings of the Near-Earth-Object Interception Workshop
[NASA-TM-108236] p 3556 N93-28572
RBSE: Product development team research activity deliverables
[NASA-CR-193115] p 3527 N93-29212
NASA SBIR abstracts of 1991 phase 1 projects
[NASA-TM-108240] p 3609 N93-29323
Research and technology objectives and plans: Summary fiscal year 1991
[NASA-TM-103086] p 3660 N93-29452
The 1992 town meetings: Toward a shared vision
[NASA-NP-205] p 3608 N93-30134
Interagency Advanced Power Group (IAPG) Meeting Compendium
[DE93-006189] p 3670 N93-30212
Technology transfer p 3626 N93-30699
Technology transfer needs and experiences: The NASA Research Center perspective p 3626 N93-30703
Technology transfer within the NASA Goddard Space Flight Center p 3626 N93-30704
Technology transfer and space science missions
p 3626 N93-30705
Technology transfer p 3627 N93-30707
Technology transfer within NASA
p 3627 N93-30708
Technology transfer within the government
p 3627 N93-30709
Technology transfer within the government
p 3627 N93-30711
NASP technology transfer p 3627 N93-30713
NASA space research and technology overview (ITP)
p 3628 N93-30722
Space research and technology overview
p 3628 N93-30723
First NASA Advanced Composites Technology Conference, part 2
[NASA-CP-3104-PT-2] p 3303 N93-30841
NASA SPACE PROGRAMS
The MESUR mission p 3649 N93-28816
Pluto fast flyby mission and science overview
p 3649 N93-28818
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819
A perspective on acquisition of NASA space systems
[AD-A263246] p 3610 N93-29499
Exploration technology prioritization
p 3629 N93-30726
NASTRAN
NASTRAN analysis for the Airmass Sunburst model 'C' Ultralight Aircraft p 3249 N93-29777
NATIONAL AEROSPACE PLANE PROGRAM
NASP technology transfer p 3627 N93-30713
NATIONAL AIRSPACE SYSTEM
National Airspace System Performance Analysis Capability (NASPAC) simulation model
p 3247 N93-30351
NATURAL GAS
Thermodynamic properties of natural gas mixtures
[PB93-162816] p 3604 N93-29428
Rates and mechanisms of reaction of hydrogen sulfide with iron chelates
[PB93-184299] p 3312 N93-29665
Thermodynamic properties of natural gas mixtures
[PB93-176162] p 3604 N93-29794
Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide
[PB93-173805-VOL-2] p 3471 N93-29861
Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658
Diffusion coefficients and heats of mixing in aqueous alkanolamines
[PB93-176212] p 3316 N93-30661
Power generation and transportation systems research department
[PB93-178309] p 3352 N93-30663
NOx chemistry in natural gas flames
[PB93-175263] p 3317 N93-30760
NATURAL LANGUAGE (COMPUTERS)
Natural language generation
[AD-A262578] p 3524 N93-28579
NATURAL SATELLITES
Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing
p 3641 N93-28773
NAVIER-STOKES EQUATION
Navier-Stokes analysis of radial turbine rotor performance
[NASA-CR-191153] p 3251 N93-28609
A new flux conserving Newton's method scheme for the two-dimensional, steady Navier-Stokes equations
[NASA-TM-106160] p 3416 N93-28626
Implementation of a multidomain Navier-Stokes code on the Intel iPSC2 hypercube
[FFA-TN-1992-37] p 3418 N93-28994
The numerical solution of low Mach number flow in confined regions by Richardson extrapolation
[TRITA-NA-9207] p 3238 N93-29005
An efficient spectral integration method for the solution of the Navier-Stokes equations
[FFA-TN-1992-28] p 3418 N93-29009
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade
[NASA-TM-106187] p 3420 N93-29157
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet
[NASA-TM-106240] p 3252 N93-29162
Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions
p 3421 N93-29177
Accuracy of least-squares methods for the Navier-Stokes equations
[NASA-TM-106209] p 3421 N93-29208
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-193241] p 3421 N93-29213
An upwind method for the solution of the 3D Euler and Navier-Stokes equations on adaptively refined meshes
[AD-A262863] p 3423 N93-29472
Recent applications of CFD to the aerodynamics of Army projectiles
[AD-A262953] p 3240 N93-29512
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Aerothermic calculations of flows in interdisc cavities of turbines p 3256 N93-29947
The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade
p 3258 N93-29958
Coupling of 3D-Navier-Stokes external flow calculations and internal 3D-heat conduction calculations for cooled turbine blades p 3258 N93-29961
Navier-Stokes analysis of three-dimensional flow and heat transfer inside turbine blade rows
p 3259 N93-29963
Simulation, characterization and control of forced unsteady viscous flows using Navier-Stokes equations
[AD-A264333] p 3425 N93-30369
Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375
Computation of a delta-wing roll-and-hold maneuver
[AD-A264704] p 3260 N93-30498

Some implications of a differential turbomachinery equation with viscous correction
[AD-A264693] p 3427 N93-30571
Compressible turbulence in a high-speed high Reynolds number mixing layer p 3242 N93-30583
Strong parallel blade-vortex interaction and noise propagation in helicopter flight p 3563 N93-30980
Godunov-type methods for the equations of compressible fluid mechanics
[KFK-5058] p 3428 N93-31020

NAVIGATION
Advanced Unmanned Search System (AUSS) supervisory command, control and navigation
[AD-A263171] p 3245 N93-28990
Automated satellite image navigation
[AD-A262868] p 3269 N93-29475

NAVIGATION AIDS
A comparison of simulated parallax and single-station range aids to navigation
[AD-A263460] p 3246 N93-29818
Tactical satellites p 3284 N93-29893
High reliability, maintenance-free INS battery development
[AD-A264521] p 3412 N93-30406
Conspicuity of aids to navigation. Part 1: Temporal patterns for flashing lights
[AD-A264626] p 3499 N93-30426
Design and implementation of a Global Positioning System (GPS) supported area navigation system with electronic aircraft
[ILR-MITT-275(1992)] p 3246 N93-30671

NAVIGATION INSTRUMENTS
Design and implementation of a Global Positioning System (GPS) supported area navigation system with electronic aircraft
[ILR-MITT-275(1992)] p 3246 N93-30671

NAVIGATION SATELLITES
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468
System of navigation by satellites with European coverage p 3284 N93-29897
Tactical satellites for air command and control p 3284 N93-29898

NAVY
Independent research and independent exploratory development programs
[AD-A264735] p 3544 N93-30556
Pattern measurements of US Navy ELF antennas p 3399 N93-30752

NEAR FIELDS
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740

NEAR INFRARED RADIATION
Near-infrared line imaging of NGC 6240: Global shock and nuclear starburst
[MPE-PREPRINT-226] p 3631 N93-30641

NEEL TEMPERATURE
Phase separation, antiferromagnetism, and superconductivity in superconducting-superoxygenated La(2-x)Sr(x)CuO(4+(delta))
[DE93-009852] p 3598 N93-30517

NEGATIVE IONS
The production and destruction of negative ions
[DE93-010527] p 3564 N93-28665
Measurement of work function of a plasma grid in a cesium seeded negative ion source
[DE93-764153] p 3589 N93-30190

NEODYMIUM LASERS
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
ND laser with co-doped ion(s) pumped by visible laser diodes
[AD-D015711] p 3437 N93-29277
Simulation of transient radiation effects on semiconductor devices using a pulsed Q-switched Nd:YAG laser p 3357 N93-30230

NEON
Measurement of 1s2s(sup 3)S(sub 1)-1s2p(sup 3)P(sub 2,0) intervals in helium-like neon
[DE93-009243] p 3563 N93-28521
Polarization dependence of the ionization of helium and neon by 120 femtosecond pulses at 614 nm
[DE93-010514] p 3564 N93-28762

NEPHANALYSIS
Cloudiest year study: An analysis of the 3DNEPH and RTNEPH databases
[AD-A263409] p 3483 N93-29967

NERVES
Biophysical and biochemical mechanisms in synaptic transmitter release
[AD-A264829] p 3496 N93-30613
An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination
[AD-A264293] p 3492 N93-30818
Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures
[AD-A264179] p 3497 N93-30882

NERVOUS SYSTEM
Neural mechanisms of attention
[AD-A264345] p 3544 N93-30165
Multiple neuron recording in the hippocampus of freely moving animals
[AD-A264807] p 3492 N93-30594
Biophysical and biochemical mechanisms in synaptic transmitter release
[AD-A264829] p 3496 N93-30613

NETHERLANDS
Remote sensing in Czechoslovakia and Hungary: An analysis of the possible co-operation of The Netherlands with Czechoslovakia and Hungary in the field of remote sensing
[BCRS-92-12] p 3461 N93-29466
Land use database for the Netherlands using LANDSAT Thematic Mapper pictures
[BCRS-91-32] p 3463 N93-30839

NETWORK ANALYSIS
Performance measurement systems: A best practices study
[AD-A262180] p 3506 N93-29444
FDDI installation and performance analysis
[AD-A263263] p 3529 N93-29497
Maximum and minimum return losses from a passive two-port network terminated with a mismatched load p 3385 N93-29594
NetStat: A probabilistic network connectivity analysis tool
[AD-A262838] p 3529 N93-29647
Efficient algorithms for the evaluation of planar network reliability
[AD-A263602] p 3531 N93-29916
A multilevel approach to minimum cost network flows
[AD-A264008] p 3550 N93-29978
Analysis of visual loss from retinal lesions
[AD-A264692] p 3496 N93-30494
Memory driven feature-based design
[AD-A264697] p 3534 N93-30495

NETWORK SYNTHESIS
Memory driven feature-based design
[AD-A264697] p 3534 N93-30495

NEURAL NETS
Artificial intelligence methodologies in flight related differential game, control and optimization problems
[AD-A262405] p 3541 N93-28498
Soft computing in design and manufacturing of advanced materials
[NASA-TM-106032] p 3295 N93-28624
Digital image compression using artificial neural networks p 3624 N93-28811
Using a neural network to estimate solvent consumption
[PB93-173110] p 3467 N93-28873
Neural network simulations on massively parallel computers: Applications in chemical physics
[DE93-006739] p 3538 N93-28894
Neural network technologies
[AD-A262576] p 3541 N93-28987
Spurious symptom reduction in fault monitoring
[NASA-CR-191453] p 3542 N93-29192
Multi-channel holographic birfurcative neural network system for real-time adaptive EOS data analysis p 3614 N93-29231
Cognitive and Neural Sciences Division 1992 programs
[AD-A263400] p 3654 N93-29258
The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction
[DE93-010304] p 3567 N93-29416
A neuro-fuzzy architecture for real-time applications p 3511 N93-29529
Learning characteristics of a space-time neural network as a tether skiprope observer p 3512 N93-29534
Clustering of tethered satellite system simulation data by an adaptive neuro-fuzzy algorithm p 3512 N93-29535
Character recognition using a neural network model with fuzzy representation p 3512 N93-29536
Comparison of crisp and fuzzy character networks in handwritten word recognition p 3514 N93-29545
Fuzzy neural network methodology applied to medical diagnosis p 3498 N93-29546
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 2
[NASA-CP-10112-VOL-2] p 3515 N93-29556
Adding dynamic rules to self-organizing fuzzy systems p 3515 N93-29557
A neural fuzzy controller learning by fuzzy error propagation p 3516 N93-29560
Incorporation of varying types of temporal data in a neural network p 3518 N93-29575
Fuzzy operators and cyclic behavior in formal neuronal networks p 3519 N93-29576
Neural networks: A simulation technique under uncertainty conditions p 3519 N93-29577
Incomplete fuzzy data processing systems using artificial neural network p 3519 N93-29578
Stochastic architecture for Hopfield neural nets p 3519 N93-29579
Hierarchical model of matching p 3519 N93-29580
A conjugate gradients/trust regions algorithms for training multilayer perceptrons for nonlinear mapping p 3519 N93-29581
An accelerated training method for back propagation networks
[NASA-CASE-MSC-21625-1] p 3498 N93-29610
Neural networks application to divergence-based passive ranging
[NASA-TM-103981] p 3245 N93-29653
Communications neural net processors
[AD-A263330] p 3542 N93-29763
Development of neural network architectures for self-organizing pattern recognition and robotics
[AD-A264831] p 3543 N93-29791
Feature based neural network acoustic transient signal classification
[AD-A263437] p 3562 N93-29816
Computation and generalization in neural networks
[AD-A263752] p 3549 N93-29871
Effect of design selection on response surface performance
[NASA-CR-4520] p 3249 N93-29885
A neural network based approach for machine fault diagnosis
[VTT-TIED-1274] p 3543 N93-29998
Computing with neural maps: Application to perceptual and cognitive function
[AD-A264056] p 3499 N93-30033
Neural mechanisms of attention
[AD-A264345] p 3544 N93-30165
Neural network cloud classification research
[AD-A264628] p 3484 N93-30176
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-1-2] p 3354 N93-30215
Improvement of the NRC automatic speech recognition system p 3355 N93-30221
Analog CMOS circuits for neural networks p 3355 N93-30223
A motion detector based on a neural network p 3356 N93-30224
An artificial neural network model for periodic trajectory generation p 3356 N93-30225
Parameter identification of time-varying systems using neural networks p 3356 N93-30226
An architecture for an analog VLSI neural network for early computer vision processing p 3359 N93-30244
An adaptive algorithm for linear associative memory problem p 3360 N93-30255
Cloud classification from satellite imagery using neural computing p 3367 N93-30297
Image enhancement using an analog device neural network p 3376 N93-30346
A testbed for autonomous reflexive grasping
[AD-A264557] p 3446 N93-30384
Drive-reinforcement learning system applications
[AD-A264514] p 3446 N93-30404
Analysis of visual loss from retinal lesions
[AD-A264692] p 3496 N93-30494
Memory driven feature-based design
[AD-A264697] p 3534 N93-30495
Independent research and independent exploratory development programs
[AD-A264735] p 3544 N93-30556
The 1991 neural information processing systems: Natural and synthetic
[AD-A264754] p 3623 N93-30559
Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561
Evolving neural network architecture
[AD-A264802] p 3544 N93-30592
Principal components of natural images: An analytical solution
[AD-A264800] p 3489 N93-30603
4D interconnect experimental development
[AD-A264298] p 3540 N93-30895

An algorithm for simple and complex feature detection: From retina to primary visual cortex
[AD-A264306] p 3497 N93-30897
Structural design using neural networks
p 3545 N93-31029
On neural networks in identification and control of dynamic systems
[NASA-TM-107702] p 3455 N93-31038

NEURONS
Adding dynamic rules to self-organizing fuzzy systems
p 3515 N93-29557
Parallel processing and learning: Variability and chaos in self-organization of activity in groups of neurons
[AD-A264224] p 3539 N93-30361
Evolving neural network architecture
[AD-A264802] p 3544 N93-30592
Multiple neuron recording in the hippocampus of freely moving animals
[AD-A264807] p 3492 N93-30594

NEUROPHYSIOLOGY
Cognitive and Neural Sciences Division 1992 programs
[AD-A263400] p 3654 N93-29258
Fuzzy operators and cyclic behavior in formal neuronal networks p 3519 N93-29576
The AFOSR Workshop on the Future of EEG and MEG
[AD-A264338] p 3495 N93-30160
Control and circadian behavior by transplanted suprachiasmatic nuclei
[AD-A264553] p 3496 N93-30382
Multiple neuron recording in the hippocampus of freely moving animals
[AD-A264807] p 3492 N93-30594

NEUROTRANSMITTERS
Molecular approach to hypothalamic rhythms
[AD-A264438] p 3496 N93-30421

NEUTRAL BEAMS
NPB cesium space experiment p 3267 N93-28733
Use of particle beams for lunar prospecting
p 3650 N93-28822

NEUTRAL GASES
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334

NEUTRAL PARTICLES
Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334
The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380
Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787

NEUTRINOS
Research in theoretical physics
[DE93-008401] p 3603 N93-28961
Limits on neutrino radiative decay from SN1987A
[NASA-CR-193262] p 3653 N93-29164
Measurement of W-Z interference from neutrino-electron scattering
[DE93-010724] p 3566 N93-29313
Neutrino mass
[DE93-010735] p 3566 N93-29315
A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052
Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

NEUTRON ACTIVATION ANALYSIS
Instrumental neutron activation analysis developed for silicon integrated circuit technology
[ETN-93-93581] p 3408 N93-29271

NEUTRON COUNTERS
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415
Electronics for a neutron detector and a Geiger-Mueller detector for the radiation protection around MEA and AmPS
[DIGEL-1992-6] p 3413 N93-30838

NEUTRON CROSS SECTIONS
Fast neutron cross section measurements
[DE93-009053] p 3563 N93-28546

NEUTRON DIFFRACTION
Neutron scattering studies of the structures and lattice dynamics of the alkali metals
[DE93-008272] p 3593 N93-28956
A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799

NEUTRON FLUX DENSITY
A study on radiation shielding analysis for toroidal field coils of a tokamak-type fusion reactor
[DE93-753398] p 3585 N93-28981

NEUTRON IRRADIATION
Enhancements of the critical currents of YBaCuO single crystals by neutron (n) and proton (p) irradiation
[DE93-007892] p 3592 N93-28661
Irradiation assisted stress corrosion cracking of stainless steel irradiated in FBR
[DE93-764495] p 3326 N93-30191

NEUTRON SCATTERING
Neutron scattering studies of the structures and lattice dynamics of the alkali metals
[DE93-008272] p 3593 N93-28956
A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799

NEUTRON SPECTRA
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415

NEUTRON SPECTROMETERS
Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415

NEUTRON STARS
GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars
[NASA-CR-193243] p 3635 N93-30053

NEUTRONS
Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design
[DE93-753270] p 3584 N93-28535
Neutron radiation induced degradation of diode characteristics
[AD-A263277] p 3405 N93-28563
Comparison of analytical transport and stochastic solutions for neutron slowing down in an infinite medium
[DE93-010799] p 3565 N93-28833
Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849
Coherent and semi-coherent neutron transfer reactions
[DE93-008336] p 3565 N93-28959
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415
A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799
Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

NEW ENGLAND (US)
Rhode Island hurricanes and tropical storms: A fifty-six year summary, 1936-1991
[PB93-162006] p 3481 N93-29198

NICKEL ALLOYS
International Conference on Martensitic Transformations (ICOMAT 92)
[AD-A262739] p 3321 N93-28591
Effects of internal helium on mechanical properties of Nitronic (tm) 40 stainless steel
[DE93-009902] p 3324 N93-29265
Platinum-modified diffusion aluminide coatings on nickel-base superalloys
[AD-A263597] p 3325 N93-29981
Order-disorder transformations in Ni-Al alloys
[DE93-009293] p 3326 N93-30389
Examination of formability to seamless tubes on Ni-Cr-W superalloy
[DE93-764158] p 3326 N93-30396
Development of Ni-Cr-W superalloys for high temperature components in high temperature gas-cooled reactors, part 2
[DE93-764469] p 3326 N93-30399
Reactive sintering of Ni3Al intermetallic alloys under compressive stress
[DE93-009729] p 3327 N93-30652
Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F
[AD-A263747] p 3327 N93-30812

NICKEL CADMIUM BATTERIES
Battery testing at Argonne National Laboratory
[DE93-009204] p 3407 N93-29036
High reliability, maintenance-free INS battery development
[AD-A264521] p 3412 N93-30406

NICKEL HYDROGEN BATTERIES
Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669

NICKEL IRON BATTERIES
Battery testing at Argonne National Laboratory
[DE93-009204] p 3407 N93-29036

NICKEL ISOTOPES
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969

NICKEL OXIDES
Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133

NICKEL PLATE
Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669

NICKEL ZINC BATTERIES
Battery testing at Argonne National Laboratory
[DE93-009204] p 3407 N93-29036

NIGHT VISION
Evaluation of test methods and requirements for respiratory protection systems 21
[AD-A262466] p 3501 N93-28757
Head-steered sensor flight test results and implications p 3502 N93-28859
System automation and pilot-vehicle-interface for unconstrained low-altitude night attack
p 3503 N93-28867
Design considerations for a night, air-to-surface attack capability on a dual role fighter p 3251 N93-28871
CATS EYES adjustment procedures
[AD-A264069] p 3508 N93-29924
Studies of the effect of image degradation and recombination on visual perception
[AD-A264332] p 3580 N93-30368
The effects of superimposing symbology on a simulated night vision goggle display
[AD-A263458] p 3508 N93-30590

NIOBIUM
Measurement of magnetic field penetration depth in niobium polycrystalline films by polarized neutron reflection method
[DE93-606390] p 3600 N93-30771

NITRAMINE PROPELLANTS
Thermal oxidation of HCN by NO2 in shock waves
p 3318 N93-30064
Thermal decomposition of nitramines
p 3318 N93-30065
Homogeneous gas phase kinetic model with gradient sensitivity analysis for high temperature particulate boron combustion in fluorine enriched environments
p 3319 N93-30090
Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

NITRATION
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes
[AD-A263250] p 3438 N93-29800

NITRIC ACID
Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839

NITRIC OXIDE
Analysis of protocol gases: An on-going quality assurance audit
[PB93-168839] p 3311 N93-29204
Kinetics of nitric oxide formation behind 3 to 4 KM/S shock waves
[AD-A263653] p 3312 N93-29389
Rate constant determinations of reactions H + HNO from ab initio reaction path calculations
p 3319 N93-30099

NITRIDES
A study of the chemical mechanism in lubrication
[DE93-012230] p 3330 N93-28650

NITRIDING
Design of interfaces in metal matrix composites
[AD-A262052] p 3296 N93-29001

NITRITES
Technical bases for precipitate hydrolysis process operating parameters, revision 1
[DE93-009894] p 3309 N93-28553

NITROGEN
Preliminary experimental results for a cryogenic brush seal configuration
[NASA-TM-106236] p 3416 N93-28627
Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327
Vibrational spectroscopy of shock-compressed fluids
p 3318 N93-30072

NITROGEN COMPOUNDS
Synthesis of cubane based energetic molecules
[AD-A263271] p 3564 N93-28562

Surface chemistry of N2H4 on Si(100)-2x1
[AD-A264819] p 3316 N93-30627
NITROGEN DIOXIDE
NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068
NITROGEN OXIDES
Vibrational spectroscopy of shock-compressed fluids
p 3318 N93-30072
NOx chemistry in natural gas flames
[PB93-175263] p 3317 N93-30760
NITROSAMINE
Thermal decomposition of nitramines
p 3318 N93-30065
NOAA SATELLITES
Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR)
[DLR-MITT-92-09] p 3456 N93-28915
Fog studies in the Alpine region with digital NOAA/AVHRR data p 3458 N93-28925
Utilization of NOAA/AVHRR data for energy balance of Lake Constance (Switzerland) p 3458 N93-28926
Derivation of conductive heat transfer in mountains from AVHRR data p 3458 N93-28927
NOAA satellite programs and technology requirements
p 3627 N93-30710
NOISE
Study on decreasing torque noise resulting from feedback noise for the modified bang-bang controller
[AD-A263178] p 3407 N93-29010
Characteristics of high-frequency signals, noise, availability, and duration of bandwidths based on ROTHR Amchitka spectrum measurements
[AD-A264480] p 3393 N93-30423
NOISE (SOUND)
Sound attenuation characteristics of the standard DH-132A and SPH-4 helmets worn in combination with standard issue earplugs
[AD-A263011] p 3506 N93-29406
NOISE GENERATORS
Some aspects of the aeroacoustics of high-speed jets
[NASA-CR-191458] p 3418 N93-28975
NOISE MEASUREMENT
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A263161] p 3406 N93-28940
External acoustical noise measurements for aviation systems
[AD-A263138] p 3562 N93-29480
Application of non-standard signal processing to ELF noise characterization for the TSS1-OESEE programme
p 3397 N93-30743
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744
NOISE PREDICTION
A long wave TE/TM noise prediction model
p 3397 N93-30742
NOISE PREDICTION (AIRCRAFT)
Computation of far-field helicopter rotor tone noise
[ONERA-P-1990-5] p 3562 N93-30110
NOISE PROPAGATION
Noise transmission properties and control strategies for composite structures p 3301 N93-30436
Strong parallel blade-vortex interaction and noise propagation in helicopter flight p 3563 N93-30980
NOISE REDUCTION
Jet mixer noise suppressor using acoustic feedback
[NASA-CASE-LEW-15170-1] p 3561 N93-28953
Gyroscope with excess noise subtraction
[AD-D015698] p 3431 N93-29046
Quiet by design: Numerical acousto-elastic analysis of aircraft structures
[ISBN-90-386-0042-9] p 3248 N93-29268
Noise transmission properties and control strategies for composite structures p 3301 N93-30436
VLF propagation measurements in the Canadian Arctic p 3396 N93-30733
NOISE SPECTRA
Strong parallel blade-vortex interaction and noise propagation in helicopter flight p 3563 N93-30980
NOMOGRAPHS
Analysis of LDEF micrometeoroid/debris data and damage to composite materials p 3309 N93-29366
NONDESTRUCTIVE TESTS
Reliability assessment at airline inspection facilities. Volume 2: Protocol for an eddy current inspection reliability experiment
[DOT/FAA/CT-92/12-VOL-2] p 3449 N93-28685
Use of local x ray computerized tomography for high-resolution, region-of-interest inspection of large ceramic components for engines
[DE93-005564] p 3449 N93-28943
Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens
[NASA-TM-106219] p 3449 N93-29073
Advanced Construction Technology Center research
[AD-A263654] p 3432 N93-29390
Advanced NDE technology program
[AD-A262008] p 3449 N93-29443
Characterization of ceramic composite materials for gas turbine applications
[DE93-009719] p 3259 N93-30168
Logarithmic time scale in thermographic Non Destructive Evaluation (NDE) of materials p 3359 N93-30246
NONEQUILIBRIUM CONDITIONS
Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284
NONEQUILIBRIUM FLOW
Inviscid quasi one-dimensional nonequilibrium flow
[FFA-TN-1992-35] p 3418 N93-28993
Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284
NONFERROUS METALS
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-008] p 3322 N93-29012
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-007] p 3322 N93-29013
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-009] p 3322 N93-29015
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-012] p 3296 N93-29016
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-013] p 3296 N93-29017
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-016] p 3296 N93-29018
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-014] p 3322 N93-29019
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-92-015] p 3322 N93-29020
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-001] p 3296 N93-29021
NONGRAY GAS
Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions
[NASA-CR-193223] p 3604 N93-29168
NONLINEAR EQUATIONS
Index mappings for interactive editing of symbolic matrices
[DE93-009316] p 3549 N93-29060
Finite element approximation of the shallow water equations on the MASPAR
[AD-A264649] p 3489 N93-30525
On the method of determining relations
[DE93-606041] p 3551 N93-30765
On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912
A numerical solution of the two-center problem
[DE92-644674] p 3551 N93-30913
A remark on the invariant measure for the nonlinear Schroedinger equation
[DE93-609840] p 3552 N93-30946
The contact mechanical nonlinearities of a mathematical model of a railway wheel rolling over corrugated rail
[ILR-MITT-266(1991)] p 3454 N93-31015
NONLINEAR EVOLUTION EQUATIONS
Computer algebra tools for higher symmetry analysis of nonlinear evolution equations
[DE93-606089] p 3535 N93-30787
NONLINEAR FILTERS
Morphological and order statistic filters: A comparative study p 3375 N93-30345
NONLINEAR OPTICS
Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer
[AD-A262189] p 3329 N93-28489
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772
Dipolar orientational relaxation in guest/host amorphous polymer probed by second harmonic generation
[AD-A262006] p 3333 N93-29441
Isothermal annealing and relaxation of the second harmonic generation signal from a nonlinear optical polymer
[AD-A262007] p 3333 N93-29442
Polymers with electrical and nonlinear optical properties
[AD-D015691] p 3333 N93-29457
Investigations of self-pumped phase conjugate laser beams and coherence length
[AD-A263438] p 3438 N93-29789
Nonlinear mode coupling in free electron lasers
[AD-A263999] p 3439 N93-29883
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162
Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610
NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666
Physical chemical studies on molecular composite compositions
[AD-A264834] p 3339 N93-30898
NONLINEAR PROGRAMMING
Nonsmooth optimization algorithms, system theory, and software tools
[AD-A264679] p 3534 N93-30549
NONLINEAR SYSTEMS
The investigation of nonlinear effects on quasiparticle transport in condensed matter systems
[DE93-009582] p 3565 N93-28914
Uncertainty reasoning in expert systems
[NASA-CR-193120] p 3548 N93-28973
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074
Multivariable control of the Space Shuttle Remote Manipulator System using linearization by state feedback
[NASA-CR-188248] p 3443 N93-29080
Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics
[AD-A263427] p 3332 N93-29337
Clustering of tethered satellite system simulation data by an adaptive neuro-fuzzy algorithm
p 3512 N93-29535
Fuzzy coordinator in control problems
p 3515 N93-29552
Non-scalar uncertainty: Uncertainty in dynamic systems p 3517 N93-29565
Comparison between the performance of two classes of fuzzy controllers p 3517 N93-29566
Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711
Weakly nonlinear dynamics of near-CJ detonation waves
[DE93-007344] p 3424 N93-29836
A diffusion approximation for a network of reservoirs with power law release rule
[AD-A263753] p 3550 N93-29872
Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization
p 3279 N93-29989
Static and dynamic large deflection flexural response of graphite-epoxy beams
[NASA-CR-4118] p 3454 N93-30374
The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization
p 3544 N93-30893
Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917
On neural networks in identification and control of dynamic systems
[NASA-TM-107702] p 3455 N93-31038
NONLINEARITY
Nonlinear coupling of tearing fluctuations in the Madison Symmetric Torus
[DE93-010131] p 3584 N93-28602
Dynamical analysis of highly excited molecular spectra
[DE93-010771] p 3564 N93-28604
Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749

Bifurcations phenomena in a nonlinear oscillator: Approximate analytical studies versus computer simulation results p 3407 N93-29037
Nonlinear analyses of composite aerospace structures in sonic fatigue
[NASA-CR-193124] p 3451 N93-29154
Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions
p 3421 N93-29177
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414
Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446
A fuzzy measure approach to motion frame analysis for scene detection p 3511 N93-29525
Non-scalar uncertainty: Uncertainty in dynamic systems p 3517 N93-29565
A conjugate gradients/trust regions algorithms for training multilayer perceptrons for nonlinear mapping
p 3519 N93-29581
Measurements of light scattering by small particles at an angle of zero degrees
[AD-A263856] p 3580 N93-29887
Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917
The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

NONPARAMETRIC STATISTICS
Empirical quantile function nonparametric integrated analyses
[AD-A263704] p 3554 N93-29385

NONUNIFORMITY
The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932

NORMAL DENSITY FUNCTIONS
Modified Anderson-Darling and Cramer-Von Mises goodness-of-fit tests for the normal distribution
[AD-A262554] p 3553 N93-28575
Monte Carlo simulation of magnitude-angle error sources
[AD-A263738] p 3555 N93-29857

NORMS
Balanced approximation can be optimal
[OUEL-1950/92] p 3548 N93-28754

NORTH ATLANTIC TREATY ORGANIZATION (NATO)
T(lc2)acS(lc3)ats for Surveillance Verification and C3I
[AGARD-CP-522] p 3387 N93-29892
Considerations for NATO satellite communications in the post-2000 era p 3388 N93-29899
NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666

NOSE TIPS
Ablation problems using a finite control volume technique
[DE93-009861] p 3549 N93-29187
Numerical computation of inviscid flow around nose tip of Space Shuttle with NND scheme
[AD-A264012] p 3421 N93-29260
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494

NOVA LASER SYSTEM
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097

NOZZLE DESIGN
Altitude compensating ablative stiffening band for rocket motor nozzles
[NASA-CASE-MFS-28728-1] p 3288 N93-28950
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock Isentropic Light Piston Facility p 3252 N93-29928

NOZZLE FLOW
Inviscid quasi one-dimensional nonequilibrium flow
[FFA-TN-1992-35] p 3418 N93-28993
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

NOZZLE GEOMETRY
Altitude compensating ablative stiffening band for rocket motor nozzles
[NASA-CASE-MFS-28728-1] p 3288 N93-28950

NOZZLE INSERTS
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix A: Insulation PFORs
[NASA-CR-192563] p 3272 N93-30618

NOZZLES
Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane
p 3253 N93-29930

NUCLEAR BINDING ENERGY
Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles
[DE92-644678] p 3535 N93-30914

NUCLEAR ELECTRIC POWER GENERATION
Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097

NUCLEAR ELECTRIC PROPULSION
NEP space test program objective
p 3265 N93-28724

NUCLEAR EMULSIONS
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

NUCLEAR ENERGY
Nuclear isomers as ultra-high-energy-density materials
[DE93-009520] p 3568 N93-29784

NUCLEAR EXPLOSIONS
Energetic material response to abnormal environments p 3350 N93-30095
Radiated fields from an electromagnetic pulse simulator p 3366 N93-30290
Acoustic-gravity waves from low-altitude localized disturbances
[AD-A264804] p 3479 N93-30593
Modeling regional seismic waves
[AD-A264002] p 3479 N93-30756

NUCLEAR FUEL ELEMENTS
Annual progress report on the NSRR experiments, (21)
[DE93-753190] p 3574 N93-29137

NUCLEAR FUELS
Annual progress report on the NSRR experiments, (21)
[DE93-753190] p 3574 N93-29137

NUCLEAR FUSION
Tests of the particle physics-physical cosmology interface
[DE93-008483] p 3634 N93-28963
Computing for magnetic fusion energy research: An updated vision
[DE93-010394] p 3587 N93-29190

NUCLEAR INTERACTIONS
The APX spectrometer for Martian missions
p 3434 N93-28776
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

NUCLEAR MAGNETIC RESONANCE
Be3(AsO4)2 2H2O: A new berylloarsenate phase containing bridged tetrahedral 3-rings
[AD-A262518] p 3592 N93-28584
Synthesis of new high performance lubricants and solid lubricants
[DE93-012237] p 3330 N93-28748
High pressure studies of hydrated nafion membranes: Dielectric relaxation and deuteron NMR
[AD-A263511] p 3332 N93-29342
NMR studies of molecules in liquid crystals and graphite
[DE93-010423] p 3569 N93-29805
Methylhydridopolysilazane and its pyrolytic conversion to Si3N4/SiC ceramics
[AD-A264150] p 3336 N93-30170
1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568
Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596

NUCLEAR MEDICINE
Proceedings of a Workshop on Molecular Nuclear Medicine
[DE93-010828] p 3493 N93-28835

NUCLEAR PHYSICS
Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960
Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002
Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

NUCLEAR POWER PLANTS
Analysis of TOPAZ 2 and SPACE-R space nuclear power plants using a modified thermionic model
[AD-A262612] p 3286 N93-28474
Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893
Statement on the United Nations Conference on Environment and Development
[DE93-601878] p 3475 N93-30996

NUCLEAR POWER REACTORS
SIRIUS-P: An inertially confined direct drive laser fusion power reactor
[DE93-012433] p 3439 N93-30186

NUCLEAR RADIATION
Neutron radiation induced degradation of diode characteristics
[AD-A263277] p 3405 N93-28563

NUCLEAR REACTIONS
Fast neutron cross section measurements
[DE93-009053] p 3563 N93-28546
Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849
Coherent and semi-coherent neutron transfer reactions
[DE93-008336] p 3565 N93-28959
Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960
Nuclear structure research at the Triangle Universities Nuclear Laboratory
[DE93-009756] p 3566 N93-29184
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301
Charged particle activation studies on the surface of LDEF spacecraft p 3572 N93-29630
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807
Studies of fluctuation processes in nuclear collisions
[DE93-011263] p 3576 N93-30054
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

NUCLEAR REACTORS
Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893
Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004

NUCLEAR RESEARCH
The prehistory of ESRO, 1959 - 1960
[ESA-HSR-1] p 3660 N93-29500
Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

NUCLEAR RESEARCH AND TEST REACTORS
Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

NUCLEAR STRUCTURE
Nuclear structure research at the Triangle Universities Nuclear Laboratory
[DE93-009756] p 3566 N93-29184
Theoretical studies in nuclear structure
[DE93-012290] p 3570 N93-30505

NUCLEAR WARFARE
Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753

NUCLEAR WEAPONS
Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider
[DE93-011481] p 3412 N93-30127
Effects of device scaling and geometry on MOS radiation hardness assurance
[DE93-009832] p 3413 N93-30516

NUCLEATE BOILING
Tank Pressure Control Experiment/Thermal Phenomena (TPCE/TP) p 3264 N93-28713
Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures
[PB93-178598] p 3475 N93-30887

NUCLEATION
A one-dimensional continuum model for shape-memory alloys
[AD-A262505] p 3321 N93-28656
Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling
[AD-A263495] p 3423 N93-29352
Diamond nucleation of surfaces using carbon clusters
[AD-A264634] p 3599 N93-30548

NUCLEI (NUCLEAR PHYSICS)
Meson-meson interactions and phi-enhancement in nucleus collisions
[DE93-010725] p 3565 N93-28831
Nuclear structure research at the Triangle Universities Nuclear Laboratory
[DE93-009756] p 3566 N93-29184

NUCLEON-NUCLEON INTERACTIONS
Nuclear structure research at the Triangle Universities Nuclear Laboratory
[DE93-009756] p 3566 N93-29184
NUCLEONS
Towards the results of global analysis of data on nucleon electromagnetic structure
[DE93-606125] p 3571 N93-30792
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990
NUMERICAL ANALYSIS
Godunov-type schemes applied to detonation flows
[NASA-CR-191447] p 3509 N93-28841
JPRS report: Science and technology. Central Eurasia: Physics and mathematics
[JPRS-UPM-93-002] p 3560 N93-29022
Quiet by design: Numerical acousto-elastic analysis of aircraft structures
[ISBN-90-386-0042-9] p 3248 N93-29268
ICASE
[NASA-CR-193257] p 3520 N93-29864
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876
Study of effects of small perturbations on chaotic systems
[DE93-009762] p 3557 N93-30048
Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079
NUMERICAL CONTROL
Computerized atmospheric trace contaminant control simulation for manned spacecraft
[NASA-TM-108409] p 3505 N93-28977
Experimental study of location and identification of ferrous spheroids using a smart total field magnetometer
[AD-A263661] p 3324 N93-29391
Valve malfunction detection apparatus
[NASA-CASE-MFS-29904-1] p 3432 N93-29503
Modification of flux profiles using a faceted concentrator
[DE93-000087] p 3464 N93-29925
A parallel processing system for intensive I/O
p 3362 N93-30262
A transputer based parallel processing architecture for robotics applications p 3362 N93-30263
Laser based 3D volumetric display system
[AD-A264825] p 3441 N93-30599
Computer control of pulsed tunable dye lasers
[DE93-605896] p 3441 N93-30801
NUMERICAL WEATHER FORECASTING
Exploitation of parallelism in climate models
[DE93-011259] p 3470 N93-29318
The sensitivity of ageostrophic circulations to model resolution: A case study using NGM forecasts of ERICA IOP-4
[AD-A262011] p 3482 N93-29393
The basics of weather models
[AD-A263386] p 3483 N93-29850
NUSSELT NUMBER
Transient thermal behaviour of a compressor rotor with axial cooling air flow and co-rotating or contra-rotating shaft p 3255 N93-29946
NUTATION
Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777
NYLON (TRADEMARK)
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471

O

OBJECT-ORIENTED PROGRAMMING
DOKMA: A document oriented communication model for medical applications as a basis of a role system in the medical field
[ETN-93-93799] p 3492 N93-28469
Dynamic object oriented interaction and its implementation in the framework in an interface management system
[ETN-93-93795] p 3523 N93-28526
Toward reusable graphics components in Ada
[AD-A262568] p 3524 N93-28577
A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846
Transforming AdaPT to Ada9x
[NASA-CR-193117] p 3526 N93-29026
An architecture for robotic system integration
[DE93-010829] p 3444 N93-29316
OSI transaction processing standard: An introduction and outlines of implementation
[VTT-TIED-1250] p 3532 N93-29997
MLog: A language for prototyping concurrent systems
p 3368 N93-30301
OBSTACLE AVOIDANCE
A study of the effects of lens focal length on remote driver performance
[AD-A263191] p 3505 N93-28941
Research on reconfigurable and reliable manipulators
[DE93-010244] p 3444 N93-29330
OCEAN BOTTOM
Analyses of data from fine structure and circulation studies in the Gulf of California
[AD-A262910] p 3486 N93-28885
Near real-time GIS in deep-ocean exploration
[AD-A262073] p 3487 N93-29003
Ocean waves in SAMSON/SWADE
[AD-A263681] p 3487 N93-29295
ARI: Internal gravity waves at abrupt topography
[AD-A263795] p 3477 N93-29879
OCEAN COLOR SCANNER
SeaWiFS technical report series. Volume 2: Analysis of orbit selection for SeaWiFS: Ascending versus descending node
[NASA-TM-104566-VOL-2] p 3486 N93-28497
SeaWiFS technical report series. Volume 6: SeaWiFS technical report series cumulative index: Volumes 1-5
[NASA-TM-104566-VOL-6] p 3486 N93-28500
OCEAN CURRENTS
Steady-state and transient modeling of tracer and nutrient distributions in the global ocean
[DE93-011043] p 3486 N93-28670
Analyses of data from fine structure and circulation studies in the Gulf of California
[AD-A262910] p 3486 N93-28885
Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results
[AD-A261939] p 3486 N93-28996
Using C-vector method to derive the three-dimensional circulation pattern near the East Greenland Polar Front
[AD-A261979] p 3487 N93-29437
A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region
[AD-A263490] p 3488 N93-29819
Dynamics of small-scale oceanic motions
[AD-A263582] p 3488 N93-29914
Measurements of ocean currents across the continental margin off Point Sur, California, during March 1989
[AD-A264853] p 3489 N93-30178
Hydrographic observations in the western tropical and subtropical north Atlantic Ocean: Atlantic Climate Change Program (ACCP) and Western Tropical Atlantic Experiment (WESTRAX) during 1990
[PB93-184760] p 3489 N93-30827
OCEAN DATA ACQUISITIONS SYSTEMS
Ice-ocean four dimensional structure and dynamics
[AD-A264850] p 3490 N93-30906
ERS-1 directional wave spectra validation with the airborne SAR PHARS
[BCRS-92-18] p 3463 N93-31010
OCEAN DYNAMICS
Dynamics of small-scale oceanic motions
[AD-A263582] p 3488 N93-29914
Analysis of a simulation of the seasonal cycle in the tropical Pacific Ocean in an eddy-resolving global ocean model
[AD-A264007] p 3488 N93-29977
Shear, strain, and thermohaline vertical fine structure in the upper ocean p 3488 N93-30046
Ice-ocean four dimensional structure and dynamics
[AD-A264850] p 3490 N93-30906
OCEAN MODELS
Steady-state and transient modeling of tracer and nutrient distributions in the global ocean
[DE93-011043] p 3486 N93-28670
Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327
Dynamics of small-scale oceanic motions
[AD-A263582] p 3488 N93-29914
Analysis of a simulation of the seasonal cycle in the tropical Pacific Ocean in an eddy-resolving global ocean model
[AD-A264007] p 3488 N93-29977
The IUTAM Symposium on Breaking Waves
[AD-A264196] p 3489 N93-30143
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
OCEAN SURFACE
Processing of altimeter data by the German ERS-1 Processing and Archiving Facility (D-PAF)
p 3457 N93-28917
Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results
[AD-A261939] p 3486 N93-28996
Ocean waves in SAMSON/SWADE
[AD-A263681] p 3487 N93-29295
Optical slope/height measurements of small scale waves within the SAXON-FPN experiment
[AD-A262572] p 3487 N93-29422
Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448
The IUTAM Symposium on Breaking Waves
[AD-A264196] p 3489 N93-30143
Uplink laser propagation measurements through the sea surface, haze and clouds
[AD-A264687] p 3440 N93-30553
OCEAN TEMPERATURE
Reception at Ascension Island, South Atlantic, of the transmissions from the Heard Island feasibility test
[PB93-176261] p 3394 N93-30662
Hydrographic observations in the western tropical and subtropical north Atlantic Ocean: Atlantic Climate Change Program (ACCP) and Western Tropical Atlantic Experiment (WESTRAX) during 1990
[PB93-184760] p 3489 N93-30827
OCEANOGRAPHIC PARAMETERS
Measurements of ocean currents across the continental margin off Point Sur, California, during March 1989
[AD-A264853] p 3489 N93-30178
A calibration procedure for the SBE 19 Conductivity, Temperature, and Depth (CTD) profiler
[AD-A264435] p 3489 N93-30420
OCEANOGRAPHY
Processing of altimeter data by the German ERS-1 Processing and Archiving Facility (D-PAF)
p 3457 N93-28917
Near real-time GIS in deep-ocean exploration
[AD-A262073] p 3487 N93-29003
JPRS report: Science and technology. Central Eurasia: Earth science
[JPRS-UES-93-003] p 3456 N93-29089
National collaboratories: Applying information technology for scientific research
[LC-93-83795] p 3612 N93-29129
Using C-vector method to derive the three-dimensional circulation pattern near the East Greenland Polar Front
[AD-A261979] p 3487 N93-29437
A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region
[AD-A263490] p 3488 N93-29819
Analysis of a simulation of the seasonal cycle in the tropical Pacific Ocean in an eddy-resolving global ocean model
[AD-A264007] p 3488 N93-29977
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
Oceanographic research towers in european waters
[AD-A264795] p 3489 N93-30612
Standard and reference materials for marine science, third edition
[PB93-185684] p 3489 N93-30830
IOC-UNEP review meeting on oceanographic processes of transport and distribution of pollutants in the sea
[DE93-605070] p 3490 N93-31019
OCEANS
Ocean Margins Program
[DE93-008937] p 3470 N93-29262
Tidal and lunar data for Point Mugu, San Nicolas island, and the Barking Sanda area during 1993
[AD-A262725] p 3477 N93-29401
Clouds and radiation: A primier
[AD-A263136] p 3482 N93-29479
Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817
OCTETS
Borel sum rules for octet baryons in nuclear medium
[DE93-753245] p 3604 N93-29242
OFF-ON CONTROL
Study on decreasing torque noise resulting from feedback noise for the modified bang-bang controller
[AD-A263178] p 3407 N93-29010
OFFICE AUTOMATION
High-performance mass storage system for workstations p 3618 N93-30457
OFFSHORE ENERGY SOURCES
Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide
[PB93-173805-VOL-2] p 3471 N93-29861
OFFSHORE PLATFORMS
Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1
[PB93-173797] p 3468 N93-28899
Ice-ocean four dimensional structure and dynamics
[AD-A264850] p 3490 N93-30906

OHMIC DISSIPATION
Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765
OIL EXPLORATION
Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide
[PB93-173805-VOL-2] p 3471 N93-29861
OIL RECOVERY
Study on technology for effective utilization of carbon dioxide in view of global environment
[DE93-781440] p 3468 N93-28883
Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1
[PB93-173797] p 3468 N93-28899
OIL SLICKS
Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967
OILS
Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967
OLIGOMERS
Synthesis of oligoimides and oligoimide anion radicals
[AD-A263129] p 3290 N93-29474
Preliminary properties of a resin from ethynyl terminated materials p 3303 N93-30842
OLIVINE
Frequency dependent electrical properties of minerals and partial-melts
[DE93-009254] p 3410 N93-29793
OMEGA NAVIGATION SYSTEM
Investigations of equatorial ionosphere nighttime mode conversion at VLF p 3396 N93-30735
ON-LINE SYSTEMS
Basic OSF/Motif programming and applications
[DE93-010800] p 3524 N93-28834
NSSDC data listing
[NASA-TM-108264] p 3612 N93-29167
A composite self tuning strategy for fuzzy control of dynamic systems p 3511 N93-29530
Designing a fuzzy scheduler for hard real-time systems p 3512 N93-29537
Some problems with the design of self-learning management systems p 3516 N93-29559
EnviroNET: On-line information for LDEF
p 3624 N93-29625
The planning coordinator: A design architecture for autonomous error recovery and on-line planning of intelligent tasks
[NASA-CR-193250] p 3543 N93-30039
Graphical programming: On-line robot simulation for telerobotic control
[DE93-009796] p 3447 N93-30654
ONBOARD DATA PROCESSING
Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801
Systematic processing of Clementine data for scientific analyses p 3624 N93-28803
On-board B-ISDN fast packet switching architectures. Phase 2: Development. Proof-of-concept architecture definition report
[NASA-CR-191151] p 3273 N93-29884
Synchronization techniques for medium data rate EHF MILSATCOM systems p 3389 N93-29901
SAW technology for on-board processing in military satellite communications p 3362 N93-30265
Airborne data acquisition using a front-end processor architecture p 3373 N93-30329
OPEN CLUSTERS
Young open clusters as probes of the star formation process p 3635 N93-30377
OPENINGS
A Rayleigh-Ritz analysis methodology for cutouts in composite structures p 3307 N93-30869
OPERATING COSTS
STRV1-b flight experiment p 3265 N93-28723
OPERATING SYSTEMS (COMPUTERS)
A temporal proof methodology for reactive systems
[NASA-CR-193145] p 3528 N93-29469
Nonresident and endangered variables: The effects of code generation optimizations on symbolic debugging
[AD-A263149] p 3529 N93-29486
A redesigned Isis and Meta system under Mach
[AD-A263576] p 3531 N93-29976
Using the Mach communication primitives in X11
[AD-A264049] p 3533 N93-30125
OPERATING TEMPERATURE
Ambient-atmosphere compatible superconducting fullerenes
[AD-A262025] p 3595 N93-29397
OPERATIONAL PROBLEMS
Galileo post-Gaspra cruise and Earth-2 encounter
p 3385 N93-29597
OPERATIONS RESEARCH
Assessment of Columbus payload operations capabilities by scheduling with the MARS system
[ESA-STR-235] p 3281 N93-30106
Placement of cells: Theory and solution of a quadratic 0/1 optimization problem
[ETN-93-94182] p 3413 N93-30616
OPERATOR PERFORMANCE
Engineman stress and fatigue: Pilot tests
[PB93-175008] p 3507 N93-29675
The air traffic controller's mental model and it's implications for equipment design and trainee selection
p 3372 N93-30322
OPERATORS (MATHEMATICS)
Topology of hybrid objects
[ETN-93-93594] p 3546 N93-28466
Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles
[DE92-644678] p 3535 N93-30914
Nth roots of normal contractions
[DE92-644725] p 3557 N93-30985
OPTICAL COMMUNICATION
Fundamental study of the signal processing by optics
[DE93-776265] p 3577 N93-28982
Fiber grating-based sensing system with interferometric wavelength-shift detection
[AD-D015697] p 3577 N93-29038
Optical coherent phase diversity systems
[ISBN-90-9004897-9] p 3578 N93-29270
Hybrid data link
[AD-D015714] p 3383 N93-29280
Fiber-optic currents measurements
[DE93-007970] p 3579 N93-29350
Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455
Atmospheric transverse coherence length measurement system for laser communications
[AD-A263563] p 3439 N93-29827
Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875
Electro-optic characterisation of extremely wide bandwidth electrical signals
[AD-A264202] p 3392 N93-30145
Uplink laser propagation measurements through the sea surface, haze and clouds
[AD-A264687] p 3440 N93-30553
Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609
OPTICAL COMPUTERS
Accuracy enhancement in optical computing
[AD-A264872] p 3522 N93-30179
Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609
4D interconnect experimental development
[AD-A264298] p 3540 N93-30895
OPTICAL CORRELATORS
Spatial Light Modulators (SLMs) surface quality
[AD-A263249] p 3579 N93-29656
OPTICAL DATA PROCESSING
The German satellite ground station in Antarctica: Realization and first results p 3458 N93-28924
Fog studies in the Alpine region with digital NOAA/AVHRR data p 3458 N93-28925
Multi-channel holographic birfurcative neural network system for real-time adaptive EOS data analysis
p 3614 N93-29231
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
Spatial Light Modulators (SLMs) surface quality
[AD-A263249] p 3579 N93-29656
Photorefractive integrators and correlators
[AD-A264200] p 3597 N93-30144
Acousto-optic time-integrating correlators for processing wideband digital data p 3360 N93-30253
Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557
Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609
4D interconnect experimental development
[AD-A264298] p 3540 N93-30895
Massively parallel spatial light modulation-based optical signal processing
[AD-A264846] p 3581 N93-30905
OPTICAL DATA STORAGE MATERIALS
Holographic data storage crystals for the LDEF
p 3435 N93-29697
ICI optical data storage tape: An archival mass storage media p 3621 N93-30472
Flexible storage medium for write-once optical tape
p 3621 N93-30473
Electron trapping data storage system and applications p 3622 N93-30474
OPTICAL DISKS
Associative memories for supercomputers
[AD-A263142] p 3520 N93-29482
Goddard Conference on Mass Storage Systems and Technologies, Volume 1
[NASA-CP-3198] p 3616 N93-30449
Striped tertiary storage arrays p 3620 N93-30464
OPTICAL EQUIPMENT
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-001] p 3274 N93-29014
High-efficiency high-reliability optical components for a large, high-average-power visible laser system
[DE93-009225] p 3437 N93-29098
In orbit degradation of EUV optical components in the wavelength range 10-40 nm AO 138-3
p 3582 N93-29691
Degradation of optical components in a space environment p 3582 N93-29692
Studies of effects on optical components and sensors: LDEF experiments AO-147 (ERB components) and S-0014 (APEX) p 3582 N93-29693
LDEF space optics handbook p 3582 N93-29695
OPTICAL FIBERS
Fiber-optic currents measurements
[DE93-007970] p 3579 N93-29350
Fiber-optic polarimetric strain gauge
p 3375 N93-30341
OPTICAL FILTERS
X ray, far, and extreme ultraviolet coatings for space applications p 3340 N93-28829
Laser radiation detection system
[AD-D015724] p 3438 N93-29287
Studies of effects on optical components and sensors: LDEF experiments AO-147 (ERB components) and S-0014 (APEX) p 3582 N93-29693
Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205
Method and apparatus for imaging an object in or through a scattering medium by using multiple-wave mixing
[AD-D015707] p 3581 N93-30410
OPTICAL FLOW (IMAGE ANALYSIS)
Neural networks application to divergence-based passive ranging
[NASA-TM-103981] p 3245 N93-29653
Binocular spherical disparity: A study in representation for a forward translating camera
[PB93-184422] p 3579 N93-29667
OPTICAL MATERIALS
Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer
[AD-A262189] p 3329 N93-28489
Infrared rugates by molecular beam epitaxy
p 3582 N93-28808
Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059
Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207
Multichip module high speed testing
[AD-A262989] p 3408 N93-29427
Polymers with electrical and nonlinear optical properties
[AD-D015691] p 3333 N93-29457
Degradation of optical components in a space environment p 3582 N93-29692
Studies of effects on optical components and sensors: LDEF experiments AO-147 (ERB components) and S-0014 (APEX) p 3582 N93-29693
Effects of long term space environment exposure on optical substrates and coatings (S0050-2)
p 3582 N93-29694
Problems in the implementation of x ray optics with x ray lasers
[DE93-009297] p 3438 N93-29781
Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610
Visible light emitting materials and injection devices
[AD-A263499] p 3601 N93-30811
OPTICAL MEASUREMENT
Characterization of laboratory generated turbulence by optical phase measurements
[AD-A262596] p 3480 N93-28465
Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540

The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements
p 3649 N93-28815
An automated observing system for passive evaluation of cloud cover and visibility
[AD-A263207] p 3481 N93-28875
Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results
[AD-A261939] p 3486 N93-28996
Fiber grating-based sensing system with interferometric wavelength-shift detection
[AD-D015697] p 3577 N93-29038
Optical slope/height measurements of small scale waves within the SAXON-FPN experiment
[AD-A262572] p 3487 N93-29422
Design of a high resolution spatial heterodyne interferometer
[AD-A262867] p 3285 N93-29461
Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine
[AD-A263810] p 3580 N93-29880
Optical blade vibration measurement
[ETN-93-93454] p 3259 N93-29999

OPTICAL MEASURING INSTRUMENTS
The production and destruction of negative ions
[DE93-010527] p 3564 N93-28665
The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements
p 3649 N93-28815
Environmental monitors in the Midcourse Space Experiments (MSX) p 3286 N93-28826
Precision optical interferometry in space
[NASA-CR-193264] p 3630 N93-29163
Optical slope/height measurements of small scale waves within the SAXON-FPN experiment
[AD-A262572] p 3487 N93-29422

OPTICAL MEMORY (DATA STORAGE)
Associative memories for supercomputers
[AD-A263142] p 3520 N93-29482
Optical media standards for industry
p 3617 N93-30451
The fundamentals and futures of removable mass storage alternatives p 3619 N93-30460
Electron trapping data storage system and applications p 3622 N93-30474

OPTICAL MICROSCOPES
Ultra-high resolution water window x ray microscope optics design and analysis
[NASA-CR-193225] p 3578 N93-29128

OPTICAL POLARIZATION
Rib arrow integrated optic polarizer
p 3357 N93-30231

OPTICAL PROPERTIES
The Optical Properties Monitor (OPM): A multipurpose optical laboratory in space p 3266 N93-28729
Optically controlled active impedance element particularly suited for a microwave oscillator
[AD-D015723] p 3408 N93-29281
Methods for reducing turbulent flow aero-optical distortion
[AD-A263698] p 3423 N93-29353
Quantum devices using Si-based superlattices and structures
[AD-A263700] p 3595 N93-29383
Polymers with electrical and nonlinear optical properties
[AD-D015691] p 3333 N93-29457
Ruled and holographic experiment (AO 138-5)
p 3434 N93-29696
Next generation optical instruments and space experiment based on the LDEF thermal control surfaces experiment (S0069) p 3583 N93-29706
A stochastic formation of radiative transfer in clouds
[DE93-011372] p 3484 N93-30055
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610
NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666

OPTICAL PUMPING
A high field optical-pumping spin-exchange polarized deuterium source
[DE93-009208] p 3574 N93-28970
Femtosecond laser studies of excited state dynamics
[AD-A263708] p 3439 N93-29918

OPTICAL RADAR
The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements
p 3649 N93-28815
Development of a 9.3 micrometer CW LIDAR for the study of atmospheric aerosol
[NASA-CR-193227] p 3381 N93-29105
Measurement of the rotation Raman spectra of nitrogen, oxygen, and water vapor under conditions of a temperature humidity lidar
[GKSS-92/E/32] p 3485 N93-31018

OPTICAL RANGE FINDERS
A single band processor for the computation of range from optical absorbance p 3363 N93-30272
On the implementation of the BIRIS range sensor for applications in robotic control and autonomous navigation p 3366 N93-30286

OPTICAL REFLECTION
Formulation of Ames 24E2 IR-black coating
[NASA-TM-102864] p 3629 N93-29453

OPTICAL RESONATORS
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276

OPTICAL SCANNERS
CAESAR development plan 1992-1995
[BCRS-92-17] p 3463 N93-31009

OPTICAL SWITCHING
Ferroelectric liquid crystal optical interconnect switching systems
[AD-A263751] p 3596 N93-29859
Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557
Ultrafast, passive, broad-band, optical shutter based on novel semiconductor/conducting polymer interfaces
[AD-A264098] p 3601 N93-30878

OPTICAL TRACKING
Subnanoradian, groundbased tracking of spaceborne lasers p 3442 N93-28823
SWAT 2 overview
[AD-A262905] p 3578 N93-29139
SWAT laboratory test results
[AD-A262906] p 3578 N93-29140
Methods for reducing turbulent flow aero-optical distortion
[AD-A263698] p 3423 N93-29353

OPTICAL TRANSFER FUNCTION
Characterization of laboratory generated turbulence by optical phase measurements
[AD-A262596] p 3480 N93-28465

OPTICAL WAVEGUIDES
Nonlinear mode coupling in free electron lasers
[AD-A263999] p 3439 N93-29883
Optoelectronic technology consortium
[AD-A263580] p 3580 N93-29973
Rib arrow integrated optic polarizer
p 3357 N93-30231
Topical meeting of broadband analog and digital optoelectronics
[AD-A264643] p 3581 N93-30522

OPTICS
JPRS report: Science and technology. Central Eurasia: Physics and mathematics
[JPRS-UPM-93-002] p 3560 N93-29022
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-004] p 3354 N93-29090

OPTIMAL CONTROL
Artificial intelligence methodologies in flight related differential game, control and optimization problems
[AD-A262405] p 3541 N93-28498
Optimal control of the M/G/1 queue with repeated vacations of the server
[INRIA-RR-1637] p 3541 N93-28637
A fuzzy logic optimal control law solution to the CMMCA tracking problem
[AD-A262555] p 3542 N93-29420
An information theoretic approach to stochastic adaptive control application to manipulators with active inertia
p 3359 N93-30247
Nonsmooth optimization algorithms, system theory, and software tools
[AD-A264679] p 3534 N93-30549

OPTIMIZATION
Packing of Steiner trees: Polyhedric studies and application
[ETN-93-93796] p 3547 N93-28527
Optimal control of the M/G/1 queue with repeated vacations of the server
[INRIA-RR-1637] p 3541 N93-28637
Balanced approximation can be optimal
[OUEL-1950/92] p 3548 N93-28754
Preemptive scheduling with variable profile, precedence constraints and due dates
[INRIA-RR-1622] p 3538 N93-28937
Uncertainty reasoning in expert systems
[NASA-CR-193120] p 3548 N93-28973
Design optimization of space structures
p 3278 N93-29122
Enhanced reduction of velocity data obtained during CETA flight experiment
[NASA-TM-4460] p 3431 N93-29209
Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291
Characterization and optimization of a Hot Air Solder-Leveling System
[DE93-010188] p 3332 N93-29328
Integrated approaches to parallelism in optimization and solution of inverse problems
[AD-A262259] p 3452 N93-29349
Nonresident and endangered variables: The effects of code generation optimizations on symbolic debugging
[AD-A263149] p 3529 N93-29486
Fuzzy learning under and about an unfamiliar fuzzy teacher p 3516 N93-29558
A multilevel approach to minimum cost network flows
[AD-A264008] p 3550 N93-29978
Optimal geometric design of robots for environments with obstacles p 3445 N93-30149
Parametric and combinatorial problems in constrained optimization
[AD-A264229] p 3555 N93-30363
Technical examination and simulation of a photovoltaic system: Solar generator, battery, download
[ETN-93-94179] p 3466 N93-30573
Placement of cells: Theory and solution of a quadratic 0/1 optimization problem
[ETN-93-94182] p 3413 N93-30616
Optimum design of multiwire cages for high-voltage applications
[AD-A264310] p 3400 N93-30995

OPTOELECTRONIC DEVICES
Low temperature (LT) GaAs and related materials
[AD-A263607] p 3298 N93-29282

ORBIT CALCULATION
The effect of clock, media, and station location errors on Doppler measurement accuracy
p 3246 N93-29588
Precise tracking of the Magellan and Pioneer Venus orbiters by Same-Beam Interferometry. Part 2: Orbit determination analysis p 3270 N93-29589
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800

ORBIT TRANSFER VEHICLES
ELITE program: Electric insertion transfer experiment
p 3264 N93-28709
Advanced engine study program
[NASA-CR-187217] p 3287 N93-28946
Analysis of orbital system logistics in the cis-lunar space with particular consideration of life cycle costs
[ETN-93-93484] p 3268 N93-29063
Project UM-HAUL: A self-unloading reusable lunar lander p 3232 N93-29740
Mars sample return mission: Two alternate scenarios
p 3233 N93-29746
SPECS: Orbital debris removal p 3234 N93-29754
Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing
[NASA-CR-191036] p 3448 N93-31039

ORBITAL ASSEMBLY
Space Station: Orbiter berthing p 3274 N93-29091
Space construction activities
[NASA-CR-192690] p 3274 N93-29108
Interaction dynamics of on-orbit construction
p 3274 N93-29109
Hybrid CMS methods with model reduction for assembly of structures p 3274 N93-29110
Controls of interaction dynamics of orbital assembly
p 3275 N93-29111
Systems engineering studies of on-orbit assembly operation p 3275 N93-29114

ORBITAL RENDEZVOUS
Reference equations of motion for automatic rendezvous and capture
[NASA-CR-185676] p 3269 N93-29652

ORBITAL SERVICING
Analysis of orbital system logistics in the cis-lunar space with particular consideration of life cycle costs
[ETN-93-93484] p 3268 N93-29063

ORBITAL SPACE TESTS
CSI-Star: A low-cost CSI orbital testbed
p 3263 N93-28707

ORDER-DISORDER TRANSFORMATIONS
Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364
Anelastic relaxations associated with local disordering in grain boundaries
[AD-A263101] p 3596 N93-29796
Some effects of composition and microstructure on the B2 in equilibrium to DO3 ordered phase transition in Fe3Al alloys
[DE93-009724] p 3325 N93-29813
Order-disorder transformations in Ni-Al alloys
[DE93-009293] p 3326 N93-30389

ORDNANCE
Ordnance thermal battery
[AD-D015722] p 3412 N93-30201

ORGANIC COMPOUNDS
Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665
Standard and reference materials for marine science, third edition
[PB93-185684] p 3489 N93-30830
Visualizing weld metal solidification using organic analogs p 3293 N93-30973

ORGANIC COOLANTS
Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641

ORGANIC SILICON COMPOUNDS
Applications of transition metal compounds in the preparation of useful silicon-containing ceramics
[AD-A264028] p 3335 N93-30028

ORGANIC SULFUR COMPOUNDS
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene
[NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506
Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146

ORGANISMS
Planetary protection issues for the MESUR mission: Probability of growth (Pg)
[NASA-CP-3167] p 3651 N93-30214

ORGANIZATIONS
Minimum security requirements for multi-user operating systems
[PB93-185999] p 3522 N93-30832

ORGANOMETALLIC COMPOUNDS
Supported organometallic complexes, surface chemistry, spectroscopy, and catalysis
[DE93-011930] p 3309 N93-28688
Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid
[DE93-007362] p 3593 N93-28966
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A263076] p 3382 N93-29131
Synthetic lubricating oil greases containing metal chelates of Schiff bases
[AD-D015694] p 3333 N93-29458
Organometallic and surface chemistry of mixed-metal systems
[DE93-012686] p 3325 N93-30059
Methylhydridopolysilazane and its pyrolytic conversion to Si3N4/SiC ceramics
[AD-A264150] p 3336 N93-30170
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610
Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816

ORGANOMETALLIC POLYMERS
A study of the chemical mechanism in lubrication
[DE93-012230] p 3330 N93-28650
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610

ORR-SOMMERFELD EQUATIONS
Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326

ORTHOGONALITY
Study on various problems in statistical planning and inference
[AD-A262484] p 3554 N93-29411

OSCILLATING CYLINDERS
Stabilized space-time finite element formulations for unsteady incompressible flows involving fluid-body interactions p 3419 N93-29040

OSCILLATIONS
The natural excitation technique (NExT) for modal parameter extraction from operating wind turbines
[DE93-010611] p 3463 N93-28603
Chaos in mechanical systems with especial reference to rotorcraft and missiles
[AD-A263703] p 3604 N93-29384
Theoretical studies in nuclear structure
[DE93-012290] p 3570 N93-30505
Neutrino oscillations and a new Faraday effect
[DE93-606111] p 3571 N93-30789

OSCILLATORS
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772
Bifurcations phenomena in a nonlinear oscillator: Approximate analytical studies versus computer simulation results p 3407 N93-29037
Program for an improved hypersonic temperature-sensing probe
[NASA-CR-186025] p 3431 N93-29066
Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084
An improved linear ion trap physics package p 3384 N93-29587
The flight performance of the Galileo orbiter USO p 3386 N93-29603
Fusion laser oscillator and pulse-forming system using integrated optics
[DE93-009286] p 3588 N93-29780
Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875
Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider
[DE93-011481] p 3412 N93-30127

OSCILLOSCOPES
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Electro-optic characterisation of extremely wide bandwidth electrical signals
[AD-A264202] p 3392 N93-30145

OSEEN APPROXIMATION
Hydrodynamic interactions among fibers in high efficiency filters
[DE93-007117] p 3424 N93-30035

OUTGASSING
Return flux experiment p 3266 N93-28727

OVER-THE-HORIZON RADAR
Characteristics of high-frequency signals, noise, availability, and duration of bandwidths based on ROTHR Amchitka spectrum measurements
[AD-A264480] p 3393 N93-30423

OXIDATION
The temperature dependence of the deformation and oxidation behavior of an age-hardenable beta + alpha-two titanium alloy
[AD-A262232] p 3320 N93-28491
Influence of the Cold Buster (tm) sports bar on heat debt, mobilization and oxidation of energy substrates
[AD-A262762] p 3493 N93-28939
Oxidation behavior in reaction-bonded aluminum-silicon alloy/alumina powder compacts
[DE93-010407] p 3298 N93-29191
High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures
[AD-A263611] p 3311 N93-29283
Super critical water oxidation on energetic materials
[DE93-010704] p 3342 N93-29312
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829
Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR)
[DE93-753349] p 3576 N93-30006
Thermal oxidation of HCN by NO2 in shock waves p 3318 N93-30064
Study of codeposition of aluminum-haffnium and deposition of yttrium by the cementation technique: Elaboration of Ni-Cr-Al and Ni-Cr-Al-Hf felt materials
[ONERA-NT-1990-9] p 3336 N93-30112
Surface chemistry of hydrogen-passivated porous silicon-oxidation of surface Si-H groups by acetone
[AD-A264655] p 3315 N93-30526
Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F
[AD-A263747] p 3327 N93-30812
Laboratory experiments in integrated circuit fabrication p 3292 N93-30962

OXIDATION RESISTANCE
Ultrahigh temperature assessment study: Ceramic matrix composites
[AD-A262740] p 3295 N93-28592
High temperature creep and oxidation resistant chromium silicide matrix alloy containing molybdenum
[NASA-CASE-LEW-15697-1] p 3323 N93-29172
Platinum-modified diffusion aluminide coatings on nickel-base superalloys
[AD-A263597] p 3325 N93-29981
Development of adherent ceramic coatings to reduce contact stress damage of ceramics
[DE93-012518] p 3336 N93-30182
Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F
[AD-A263747] p 3327 N93-30812

OXIDATION-REDUCTION REACTIONS
Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists
[AD-A263130] p 3432 N93-29476
Hydrogen sulfide decomposition into hydrogen and sulfur by quinone cycles, part 1
[PB93-175297] p 3317 N93-30761

OXIDE FILMS
Structure, adhesion, and stability of metal/oxide and oxide/oxide interfaces
[DE93-012930] p 3325 N93-30060
Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372

OXIDES
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion
[DE93-010662] p 3464 N93-29844

OXIDIZERS
Super critical water oxidation on energetic materials
[DE93-010704] p 3342 N93-29312

OXYGEN
The electrolyte factor in O2 reduction electrocatalysis
[AD-A263565] p 3313 N93-29828
Vibrational spectroscopy of shock-compressed fluids p 3318 N93-30072
Dioxygen reduction in various acid electrolytes
[AD-A263564] p 3317 N93-30664

OXYGEN ATOMS
Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561
Method for preparation of a microporous structure with layered interstitial surface treatment
[NASA-CASE-MSC-21487-2] p 3296 N93-29023
Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193
Damage areas on selected LDEF aluminum surfaces p 3283 N93-29374
Refinements on the pinhole camera measurements of the LDEF attitude p 3283 N93-29622
LDEF microenvironments, observed and predicted p 3283 N93-29623
Center for surface radiation damage studies
[AD-A264330] p 3570 N93-30366
Development of an O atom gun
[AD-A264753] p 3570 N93-30558

OXYGEN ISOTOPES
Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327

OXYGEN MASKS
Evaluation of test methods and requirements for respiratory protection systems 21
[AD-A262466] p 3501 N93-28757

OXYGEN PRODUCTION
Hybrid oxygen system
[AD-A262417] p 3500 N93-28464
Benefits of in situ propellant utilization for a Mars sample return mission
[NASA-TM-106243] p 3341 N93-28695
Alkali metal carbon dioxide electrochemical system for energy storage and/or conversion of carbon dioxide to oxygen
[NASA-CASE-LEW-14973-1] p 3464 N93-28974
Upper ocean model of dissolved atmospheric gases
[DE93-010151] p 3487 N93-29327
Method for producing oxygen from lunar materials
[NASA-CASE-MSC-21759-1] p 3312 N93-29617

OXYGEN SUPPLY EQUIPMENT
Hybrid oxygen system
[AD-A262417] p 3500 N93-28464
Magnetohydrodynamic projects at the CDIF
[DE93-012195] p 3584 N93-28649

OXYGEN-HYDROCARBON ROCKET ENGINES
Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-192561] p 3287 N93-28680

OZONE
Development of ultraviolet absorption photometer for atmospheric ozone measurements and results from mid-latitude investigations p 3468 N93-28949
Emission inventories: A global modeling perspective
[DE93-005817] p 3469 N93-28965
Summer 1990 Atlanta ozone precursor study (January 1993)
[PB93-167203] p 3470 N93-29200
Study to determine the nature and extent of ozone and ozone precursor transport in selected areas of California
[PB93-184828] p 3470 N93-29669
Potential effects of HFC-152a on global ozone and climate
[DE93-008018] p 3471 N93-29792

The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis [DE93-007537] p 3313 N93-29837

OZONE DEPLETION

Advanced Earth Observing Satellite (ADEOS) p 3279 N93-29648

Overview of the DOE Atmospheric Chemistry Program's Ozone Project [DE93-007416] p 3471 N93-29770

OZONOMETRY

Development of ultraviolet absorption photometer for atmospheric ozone measurements and results from mid-latitude investigations p 3468 N93-28949

Summer 1990 Atlanta ozone precursor study (January 1993) [PB93-167203] p 3470 N93-29200

OZONOSPHERE

Results from the US/Russian Meteor-3/Total Ozone Mapping Spectrometer [NASA-TM-104576] p 3467 N93-28682

Advanced Earth Observing Satellite (ADEOS) p 3279 N93-29648

P

P WAVES

Modern seismic travel time tables and station corrections for P and S waves [AD-A262536] p 3477 N93-29412

P-I-N JUNCTIONS

Widebanding techniques for VHF antennas 2 [AD-A263998] p 3387 N93-29882

Infrared imaging array integrated in three dimensions directly on top of silicon circuits [AD-A264707] p 3581 N93-30500

P-N JUNCTIONS

Laboratory experiments in integrated circuit fabrication p 3292 N93-30962

P-3 AIRCRAFT

Uplink laser propagation measurements through the sea surface, haze and clouds [AD-A264687] p 3440 N93-30553

PACIFIC OCEAN

Upper ocean model of dissolved atmospheric gases [DE93-010151] p 3487 N93-29327

Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide [PB93-173805-VOL-2] p 3471 N93-29861

Analysis of a simulation of the seasonal cycle in the tropical Pacific Ocean in an eddy-resolving global ocean model [AD-A264007] p 3488 N93-29977

Fiber optic chemical sensors for characterizing the carbon cycle in ocean margin regions [DE93-011442] p 3489 N93-30056

Measurements of ocean currents across the continental margin off Point Sur, California, during March 1989 [AD-A264853] p 3489 N93-30178

PACKAGING

Packing of Steiner trees: Polyhedric studies and application [ETN-93-93796] p 3547 N93-28527

PACKET SWITCHING

On-board B-ISDN fast packet switching architectures. Phase 2: Development. Proof-of-concept architecture definition report [NASA-CR-191151] p 3273 N93-29884

PACKETS (COMMUNICATION)

Flow control using the theory of zero sum Markov games [INRIA-RR-1597] p 3553 N93-28507

On-board B-ISDN fast packet switching architectures. Phase 2: Development. Proof-of-concept architecture definition report [NASA-CR-191151] p 3273 N93-29884

PAINTS

Thermal control paints on LDEF: Results of M0003 sub-experiment 18 [AD-A263252] p 3329 N93-28561

PAIR PRODUCTION

New limits on generation-1 leptoquarks [DE93-008138] p 3567 N93-29351

Pion pair production in photon-photon collisions [DE93-606114] p 3571 N93-30790

Towards the results of global analysis of data on nucleon electromagnetic structure [DE93-606125] p 3571 N93-30792

PALEOCLIMATOLOGY

Drill/borescope system for the Mars Polar Pathfinder p 3647 N93-28805

PALLADIUM

Applications of transition metal compounds in the preparation of useful silicon-containing ceramics [AD-A264028] p 3335 N93-30028

PANELS

Multi-parameter optimization tool for low-cost commercial fuselage crown designs p 3305 N93-30858

Comparison of hand laid-up tape and filament wound composite cylinders and panels with and without impact damage p 3306 N93-30859

Optimization of composite sandwich cover panels subjected to compressive loadings p 3306 N93-30862

Advanced fiber placement of composite fuselage structures p 3306 N93-30864

PARABOLIC BODIES

Three-D crater analysis of LDEF impact features from stereo imagery p 3283 N93-29359

PARABOLIC REFLECTORS

A satellite-tracking millimeter-wave reflector antenna system for mobile satellite-tracking [NASA-CASE-NPO-18772-1-CU] p 3381 N93-28955

Array-fed reflector systems with limited scan p 3371 N93-30318

PARACHUTES

The development of a parachute system for aerial delivery from high speed cargo aircraft [DE93-008339] p 3239 N93-29035

A computational model that couples aerodynamic and structural dynamic behavior of parachutes during the opening process [AD-A264115] p 3241 N93-30119

PARALLAX

A comparison of simulated parallax and single-station range aids to navigation [AD-A263460] p 3246 N93-29818

PARALLEL COMPUTERS

BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems [DE93-011391] p 3524 N93-28644

Planning of a West Virginia University Research Center in the basic materials sciences [DE93-011731] p 3592 N93-28647

Parallel software tools at Langley Research Center [NASA-TM-108995] p 3520 N93-29070

Implementation of a single-material version of PAGOSA on MIMD hypercubes [SAND-92-0640] p 3526 N93-29127

Efficient wiring of reconfigurable parallel processors [DE93-009847] p 3538 N93-29186

The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction [DE93-010304] p 3567 N93-29416

Special purpose parallel computer architecture for real-time control and simulation in robotic applications [NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608

High performance computing and communications program p 3627 N93-30715

PARALLEL FLOW

A parallel implicit incompressible flow solver using unstructured meshes [AD-A263395] p 3424 N93-29851

PARALLEL PROCESSING (COMPUTERS)

Design of a hardware discrete event simulation coprocessor [AD-A262614] p 3537 N93-28478

Study on the concurrent calculation with a multitransputer network [DE93-753191] p 3524 N93-28531

Parallel computation and the basis system [DE93-008755] p 3537 N93-28544

A multiarchitecture parallel-processing development environment [NASA-TM-106180] p 3538 N93-28628

How to write fast and clear parallel programs using algebra [DE93-000797] p 3524 N93-28640

BlockSolve v1.1: Scalable library software for the parallel solution of sparse linear systems [DE93-011391] p 3524 N93-28644

Planning of a West Virginia University Research Center in the basic materials sciences [DE93-011731] p 3592 N93-28647

Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies [AGARD-CP-520] p 3501 N93-28850

Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing p 3501 N93-28853

Neural network simulations on massively parallel computers: Applications in chemical physics [DE93-006739] p 3538 N93-28894

Preemptive scheduling with variable profile, precedence constraints and due dates [INRIA-RR-1622] p 3538 N93-28937

A simple parallel prefix algorithm for compact finite-difference schemes [NASA-CR-191448] p 3525 N93-28976

Implementation of a multidomain Navier-Stokes code on the Intel iPSC2 hypercube [FFA-TN-1992-37] p 3418 N93-28994

Implementation of a single-material version of PAGOSA on MIMD hypercubes [SAND-92-0640] p 3526 N93-29127

Distributed Virtual System (DIVIRS) Project [NASA-CR-193234] p 3526 N93-29169

Computing for magnetic fusion energy research: An updated vision [DE93-010394] p 3587 N93-29190

Exploitation of parallelism in climate models [DE93-011259] p 3470 N93-29318

The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction [DE93-010304] p 3567 N93-29416

Implementation of parallel algorithms [AD-A263126] p 3529 N93-29496

Exploiting the memory hierarchy in sequential and parallel sparse Cholesky factorization [AD-A262849] p 3539 N93-29508

Special purpose parallel computer architecture for real-time control and simulation in robotic applications [NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608

Using synthetic-perturbation techniques for tuning shared memory programs [PB93-178572] p 3539 N93-29677

Communications neural net processors [AD-A263330] p 3542 N93-29763

Data parallelism [DE93-009300] p 3539 N93-29782

Full abstraction for a shared variable parallel language [AD-A263547] p 3530 N93-29821

NESL: A nested data-parallel language (Version 2.6) [AD-A263548] p 3530 N93-29822

Class notes: Programming parallel algorithms CS 15-840B (Fall 1992) [AD-A263549] p 3530 N93-29823

Tactical satellites p 3284 N93-29893

Use of a genetic algorithm to solve two-fluid flow problems on an NCUBE multiprocessor computer [DE93-009630] p 3425 N93-30184

A parallel processing system for intensive I/O p 3362 N93-30262

A transputer based parallel processing architecture for robotics applications p 3362 N93-30263

Optimized partitioning and balancing for parallel processing p 3365 N93-30280

Parallel processing and learning: Variability and chaos in self-organization of activity in groups of neurons [AD-A264224] p 3539 N93-30361

High-performance mass storage system for workstations p 3618 N93-30457

Infrared imaging array integrated in three dimensions directly on top of silicon circuits [AD-A264707] p 3581 N93-30500

Finite element approximation of the shallow water equations on the MASPAR [AD-A264649] p 3489 N93-30525

Promoting high-performance computing and communications [ISBN-0-16-041828-3] p 3522 N93-30570

Multiprocessing MCNP on an IBM RS/6000 cluster [DE93-008712] p 3540 N93-30633

Transputers, parallel processing in embedded systems for image compression in space applications [NLR-TP-89242-U] p 3522 N93-30840

Massively parallel spatial light modulation-based optical signal processing [AD-A264846] p 3581 N93-30905

PARALLEL PROGRAMMING

A C++ interface for programming on the Connection Machine [INRIA-RR-1698] p 3538 N93-29487

Data parallelism [DE93-009300] p 3539 N93-29782

Full abstraction for a shared variable parallel language [AD-A263547] p 3530 N93-29821

Class notes: Programming parallel algorithms CS 15-840B (Fall 1992) [AD-A263549] p 3530 N93-29823

The midway distributed shared memory system [AD-A264645] p 3534 N93-30523

PARAMETER IDENTIFICATION

Speech recognition by recursive stochastic modelling [ISBN-90-9005038-8] p 3382 N93-29266

Optical coherent phase diversity systems [ISBN-90-9004897-9] p 3578 N93-29270

Estimating the parameters of chaotic maps [AD-A262574] p 3556 N93-29423

Parameter identification of time-varying systems using neural networks p 3356 N93-30226

PARAMETERIZATION

An analysis of the Generalized Lambda Distribution [AD-A262485] p 3555 N93-29447

Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928

PARASITIC DISEASES
Project MEDSAT p 3231 N93-29739

PARITY
Tutorial: Performance and reliability in redundant disk arrays p 3537 N93-30463

PARTIAL DIFFERENTIAL EQUATIONS
Index mappings for interactive editing of symbolic matrices
[DE93-009316] p 3549 N93-29060
Difference methods for hyperbolic problems with emphasis on space-centered approximations
[ONERA-NT-1990-4] p 3550 N93-30136

PARTICLE ACCELERATOR TARGETS
Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569
Studies of relativistic heavy ion collisions at the AGS (E814/E877)
[DE93-008541] p 3564 N93-28678
Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

PARTICLE ACCELERATORS
Modern Monte Carlo particle transport simulation for safety and radiation protection applications in accelerometer technology and in space science
[JUEL-2609] p 3574 N93-29062
Mechanical behaviour of a closed collar model for an 11.5 T dipole
[NIKHEF-H/92-03] p 3576 N93-30019
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Microwave emission from relativistic electron beams
[AD-A264102] p 3400 N93-30880

PARTICLE BEAMS
Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768
Use of particle beams for lunar prospecting
p 3650 N93-28822
Maximizing the luminosity of hadron, supercolliders at 10-100 TeV
[DE93-009247] p 3574 N93-29103

PARTICLE COLLISIONS
Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569
Dense inclined flows: Theory and experiments
[DE93-011452] p 3417 N93-28630
Meson-meson interactions and phi-enhancement in nucleus collisions
[DE93-010725] p 3565 N93-28831
Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960
Maximizing the luminosity of hadron, supercolliders at 10-100 TeV
[DE93-009247] p 3574 N93-29103
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
Studies of fluctuation processes in nuclear collisions
[DE93-011263] p 3576 N93-30054
Multidimensional intermittency in hadronic collisions
[DE93-010562] p 3577 N93-30532
Pion pair production in photon-photon collisions
[DE93-606114] p 3571 N93-30790
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Single t-quark production in high energy (gamma)e collisions
[DE92-644947] p 3572 N93-30930
Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990
Baryon number violation and particle collider experiments
[NIKHEF-H/92-14] p 3572 N93-31008

PARTICLE DIFFUSION
Theory of tokamak edge turbulence: Drift-thermal instability-induced turbulence and ionization-driven drift wave turbulence p 3586 N93-29123
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667
Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

PARTICLE INTERACTIONS
Spin observables in large t elastic N-N scattering
[DE93-009211] p 3564 N93-28549
Macrostatistical hydrodynamics
[DE93-012289] p 3417 N93-28751
Coupled-channel analysis of low energy nucleon-antinucleon interactions
[DE93-606115] p 3571 N93-30791
Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796
Low-energy behaviour of few-particle scattering amplitudes in two dimensions
[DE93-609834] p 3572 N93-30944

PARTICLE PRECIPITATION
Mithras studies of the boundary between open and closed field lines
[AD-A264758] p 3479 N93-30562

PARTICLE PRODUCTION
Meson-meson interactions and phi-enhancement in nucleus collisions
[DE93-010725] p 3565 N93-28831
Elementary particle interactions
[DE93-005113] p 3568 N93-29764
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
Parton's picture of the electroweak processes in high energy e(+)e(-)-collisions
[DE93-606107] p 3571 N93-30788
Single t-quark production in high energy (gamma)e collisions
[DE92-644947] p 3572 N93-30930

PARTICLE SIZE DISTRIBUTION
Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357

PARTICLE SPIN
Spin observables in large t elastic N-N scattering
[DE93-009211] p 3564 N93-28549

PARTICLE THEORY
A new exact solution to the classical equations of motion of the relativistic string with massive ends
[DE92-644736] p 3557 N93-30922
Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924
Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925

PARTICLE TRACKS
Interplanetary meteoroid debris in LDEF metal craters
p 3638 N93-29372
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488

PARTICLE TRAJECTORIES
Simulation and calculation of diffusive aerosol deposition
[DE93-007518] p 3474 N93-30506

PARTICULATE REINFORCED COMPOSITES
Design of interfaces in metal matrix composites
[AD-A262052] p 3296 N93-29001

PARTICULATES
Environmental Verification Experiment for the Explorer Platform (EVEEP) p 3266 N93-28726
Derivation of particulate directional information from analysis of elliptical impact craters on LDEF
p 3283 N93-29362

PARTITIONS (MATHEMATICS)
Optimized partitioning and balancing for parallel processing p 3365 N93-30280
Direct Monte Carlo simulation of the chemical equilibrium composition of detonation products
[DE92-040372] p 3315 N93-30447

PARTONS
Parton's picture of the electroweak processes in high energy e(+)e(-)-collisions
[DE93-606107] p 3571 N93-30788

PASSIVE SATELLITES
Spaceborne passive radiative cooler
p 3378 N93-28802

PASSIVITY
Fundamental aspects in the design of passive alloys
[DE93-009028] p 3320 N93-28545
Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002

PATHS
Walkway friction: Experiment and analysis
p 3293 N93-30966

PATTERN RECOGNITION
Recognizing parameterized objects from range data
[OUEL-1918/92] p 3523 N93-28486
Information-theoretic performance bounding of Bayesian identifiers
[DE93-010705] p 3554 N93-28763
A corner matching and tracking strategy applied to videophony
[OUEL-1933/92] p 3380 N93-28896
Multi-channel holographic birfurcative neural network system for real-time adaptive EOS data analysis
p 3614 N93-29231
Representation and recognition with invariants and geometric constraint models
[AD-A263235] p 3529 N93-29493
Clustering of tethered satellite system simulation data by an adaptive neuro-fuzzy algorithm
p 3512 N93-29535
The fusion of information via fuzzy integration
p 3517 N93-29568
Neural networks application to divergence-based passive ranging
[NASA-TM-103981] p 3245 N93-29653
Spatial Light Modulators (SLMs) surface quality
[AD-A263249] p 3579 N93-29656
Development of neural network architectures for self-organizing pattern recognition and robotics
[AD-A264831] p 3543 N93-29791
Mixed limit theorems for pattern analysis
[AD-A263735] p 3549 N93-29854
A neural network based approach for machine fault diagnosis
[VTT-TIED-1274] p 3543 N93-29998
Computing with neural maps: Application to perceptual and cognitive function
[AD-A264056] p 3499 N93-30033
Representations of shape in object recognition and long-term visual memory
[AD-A264342] p 3499 N93-30163
Feature segmentation using a multiple-stack based chain coding algorithm p 3359 N93-30243
A robust multi-operator 3-D edge detection approach for range image segmentation p 3366 N93-30288
Recognizing partially overlapping objects
p 3366 N93-30289
Cloud classification from satellite imagery using neural computing p 3367 N93-30297
Classification of radar clutter in an air traffic control environment p 3246 N93-30299
Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413
Qualitative methods in computer vision
[AD-A264335] p 3533 N93-30418
Multiresolution analysis of SAR data
[AD-A264727] p 3393 N93-30576
An algorithm for simple and complex feature detection: From retina to primary visual cortex
[AD-A264306] p 3497 N93-30897

PATTERN REGISTRATION
Recognizing parameterized objects from range data
[OUEL-1918/92] p 3523 N93-28486

PAVEMENTS
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103

PAYLOAD INTEGRATION
Space transportation analysis and design (Reissue A)
[AD-A262752] p 3271 N93-28487
Project UM-HAUL: A self-unloading reusable lunar lander p 3232 N93-29740

PAYLOAD RETRIEVAL (STS)
Retrievable payload carrier, next generation Long Duration Exposure Facility: Update 1992
p 3283 N93-29705

PAYLOADS
Multipurpose satellite bus (MPS) p 3232 N93-29743
Assessment of Columbus payload operations capabilities by scheduling with the MARS system
[ESA-STR-235] p 3281 N93-30106
Payload flight assignments. NASA mixed fleet
[NASA-TM-108255] p 3268 N93-30133
Aerospace payload design and development
[AD-A264502] p 3289 N93-30402

PEEK
Evaluation of polyaryl adhesives in elastomer-stainless steel joints
[DE93-009794] p 3329 N93-28551
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414
Consolidation of graphite thermoplastic textile preforms for primary aircraft structure p 3302 N93-30439
Delaminations in composite plates under impact loads
p 3304 N93-30849
Advanced fiber/matrix material systems
p 3305 N93-30854

PEGASUS AIR-LAUNCHED BOOSTER

Spacecraft and launch systems for TACSAT applications p 3284 N93-29904

PENETRATION

Lunar regolith penetrators and cutters p 3276 N93-29117

Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355

The effect of material strength on segment penetration behavior
[AD-A263262] p 3453 N93-29801

PERCEPTION

Cognitive and Neural Sciences Division 1992 programs
[AD-A263400] p 3654 N93-29258

PERFORMANCE PREDICTION

High performance dispersion model PHYSIC
[DE93-753303] p 3467 N93-28536

The identification of early warning signals prior to contractor default
[AD-A262828] p 3609 N93-29433

Flight mechanical model for performance calculations and interactions between flight vehicle and ramjet in regard to the flight orbit
[ESA-TT-1267] p 3248 N93-29464

SWAT system performance predictions
[AD-A262857] p 3579 N93-29470

Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 2: Evaluation of modeling and simulation techniques for predicting radiation induced performance decrements
[AD-A262872] p 3506 N93-29484

Predicting aircrew training performance with psychometric g
[AD-A264021] p 3498 N93-30026

A methodology and tool for the prediction of depth of reception in the sea for a VLF/LF communications system p 3397 N93-30741

PERFORMANCE TESTS

Time delay measurements of current primary FAA air/ground transmitters and receivers
[DOT/FAA/CT-TN93/14] p 3379 N93-28555

High octane ethers from synthesis gas-derived alcohols
[DE93-012470] p 3341 N93-28752

Transient tests on an MHD thruster
[DE93-008656] p 3587 N93-29299

Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424

Performance measurement systems: A best practices study
[AD-A262180] p 3506 N93-29444

Data Multiplexing Network (DMN) equipment Operational Test and Evaluation (OT&E) integration test report
[AD-A263172] p 3538 N93-29490

FDDI installation and performance analysis
[AD-A263263] p 3529 N93-29497

PERIODIC FUNCTIONS

Extracting infinite system properties from finite size clusters: Phase randomization/boundary condition averaging
[AD-A264712] p 3551 N93-30503

A remark on the invariant measure for the nonlinear Schroedinger equation
[DE93-609840] p 3552 N93-30946

PERIODIC VARIATIONS

Extracting infinite system properties from finite size clusters: Phase randomization/boundary condition averaging
[AD-A264712] p 3551 N93-30503

PERIPHERAL VISION

A simple computational model of center-surround receptive fields in the retina
[AD-A264723] p 3496 N93-30515

PERMAFROST

A field investigation of water and salt movement in permafrost and the active layer
[AD-A263706] p 3487 N93-29298

PERMANENT MAGNETS

Forces on a magnet moving past figure-eight coils
[DE93-009965] p 3561 N93-29189

PERMEABILITY

Gas permeability of E/EP semicrystalline diblock copolymers
[AD-A263241] p 3329 N93-28560

NASA in-step: Permeable membrane experiment p 3267 N93-28736

PERMEATING

Gas permeability of E/EP semicrystalline diblock copolymers
[AD-A263241] p 3329 N93-28560

PERMITTIVITY

Fast multipole method in simulations of aqueous systems
[AD-A263422] p 3567 N93-29336

PERSONAL COMPUTERS

Study on the concurrent calculation with a multitransputer network
[DE93-753191] p 3524 N93-28531

Prototype and short-run printed circuit board creation
[AD-A263245] p 3409 N93-29655

Low cost instrumentation: Parallel port analog to digital converter
[AD-A263468] p 3433 N93-30584

Software conception and structure of automated workstation for an experimental data processing
[DE93-609815] p 3623 N93-30994

PERSONALITY

Accident proneness: A research review
[DOT/FAA/AM-93/9] p 3498 N93-28622

PERSONALITY TESTS

Field test of a computer-driven tool to measure psychological characteristics of aircrew
[AD-A264484] p 3499 N93-30425

PERSONNEL

Technology transfer personnel exchange at the Boeing Company
[DE93-010190] p 3625 N93-29329

PERSONNEL DEVELOPMENT

Profiles of major federal literacy programs
[PB93-163863] p 3608 N93-30657

PERSONNEL MANAGEMENT

Determinants of performance rating accuracy: A field study
[AD-A264726] p 3500 N93-30575

PERTURBATION

Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303

Algorithms for point set congruence
[AD-A264016] p 3532 N93-29980

Study of effects of small perturbations on chaotic systems
[DE93-009762] p 3557 N93-30048

Vibration control of flexible space structures in noisy environment p 3285 N93-30235

Mithras studies of the boundary between open and closed field lines
[AD-A264758] p 3479 N93-30562

Non-perturbative calculation of equilibrium polarization of stored electron beams
[DE93-764500] p 3577 N93-30607

Transient (approximately equals 10 s) VLF amplitude and phase perturbations due to lightning-induced electron precipitation into the ionosphere (the Trimpi effect) p 3396 N93-30736

ELF propagation in deep and shallow sea water p 3397 N93-30739

PERTURBATION THEORY

Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446

The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials p 3343 N93-30063

Parton's picture of the electroweak processes in high energy e(+)e(-)-collisions
[DE93-606107] p 3571 N93-30788

PETN

A steric hindrance model for the crystal orientation dependence of the shock initiation sensitivity of PETN explosive
[LA-UR-92-1427] p 3345 N93-30074

Computational analysis of slip in PETN
[DE92-040222] p 3598 N93-30445

PETRI NETS

Resource utilization model for the algorithm to architecture mapping model
[NASA-CR-193122] p 3527 N93-29171

Performance analysis of communication protocols using D-timed Petri net p 3356 N93-30227

On analytical performance modelling of software for distributed systems p 3364 N93-30279

PETROLEUM PRODUCTS

Design issues of a reinforcement-based self-learning fuzzy controller for petrochemical process control p 3512 N93-29533

PHARMACOLOGY

Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502

Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures
[AD-A264179] p 3497 N93-30882

PHASE CHANGE MATERIALS

Thermal energy storage flight experiment in microgravity p 3265 N93-28720

PHASE CONJUGATION

SWAT system performance predictions
[AD-A262857] p 3579 N93-29470

Investigations of self-pumped phase conjugate laser beams and coherence length
[AD-A263438] p 3438 N93-29789

PHASE DEMODULATORS

Design and integration of high bit rate four phase monolithic demodulators and modulators at X band
[LAAS-92354] p 3414 N93-31030

PHASE ERROR

Effects of imbalances and DC offsets on I/Q demodulation
[AD-A264466] p 3393 N93-30537

Study of a VLF distributed antenna array p 3398 N93-30749

PHASE LOCKED SYSTEMS

Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084

Theoretical bit error rate performance of the Kalman filter excisor for FM interference
[AD-A263018] p 3383 N93-29407

A fuzzy control design case: The fuzzy PLL p 3515 N93-29555

High-power Ka-band amplifier p 3385 N93-29590

Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922

PHASE MODULATION

Spatial Light Modulators (SLMs) surface quality
[AD-A263249] p 3579 N93-29656

A systolic-array structure for MTCM receivers p 3357 N93-30236

Design and integration of high bit rate four phase monolithic demodulators and modulators at X band
[LAAS-92354] p 3414 N93-31030

PHASE SEPARATION (MATERIALS)

Phase separation, antiferromagnetism, and superconductivity in superconducting-superoxygenated La(2-x)Sr(x)CuO(4+(delta))
[DE93-009852] p 3598 N93-30517

PHASE SHIFT

Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084

PHASE SHIFT CIRCUITS

Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455

Modification of the S-band phase shifter model 331A-3 of Electromagnetic Sciences Inc.
[DIGEL-1992-5] p 3399 N93-30836

PHASE SHIFT KEYING

Optical coherent phase diversity systems
[ISBN-90-9004897-9] p 3578 N93-29270

Signal-to-noise ratio losses in full spectrum combining of signals with a downconverted subcarrier p 3386 N93-29599

An error control protocol based on trellis coded modulations p 3358 N93-30237

Comparison of diversity combining, interleaving, and decoding techniques of a scintillated channel p 3362 N93-30266

Temporal synchronization of frequency hopped DPSK p 3365 N93-30285

Signal processor based MSAT trellis coded M-DPSK with adaptive Doppler phasor correction p 3373 N93-30332

Two-stage Doppler phasor corrected TCM/DMPSK for shadowed mobile satellite channels p 3373 N93-30333

PHASE TRANSFORMATIONS

Thermodynamics of swelling and collapse of polyelectrolytic gels
[ETN-93-93485] p 3331 N93-29064

A Riemann problem for an elastic bar that changes phase
[AD-A262827] p 3452 N93-29432

Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445

Diffraction and holography with photoelectrons and Auger electrons: Some new directions
[DE93-007664] p 3313 N93-29766

Some effects of composition and microstructure on the B2 in equilibrium to DO3 ordered phase transition in Fe3Al alloys
[DE93-009724] p 3325 N93-29813

Rapidly activated dynamic phase transitions in nonlinear solids
[AD-A263601] p 3299 N93-29982

Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100

Improvement in ductility of the intermetallic compound Ti3Al
[ESA-TT-1276] p 3325 N93-30105
Sensitive detection of new superconductors created at ultra high pressures
[AD-A264340] p 3597 N93-30161
Phase transition studies in barium and strontium titanates at microwave frequencies p 3293 N93-30970
A dynamical model of structural phase transition in La2CuO4
[DE93-605325] p 3602 N93-31025

PHASE VELOCITY
Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084

PHASED ARRAYS
Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455
Tolerance theory of phased array antennas: A statistical approach p 3369 N93-30307
Adaptive airborne radar simulation with equalization filter taps
[AD-A264722] p 3393 N93-30514

PHENYLS
Physical chemical studies on molecular composite compositions
[AD-A264834] p 3339 N93-30898

PHOBOS
Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

PHONONS
Theory of normal and superconducting properties of fullerene-based solids
[DE93-007722] p 3592 N93-28582

PHOSPHAZENE
Water-soluble polyphosphazenes and their hydrogels
[AD-A264883] p 3340 N93-30909

PHOSPHORIC ACID
The use of quantum chemistry to estimate the performance and properties of explosives
[DE92-040369] p 3352 N93-30446
Dioxygen reduction in various acid electrolytes
[AD-A263564] p 3317 N93-30664

PHOSPHORUS COMPOUNDS
The use of quantum chemistry to estimate the performance and properties of explosives
[DE92-040369] p 3352 N93-30446

PHOTOACOUSTIC SPECTROSCOPY
The photodissociation and reaction dynamics of vibrationally excited molecules
[DE93-010896] p 3565 N93-28879
Pulsed laser photoacoustic spectrometer for study of solid materials
[DE93-605290] p 3441 N93-31023

PHOTOCATHODES
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101

PHOTOCHEMICAL REACTIONS
Membrane-based photochemical systems as models for photosynthetic cells
[DE93-009758] p 3310 N93-28911
Magnetic resonance studies of photo-induced electron transfer reactions
[DE93-012239] p 3311 N93-29182
NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068
Single-shot femtosecond spectroscopy: A methodology for observation of solid-state chemical reactions
p 3319 N93-30075
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101
Photo-desorption from copper alloys
[DE93-011872] p 3326 N93-30490

PHOTOCONDUCTORS
Uniaxially stressed Ge:Ga and Ge:Be
[DE93-010426] p 3594 N93-29150

PHOTODETACHMENT
The production and destruction of negative ions
[DE93-010527] p 3564 N93-28665
Partial cross sections in H(-) photodetachment
[DE93-011570] p 3569 N93-30130

PHOTODISSOCIATION
The photodissociation and reaction dynamics of vibrationally excited molecules
[DE93-010896] p 3565 N93-28879
Photodissociation of HBr/LiF(001): A quantum mechanical model
[NASA-CR-193119] p 3603 N93-28933
Femtosecond laser studies of excited state dynamics
[AD-A263708] p 3439 N93-29918
NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068
Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557

PHOTOELASTIC ANALYSIS
Design and implementation of an interactive isochromatic fringe-analysis system using machine-vision techniques p 3369 N93-30305

PHOTOELECTRIC EMISSION
Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642

PHOTOELECTRON SPECTROSCOPY
Laser spectroscopy of hydrocarbon radicals
[DE93-012555] p 3436 N93-28653
Energy spectra and photoelectron work function from YBa2Cu3O7 high-T(sub c) superconductor
[DE93-606329] p 3600 N93-30766

PHOTOELECTRONS
Laser spectroscopy of hydrocarbon radicals
[DE93-012555] p 3436 N93-28653
Diffraction and holography with photoelectrons and Auger electrons: Some new directions
[DE93-007664] p 3313 N93-29766
Defect density measurements in a shocked single crystal of ammonium perchlorate p 3319 N93-30093
A quality monitor and monitoring technique employing optically stimulated electron emission
[NASA-CASE-LAR-15063-1] p 3449 N93-30414
1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568
Energy spectra and photoelectron work function from YBa2Cu3O7 high-T(sub c) superconductor
[DE93-606329] p 3600 N93-30766

PHOTOEXCITATION
Uniaxially stressed Ge:Ga and Ge:Be
[DE93-010426] p 3594 N93-29150
Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101
Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501

PHOTOGRAPHIC EMULSIONS
The emulsion chamber technology experiment
p 3268 N93-28743

PHOTOGRAPHIC MEASUREMENT
Measurement of 1s2s(sup 3)S(sub 1)-1s2p(sup 3)P(sub 2,0) intervals in helium-like neon
[DE93-009243] p 3563 N93-28521

PHOTOGRAPHS
Digital image processing of descanned terrestrial ground photographs p 3459 N93-28928
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55
[NASA-TM-107559] p 3271 N93-29136
Image segmentation using fuzzy LVQ clustering networks p 3511 N93-29528
The Visible Human Project of the National Library of Medicine: Remote access and distribution of a multi-gigabyte data set p 3617 N93-30453

PHOTOGRAPHY
Flash x ray system: Techniques and applications
[DE93-011477] p 3430 N93-28645

PHOTOINTERPRETATION
Rejection of archival photographic objects as optical counterparts of gamma ray bursters
[MPE-PREPRINT-228] p 3631 N93-30642

PHOTOIONIZATION
Discharge of electrically charged clouds
[AD-A263212] p 3480 N93-28518
Polarization dependence of the ionization of helium and neon by 120 femtosecond pulses at 614 nm
[DE93-010514] p 3564 N93-28762

PHOTOLITHOGRAPHY
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

PHOTOLUMINESCENCE
Luminescence study of ion-implanted and MBE-grown Er-doped GaAs and Al(x)Ga(1-x)As
[AD-A262602] p 3591 N93-28471

PHOTOLYSIS
The photodissociation and reaction dynamics of vibrationally excited molecules
[DE93-010896] p 3565 N93-28879
Observation of reaction intermediates in crystalline RDX p 3318 N93-30067

PHOTON ABSORPTIOMETRY
The production and destruction of negative ions
[DE93-010527] p 3564 N93-28665

PHOTON BEAMS
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969

PHOTON-ELECTRON INTERACTION
Hard photon emission from high energy electrons and positrons in single crystals
[DE93-606328] p 3600 N93-30770
Single t-quark production in high energy (gamma)e collisions
[DE92-644947] p 3572 N93-30930

PHOTONICS
NSF Tokyo reports: Japanese R and D projects on micro- and nanofabrication and related basic research projects
[PB93-181261] p 3410 N93-29671
Ferroelectric liquid crystal optical interconnect switching systems
[AD-A263751] p 3596 N93-29859
Advanced microwave frequency sources and filters based on superconducting Photonic Band Gap (PBG) structures
[AD-A264404] p 3597 N93-30175

PHOTONS
Discharge of electrically charged clouds
[AD-A263212] p 3480 N93-28518
A unique photon bombardment system for space applications p 3286 N93-28790
NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068
Applications of the photorefractive effect and damage induced effects in fibers
[AD-A264339] p 3580 N93-30205
On the photonic chiral anomaly in an external gravitational field
[DE93-606082] p 3479 N93-30785
Single t-quark production in high energy (gamma)e collisions
[DE92-644947] p 3572 N93-30930

PHOTOPRODUCTION
Elementary particle interactions
[DE93-005113] p 3568 N93-29764

PHOTORECEPTORS
Photoreceptors regulating circadian behavior: A mouse model
[AD-A264881] p 3497 N93-30908

PHOTOSPHERE
The detection of low-degree solar gravity mode oscillations by differential radius observations, 1986-1987 p 3652 N93-28605
Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

PHOTOSYNTHESIS
Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase
[DE93-010081] p 3467 N93-28543
Membrane-based photochemical systems as models for photosynthetic cells
[DE93-009758] p 3310 N93-28911
Regulation of alternative CO2 fixation pathways in procaryotic and eucaryotic photosynthetic organisms
[DE93-012109] p 3491 N93-29181

PHOTOVOLTAIC CELLS
The Photovoltaic Array Space Power Plus diagnostics (PASP Plus) flight experiment p 3265 N93-28717
STRV1-b flight experiment p 3265 N93-28723
Measurements and Characterization Branch
[DE93-000094] p 3465 N93-30207
Technical examination and simulation of a photovoltaic system: Solar generator, battery, download
[ETN-93-94179] p 3466 N93-30573
Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609

PHOTOVOLTAIC CONVERSION
New III-V cell design approaches for very high efficiency
[DE93-000097] p 3464 N93-28971
Measurements and Characterization Branch
[DE93-000094] p 3465 N93-30207
Growth and development of GaInAsP for use in high-efficiency solar cells
[DE93-000098] p 3465 N93-30208

PHYSICAL CHEMISTRY
Use of statistics in computational chemistry
[AD-A264307] p 3315 N93-30365
The use of quantum chemistry to estimate the performance and properties of explosives
[DE92-040369] p 3352 N93-30446

PHYSICAL EXERCISE
Exercise/recreation facility for a lunar or Mars analog
p 3230 N93-29733
Beta-adrenergic blockade and lactate metabolism during exercise at high altitude
[AD-A263544] p 3495 N93-29820

PHYSICAL FACTORS
Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076
PHYSICAL WORK
Field trial of caffeine on physical performance at altitude: An attempt to overcome the challenge
[AD-A264260] p 3497 N93-30894
PHYSICS
JPRS report: Science and technology. Central Eurasia: Physics and mathematics
[JPRS-UPM-93-002] p 3560 N93-29022
PHYSIOLOGICAL EFFECTS
Evaluation of test methods and requirements for respiratory protection systems 21
[AD-A262466] p 3501 N93-28757
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471
Issues on human acceleration tolerance after long-duration space flights
[NASA-TM-104753] p 3495 N93-29651
Sonic boom problem for future highspeed aircraft
[ONERA-NT-1990-3] p 3241 N93-30020
The Environmental Symptoms Questionnaire (ESQ): Development and application
[AD-A264127] p 3495 N93-30196
Acquisition of physiological data during G-induced Loss of Consciousness (G-LOC)
[AD-A264492] p 3496 N93-30400
Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures
[AD-A264179] p 3497 N93-30882
PHYSIOLOGICAL FACTORS
Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502
PHYSIOLOGICAL RESPONSES
State of the art: Ecological biomarkers
[DE93-006621] p 3469 N93-28992
Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502
Beta-adrenergic blockade and lactate metabolism during exercise at high altitude
[AD-A263544] p 3495 N93-29820
PHYSIOLOGICAL TESTS
Pilot Candidate Selection Method (PCSM): What makes it work?
[AD-A262871] p 3498 N93-29481
PHYSIOLOGY
Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A263240] p 3494 N93-29620
PHYTOTRONS
Growing wheat to maturity in reduced gas pressures
[NASA-CR-193245] p 3491 N93-29216
PICOSECOND PULSES
Response of a Nb/Al2O3/Nb tunnel junction to picosecond electrical pulses
[DE93-010416] p 3594 N93-29249
PICTURE TUBES
Computer-controlled alignment for a 2000-line color monitor p 3247 N93-30324
PIEZOELECTRIC CERAMICS
Materials for adaptive structural acoustic control, volume 1
[AD-A264619] p 3562 N93-30121
Materials for adaptive structural acoustic control, volume 2
[AD-A264620] p 3563 N93-30385
PIEZOELECTRICITY
Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films
[AD-A263664] p 3594 N93-29293
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics
[AD-A263427] p 3332 N93-29337
PILOT ERROR
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
PILOT PERFORMANCE
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing
p 3501 N93-28853
A new class of mission support for combat air-crew
p 3501 N93-28854
Pilot intent and error recognition as part of a knowledge based cockpit assistant p 3502 N93-28855
The design and development of the new RAF standard HUD format p 3502 N93-28856
Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1
p 3502 N93-28857
The quest for an integrated flying helmet
p 3502 N93-28860
The physiological limitations of man in the high G environment p 3503 N93-28861
Oculo-motor responses and virtual image displays
p 3503 N93-28862
Human capabilities and limitations in situation awareness p 3503 N93-28863
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 2: Evaluation of modeling and simulation techniques for predicting radiation induced performance decrements
[AD-A262872] p 3506 N93-29484
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information
[AD-A263874] p 3507 N93-29888
Field test of a computer-driven tool to measure psychological characteristics of aircrew
[AD-A264484] p 3499 N93-30425
The effects of superimposing symbology on a simulated night vision goggle display
[AD-A263458] p 3508 N93-30590
Training effectiveness assessment: Methodological problems and issues p 3237 N93-30684
PILOT SELECTION
Pilot Candidate Selection Method (PCSM): What makes it work?
[AD-A262871] p 3498 N93-29481
PILOT TRAINING
Predicting aircrew training performance with psychometric g
[AD-A264021] p 3498 N93-30026
Part 1: Executive summary p 3236 N93-30674
Helicopter simulator standards p 3236 N93-30675
Helicopter simulation: An aircrew training and qualification perspective p 3236 N93-30676
Simulators for corporate pilot training and evaluation
p 3236 N93-30678
Training effectiveness assessment: Where are we?
p 3236 N93-30679
Current training: Where are we? p 3236 N93-30680
Helicopter simulator qualification
p 3237 N93-30681
Helicopter simulation: Making it work
p 3237 N93-30682
Helicopter training simulators: Key market factors
p 3237 N93-30683
Training effectiveness assessment: Methodological problems and issues p 3237 N93-30684
Determining the transferability of flight simulator data
p 3237 N93-30685
Progress through precedent: Going where no helicopter simulator has gone before p 3237 N93-30686
Transfer of training and simulator qualification or myth and folklore in helicopter simulation
p 3237 N93-30687
PILOTLESS AIRCRAFT
Development and testing of the Perseus proof-of-concept aircraft
[DE93-010121] p 3247 N93-28586
A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle
[AD-A262477] p 3248 N93-29409
PILOTS (PERSONNEL)
An analysis of en route controller-pilot voice communications
[AD-A264784] p 3394 N93-30611
PINEAL GLAND
The Gordon Research Conference on Pineal Cell Biology
[AD-A264840] p 3497 N93-30904
PINHOLE CAMERAS
Refinements on the pinhole camera measurements of the LDEF attitude p 3283 N93-29622
PIONEER VENUS SPACECRAFT
Precise tracking of the Magellan and Pioneer Venus orbiters by Same-Beam Interferometry. Part 2: Orbit determination analysis p 3270 N93-29589
PIONS
Pion pair production in photon-photon collisions
[DE93-606114] p 3571 N93-30790
PIPE FLOW
Prediction of gas-liquid two-phase flow regime in microgravity
[NASA-TM-106274] p 3352 N93-30939
PIPELINES
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Power generation and transportation systems research department
[PB93-178309] p 3352 N93-30663
PIPES (TUBES)
Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Valve malfunction detection apparatus
[NASA-CASE-MFS-29904-1] p 3432 N93-29503
Examination of formability to seamless tubes on Ni-Cr-W superalloy
[DE93-764158] p 3326 N93-30396
PIPETTES
Micropipet manipulation of lipid membranes: Direct measurement of the material properties of a cohesive structure that is only two molecules thick
p 3291 N93-30953
PISTON ENGINES
Small Stirling dynamic isotope power system for robotic space missions
[NASA-TM-105785] p 3287 N93-28686
PITCH (INCLINATION)
Wind loads on canopy roofs
[RR-CE132] p 3451 N93-29106
PITCHING MOMENTS
Evaluation of four advanced nozzle concepts for short takeoff and landing performance
[NASA-TP-3314] p 3239 N93-29165
Aerodynamic characteristics of a rotorcraft airfoil designed for the tip region of a main rotor blade
[NASA-TM-4264] p 3240 N93-29450
Construction, wind tunnel testing and data analysis for a 1/5 scale ultra-light wing model p 3243 N93-29778
PIXELS
Radiometric calibration system for IR cameras
[DE93-009237] p 3430 N93-28520
Design of a pixel cell optimized for a data push architecture readout
[DE93-011016] p 3616 N93-30122
Feature segmentation using a multiple-stack based chain coding algorithm p 3359 N93-30243
PLANAR STRUCTURES
Planar microstrip YAGI antenna array
[NASA-CASE-NPO-17873-2-CU] p 3384 N93-29507
Nonlinear attitude control of planar structures in space using only internal controls p 3280 N93-29991
PLANCKS CONSTANT
Planck scale effects in neutrino physics
[DE93-606133] p 3571 N93-30793
Formulation of wave mechanics without the Planck constant h/2 pi
[DE93-604083] p 3608 N93-30987
PLANE STRAIN
Bainitic stabilization of austenite in low alloy steels
[DE93-008275] p 3321 N93-28957
PLANE WAVES
The wave, the cylinder, and the plate
[DE93-009458] p 3450 N93-28596
Performance analysis of subspace methods
[AD-A263984] p 3530 N93-29865
Application of integral and differential equation methods for various EM interaction problems
[AD-A264821] p 3394 N93-30597
A tight binding model for the electronic structure of FCC and SC C60
[DE93-606214] p 3601 N93-30794
PLANETARY ATMOSPHERES
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
Rugged, no-moving-parts windspeed and static pressure probe designs for measurements in planetary atmospheres p 3434 N93-28767
Remote measurement of planetary magnetic fields by the Hanle effect p 3645 N93-28793
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798
PLANETARY BASES
Single-stage Mars mission p 3232 N93-29742
Mars habitat p 3233 N93-29747
PLANETARY COMPOSITION
Thermal Analyzer for Planetary Soil (TAPS): An in situ instrument for mineral and volatile-element measurements p 3643 N93-28782
An integrated XRF/XRD instrument for Mars exobiology and geology experiments p 3645 N93-28792
Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799
A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800
Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805
Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807

Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812
A team approach to the development of gamma ray and x ray remote sensing and in situ spectroscopy for planetary exploration missions p 3650 N93-28824

PLANETARY CORES
Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777

PLANETARY ENVIRONMENTS
Thermal Analyzer for Planetary Soil (TAPS): An in situ instrument for mineral and volatile-element measurements p 3643 N93-28782
Lightweight modular instrumentation for planetary applications p 3286 N93-28787

PLANETARY GEOLOGY
An integrated XRF/XRD instrument for Mars exobiology and geology experiments p 3645 N93-28792
Optimism experiment and development of space-qualified seismometers in France
p 3646 N93-28796
Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799
A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800
Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

PLANETARY IONOSPHERES
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809

PLANETARY MAGNETIC FIELDS
Remote measurement of planetary magnetic fields by the Hanle effect p 3645 N93-28793
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809

PLANETARY MAGNETOSPHERES
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809

PLANETARY MANTLES
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819

PLANETARY MAPPING
Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779
Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780
Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807

PLANETARY RINGS
On symmetric central configurations with application to satellite motion about rings p 3652 N93-31000

PLANETARY STRUCTURE
Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819
Design optimization of space structures
p 3278 N93-29122

PLANETARY SURFACES
Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780
Thermal Analyzer for Planetary Soil (TAPS): An in situ instrument for mineral and volatile-element measurements p 3643 N93-28782
Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799
Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801

PLANETARY SYSTEMS
Detection of other planetary systems using photometry p 3632 N93-28791

PLANETOLOGY
Workshop on Advanced Technologies for Planetary Instruments, part 1
[NASA-CR-193015] p 3639 N93-28764

PLANNING
Natural language generation
[AD-A262578] p 3524 N93-28579

PLASMA ACCELERATION
Elemental compositions of high-energy ions produced by magnetosonic waves in quiescent plasmas
[DE93-753241] p 3588 N93-29434
Ion ring distribution produced by a magnetosonic wave
[DE93-754311] p 3590 N93-30533

PLASMA CLOUDS
USU center of excellence in theory and analysis of the geo-plasma environment
[AD-A264750] p 3590 N93-30585

PLASMA CONTROL
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532
Self-organized profile relaxation by ion temperature gradient instability in toroidal plasmas
[DE93-009580] p 3585 N93-28910
Electron cyclotron heating and current drive in toroidal geometry
[DE93-010400] p 3586 N93-29049
Computing for magnetic fusion energy research: An updated vision
[DE93-010394] p 3587 N93-29190
Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303
Modeling the D3-D plasma boundary with the LEDGE code
[DE93-009301] p 3588 N93-29772
Fundamental studies of fusion plasmas
[DE93-013144] p 3589 N93-30189
Experimental MHD stability limit in the gas-dynamic trap
[DE93-606218] p 3591 N93-30780
Plasma diffusion through multidipole magnetic fields
[DE93-608548] p 3591 N93-31007

PLASMA CURRENTS
Solar flare MDH
[AD-A262275] p 3652 N93-28756
The fluctuation induced Hall effect
[DE93-010130] p 3585 N93-28912
Bootstrap current profiles and scaling in large aspect ratio tokamaks
[DE93-753158] p 3589 N93-30003

PLASMA DENSITY
Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers
[DE93-008706] p 3586 N93-29093
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334
High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606
Measurements of the energy spectrum of an intense microsecond relativistic electron beam in the beam-plasma experiments using a multi-foil analyzer
[DE93-606271] p 3590 N93-30768

PLASMA DIAGNOSTICS
Plasma diagnostics by antenna impedance measurements p 3400 N93-28820
Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers
[DE93-008706] p 3586 N93-29093
Modeling the D3-D plasma boundary with the LEDGE code
[DE93-009301] p 3588 N93-29772
A new multichannel soft x ray framing camera for fusion experiments
[DE93-009302] p 3432 N93-29773
Operation of a 20-channel grating polychromator diagnostic system and its application to sawtooth observations in JT-60U
[DE93-764388] p 3590 N93-30398

PLASMA DIFFUSION
Plasma diffusion through multidipole magnetic fields
[DE93-608548] p 3591 N93-31007

PLASMA DYNAMICS
Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099

PLASMA ELECTRODES
Engineering consideration for the self-energizing magnetoplasmadynamic (MPD): Type fusion plasma thruster
[AD-A262785] p 3288 N93-29289

PLASMA FOCUS
Engineering consideration for the self-energizing magnetoplasmadynamic (MPD): Type fusion plasma thruster
[AD-A262785] p 3288 N93-29289

PLASMA GENERATORS
High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606

PLASMA HEATING
Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533
Development of high power microwave source
[DE93-753316] p 3436 N93-28980
Electron cyclotron heating and current drive in toroidal geometry
[DE93-010400] p 3586 N93-29049
Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303
Fundamental studies of fusion plasmas
[DE93-013144] p 3589 N93-30189
High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606

PLASMA INTERACTION EXPERIMENT
Transfer Orbit Plasma Interaction Experiment (TROPIX) p 3267 N93-28734

PLASMA INTERACTIONS
Transfer Orbit Plasma Interaction Experiment (TROPIX) p 3267 N93-28734
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092

PLASMA JETS
Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158
Plasma/particle interaction in subsonic argon/helium thermal plasma jets
[DE93-010808] p 3589 N93-30181

PLASMA OSCILLATIONS
The fluctuation induced Hall effect
[DE93-010130] p 3585 N93-28912

PLASMA PHYSICS
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532
Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533
New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583
JPRS report: Science and technology. Central Eurasia: Physics and mathematics
[JPRS-UPM-93-002] p 3560 N93-29022
A survey of problems in divertor and edge plasma theory
[DE93-007531] p 3586 N93-29056
Novel methods of acceleration
[AD-A264828] p 3590 N93-30600
Plasma Physics Network Newsletter, no. 5
[DE93-606216] p 3591 N93-30795

PLASMA PROPULSION
Engineering consideration for the self-energizing magnetoplasmadynamic (MPD): Type fusion plasma thruster
[AD-A262785] p 3288 N93-29289

PLASMA RADIATION
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099

PLASMA SHEATHS
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334

PLASMA SPRAYING
Plasma/particle interaction in subsonic argon/helium thermal plasma jets
[DE93-010808] p 3589 N93-30181
Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 3338 N93-30565

PLASMA TEMPERATURE
Self-organized profile relaxation by ion temperature gradient instability in toroidal plasmas
[DE93-009580] p 3585 N93-28910
Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers
[DE93-008706] p 3586 N93-29093

PLASMA TURBULENCE
Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749

PLASMA WAVES
Observation of a beam energy shift caused by a plasma wakefield
[DE93-753243] p 3583 N93-28533
A Fokker-Planck operator for the emission and absorption of electron plasma waves in a magnetized plasma
[DE93-009579] p 3584 N93-28598
A novel approach for new radiation sources based on solid state plasma instabilities
[AD-A263699] p 3588 N93-29382

Elemental compositions of high-energy ions produced by magnetosonic waves in quiescent plasmas
[DE93-753241] p 3588 N93-29434

PLASMA-PARTICLE INTERACTIONS

Plasma/particle interaction in subsonic argon/helium thermal plasma jets
[DE93-010808] p 3589 N93-30181

PLASMAS (PHYSICS)

Moment approach to fast ion neoclassical transport and viscous forces
[DE93-753305] p 3585 N93-28979

Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099

Elemental compositions of high-energy ions produced by magnetosonic waves in quiescent plasmas
[DE93-753241] p 3588 N93-29434

Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765

Measurement of work function of a plasma grid in a cesium seeded negative ion source
[DE93-764153] p 3589 N93-30190

High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606

Plasma Physics Network Newsletter, no. 5
[DE93-606216] p 3591 N93-30795

PLASTIC COATINGS

Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561

PLASTIC DEFORMATION

Deformation mechanisms in Be(sub 12)X compounds
[DE93-009080] p 3320 N93-28548

Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863

Plastic deformation behaviour of oxide dispersion strengthened titanium alloys
[ONERA-NT-1990-6] p 3326 N93-30138

Computational analysis of slip in PETN
[DE92-040222] p 3598 N93-30445

PLASTIC PROPELLANTS

A simple model for explosives formulation
[DE93-010703] p 3341 N93-29251

PLASTIC PROPERTIES

Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159

A continuum code investigation of stress integration using exact and approximate material rotation
[DE93-001892] p 3454 N93-31013

PLASTICS

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 2
[AD-A263814] p 3335 N93-29881

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 1
[AD-A263813] p 3335 N93-29886

Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 3447 N93-30567

PLATELETS

Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A263240] p 3494 N93-29620

PLATES (STRUCTURAL MEMBERS)

Comparison of impact results for several polymeric composites over a wide range of low impact velocities
p 3304 N93-30848

Delaminations in composite plates under impact loads
p 3304 N93-30849

PLATING

Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669

PLATINUM

In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331

Platinum-modified diffusion aluminide coatings on nickel-base superalloys
[AD-A263597] p 3325 N93-29981

Applications of transition metal compounds in the preparation of useful silicon-containing ceramics
[AD-A264028] p 3335 N93-30028

Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501

Dioxygen reduction in various acid electrolytes
[AD-A263564] p 3317 N93-30664

PLOTTING

XRONOS: A timing analysis software package. User's guide, version 3.00
[NASA-TM-109222] p 3532 N93-30023

PLUG NOZZLES

Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068

PLUMES

Return flux experiment p 3266 N93-28727

The Ultraviolet Plume Instrument (UVPI)
p 3285 N93-28784

The +vbar breakout during approach to Space Station Freedom
[NASA-TM-104772] p 3269 N93-30135

PLUTO (PLANET)

Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799

Pluto fast flyby mission and science overview
p 3649 N93-28818

PLUTONIUM

Polymeric materials for use in wet hydrochloric acid environments
[DE93-010881] p 3330 N93-28600

PLY ORIENTATION

Composite laminate stiffnesses and their sensitivities
[DLR-FB-92-16] p 3296 N93-29007

PNEUMATIC EQUIPMENT

Advanced coordinate measuring machine at Sandia National Laboratories
[DE93-010618] p 3432 N93-29842

POINCARE PROBLEM

Positive energy representations of the conformal quantum algebra
[DE93-606064] p 3551 N93-30809

Regular and chaotic motion of two dimensional electrons in a strong magnetic field
[DE93-604091] p 3607 N93-30933

POINT SPREAD FUNCTIONS

Semi-blind restoration of images distorted by random time varying point spread functions
p 3375 N93-30344

POISSON EQUATION

Scaling properties of localized quantum chaos
[DE93-606031] p 3606 N93-30803

POISSON RATIO

Enhanced noncontacting laser extensometer for biaxial strain measurements
[AD-A263170] p 3430 N93-28989

POLAR CAP ABSORPTION

ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744

Performance statistics bulletin. High latitude meteor scatter propagation, May, June, July 1989
[AD-A264003] p 3399 N93-30757

POLAR CAPS

Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805

Electrodynamics of the dayside cleft region based on ground observations at Svalbard
[AD-A263571] p 3477 N93-29831

POLAR CUSPS

The dynamic cusp at low altitudes: A case study combining Viking, DMSP, and Sondrestrom incoherent scatter radar observations
[NASA-CR-193152] p 3476 N93-28842

POLAR REGIONS

NOAA satellite programs and technology requirements
p 3627 N93-30710

ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744

POLARIMETERS

Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303

Polarization experiments with hadronic and electromagnetic probes
[DE93-011375] p 3392 N93-30126

POLARIMETRY

Polarimetric multispectral imaging technology
p 3434 N93-28774

The MAESTRO-1 campaign: Analyses of polarimetric SAR data of agricultural fields and forests
[BCRS-92-06] p 3460 N93-29320

Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

POLARITY

Transient tests on an MHD thruster
[DE93-008656] p 3587 N93-29299

POLARIZATION

Non-perturbative calculation of equilibrium polarization of stored electron beams
[DE93-764500] p 3577 N93-30607

POLARIZATION (CHARGE SEPARATION)

Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096

Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711

Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501

Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569

Charge separation in bipolar transistors
[DE93-009624] p 3413 N93-30650

POLARIZATION (SPIN ALIGNMENT)

A high field optical-pumping spin-exchange polarized deuterium source
[DE93-009208] p 3574 N93-28970

POLARIZATION (WAVES)

Polarization experiments with hadronic and electromagnetic probes
[DE93-011375] p 3392 N93-30126

POLARIZED LIGHT

A compact imaging detector of polarization and spectral content p 3582 N93-28810

Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372

POLARIZED RADIATION

Theoretical-experimental study of the non-thermal effects of the polarized laser radiation in living tissues
[DE93-607212] p 3441 N93-30775

POLARIZERS

Rib arrow integrated optic polarizer
p 3357 N93-30231

POLAROGRAPHY

Analytical applications of electrified interfaces between two immiscible solutions
[AD-A263085] p 3311 N93-29132

POLARONS

Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501

Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569

POLICIES

The 9th FLICC Forum on Federal Information Policies
[PB93-184687] p 3624 N93-29668

The 1992 World Administrative Radio Conference: Technology and Policy Implications
[OTA-TCT-549] p 3392 N93-30150

Profiles of major federal literacy programs
[PB93-163863] p 3608 N93-30657

White House/OSTP perspective p 3625 N93-30696

Filling the gaps: An overview of data on education in grades K through 12
[PB93-176550] p 3608 N93-30821

Guide to Federal Water Quality Programs and Information: A Guide with Computer Software Developed by the Interagency Working Group on Water Quality
[PB93-186245] p 3475 N93-30834

POLLUTION

Planning and progress of EPA's pollution prevention research program
[PB93-185767] p 3475 N93-30831

POLLUTION CONTROL

Using a neural network to estimate solvent consumption
[PB93-173110] p 3467 N93-28873

Global warming issue and global economic model
[DE93-781334] p 3468 N93-28881

Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1
[PB93-173797] p 3468 N93-28899

Building alliances to restore coastal environments: A coastal America progress report
[PB93-169464] p 3470 N93-29674

Multi-Attribute Decision Theory methodology for pollution control measure analysis
[DE93-005444] p 3472 N93-30008

Pollution prevention: A regulatory update
[DE93-009727] p 3472 N93-30180

Planning and progress of EPA's pollution prevention research program
[PB93-185767] p 3475 N93-30831

POLLUTION MONITORING

Summer 1990 Atlanta ozone precursor study (January 1993)
[PB93-167203] p 3470 N93-29200

POLLUTION TRANSPORT
Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399
Study to determine the nature and extent of ozone and ozone precursor transport in selected areas of California
[PB93-184828] p 3470 N93-29669
Annual report on monitoring of the unsaturated zone and recharge areas at INEL to the state of Idaho INLEL oversight committee
[DE93-012947] p 3473 N93-30187
IOC-UNEP review meeting on oceanographic processes of transport and distribution of pollutants in the sea
[DE93-605070] p 3490 N93-31019

POLYAMIDE RESINS
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene
[NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506

POLYATOMIC GASES
Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions
[NASA-CR-193223] p 3604 N93-29168

POLYATOMIC MOLECULES
Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446

POLYCARBOSILANES
Catalytic synthesis of silicon carbide preceramic polymers: Polycarbosilanes
[DE93-008634] p 3329 N93-28541

POLYCRYSTALS
Transformation toughening
[DE93-011805] p 3321 N93-28631
Growth, characterization and device development in monocrystalline diamond films
[AD-A263204] p 3593 N93-28874
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863
Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159
Measurement of magnetic field penetration depth in niobium polycrystalline films by polarized neutron reflection method
[DE93-606390] p 3600 N93-30771
Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g)
[AD-A264297] p 3601 N93-30819
Silicon Film(trademark) photovoltaic manufacturing technology
[DE93-010008] p 3466 N93-30891
Tensile creep behavior of polycrystalline alumina fibers
[NASA-TM-106269] p 3340 N93-30938

POLYETHYLENES
Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839
Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964

POLYGONS
Polygonal approximation overviews and perspectives
[INRIA-RR-1621] p 3547 N93-28513

POLYIMIDES
Polyimides prepared from 3,5-diamino benzo trifluoride
[NASA-CASE-LAR-14206-1] p 3331 N93-29083
Diphenylmethane-containing dianhydride and polyimides prepared therefrom
[NASA-CASE-LAR-14487-1] p 3331 N93-29085
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene
[NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506
Advanced fiber/matrix material systems
p 3305 N93-30854

POLYMER CHEMISTRY
Catalytic synthesis of silicon carbide preceramic polymers: Polycarbosilanes
[DE93-008634] p 3329 N93-28541
Diphenylmethane-containing dianhydride and polyimides prepared therefrom
[NASA-CASE-LAR-14487-1] p 3331 N93-29085
Novel polymer compositions for high-temperature membrane applications, phase 1
[PB93-174126] p 3331 N93-29201
Synthesis and polymerization of azaethylenes and aza-1,3-dienes
[AD-A263651] p 3332 N93-29290
Polymers with electrical and nonlinear optical properties
[AD-D015691] p 3333 N93-29457
Chromatographic and solvatochromic measurements on butyl rubbers
[AD-A263088] p 3334 N93-29795
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825
Synthesis of chiral molybdenum ROMP initiators and all-cis highly tactic Poly-2,3-R2Norbornadiene (R = CF3 or CO2Me)
[AD-A264133] p 3336 N93-30169
Conjugated substituted ionic polyacetylenes
[AD-A264702] p 3337 N93-30497
Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596

POLYMER MATRIX COMPOSITES
Probabilistic simulation of multi-scale composite behavior
[NASA-TM-106196] p 3451 N93-28633
Aligned, short-fiber composites by novel flow processing methods
[DE93-008701] p 3296 N93-28904
Effects of freeze/thaw cycles on hydrostatically conditioned E-glass/J-2 composite
[AD-A262980] p 3298 N93-29425
SESAME equation of state number 8010: Boron loaded silicone potting material
[DE93-012083] p 3300 N93-30395
Wetting and dispersion in ceramic/polymer melt injection molding systems
[DE93-013240] p 3338 N93-30601
Studies of fiber-matrix adhesion on compression strength p 3304 N93-30846

POLYMERIC FILMS
A simple model for explosives formulation
[DE93-010703] p 3341 N93-29251
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method
[ONERA-P-1990-4] p 3335 N93-30024

POLYMERIZATION
Polyimides prepared from 3,5-diamino benzo trifluoride
[NASA-CASE-LAR-14206-1] p 3331 N93-29083
Synthesis and polymerization of azaethylenes and aza-1,3-dienes
[AD-A263651] p 3332 N93-29290
Synthesis of chiral molybdenum ROMP initiators and all-cis highly tactic Poly-2,3-R2Norbornadiene (R = CF3 or CO2Me)
[AD-A264133] p 3336 N93-30169
Conjugated substituted ionic polyacetylenes
[AD-A264702] p 3337 N93-30497
Optically switchable conductive polymers
[AD-A264751] p 3337 N93-30557
Carborane-(siloxane or silane)-unsaturated hydrocarbon based polymers
[AD-D015717] p 3338 N93-30586
Conjugated polymers from cyclohexadienediol monomers
[AD-A264837] p 3340 N93-30900
Water-soluble polyphosphazenes and their hydrogels
[AD-A264883] p 3340 N93-30909

POLYMERS
Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer
[AD-A262189] p 3329 N93-28489
In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques
[DE93-007699] p 3405 N93-28581
Polymeric materials for use in wet hydrochloric acid environments
[DE93-010881] p 3330 N93-28600
Novel polymer compositions for high-temperature membrane applications, phase 1
[PB93-174126] p 3331 N93-29201
Results of a round robin test program: Complex modulus properties of a polymeric damping material
[AD-A263619] p 3332 N93-29344
An extension of a kinetic theory of polymer crystallization through the exclusion of negative barriers
[AD-A264810] p 3334 N93-29660
Molecular dynamics of physical aging processes in polymer glasses
[AD-A263737] p 3334 N93-29856
The swollen polymer technique and its use for heat transfer investigations on film cooled surfaces
p 3255 N93-29944
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007
Conjugated substituted ionic polyacetylenes
[AD-A264702] p 3337 N93-30497
A 69 cent look at thermoplastic softening
p 3292 N93-30963
Experiments in materials science from household items p 3293 N93-30971

POLYMETHYL METHACRYLATE
Polar order and relaxation of second order nonlinear optical susceptibility in an electric field polarized amorphous polymer
[AD-A262189] p 3329 N93-28489
Isothermal annealing and relaxation of the second harmonic generation signal from a nonlinear optical polymer
[AD-A262007] p 3333 N93-29442
Characterization of slow chromophore reorientation in nonlinear optical polymers by two-dimensional MAS NMR
[AD-A264809] p 3338 N93-30596

POLYMORPHISM
Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100

POLYNOMIALS
Three-D crater analysis of LDEF impact features from stereo imagery p 3283 N93-29359
Polynomial space polynomial delay algorithms for listing families of graphs
[DE93-010677] p 3530 N93-29808
Effect of design selection on response surface performance
[NASA-CR-4520] p 3249 N93-29885
Approximation formulae for functional integrals in P(phi)2-quantum field theory
[DE93-606067] p 3605 N93-30781

POLYPHENYLS
Materials studies for preventing corrosion in condensing environments
[PB93-185478] p 3327 N93-30815

POLYTOPES
Packing odd paths
[CWI-BS-R9207] p 3549 N93-29849

POLYURETHANE FOAM
Hydrostatic and uniaxial behavior of a high density polyurethane foam (FR-3720) at various temperatures
[DE93-011486] p 3330 N93-28838
Generation of carbon monoxide in compartment fires
[PB93-146702] p 3244 N93-29211
Mitigation of shock waves in a cylindrical tunnel by foam
[AD-A262491] p 3423 N93-29419

POLYURETHANE RESINS
Hydrostatic and uniaxial behavior of a high density polyurethane foam (FR-3720) at various temperatures
[DE93-011486] p 3330 N93-28838

PONDEROMOTIVE FORCES
Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532

POPULATION INVERSION
Inner-shell photo-ionized x ray laser schemes
[DE93-009285] p 3438 N93-29309

POPULATIONS
The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672
Further analysis of LDEF FRECOPA micrometeoroid remnants p 3638 N93-29360
Origin of orbital debris impacts on LDEF's trailing surfaces p 3283 N93-29373

POROSITY
Healing of lithographically introduced flaws in glass and glass containing ceramics
[DE93-010453] p 3330 N93-28761
Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g)
[AD-A264297] p 3601 N93-30819
Ultrasonic detection and identification of fabrication defects in composites p 3305 N93-30856

POROUS MATERIALS
Method for preparation of a microporous structure with layered interstitial surface treatment
[NASA-CASE-MSC-21487-2] p 3296 N93-29023
Velocity measurements of low Reynolds number tube flow using fiber-optic technology
[DE93-009865] p 3422 N93-29335
Hydrodynamic interactions among fibers in high efficiency filters
[DE93-007117] p 3424 N93-30035
Surface chemistry of hydrogen-passivated porous silicon-oxidation of surface Si-H groups by acetone
[AD-A264655] p 3315 N93-30526
Ordered molecular arrays as templates: A new approach to synthesis of mesoporous materials
[AD-A264631] p 3570 N93-30540

PORTABLE EQUIPMENT
A portable modular architecture for robotic manipulator control
[DE93-010819] p 3444 N93-29254
Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics
[DE93-009827] p 3433 N93-30510
POSITION (LOCATION)
Smart skin structures for identifying and locating laser irradiation
[DE93-005464] p 3436 N93-28887
POSITION ERRORS
Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction
[NASA-CR-188249] p 3634 N93-29042
Adaptive motion control of mobile robots
p 3545 N93-30903
POSITION INDICATORS
Robot arm with positional absolute encoded joints
p 3370 N93-30312
POSITION SENSING
An auto-guiding system for mid-sized telescopes
p 3375 N93-30340
POSITIONING
Lunar crane system p 3277 N93-29118
Lunar rovers and local positioning system
p 3277 N93-29119
Vision-based control of holonomic robots for 3-dimensional rigid-body positioning using camera-space manipulation p 3578 N93-29178
System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468
POSITRON ANNIHILATION
Defect studies in low-temperature-grown GaAs
[DE93-010405] p 3595 N93-29417
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars
[NASA-CR-193243] p 3635 N93-30053
Towards the results of global analysis of data on nucleon electromagnetic structure
[DE93-606125] p 3571 N93-30792
POSITRONS
Molecular dynamics of physical aging processes in polymer glasses
[AD-A263737] p 3334 N93-29856
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488
Non-perturbative calculation of equilibrium polarization of stored electron beams
[DE93-764500] p 3577 N93-30607
Unitary approximation of Bhabha diffusion by high energies and its implementation in Monte Carlo event generators
[ETN-93-93622] p 3571 N93-30670
POSTFLIGHT ANALYSIS
SPREE Interactive Data Analysis Tool (SIDAT)
[AD-A262782] p 3273 N93-29306
Overview of the Systems Special Investigation Group investigation p 3318 N93-29683
The effect of the low Earth orbit environment on space solar cells: Results of the Advanced Photovoltaic Experiment (S0014) p 3467 N93-29686
New results from FRECOPA analysis
p 3448 N93-29688
LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690
In orbit degradation of EUV optical components in the wavelength range 10-40 nm AO 138-3
p 3582 N93-29691
Ruled and holographic experiment (AO 138-5)
p 3434 N93-29696
Radiation and temperature effects on LDEF fiber optic samples p 3583 N93-29700
Long Duration Exposure Facility (LDEF) low temperature Heat Pipe Experiment Package (HEPP) flight results
p 3429 N93-29701
Next generation optical instruments and space experiment based on the LDEF thermal control surfaces experiment (S0069) p 3583 N93-29706
Postflight hardware evaluation 360T025 (RSRM-25, STS-46)
[NASA-CR-192562] p 3272 N93-30617
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix A: Insulation PFORs
[NASA-CR-192563] p 3272 N93-30618
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix B: Case, seals, and joints PFORs
[NASA-CR-192564] p 3272 N93-30619
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix C: Nozzle PFORs
[NASA-CR-192565] p 3272 N93-30620
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix E: Insulation postfire data
[NASA-CR-192566] p 3272 N93-30621
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix D: Nozzle postfire data
[NASA-CR-192580] p 3289 N93-30648
POSTMISSION ANALYSIS (SPACECRAFT)
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55
[NASA-TM-107559] p 3271 N93-29136
POTENTIAL ENERGY
A field investigation of water and salt movement in permafrost and the active layer
[AD-A263706] p 3487 N93-29298
The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis
[DE93-007537] p 3313 N93-29837
Molecular dynamics of detonation in crystals with defects p 3350 N93-30097
Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100
Biophysical and biochemical mechanisms in synaptic transmitter release
[AD-A264829] p 3496 N93-30613
POTENTIAL FLOW
Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller
[AD-A264057] p 3241 N93-29891
POTENTIAL THEORY
Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556
POTENTIOMETERS
An automated data collection system for a Charpy impact tester p 3293 N93-30972
POTENTIOMETRIC ANALYSIS
Analytical applications of electrified interfaces between two immiscible solutions
[AD-A263085] p 3311 N93-29132
POWDER (PARTICLES)
Explosive consolidation of combustion synthesized TiC and TiB2: Precursor morphology effects
[AD-A263186] p 3341 N93-28515
Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564
Powder x ray diffraction patterns of energetic materials for use as reference standards
[DE93-009903] p 3592 N93-28568
Colloid and interface chemistry aspects of ceramics
[AD-A264685] p 3337 N93-30552
Powder towpreg process development
p 3303 N93-30844
Advanced fiber/matrix material systems
p 3305 N93-30854
Design, synthesis, and chemical processing of hierarchical ceramic structures for aerospace applications
[AD-A264227] p 3339 N93-30885
POWDER METALLURGY
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092
Near net shape processing: A necessity for advanced materials applications p 3290 N93-30949
Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976
POWER AMPLIFIERS
Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
POWER CONDITIONING
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
POWER EFFICIENCY
Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158
Energy efficient drivepower, volume 2
[DE93-012437] p 3410 N93-29814
POWER LINES
Fundamental study of the signal processing by optics
[DE93-776265] p 3577 N93-28982
POWER REACTORS
Bootstrap current profiles and scaling in large aspect ratio tokamaks
[DE93-753158] p 3589 N93-30003
Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001
POWER SPECTRA
Wavelet transform techniques and signal analysis
[DE93-007919] p 3382 N93-29244
Vortex shedding by blunt/bluff bodies at high Reynolds numbers. Volume 4: Rectangles
[AD-A264154] p 3241 N93-30151
Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 1: Data analysis
[AD-A264151] p 3241 N93-30171
Vortex shedding by Blunt/Bluff bodies at high reynolds numbers. Volume 2: Cylinders, octagon, hexagon
[AD-A264152] p 3241 N93-30172
Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 3. Cubes
[AD-A264153] p 3242 N93-30173
POWER SUPPLIES
Energy efficient drivepower, volume 2
[DE93-012437] p 3410 N93-29814
High reliability, maintenance-free INS battery development
[AD-A264521] p 3412 N93-30406
POWERED LIFT AIRCRAFT
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065
PRECESSION
Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777
PRECIPITATES
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301
Growth model of Au films on Ru(001)
[DE92-642126] p 3602 N93-30998
PRECIPITATION (METEOROLOGY)
Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519
Case study of Frontal Boundary Study Mission 03
[DE93-007176] p 3473 N93-30183
PRECIPITATION HARDENING
The temperature dependence of the deformation and oxidation behavior of an age-hardenable beta + alpha-two titanium alloy
[AD-A262232] p 3320 N93-28491
PREDICTION ANALYSIS TECHNIQUES
Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase
[DE93-010081] p 3467 N93-28543
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program
[NASA-CR-193263] p 3460 N93-29179
Two-dimensional model for current and heat transport in solid-armature railguns
[AD-A262014] p 3271 N93-29394
Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399
An analysis of possible applications of fuzzy set theory to the actuarial credibility theory p 3510 N93-29517
Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765
Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926
Combustion/explosion chemistry of bulk materials
p 3343 N93-30062
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103
Analytical predictions of the intermodulation noise of semiconductor laser diode p 3361 N93-30256
An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547
First NASA Advanced Composites Technology Conference, part 2
[NASA-CP-3104-PT-2] p 3303 N93-30841
PREDICTIONS
Exploitation of parallelism in climate models
[DE93-011259] p 3470 N93-29318
Developments in impact damage modeling for laminated composite structures p 3305 N93-30857
PREFORMS
Environmental effects on stitched RTM composites
[NASA-CR-193221] p 3297 N93-29107
Method and apparatus for weaving a woven angle ply fabric
[NASA-CASE-LAR-14048-1] p 3354 N93-29611

Consolidation of graphite thermoplastic textile preforms for primary aircraft structure p 3302 N93-30439
Infiltration/cure modeling of resin transfer molded composite materials using advanced fiber architectures p 3303 N93-30843
Powder towpreg process development p 3303 N93-30844
Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850

PRELAUNCH TESTS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136

PREMIXED FLAMES
Studies in premixed combustion [DE93-007955] p 3310 N93-29051
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A264341] p 3425 N93-30162
A novel flame thermometer based on the doppler width of ro-vibrational transitions [AD-A264515] p 3315 N93-30405
Studies of curvature, strain, and unsteady effects on premixed flames p 3316 N93-30646

PREPREGS
Design, analysis, and fabrication of the technology integration box beam p 3300 N93-30433
Comparison of impact results for several polymeric composites over a wide range of low impact velocities p 3304 N93-30848
Development of resins for composites by resin transfer molding p 3305 N93-30853
Advanced fiber placement of composite fuselage structures p 3306 N93-30864

PREPROCESSING
Preprocessing remotely-sensed data for efficient analysis and classification [DE93-007367] p 3611 N93-28580
Pre- and postprocessing techniques for determining goodness of computational meshes [NASA-CR-192553] p 3538 N93-29030

PRESSURE CHAMBERS
Guide for certifying pressure vessels and systems [NASA-TM-107549] p 3449 N93-29220

PRESSURE DEPENDENCE
Pressure dependence of the reaction propagation rate of TATB to 40 GPa p 3319 N93-30082

PRESSURE DISTRIBUTION
Transonic flows on an oscillating airfoil and their effect on the flutter-boundary [DLR-FB-92-08] p 3238 N93-29006
Wind loads on canopy roofs [RR-CE132] p 3451 N93-29106
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade [NASA-TM-106187] p 3420 N93-29157
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28 [NASA-TP-3313] p 3239 N93-29160
High-Reynolds-number test of a 5-percent-thick low-aspect-ratio semispan wing in the Langley 0.3-meter transonic cryogenic tunnel: Wing pressure distributions [NASA-TM-4227] p 3240 N93-29449
Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions p 3253 N93-29933
The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade p 3258 N93-29958
Sound wave scattering from a rigid sphere [AD-A264182] p 3562 N93-30157

PRESSURE EFFECTS
Sensitive detection of new superconductors created at ultra high pressures [AD-A264340] p 3597 N93-30161
Containment of explosions in spherical vessels [DE93-005445] p 3446 N93-30211
Hydrogen-rated system for in vitro studies at pressure: Operating procedures and emergency procedures [AD-A264179] p 3497 N93-30882

PRESSURE GAGES
Selection and static calibration of the Marsh J1678 pressure gauge p 3249 N93-29779

PRESSURE GRADIENTS
Heat transfer with moderate free stream turbulence p 3254 N93-29936

PRESSURE MEASUREMENT
Selection and static calibration of the Marsh J1678 pressure gauge p 3249 N93-29779

PRESSURE OSCILLATIONS
Strong parallel blade-vortex interaction and noise propagation in helicopter flight p 3563 N93-30980

PRESSURE RATIO
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28 [NASA-TP-3313] p 3239 N93-29160

PRESSURE REGULATORS
Tank Pressure Control Experiment (TPCE) p 3264 N93-28712
Tank Pressure Control Experiment/Thermal Phenomena (TPCE/TP) p 3264 N93-28713

PRESSURE SENSORS
Rugged, no-moving-parts windspeed and static pressure probe designs for measurements in planetary atmospheres p 3434 N93-28767
A calibration procedure for the SBE 19 Conductivity, Temperature, and Depth (CTD) profiler [AD-A264435] p 3489 N93-30420

PRESSURE SWITCHES
Valve malfunction detection apparatus [NASA-CASE-MFS-29904-1] p 3432 N93-29503

PRESSURE VESSEL DESIGN
Guide for certifying pressure vessels and systems [NASA-TM-107549] p 3449 N93-29220

PRESSURE VESSELS
New remote maintenance approach for TPX [DE93-007857] p 3584 N93-28583
Building a generalized distributed system model [NASA-CR-193239] p 3527 N93-29219
Guide for certifying pressure vessels and systems [NASA-TM-107549] p 3449 N93-29220
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels [DE93-006206] p 3454 N93-30213
Steps required in the pursuit of quantitative risk management processes for high pressure systems [DE93-007586] p 3378 N93-30508
Structural design, analysis, and code evaluation of an odd-shaped pressure vessel [DE93-008182] p 3447 N93-30632

PRESSURIZED WATER REACTORS
Annual progress report on the NSRR experiments, (21) [DE93-753190] p 3574 N93-29137
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels [DE93-006206] p 3454 N93-30213

PREVENTION
Planning and progress of EPA's pollution prevention research program [PB93-185767] p 3475 N93-30831

PRIMITIVE EQUATIONS
High performance dispersion model PHYSIC [DE93-753303] p 3467 N93-28536

PRINTED CIRCUITS
Characterization and optimization of a Hot Air Solder-Leveling System [DE93-010188] p 3332 N93-29328
Prototype and short-run printed circuit board creation [AD-A263245] p 3409 N93-29655
Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider [DE93-011481] p 3412 N93-30127
Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System [DE93-006283] p 3412 N93-30370
An application protocol for CAD to CAD transfer of electronic information [AD-A264554] p 3533 N93-30383

PRISMS
The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672
The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766
An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels p 3255 N93-29942

PROBABILITY DENSITY FUNCTIONS
An analysis of the Generalized Lambda Distribution [AD-A262485] p 3555 N93-29447

PROBABILITY DISTRIBUTION FUNCTIONS
The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672
Monte Carlo simulation of magnitude-angle error sources [AD-A263738] p 3555 N93-29857

PROBABILITY THEORY
Probabilistic simulation of multi-scale composite behavior [NASA-TM-106196] p 3451 N93-28633
Risk-based spacecraft fire safety experiments p 3267 N93-28738
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques [NASA-CR-190785] p 3288 N93-29068
Estimations of expectedness and potential surprise in possibility theory p 3510 N93-29518
Comparison of specificity and information for fuzzy domains p 3510 N93-29519
Decision analysis with approximate probabilities p 3513 N93-29542
Information compression in the context model p 3514 N93-29549
Fuzzy learning under and about an unfamiliar fuzzy teacher p 3516 N93-29558
Quantification of human responses p 3500 N93-29564
Possibilistic measurement and set statistics p 3517 N93-29567
Neural networks: A simulation technique under uncertainty conditions p 3519 N93-29577
On probability-possibility transformations p 3519 N93-29582
NetStat: A probabilistic network connectivity analysis tool [AD-A262838] p 3529 N93-29647
Planetary protection issues for the MESUR mission: Probability of growth (Pg) [NASA-CP-3167] p 3651 N93-30214
Quantum field theory in spaces with closed time-like curves [DE93-010564] p 3605 N93-30481
Steps required in the pursuit of quantitative risk management processes for high pressure systems [DE93-007586] p 3378 N93-30508
On the impossibility of creating the quantum correlations with computers [DE93-606039] p 3606 N93-30806
Probabilistic composite analysis p 3307 N93-30868

PROBLEM SOLVING
Research in mathematics and computer science, March 1, 1991 - September 30, 1992 [DE93-011492] p 3509 N93-28573
Parametric likelihood inference for record breaking problems [AD-A262546] p 3549 N93-29413
Information technology: A force for organizational change [AD-A261986] p 3615 N93-29439
Neural networks: A simulation technique under uncertainty conditions p 3519 N93-29577
Managing operational intelligence overload: Guidelines for avoiding decision paralysis [AD-A264184] p 3610 N93-30158
Nonsmooth optimization algorithms, system theory, and software tools [AD-A264679] p 3534 N93-30549
Intelligent real-time problem solving [AD-A264830] p 3535 N93-30614
Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964

PROCEDURES
CATS EYES adjustment procedures [AD-A264069] p 3508 N93-29924

PROCESS CONTROL (INDUSTRY)
Process optimization of Hexoloy SX-SiC towards improved mechanical properties [DE93-007913] p 3320 N93-28564
Design issues of a reinforcement-based self-learning fuzzy controller for petrochemical process control p 3512 N93-29533
Fuzzy simulation in concurrent engineering p 3516 N93-29562
Powder towpreg process development p 3303 N93-30844

PROCUREMENT
Productivity measurement in science and technology contracting [AD-A262077] p 3609 N93-28985
A perspective on acquisition of NASA space systems [AD-A263246] p 3610 N93-29499

PROCUREMENT MANAGEMENT
The program manager's notebook [AD-A263074] p 3609 N93-29142

PRODUCT DEVELOPMENT
RBSE: Product development team research activity deliverables [NASA-CR-193115] p 3527 N93-29212
The NASA SBIR product catalog [NASA-TM-108242] p 3609 N93-29322
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 2 [NASA-CP-10112-VOL-2] p 3515 N93-29556
Data probe user's guide [PB93-178655] p 3530 N93-29678
The NCAT process p 3626 N93-30697
CAESAR development plan 1992-1995 [BCRS-92-17] p 3463 N93-31009

PRODUCTION COSTS
Silicon Film(trademark) photovoltaic manufacturing technology [DE93-010008] p 3466 N93-30891

PRODUCTION MANAGEMENT
The program manager's notebook [AD-A263074] p 3609 N93-29142

PRODUCTIVITY
Productivity measurement in science and technology contracting
[AD-A262077] p 3609 N93-28985
PRODUCTS
The NASA SBIR product catalog
[NASA-TM-108242] p 3609 N93-29322
SESC products and services user guide
[PB93-178879] p 3653 N93-29679
PROGRAM VERIFICATION (COMPUTERS)
An assessment of space shuttle flight software development processes
[NASA-CR-193179] p 3525 N93-28934
A temporal proof methodology for reactive systems
[NASA-CR-193145] p 3528 N93-29469
Nonresident and endangered variables: The effects of code generation optimizations on symbolic debugging
[AD-A263149] p 3529 N93-29486
Communications systems design for testability: Grey-box testing p 3368 N93-30302
Using Penelope to assess the correctness of NASA Ada software: A demonstration of formal methods as a counterpart to testing
[NASA-CR-4509] p 3533 N93-30380
High-energy electron-positron interactions
[DE93-011611] p 3576 N93-30488
Procedures for applying Ada quality prediction models
[AD-A264730] p 3534 N93-30546
An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547
PROGRAMMING (SCHEDULING)
Estimating test range capacity
[AD-A262493] p 3270 N93-28938
PROGRAMMING ENVIRONMENTS
Parallel software tools at Langley Research Center
[NASA-TM-108995] p 3520 N93-29070
An annotated bibliography on integration in software engineering environments
[AD-A264798] p 3535 N93-30602
PROGRAMMING LANGUAGES
Concurrent clean language manual, version 0.8
[TR-92-18] p 3522 N93-28482
The concurrent clean system user's manual and PABCstat user's manual, version 0.8
[TR-92-19] p 3523 N93-28484
Formal definition of a conceptual language for the description and manipulation of information models
[TR-92-16] p 3523 N93-28503
Handshake circuits: An intermediary between communicating processes and VLSI
[ETN-93-93579] p 3408 N93-29269
Implementing error-valued semantics for dataflow languages on imperative machines
[DE93-009319] p 3615 N93-29310
Automated reasoning with function evaluation for COCOLOG
[INRIA-RR-1713] p 3529 N93-29488
Full abstraction for a shared variable parallel language
[AD-A263547] p 3530 N93-29821
Class notes: Programming parallel algorithms CS 15-840B (Fall 1992)
[AD-A263549] p 3530 N93-29823
Turning SOS rules into equations
[CWI-CS-R9218] p 3532 N93-30017
PROJECT MANAGEMENT
Applied research in America
[DE93-011725] p 3625 N93-28646
The program manager's notebook
[AD-A263074] p 3609 N93-29142
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-010658] p 3408 N93-29311
A perspective on acquisition of NASA space systems
[AD-A263246] p 3610 N93-29499
Air Force CALS business practices
[AD-A264789] p 3610 N93-30177
Interagency Advanced Power Group (IAPG) Meeting Compendium
[DE93-006189] p 3670 N93-30212
The NCAT process p 3626 N93-30697
PROJECT PLANNING
Program plan for an experimenter's laboratory for visualized interactive science p 3613 N93-29224
High performance computing: Advanced Research Projects Agency should do more to foster program goals. Report to the Chairman, Committee on Armed Services, House of Representatives
[GAO/IMTEC-93-24] p 3533 N93-30202
Rotorcraft master plan p 3236 N93-30677
Technology coordination p 3626 N93-30706
PROJECT SETI
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-193137] p 3509 N93-28895
PROJECTILE CRATERING
Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374
LDEF data: Comparisons with existing models
p 3283 N93-29375
PROJECTILES
Studies of relativistic heavy ion collisions at the AGS (E814/E877)
[DE93-008541] p 3564 N93-28678
Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494
Recent applications of CFD to the aerodynamics of Army projectiles
[AD-A262953] p 3240 N93-29512
The effect of material strength on segment penetration behavior
[AD-A263262] p 3453 N93-29801
Measurement of projectile surface temperature by means of its infrared radiation: A preliminary study
[AD-A264053] p 3432 N93-30032
PROKARYOTES
Regulation of alternative CO2 fixation pathways in procaryotic and eucaryotic photosynthetic organisms
[DE93-012109] p 3491 N93-29181
PROLATE SPHEROIDS
An experimental study of flow over a 6 to 1 prolate spheroid at incidence p 3239 N93-29124
PROLOG (PROGRAMMING LANGUAGE)
MLog: A language for prototyping concurrent systems
p 3368 N93-30301
PRONY SERIES
Advances in the identification of electrochemical transfer function models using Prony analysis
[DE93-009424] p 3550 N93-30041
PROPAGATION MODES
Studies of the propagation of Low Frequency (LF) radio waves p 3396 N93-30738
PROPANE
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
PROPELLANT BINDERS
A simple model for explosives formulation
[DE93-010703] p 3341 N93-29251
PROPELLANT CHEMISTRY
A simple model for explosives formulation
[DE93-010703] p 3341 N93-29251
Strategies for understanding the deflagration-to-detonation transition
p 3319 N93-30077
Applications of density functional theory to calculation of reaction energetics p 3351 N93-30098
PROPELLANT COMBUSTION
The equivalent flat nose diameter of hemispherical nose cylindrical projectiles for impact induced detonation of energetic materials
[AD-A263244] p 3342 N93-29494
The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials
p 3343 N93-30063
Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079
Flame structure studies of propellant like low pressure flames using optical and mass spectrometric means
p 3319 N93-30081
Thermal decomposition pathways of RDX in the condensed phase p 3347 N93-30083
Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102
PROPELLANT DECOMPOSITION
Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402
PROPELLANT EXPLOSIONS
Thermal decomposition pathways of RDX in the condensed phase p 3347 N93-30083
PROPELLANT PROPERTIES
Benefits of in situ propellant utilization for a Mars sample return mission
[NASA-TM-106243] p 3341 N93-28695
PROPELLANT SENSITIVITY
A steric hindrance model for the crystal orientation dependence of the shock initiation sensitivity of PETN explosive
[LA-UR-92-1427] p 3345 N93-30074
PROPELLANT TANKS
APU diaphragm testing. Test plan
[NASA-TM-108251] p 3271 N93-29387
PROPELLANT TESTS
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
PROPELLANTS
Selective nitrations. Volume 2: The laser-induced nitration of three cycloalkanes
[AD-A263250] p 3438 N93-29800
Examination of shock induced chemical reactions in liquids using time-resolved optical spectroscopy
p 3318 N93-30073
Strategies for understanding the deflagration-to-detonation transition
p 3319 N93-30077
PROPELLER BLADES
An integrated optimum design approach for high speed prop-rotors including acoustic constraints
[NASA-CR-193222] p 3248 N93-29153
Project ARES 2: High-altitude battery-powered aircraft
p 3227 N93-29715
Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller
[AD-A264057] p 3241 N93-29891
PROPELLERS
Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller
[AD-A264057] p 3241 N93-29891
PROPORTIONAL CONTROL
Three-parameter tunable Tilt-Integral-Derivative (TID) controller
[NASA-CASE-NPO-18492-1-CU] p 3542 N93-29176
PROPOSALS
NASA SBIR abstracts of 1991 phase 1 projects
[NASA-TM-108240] p 3609 N93-29323
AFOSR Status Report
[AD-A264720] p 3670 N93-30513
PROPULSION
Propulsion and detonics research in France
p 3344 N93-30070
PROPULSION SYSTEM CONFIGURATIONS
Development and testing of the Perseus proof-of-concept aircraft
[DE93-010121] p 3247 N93-28586
Clustered Lance Booster (CLB) feasibility study
[AD-A262746] p 3286 N93-28593
Delta Advanced Reusable Transport (DART): An alternative manned spacecraft p 3231 N93-29735
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion
[DE93-010662] p 3464 N93-29844
PROPULSION SYSTEM PERFORMANCE
Development and testing of the Perseus proof-of-concept aircraft
[DE93-010121] p 3247 N93-28586
Additional support for the TDK/MABL computer program
[NASA-CR-193037] p 3526 N93-29028
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion
[DE93-010662] p 3464 N93-29844
PROPYLENE
APU diaphragm testing. Test plan
[NASA-TM-108251] p 3271 N93-29387
PROSTHETIC DEVICES
Prosthetic elbow joint
[NASA-CASE-MFS-28707-1] p 3508 N93-30566
PROTECTION
Evaluation of environmental marketing terms in the United States
[PB93-175784] p 3474 N93-30660
PROTECTIVE CLOTHING
Evaluation of test methods and requirements for respiratory protection systems 21
[AD-A262466] p 3501 N93-28757
Evaluation and optimization of a flexible filtration system for respiratory protection system 21
[AD-A262467] p 3493 N93-28758
Biophysical model for handwear insulation testing
[AD-A262926] p 3505 N93-28884
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471
PROTECTIVE COATINGS
Smart skin structures for identifying and locating laser irradiation
[DE93-005464] p 3436 N93-28887
Operational results of pilot cell test with cermet inert anodes
[DE93-009338] p 3322 N93-29061
LDEF: 69 Months in Space. Second Post-Retrieval Symposium, part 2
[NASA-CP-3194-PT-2] p 3654 N93-29354
Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363

Post-flight analyses of the crystals from the M0003-14 quartz crystal microbalance experiment
p 3602 N93-29684
Platinum-modified diffusion aluminide coatings on nickel-base superalloys
[AD-A263597] p 3325 N93-29981
Chromate-free corrosion resistant conversion coatings for aluminum
[DE93-009835] p 3336 N93-30051
Laser gas alloying of titanium materials
[ETN-93-93805] p 3325 N93-30115
Development of adherent ceramic coatings to reduce contact stress damage of ceramics
[DE93-012518] p 3336 N93-30182
Flexible storage medium for write-once optical tape
p 3621 N93-30473
Diamond nucleation of surfaces using carbon clusters
[AD-A264634] p 3599 N93-30548
Oxidation and hot corrosion of superalloys Rene 100 and X-40 at temperatures of 1475 F to 2000 F
[AD-A263747] p 3327 N93-30812

PROTEINS
Center of Excellence in Biotechnology (Research)
[AD-A263598] p 3491 N93-29915
Defining protein electrostatic recognition processes
[AD-A264838] p 3571 N93-30901
Computer assisted multiplex sequencing
[DE93-007144] p 3536 N93-30934

PROTOCOL (COMPUTERS)
A survey of network interface designs
[MEMO-INF-92-59] p 3379 N93-28502
Initial graphics exchange specification hybrid microcircuit application protocol
[PB93-175404] p 3407 N93-29203
RBSE: Product development team research activity deliverables
[NASA-CR-193115] p 3527 N93-29212
Building a generalized distributed system model
[NASA-CR-193239] p 3527 N93-29219
Handshake circuits: An intermediary between communicating processes and VLSI
[ETN-93-93579] p 3408 N93-29269
FDDI installation and performance analysis
[AD-A263263] p 3529 N93-29497
Ethernet performance of the Motorola Altair WIN system
[AD-A263877] p 3387 N93-29890
OSI transaction processing standard: An introduction and outlines of implementation
[VTT-TIED-1250] p 3532 N93-29997
Using the Mach communication primitives in X11
[AD-A264049] p 3533 N93-30125
Performance analysis of communication protocols using D-timed Petri net p 3356 N93-30227
Automatic synthesis of protocol specifications
p 3356 N93-30228
An application protocol for CAD to CAD transfer of electronic information
[AD-A264554] p 3533 N93-30383

PROTON BEAMS
Design of a particle beam satellite system for lunar prospecting p 3434 N93-28768

PROTON FLUX DENSITY
Induced activation study of LDEF
p 3572 N93-29632

PROTON IRRADIATION
Enhancements of the critical currents of YBaCuO single crystals by neutron (n) and proton (p) irradiation
[DE93-007892] p 3592 N93-28661

PROTON SCATTERING
Spin observables in large t elastic N-N scattering
[DE93-009211] p 3564 N93-28549

PROTON-PROTON REACTIONS
Multidimensional intermittency in hadronic collisions
[DE93-010562] p 3577 N93-30532

PROTONS
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415
Revised prediction of LDEF exposure to trapped protons p 3572 N93-29633

PROTOTYPES
Design and construction of a prototype ACTS propagation terminal
[NASA-CR-193071] p 3404 N93-28539
The lightcraft project p 3233 N93-29749
Concept formulation process aid for trade-off determination: Operator's guide
[AD-A263756] p 3531 N93-29874
Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875
A prototype of a faculty and staff executive information system
[AD-A264852] p 3623 N93-30907

PROTOZOA
Process for selectively recovering algae and protozoa
[NASA-CASE-MFS-26124-1-NPO] p 3491 N93-29174

PROVING
A temporal proof methodology for reactive systems
[NASA-CR-193145] p 3528 N93-29469
The NCAT process p 3626 N93-30697
ERS-1 directional wave spectra validation with the airborne SAR PHARS
[BCRS-92-18] p 3463 N93-31010

PSEUDORANDOM SEQUENCES
Robot arm with positional absolute encoded joints
p 3370 N93-30312

PSYCHOLOGICAL FACTORS
Evaluation of test methods and requirements for respiratory protection systems 21
[AD-A262466] p 3501 N93-28757
Sound attenuation characteristics of the standard DH-132A and SPH-4 helmets worn in combination with standard issue earplugs
[AD-A263011] p 3506 N93-29406

PSYCHOLOGICAL TESTS
Pilot Candidate Selection Method (PCSM): What makes it work?
[AD-A262871] p 3498 N93-29481
Field test of a computer-driven tool to measure psychological characteristics of aircrew
[AD-A264484] p 3499 N93-30425

PSYCHOLOGY
Geoscience center research
[AD-A263465] p 3462 N93-29834
The dynamics of visual representation, attention, encoding, and retrieval processes
[AD-A264674] p 3500 N93-30543

PSYCHOMETRICS
Predicting aircrew training performance with psychometric g
[AD-A264021] p 3498 N93-30026
Field test of a computer-driven tool to measure psychological characteristics of aircrew
[AD-A264484] p 3499 N93-30425

PULMONARY FUNCTIONS
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153

PULSARS
The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604
GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars
[NASA-CR-193243] p 3635 N93-30053

PULSE CODE MODULATION
Influence of optical feedback on the pulse behavior of semiconductor lasers
[ETN-93-93798] p 3436 N93-28614

PULSE COMMUNICATION
Advanced HF digital networks p 3375 N93-30343

PULSE COMPRESSION
Accelerator research studies
[DE93-009353] p 3573 N93-28522

PULSE DOPPLER RADAR
The use of data turning in airborne radars
p 3358 N93-30241

PULSE DURATION
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772
Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780
A technique for single-pulse spectrum and pulse width measurements for an IR-FEL
[DE93-007732] p 3436 N93-28847

PULSE GENERATORS
Optically controlled solid state opening switches
[AD-A262404] p 3591 N93-28496
High-voltage pulse generator capable of 2000 J at 10 kV
[AD-A262034] p 3407 N93-28999
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
Fusion laser oscillator and pulse-forming system using integrated optics
[DE93-009286] p 3588 N93-29780
Analysis of an MCG/fuse/PFS experiment
[DE93-007355] p 3410 N93-29812
Pulse control in an accelerator for heavy-ion fusion
[DE93-009527] p 3576 N93-30390

PULSE REPETITION RATE
All solid-state high power visible laser
[NASA-CR-193163] p 3436 N93-28623
Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780
High-repetition rate x ray lasers and applications
[DE93-011882] p 3440 N93-30394

PULSED LASERS
Discharge of electrically charged clouds
[AD-A263212] p 3480 N93-28518
All solid-state high power visible laser
[NASA-CR-193163] p 3436 N93-28623
Polarization dependence of the ionization of helium and neon by 120 femtosecond pulses at 614 nm
[DE93-010514] p 3564 N93-28762
Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780
Low-pump-rate multi-millisecond atomic xenon laser
[DE93-011484] p 3437 N93-29180
Inner-shell photo-ionized x ray laser schemes
[DE93-009285] p 3438 N93-29309
Operating manual for single-shot autocorrelator
[AD-A262016] p 3438 N93-29395
Fusion laser oscillator and pulse-forming system using integrated optics
[DE93-009286] p 3588 N93-29780
High resolution free-electron laser spectroscopy
[AD-A263734] p 3439 N93-29853
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101
High-repetition rate x ray lasers and applications
[DE93-011882] p 3440 N93-30394
Method and apparatus for imaging an object in or through a scattering medium by using multiple-wave mixing
[AD-D015707] p 3581 N93-30410
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry
[DE93-011734] p 3427 N93-30489
Computer control of pulsed tunable dye lasers
[DE93-605896] p 3441 N93-30801

PUPILS
A tutorial on exit pupils and eye rotation with virtual image optical displays
[AD-A262399] p 3494 N93-29400

PYRIDINES
Conjugated substituted ionic polyacetylenes
[AD-A264702] p 3337 N93-30497

PYROELECTRICITY
Smart skin structures for identifying and locating laser irradiation
[DE93-005464] p 3436 N93-28887
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics
[AD-A263427] p 3332 N93-29337

PYROLYSIS
Methylhydridopolysilazane and its pyrolytic conversion to Si3N4/SiC ceramics
[AD-A264150] p 3336 N93-30170
Conjugated polymers from cyclohexadienediol monomers
[AD-A264837] p 3340 N93-30900

PYROLYTIC GRAPHITE
Semiconductor cooling apparatus
[NASA-CASE-LEW-14162-3] p 3299 N93-29614

PYROMETERS
A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152

Q

Q FACTORS
Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317
Investigation of thermoacoustic muffler
[AD-A262009] p 3562 N93-29392
An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547

Q SWITCHED LASERS
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772

QUADRUPOLES
An RF driven H(-) source and a low energy beam injection system for RFQ operation
[DE93-010438] p 3575 N93-29302
Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317

QUALITATIVE ANALYSIS
Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776

QUALITY CONTROL

Analysis of protocol gases: An on-going quality assurance audit
[PB93-168839] p 3311 N93-29204

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 2
[AD-A263814] p 3335 N93-29881

A guide to total software quality control, volume 1
[AD-A263881] p 3531 N93-29920

A guide to total software quality control, volume 2
[AD-A263891] p 3531 N93-29921

Software testing using the IEEE standards
[DE93-009833] p 3532 N93-30050

Data quality statements for spatial databases
[AD-A264125] p 3616 N93-30195

Procedures for applying Ada quality prediction models
[AD-A264730] p 3534 N93-30546

An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547

The quality assurance liaison: Combined technical and quality assurance support
[DE93-008725] p 3450 N93-30636

QUANTILES

Empirical quantile function nonparametric integrated analyses
[AD-A263704] p 3554 N93-29385

QUANTITATIVE ANALYSIS

Quantitative analysis of properties and spatial relations of fuzzy image regions p 3510 N93-29523

Improved measurement of thermal effects on microstructure p 3292 N93-30959

QUANTUM CHEMISTRY

Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540

The use of quantum chemistry to estimate the performance and properties of explosives
[DE92-040369] p 3352 N93-30446

The 26th International Quantum Chemistry Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A264206] p 3315 N93-30534

QUANTUM CHROMODYNAMICS

Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565

Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960

Borel sum rules for octet baryons in nuclear medium
[DE93-753245] p 3604 N93-29242

Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841

Unitary approximation of Bhabha diffusion by high energies and its implementation in Monte Carlo event generators
[ETN-93-93622] p 3571 N93-30670

Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924

Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925

Normal equivariant forms of vector fields
[DE92-644845] p 3551 N93-30929

Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

QUANTUM EFFICIENCY

High-performance visible/UV CCD focal plane technology for spacebased applications
p 3434 N93-28771

QUANTUM ELECTRODYNAMICS

Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542

Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924

Regular and chaotic motion of two dimensional electrons in a strong magnetic field
[DE93-604091] p 3607 N93-30933

QUANTUM MECHANICS

Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542

Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565

Photodissociation of HBr/LiF(001): A quantum mechanical model
[NASA-CR-193119] p 3603 N93-28933

Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396

Differential calculus on quantum spaces and quantum groups
[DE93-010425] p 3551 N93-30392

Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796

Chaotic quantum systems
[DE93-606030] p 3606 N93-30802

Scaling properties of localized quantum chaos
[DE93-606031] p 3606 N93-30803

On two-dimensional quasiclassics
[DE93-606034] p 3606 N93-30805

Positive energy representations of the conformal quantum algebra
[DE93-606064] p 3551 N93-30809

Connections between quantized affine algebras and superalgebras
[DE93-606065] p 3551 N93-30810

Physics laboratory technical activities, 1992
[PB93-178648] p 3561 N93-30888

On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912

Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles
[DE92-644678] p 3535 N93-30914

Topology and statistics in zero dimensions
[DE93-604080] p 3607 N93-30932

Regular and chaotic motion of two dimensional electrons in a strong magnetic field
[DE93-604091] p 3607 N93-30933

Low-energy behaviour of few-particle scattering amplitudes in two dimensions
[DE93-609834] p 3572 N93-30944

A squeezed state holomorphic phase space representation of equations of motion
[DE93-609835] p 3607 N93-30945

Formulation of wave mechanics without the Planck constant h/2 pi
[DE93-604083] p 3608 N93-30987

QUANTUM NUMBERS

Integrals of motion on the group of invariance of an interval in three-dimensional spaces
[DE93-606090] p 3606 N93-30797

QUANTUM STATISTICS

On the impossibility of creating the quantum correlations with computers
[DE93-606039] p 3606 N93-30806

Topology and statistics in zero dimensions
[DE93-604080] p 3607 N93-30932

QUANTUM THEORY

The semiclassical stability of de Sitter spacetime
[DESY-92-131] p 3603 N93-28472

Applications of unitarity in the standard model
p 3416 N93-28613

An algebraic approach to the quantization of constrained systems: Finite dimensional examples
p 3548 N93-28671

Quantum devices using Si-based superlattices and structures
[AD-A263700] p 3595 N93-29383

Understanding conformal field theory through parafermions and Chern Simons theory
[DE93-010452] p 3604 N93-29806

Quantum field theory in spaces with closed time-like curves
[DE93-010564] p 3605 N93-30481

NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666

Quantum group and symmetry of the heat equation
[DE93-607560] p 3605 N93-30779

Approximation formulae for functional integrals in P(phi)2-quantum field theory
[DE93-606067] p 3605 N93-30781

Phase structure of three- and four-dimensional phi(exp 4) field theory
[DE93-606069] p 3605 N93-30782

Beyond two dimensions
[DE93-606084] p 3606 N93-30786

Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796

Physics laboratory technical activities, 1992
[PB93-178648] p 3561 N93-30888

Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917

Compensating fields and anomalies in supergravity
[DE92-644724] p 3637 N93-30919

Quantum group generalization of the heterotic QFT
[DE92-644727] p 3607 N93-30920

Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644743] p 3557 N93-30926

A squeezed state holomorphic phase space representation of equations of motion
[DE93-609835] p 3607 N93-30945

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

QUANTUM WELLS

Low temperature (LT) GaAs and related materials
[AD-A263607] p 3298 N93-29282

Quantum devices using Si-based superlattices and structures
[AD-A263700] p 3595 N93-29383

Nonequilibrium screening and exciton dynamics probed by femtosecond laser pulses
[AD-A263603] p 3439 N93-29983

Development of ultra-low noise, high sensitivity planar metal grating coupled 3-5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A264465] p 3599 N93-30536

Electronic states in quantum wells with periodically structured interfaces
[DE93-606295] p 3600 N93-30769

QUARKS

Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569

New limits on generation-1 leptoquarks
[DE93-008138] p 3567 N93-29351

Single t-quark production in high energy (gamma)e collisions
[DE92-644947] p 3572 N93-30930

Fluctuations and intermittency in high energy nucleus-nucleus collisions
[DE93-608481] p 3577 N93-30990

QUARTZ CRYSTALS

Post-flight analyses of the crystals from the M0003-14 quartz crystal microbalance experiment
p 3602 N93-29684

Radiation sensitivity of quartz crystal oscillators experiment for the Long Duration Exposure Facility (LDEF), part 2 p 3414 N93-29685

QUASARS

Multifractal analysis of radio lobes
p 3380 N93-28689

QUENCHING (ATOMIC PHYSICS)

Reaction and reorientation of electronically excited H2(B)
[DE93-010435] p 3569 N93-29860

QUERY LANGUAGES

Formal definition of a conceptual language for the description and manipulation of information models
[TR-92-16] p 3523 N93-28503

A model for processing the SGML document in version oriented hypertext systems
[ETN-93-93797] p 3611 N93-28528

A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846

On the evaluation of fuzzy quantified queries in a database management system p 3517 N93-29569

A high performance, ad-hoc, fuzzy query processing system for relational databases p 3518 N93-29571

QUEUEING THEORY

Some qualitative properties in polling systems
[INRIA-RR-1596] p 3552 N93-28506

Flow control using the theory of zero sum Markov games
[INRIA-RR-1597] p 3553 N93-28507

Optimal control of the M/G/1 queue with repeated vacations of the server
[INRIA-RR-1637] p 3541 N93-28637

Closed-loop control with delayed information
[INRIA-RR-1638] p 3541 N93-28638

QUINONES

Hydrogen sulfide decomposition into hydrogen and sulfur by quinone cycles, part 1
[PB93-175297] p 3317 N93-30761

R

RADAR

Modern approach to relativity theory (radar formulation)
[DE93-606032] p 3606 N93-30804

RADAR ANTENNAS

Array-fed reflector systems with limited scan
p 3371 N93-30318

RADAR APPROACH CONTROL

Airspace Design Expert System (ADES), a 2D/3D mapping and modelling tool incorporating an expert system for use in instrument approach design
p 3247 N93-30357

RADAR BEAMS
Radar beam effects for a flight simulator using signal processor based hardware p 3373 N93-30328
RADAR CLUTTER MAPS
Ground clutter measurements for surface-sited radar [AD-A262472] p 3379 N93-28655
RADAR CORNER REFLECTORS
Investigations of self-pumped phase conjugate laser beams and coherence length [AD-A263438] p 3438 N93-29789
RADAR CROSS SECTIONS
Computer-aided modeling for analysis of arbitrary scatterers and feeds p 3367 N93-30293
RCS of fundamental scatterers in the HF band by wire-grid modelling p 3371 N93-30320
Wide frequency polarimetric radar cross section measurements p 3371 N93-30321
Application of integral and differential equation methods for various EM interaction problems [AD-A264821] p 3394 N93-30597
RADAR DATA
Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770
Leadex data report. Part 1: Weather analysis and satellite images [AD-A263217] p 3481 N93-28876
Software development and analysis for experimental high frequency surface wave radar data [AD-A261982] p 3383 N93-29438
Classification of radar clutter in an air traffic control environment p 3246 N93-30299
Effects of imbalances and DC offsets on I/Q demodulation [AD-A264466] p 3393 N93-30537
RADAR DETECTION
Modified Acousto-Optic Adaptive Processor (Mod-AOAP) [AD-A261983] p 3381 N93-28997
Project MEDSAT p 3231 N93-29739
A TACSAT SAR concept p 3286 N93-29910
Future directions in aviation security p 3244 N93-30274
Adaptive filtering for clutter suppression in high frequency radar p 3377 N93-30355
Enhanced convergence adaptive detection [AD-A264100] p 3399 N93-30879
RADAR IMAGERY
Multiscale morphological filtering for analysis of noisy and complex images p 3582 N93-28789
Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR) [DLR-MITT-92-09] p 3456 N93-28915
Forest examination with polarimetric radar image data p 3457 N93-28921
Remote sensing of agricultural vegetation: Status and perspectives p 3458 N93-28922
SAR shape-from-shading for a populated alpine area p 3458 N93-28923
The MAESTRO-1 campaign: Analyses of polarimetric SAR data of agricultural fields and forests [BCRS-92-06] p 3460 N93-29320
A TACSAT SAR concept p 3286 N93-29910
Similarities between synthetic aperature radar and ground probing radar imaging p 3376 N93-30347
Segmentation of SAR images p 3376 N93-30348
Multiscale and multigrid information representation, extraction and fusion [AD-A264623] p 3393 N93-30386
RADAR MAPS
Development of an airborne MMW FM-CW radar for mapping river ice [AD-A262655] p 3379 N93-28588
Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra [DE93-008734] p 3481 N93-29095
RADAR MEASUREMENT
Ground clutter measurements for surface-sited radar [AD-A262472] p 3379 N93-28655
The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements p 3649 N93-28815
RADAR SCANNING
Array-fed reflector systems with limited scan p 3371 N93-30318
RADAR SCATTERING
The dynamic cusp at low altitudes: A case study combining Viking, DMSP, and Sondrestrom incoherent scatter radar observations [NASA-CR-193152] p 3476 N93-28842
SAR shape-from-shading for a populated alpine area p 3458 N93-28923
RCS of fundamental scatterers in the HF band by wire-grid modelling p 3371 N93-30320
Wide frequency polarimetric radar cross section measurements p 3371 N93-30321
RADAR SIGNATURES
The dynamic cusp at low altitudes: A case study combining Viking, DMSP, and Sondrestrom incoherent scatter radar observations [NASA-CR-193152] p 3476 N93-28842
Forest examination with polarimetric radar image data p 3457 N93-28921
RADAR TARGETS
Wide frequency polarimetric radar cross section measurements p 3371 N93-30321
Adaptive airborne radar simulation with equalization filter taps [AD-A264722] p 3393 N93-30514
RADAR TRACKING
A fuzzy logic optimal control law solution to the CMMCA tracking problem [AD-A262555] p 3542 N93-29420
The effect of clock, media, and station location errors on Doppler measurement accuracy p 3246 N93-29588
Wind measurement accuracy of a loran radiosonde [AD-A263572] p 3483 N93-29832
Evolution of radar data processing in the French air traffic control system p 3247 N93-30325
RADAR TRANSMISSION
Characteristics of high-frequency signals, noise, availability, and duration of bandwidths based on ROTHR Amchitka spectrum measurements [AD-A264480] p 3393 N93-30423
RADIAL FLOW
Two-dimensional and three-dimensional time-dependent MHD model of extended corona p 3653 N93-30496
RADIAL VELOCITY
The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672
RADIANCE
Radiometric calibration system for IR cameras [DE93-009237] p 3430 N93-28520
The possible direct use of satellite radiance measurements by the Atmospheric Radiation Measurement Program [DE93-009819] p 3462 N93-30049
RADIANT COOLING
Spaceborne passive radiative cooler p 3378 N93-28802
RADIANT HEATING
The hydraulic analysis of cylindrical Flibe jets in a HYLIFE-2 ICF reactor [DE93-009234] p 3586 N93-29053
Unsteady combustion of energetic materials using laser-recoil p 3319 N93-30085
RADIATION BELTS
Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing p 3641 N93-28773
Radioactivities induced in some LDEF samples p 3572 N93-29628
Revised prediction of LDEF exposure to trapped protons p 3572 N93-29633
Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737
RADIATION CHEMISTRY
DOE fundamentals handbook: Chemistry [DE93-012222] p 3314 N93-30198
RADIATION COUNTERS
Proposal for a universal particle detector experiment p 3286 N93-28795
Research programs from the University of South Carolina on high energy physics [DE93-007829] p 3574 N93-28969
Radioactivities induced in some LDEF samples p 3572 N93-29628
Elementary particle interactions [DE93-005113] p 3568 N93-29764
RADIATION DAMAGE
Neutron radiation induced degradation of diode characteristics [AD-A263277] p 3405 N93-28563
Photobiological investigations on spores of streptomyces griseus [ESA-TT-1269] p 3491 N93-29274
Center for surface radiation damage studies [AD-A264330] p 3570 N93-30366
Unexpected increase in the thermal generation rate of bulk GaAs due to electron-beam metallization [DE93-009829] p 3598 N93-30511
Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation [DE93-606332] p 3601 N93-30798
RADIATION DETECTORS
A compact imaging detector of polarization and spectral content p 3582 N93-28810
Smart skin structures for identifying and locating laser irradiation [DE93-005464] p 3436 N93-28887
Superconducting submillimeter and millimeter wave detectors [DE93-007656] p 3431 N93-29149
New Mexico Center for Particle Physics: Studies of fundamental interactions [DE93-008302] p 3566 N93-29261
Laser radiation detection system [AD-D015724] p 3438 N93-29287
Absorbed dose measurements and predictions on LDEF p 3573 N93-29636
Heavy ion measurement on LDEF p 3573 N93-29644
Progress report on the ultra heavy cosmic ray experiment (AO178) p 3654 N93-29646
Reaction mechanism studies of heavy ion induced nuclear reactions [DE93-010496] p 3569 N93-29807
RADIATION DISTRIBUTION
On the meaning of delta T/T [DE93-008482] p 3653 N93-28962
A study on radiation shielding analysis for toroidal field coils of a tokamak-type fusion reactor [DE93-753398] p 3585 N93-28981
Evaluation of multi-dimensional flux models for radiative transfer in cylindrical combustion chambers p 3257 N93-29955
Radiated fields from an electromagnetic pulse simulator p 3366 N93-30290
Computer-aided modeling for analysis of arbitrary scatterers and feeds p 3367 N93-30293
RADIATION DOSAGE
Radiation monitoring equipment dosimeter experiment p 3266 N93-28730
The meteorological database [DE93-007289] p 3481 N93-29054
Leaky coaxial cable signal transmission for remote facilities [DE93-007916] p 3383 N93-29348
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 2: Evaluation of modeling and simulation techniques for predicting radiation induced performance decrements [AD-A262872] p 3506 N93-29484
Revised prediction of LDEF exposure to trapped protons p 3572 N93-29633
A measurement of the radiation dose to LDEF by passive dosimetry p 3572 N93-29634
LDEF: Dosimetric measurement results (AO 138-7 experiment) p 3573 N93-29635
Absorbed dose measurements and predictions on LDEF p 3573 N93-29636
Light-heavy ion measurements in CR-39 located on the Earth side of LDEF p 3573 N93-29638
Development and application of a 3-D geometry/mass model for LDEF satellite ionizing radiation assessments p 3573 N93-29640
Radiation model predictions and validation using LDEF satellite data p 3573 N93-29641
Future directions for LDEF ionizing radiation modeling and assessments p 3573 N93-29642
Progress report on the ultra heavy cosmic ray experiment (AO178) p 3654 N93-29646
Radiation sensitivity of quartz crystal oscillators experiment for the Long Duration Exposure Facility (LDEF), part 2 p 3414 N93-29685
Test structure to microcircuit correlation [AD-A264157] p 3412 N93-30152
Radiation-hardened microwave communications system [DE93-007915] p 3394 N93-30631
Charge separation in bipolar transistors [DE93-009624] p 3413 N93-30650
Hardness assurance and testing issues for bipolar/BiCMOS devices [DE93-009623] p 3570 N93-30669
RADIATION EFFECTS
Neutron radiation induced degradation of diode characteristics [AD-A263277] p 3405 N93-28563
Enhancements of the critical currents of YBaCuO single crystals by neutron (n) and proton (p) irradiation [DE93-007892] p 3592 N93-28661
Transfer Orbit Plasma Interaction Experiment (TROPIX) p 3267 N93-28734
Gene transcription and electromagnetic fields [DE93-010854] p 3490 N93-28848
FNAS CRRES program completion [NASA-CR-192468] p 3476 N93-29032
Photobiological investigations on spores of streptomyces griseus [ESA-TT-1269] p 3491 N93-29274
Response of energetic solids to light, heat and shock pulses [AD-A263702] p 3342 N93-29296

Three-dimensional shielding effects on charged particle fluences measured in the P0006 experiment of LDEF p 3573 N93-29639

Radiation sensitivity of quartz crystal oscillators experiment for the Long Duration Exposure Facility (LDEF), part 2 p 3414 N93-29685

LEO effects on candidate solar cell cover materials p 3467 N93-29687

New results from FRECOPA analysis p 3448 N93-29688

Studies of effects on optical components and sensors: LDEF experiments AO-147 (ERB components) and S-0014 (APEX) p 3582 N93-29693

Effects of long term space environment exposure on optical substrates and coatings (S0050-2) p 3582 N93-29694

Characterization of a space orbited incoherent fiber optic bundle p 3583 N93-29698

Analyses of space environment effects on active fiber optic links orbited aboard the LDEF p 3583 N93-29699

Radiation and temperature effects on LDEF fiber optic samples p 3583 N93-29700

Final results of space exposed experiment developed for students p 3492 N93-29702

Continued results of the seeds in space experiment p 3492 N93-29703

Problems in the implementation of x ray optics with x ray lasers [DE93-009297] p 3438 N93-29781

Total dose tests for the PROMICS-3 instrument [VTT-TIED-1203] p 3411 N93-30108

Test structure to microcircuit correlation [AD-A264157] p 3412 N93-30152

Irradiation assisted stress corrosion cracking of stainless steel irradiated in FBR [DE93-764495] p 3326 N93-30191

Simulation of transient radiation effects on semiconductor devices using a pulsed Q-switched Nd:YAG laser p 3357 N93-30230

Transient field computations within or proximity of complex structures: FD-TD approach p 3366 N93-30292

Effects of device scaling and geometry on MOS radiation hardness assurance [DE93-009832] p 3413 N93-30516

Application of integral and differential equation methods for various EM interaction problems [AD-A264821] p 3394 N93-30597

Radiation effects in FCC metals and intermetallic compounds: A molecular dynamics computer simulation study [DE93-009546] p 3600 N93-30668

Hardness assurance and testing issues for bipolar/BiCMOS devices [DE93-009623] p 3570 N93-30669

Hard photon emission from high energy electrons and positrons in single crystals [DE93-606328] p 3600 N93-30770

Theoretical-experimental study of the non-thermal effects of the polarized laser radiation in living tissues [DE93-607212] p 3441 N93-30775

Mathematical simulation of the induced (gamma)-radiation in structural materials of spaceships. Time dependence [DE93-605312] p 3281 N93-31024

RADIATION HARDENING

Neutron radiation induced degradation of diode characteristics [AD-A263277] p 3405 N93-28563

High-performance visible/UV CCD focal plane technology for spacebased applications p 3434 N93-28771

SEU tolerant computer based on the R3000 [DE93-009294] p 3520 N93-29058

Test structure to microcircuit correlation [AD-A264157] p 3412 N93-30152

Simulation of transient radiation effects on semiconductor devices using a pulsed Q-switched Nd:YAG laser p 3357 N93-30230

Effects of device scaling and geometry on MOS radiation hardness assurance [DE93-009832] p 3413 N93-30516

Hardness assurance and testing issues for bipolar/BiCMOS devices [DE93-009623] p 3570 N93-30669

RADIATION HAZARDS

Radiated fields from an electromagnetic pulse simulator p 3366 N93-30290

RADIATION MEASUREMENT

Proceedings of the Second Atmospheric Radiation Measurement (ARM) Science Team Meeting [DE93-005886] p 3476 N93-28889

Clouds and radiation: A primier [AD-A263136] p 3482 N93-29479

A photon phreak digs the LDEF happening p 3572 N93-29629

A measurement of the radiation dose to LDEF by passive dosimetry p 3572 N93-29634

LDEF: Dosimetric measurement results (AO 138-7 experiment) p 3573 N93-29635

Absorbed dose measurements and predictions on LDEF p 3573 N93-29636

LET spectra measurements of charged particles in the P0006 experiment on LDEF p 3573 N93-29637

Development and application of a 3-D geometry/mass model for LDEF satellite ionizing radiation assessments p 3573 N93-29640

Future radiation measurements in low Earth orbit p 3654 N93-29708

The possible direct use of satellite radiance measurements by the Atmospheric Radiation Measurement Program [DE93-009819] p 3462 N93-30049

RADIATION MEASURING INSTRUMENTS

Lightweight modular instrumentation for planetary applications p 3286 N93-28787

RADIATION PROTECTION

Acid solution absorption of extruded polyethylene foam [DE93-011701] p 3330 N93-28839

Charge to frequency converter for ionization chambers belonging to the radiation protection system of AmPS/MEA [DIGEL-1991-6] p 3577 N93-30837

Electronics for a neutron detector and a Geiger-Mueller detector for the radiation protection around MEA and AmPS [DIGEL-1992-6] p 3413 N93-30838

RADIATION SHIELDING

A study on radiation shielding analysis for toroidal field coils of a tokamak-type fusion reactor [DE93-753398] p 3585 N93-28981

Modern Monte Carlo particle transport simulation for safety and radiation protection applications in accelerometer technology and in space science [JUEL-2609] p 3574 N93-29062

Regolith-structure modeling p 3276 N93-29116

Structural design of cryostat and port penetration of International Thermonuclear Experimental Reactor (ITER) [DE93-753267] p 3587 N93-29243

Absorbed dose measurements and predictions on LDEF p 3573 N93-29636

Light-heavy ion measurements in CR-39 located on the Earth side of LDEF p 3573 N93-29638

Three-dimensional shielding effects on charged particle fluences measured in the P0006 experiment of LDEF p 3573 N93-29639

Beta/gamma Monte Carlo transport in repetitive structures of satellite systems [DE93-007610] p 3281 N93-30509

RADIATION SOURCES

Development of high power microwave source [DE93-753316] p 3436 N93-28980

A novel approach for new radiation sources based on solid state plasma instabilities [AD-A263699] p 3588 N93-29382

ELF propagation in deep and shallow sea water p 3397 N93-30739

RADIATION SPECTRA

Development of a 9.3 micrometer CW LIDAR for the study of atmospheric aerosol [NASA-CR-193227] p 3381 N93-29105

RADIATION TOLERANCE

Spacecraft computer technology at Southwest Research Institute p 3522 N93-28813

Total dose tests for the PROMICS-3 instrument [VTT-TIED-1203] p 3411 N93-30108

Test structure to microcircuit correlation [AD-A264157] p 3412 N93-30152

RADIATION TRANSPORT

Proceedings of the Second Atmospheric Radiation Measurement (ARM) Science Team Meeting [DE93-005886] p 3476 N93-28889

Computational simulations of a soft x ray projection lithography laser plasma source [DE93-009625] p 3437 N93-29264

RADIATION TRAPPING

Radioactivities induced in some LDEF samples p 3572 N93-29628

Future directions for LDEF ionizing radiation modeling and assessments p 3573 N93-29642

RADIATIVE HEAT TRANSFER

Spherically symmetric model atmospheres for late-type giant stars [ISBN-0-315-72632-6] p 3633 N93-28673

Application of ray tracing in radiation heat transfer [NASA-TM-106206] p 3419 N93-29075

Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions [NASA-CR-193223] p 3604 N93-29168

Thermal certification tests of Orbiter Thermal Protection System tiles coated with KSC coating slurries [NASA-TM-104766] p 3278 N93-29221

The thermal structure, dust loading, and meridional transport in the Martian atmosphere during late southern summer p 3651 N93-29616

Evaluation of multi-dimensional flux models for radiative transfer in cylindrical combustion chambers p 3257 N93-29955

A stochastic formation of radiative transfer in clouds [DE93-011372] p 3484 N93-30055

RADIATIVE LIFETIME

Limits on neutrino radiative decay from SN1987A [NASA-CR-193262] p 3653 N93-29164

RADIATIVE RECOMBINATION

New III-V cell design approaches for very high efficiency [DE93-000097] p 3464 N93-28971

RADIATIVE TRANSFER

Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers [DE93-008706] p 3586 N93-29093

Stabilized platform for tethered balloon soundings of broadband long- and short-wave radiation [DE93-007876] p 3383 N93-29308

RTE: A UNIX library with on-line documentation and sample programs for microwave radiative transfer calculations [PB93-180248] p 3386 N93-29680

A stochastic formation of radiative transfer in clouds [DE93-011372] p 3484 N93-30055

A correlated k-distribution model of the atmospheric heating rates for overlapping spectra of CO2 and H2O [DE93-007391] p 3474 N93-30504

RADICALS

Laser spectroscopy of hydrocarbon radicals [DE93-012555] p 3436 N93-28653

Synthesis of oligoimides and oligoimide anion radicals [AD-A263129] p 3290 N93-29474

RADIO ANTENNAS

Widebanding techniques for VHF antennas 2 [AD-A263998] p 3387 N93-29882

Models for performance assessment of HF antennas on the CH-135/Twin Huey helicopter p 3366 N93-30291

VLF/LF transmitting antennas p 3398 N93-30747

Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753

RADIO COMMUNICATION

Activities report of PTT Research [ISBN-9-07-212514-2] p 3392 N93-30025

The 1992 World Administrative Radio Conference: Technology and Policy Implications [OTA-TCT-549] p 3392 N93-30150

Design issues and initial performance of an adaptive air/ground/air HF communication system p 3375 N93-30342

The evolution of global mobile communications p 3376 N93-30349

Introduction p 3395 N93-30728

Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729

VLF/LF propagation measurements p 3395 N93-30732

Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734

VLF/LF transmitting antennas p 3398 N93-30747

Study of a VLF distributed antenna array p 3398 N93-30749

Pattern measurements of US Navy ELF antennas p 3399 N93-30752

Viability assessment for reliable long-wave communication links p 3399 N93-30754

RADIO EMISSION

Distribution of dark matter in the galaxy and the lower limits for the masses of supersymmetric particles [BONN-92-31] p 3632 N93-28473

Multifractal analysis of radio lobes p 3380 N93-28689

Space optical and low-frequency radio searches for Earth-crossing asteroids and comets [DE93-008716] p 3634 N93-29246

RADIO EQUIPMENT

Using today's technology to improve mobile C4I for the operational commander [AD-A263613] p 3245 N93-29285

RADIO FREQUENCIES

Large amplitude striations in an RF discharge [DE93-753244] p 3379 N93-28534

Design and construction of a prototype ACTS propagation terminal [NASA-CR-193071] p 3404 N93-28539

Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801
Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830
Wideband propagation measurements for wireless indoor communication
[PB93-175123] p 3382 N93-29202
An RF driven H(-) source and a low energy beam injection system for RFQ operation
[DE93-010438] p 3575 N93-29302
Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317
The 1992 World Administrative Radio Conference: Technology and Policy Implications
[OTA-TCT-549] p 3392 N93-30150
High-speed, CMOS dual modulus frequency divider for RF frequency synthesis p 3359 N93-30245
High density plasma production in a multicusp plasma generator with RF antenna
[DE93-764493] p 3590 N93-30606

RADIO FREQUENCY DISCHARGE
Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534

RADIO FREQUENCY HEATING
Microwave processing of ceramics
[DE93-010708] p 3332 N93-29252
Fundamental studies of fusion plasmas
[DE93-013144] p 3589 N93-30189

RADIO FREQUENCY INTERFERENCE
ELF/VLF/LF Radio Propagation and Systems Aspects
[AGARD-CP-529] p 3394 N93-30727

RADIO GALAXIES
Multifractal analysis of radio lobes
p 3380 N93-28689

RADIO METEOROLOGY
Contributions to the American Meteorological Society's 26th International Conference on Radar Meteorology
[AD-A263385] p 3481 N93-29257

RADIO NAVIGATION
The Telecommunications and Data Acquisition Report
[NASA-CR-193144] p 3384 N93-29586

RADIO OBSERVATION
Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801

RADIO RECEIVERS
Design and construction of a prototype ACTS propagation terminal
[NASA-CR-193071] p 3404 N93-28539
Time delay measurements of current primary FAA air/ground transmitters and receivers
[DOT/FAA/CT-TN93/14] p 3379 N93-28555
Miniature modular microwave end-to-end receiver
[NASA-CASE-NPO-18713-1-CU] p 3381 N93-29087
Wideband propagation measurements for wireless indoor communication
[PB93-175123] p 3382 N93-29202
An adaptive maximum likelihood receiver for correlated Rayleigh fading channels p 3371 N93-30316
Embedded GPS: The Canadian Marconi approach
p 3247 N93-30330

RADIO SIGNALS
Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830
Effects of imbalances and DC offsets on I/Q demodulation
[AD-A264466] p 3393 N93-30537
Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729

RADIO SPECTRA
Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra
[DE93-008734] p 3481 N93-29095

RADIO STARS
GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars
[NASA-CR-193243] p 3635 N93-30053

RADIO TRACKING
Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777

RADIO TRANSMISSION
A comparison of trans-equatorial ionosphere propagation predictions from AMBCOM with measured data
[AD-A264006] p 3391 N93-29987
ELF/VLF/LF Radio Propagation and Systems Aspects
[AGARD-CP-529] p 3394 N93-30727
Introduction p 3395 N93-30728
Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734
Investigations of equatorial ionosphere nighttime mode conversion at VLF p 3396 N93-30735
Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737
VLF/LF transmitting antennas p 3398 N93-30747
Study of a VLF distributed antenna array
p 3398 N93-30749
Pattern measurements of US Navy ELF antennas
p 3399 N93-30752
Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

RADIO TRANSMITTERS
Time delay measurements of current primary FAA air/ground transmitters and receivers
[DOT/FAA/CT-TN93/14] p 3379 N93-28555
Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801
A dynamic bandwidth and phase linearity measurement technique for 4-channel MSK VLF antenna systems
p 3398 N93-30748
Study of a VLF distributed antenna array
p 3398 N93-30749
Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

RADIO WAVES
A computer simulation of the production of an artificially ionized layer using the Arecibo facility
[DE93-010817] p 3478 N93-30487
Investigations of equatorial ionosphere nighttime mode conversion at VLF p 3396 N93-30735
Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737
Studies of the propagation of Low Frequency (LF) radio waves p 3396 N93-30738
A methodology and tool for the prediction of depth of reception in the sea for a VLF/LF communications system p 3397 N93-30741

RADIOACTIVE DECAY
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969
Limits on neutrino radiative decay from SN1987A
[NASA-CR-193262] p 3653 N93-29164
Cosmogenic radionuclides on LDEF: An unexpected Be-10 result p 3573 N93-29643
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052
Study of heavy-flavored particles
[DE93-011535] p 3569 N93-30128
Partial cross sections in H(-) photodetachment
[DE93-011570] p 3569 N93-30130

RADIOACTIVE ISOTOPES
Research programs from the University of South Carolina on high energy physics
[DE93-007829] p 3574 N93-28969
Radioactivities induced in some LDEF samples
p 3572 N93-29628
A photon phreak digs the LDEF happening
p 3572 N93-29629
Charged particle activation studies on the surface of LDEF spacecraft p 3572 N93-29630
Induced activation study of LDEF
p 3572 N93-29632

RADIOACTIVE WASTES
Technical bases for precipitate hydrolysis process operating parameters, revision 1
[DE93-009894] p 3309 N93-28553
Hanford Environmental Information System (HEIS) user's manual, volume 1
[DE93-007465] p 3470 N93-29135
An architecture for robotic system integration
[DE93-010829] p 3444 N93-29316
The quality assurance liaison: Combined technical and quality assurance support
[DE93-008725] p 3450 N93-30636
Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances
[PB93-185551] p 3475 N93-30829
Statement on the United Nations Conference on Environment and Development
[DE93-601878] p 3475 N93-30996

RADIOACTIVITY
An experimental investigation of radioactivity induced by ions associated with the operation of pulsed-power accelerators
[DE93-011478] p 3575 N93-29151
Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626
Collection, analysis, and archival of LDEF activation data p 3624 N93-29631
Induced activation study of LDEF
p 3572 N93-29632

RADIOBIOLOGY
Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730

RADIOCHEMISTRY
DOE fundamentals handbook: Chemistry
[DE93-012222] p 3314 N93-30198

RADIOGENIC MATERIALS
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405

RADIOGRAPHY
Flash x ray system: Techniques and applications
[DE93-011477] p 3430 N93-28645

RADIOMETERS
Stabilized platform for tethered balloon soundings of broadband long- and short-wave radiation
[DE93-007876] p 3383 N93-29308
Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448
Physics laboratory technical activities, 1992
[PB93-178648] p 3561 N93-30888

RADIOMETRIC CORRECTION
Preprocessing airborne remote sensing PARES calibration maintenance functional design document
[BCRS-92-07] p 3460 N93-29321

RADIOSONDES
Leadex data report. Part 2: Rawinsonde and ice station data
[AD-A263218] p 3483 N93-29491
Wind measurement accuracy of a loran radiosonde
[AD-A263572] p 3483 N93-29832

RAIL TRANSPORTATION
Guideway structural design and power/propulsion/braking in relation to guideways, volume 1
[PB93-169902] p 3447 N93-30820
Determination of low frequency reference slipping for high frequency unstationary motion processes
[ILR-MITT-273(1992)] p 3455 N93-31017

RAILGUN ACCELERATORS
Two-dimensional model for current and heat transport in solid-armature railguns
[AD-A262014] p 3271 N93-29394

RAIN
Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448

RAIN FORESTS
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648

RAMAN SPECTRA
Aerosol particle analysis by Raman scattering technique
[DE93-005587] p 3309 N93-28880
Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid
[DE93-007362] p 3593 N93-28966
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
In-situ temperature and concentration measurements of organosilicon decomposition in a chemical vapor deposition reactor
[ONERA-P-1990-3] p 3313 N93-30109
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162
Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501
Measurement of the rotation Raman spectra of nitrogen, oxygen, and water vapor under conditions of a temperature humidity lidar
[GKSS-92/E/32] p 3485 N93-31018

RAMAN SPECTROSCOPY
Aerosol particle analysis by Raman scattering technique
[DE93-005587] p 3309 N93-28880
Characterization of lithium electrode surface in lithium secondary batteries by in situ Raman spectroscopic methods
[AD-A263728] p 3411 N93-29986
Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR)
[DE93-753349] p 3576 N93-30006
Vibrational spectroscopy of shock-compressed fluids
p 3318 N93-30072
Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569

RAMJET ENGINES
Flight mechanical model for performance calculations and interactions between flight vehicle and ramjet in regard to the flight orbit
[ESA-TT-1267] p 3248 N93-29464
RANDOM ACCESS
NESL: A nested data-parallel language (Version 2.6)
[AD-A263548] p 3530 N93-29822
Comparison of two random access techniques for the North American MSAT system p 3370 N93-30315
RANDOM ACCESS MEMORY
Generation of configurable self-synchronizing synchronous CMOS static RAMs p 3361 N93-30259
RANDOM ERRORS
Tolerance theory of phased array antennas: A statistical approach p 3369 N93-30307
The characterization of materials using x ray diffraction p 3293 N93-30968
RANDOM NOISE
Theory and applications of random fields
[AD-A262829] p 3555 N93-29454
Enhanced convergence adaptive detection
[AD-A264100] p 3399 N93-30879
RANDOM PROCESSES
Selection and transmission of information. Issue 22: Republic interdepartmental collection (selected articles)
[AD-A262825] p 3615 N93-29431
Theory and applications of random fields
[AD-A262829] p 3555 N93-29454
RANDOM SAMPLING
A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845
RANDOM VARIABLES
Selection and transmission of information. Issue 22: Republic interdepartmental collection (selected articles)
[AD-A262825] p 3615 N93-29431
Theory and applications of random fields
[AD-A262829] p 3555 N93-29454
RANGE RESOURCES
Estimating test range capacity
[AD-A262493] p 3270 N93-28938
RANGE SAFETY
SeaWiFS technical report series. Volume 2: Analysis of orbit selection for SeaWiFS: Ascending versus descending node
[NASA-TM-104566-VOL-2] p 3486 N93-28497
RANGEFINDING
Neural networks application to divergence-based passive ranging
[NASA-TM-103981] p 3245 N93-29653
Wind measurement accuracy of a loran radiosonde
[AD-A263572] p 3483 N93-29832
A single band processor for the computation of range from optical absorbance p 3363 N93-30272
RANKINE-HUGONIOT RELATION
Nonlinear stability of viscous shock waves
[TRITA-NA-9205] p 3419 N93-29025
RAPID TRANSIT SYSTEMS
Guideway structural design and power/propulsion/braking in relation to guideways, volume 1
[PB93-169902] p 3447 N93-30820
RARE GASES
The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380
RATES (PER TIME)
Rate constant determinations of reactions H + HNO from ab initio reaction path calculations
p 3319 N93-30099
RATINGS
Determinants of performance rating accuracy: A field study
[AD-A264726] p 3500 N93-30575
Discomfort glare from high-intensity discharge headlamps: Effects of context and experience
[PB93-174720] p 3496 N93-30659
RATIONAL FUNCTIONS
The generic arithmetic of SISYPHE
[INRIA-RT-0136] p 3524 N93-28755
RATS
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153
An assessment of peripheral nerve damage in the rat following non-freezing cold exposure: An electrophysiological and histopathological examination
[AD-A264293] p 3492 N93-30818
RAWINSONDES
Leadex data report. Part 1: Weather analysis and satellite images
[AD-A263217] p 3481 N93-28876
Leadex data report. Part 2: Rawinsonde and ice station data
[AD-A263218] p 3483 N93-29491
RAY TRACING
Application of ray tracing in radiation heat transfer
[NASA-TM-106206] p 3419 N93-29075
Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252
USU center of excellence in theory and analysis of the geo-plasma environment
[AD-A264750] p 3590 N93-30585
RAYLEIGH NUMBER
A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214
RAYLEIGH SCATTERING
SWAT system performance predictions
[AD-A262857] p 3579 N93-29470
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162
RAYLEIGH-BENARD CONVECTION
A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214
RAYLEIGH-RITZ METHOD
A Rayleigh-Ritz analysis methodology for cutouts in composite structures p 3307 N93-30869
RDX
Thermal decomposition of nitramines
p 3318 N93-30065
Observation of reaction intermediates in crystalline RDX p 3318 N93-30067
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069
Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080
Thermal decomposition pathways of RDX in the condensed phase p 3347 N93-30083
Dislocation roles in energetic crystal responses
p 3348 N93-30086
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
Applications of density functional theory to calculation of reaction energetics p 3351 N93-30098
REACTING FLOW
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
An adaptive Lagrangian method for computing 1-D reacting flows and the theory of Riemann invariant manifolds for the compressible Euler equations
p 3428 N93-30902
REACTION KINETICS
Explosive consolidation of combustion synthesized TiC and TiB2: Precursor morphology effects
[AD-A263186] p 3341 N93-28515
A study of the chemical mechanism in lubrication
[DE93-012230] p 3330 N93-28650
Supported organometallic complexes, surface chemistry, spectroscopy, and catalysis
[DE93-011930] p 3309 N93-28688
Quantum dynamics of X2BC van der Waals clusters
[DE93-006416] p 3565 N93-28892
Membrane-based photochemical systems as models for photosynthetic cells
[DE93-009758] p 3310 N93-28911
Studies of hydrogen-air diffusion flames and of compressibility effects related to high-speed propulsion
p 3310 N93-29125
Generation of carbon monoxide in compartment fires
[PB93-146702] p 3244 N93-29211
Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284
Kinetics of nitric oxide formation behind 3 to 4 KM/S shock waves
[AD-A263653] p 3312 N93-29389
Rates and mechanisms of reaction of hydrogen sulfide with iron chelates
[PB93-184299] p 3312 N93-29665
Some effects of composition and microstructure on the B2 in equilibrium to DO3 ordered phase transition in Fe3Al alloys
[DE93-009724] p 3325 N93-29813
Calculations of reactive turbulent flows in aeronautical chambers p 3257 N93-29956
Kinetics and dynamics of reacting systems
[AD-A264046] p 3313 N93-30030
ONR/LANL Workshop on the Fundamental Physics and Chemistry of Combustion, Initiation, and Detonation of Energetic Materials
[CPIA-PUBL-589] p 3343 N93-30061
Combustion/explosion chemistry of bulk materials
p 3343 N93-30062
The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials
p 3343 N93-30063
Thermal oxidation of HCN by NO2 in shock waves
p 3318 N93-30064
Chemical dynamics simulations as a probe to the initiation and propagation of condensed phase detonations p 3318 N93-30071
Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079
Pressure dependence of the reaction propagation rate of TATB to 40 GPa p 3319 N93-30082
Thermal decomposition pathways of RDX in the condensed phase p 3347 N93-30083
Kinetic studies on gas-phase reaction mechanisms important to the combustion of energetic materials: The CO/N2O reaction p 3347 N93-30084
Unsteady combustion of energetic materials using laser-recoil p 3319 N93-30085
Detonation shock dynamics of composite energetic materials p 3350 N93-30096
Rate constant determinations of reactions H + HNO from ab initio reaction path calculations
p 3319 N93-30099
Studies of curvature, strain, and unsteady effects on premixed flames p 3316 N93-30646
NOx chemistry in natural gas flames
[PB93-175263] p 3317 N93-30760
REACTION PRODUCTS
A study of the chemical mechanism in lubrication
[DE93-012230] p 3330 N93-28650
High pressure preignition chemistry of hydrocarbons and hydrocarbon mixtures
[AD-A263611] p 3311 N93-29283
Charged particle activation studies on the surface of LDEF spacecraft p 3572 N93-29630
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807
Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080
Materials studies for preventing corrosion in condensing environments
[PB93-185478] p 3327 N93-30815
REACTION TIME
Two simulation studies of precision runway monitoring of independent approaches to closely spaced parallel runways
[AD-A263433] p 3261 N93-29815
REACTIVITY
Elastic and reactive collisions of atoms and molecules with neutral alkali clusters
[DE93-009313] p 3566 N93-29206
Applications of transition metal compounds in the preparation of useful silicon-containing ceramics
[AD-A264028] p 3335 N93-30028
Kinetics and dynamics of reacting systems
[AD-A264046] p 3313 N93-30030
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100
Reactive sintering of Ni3Al intermetallic alloys under compressive stress
[DE93-009729] p 3327 N93-30652
REACTOR DESIGN
Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004
SIRIUS-P: An inertially confined direct drive laser fusion power reactor
[DE93-012433] p 3439 N93-30186
Preliminary design study of a steady state tokamak device
[DE93-764162] p 3589 N93-30397
REACTOR MATERIALS
Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839
An experimental investigation of radioactivity induced by ions associated with the operation of pulsed-power accelerators
[DE93-011478] p 3575 N93-29151
Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004
DOE fundamentals handbook: Material science
[DE93-012224] p 3314 N93-30199
DOE fundamentals handbook: Material science
[DE93-012225] p 3314 N93-30200
Examination of formability to seamless tubes on Ni-Cr-W superalloy
[DE93-764158] p 3326 N93-30396

Development of Ni-Cr-W superalloys for high temperature components in high temperature gas-cooled reactors, part 2
[DE93-764469] p 3326 N93-30399

REACTOR PHYSICS

Wavelet transform techniques and signal analysis
[DE93-007919] p 3382 N93-29244

Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

REACTOR SAFETY

Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design
[DE93-753270] p 3584 N93-28535

Acid solution absorption of extruded polyethylene foam
[DE93-011701] p 3330 N93-28839

Inservice diagnostic methods for solenoid-operated valves
[DE93-007823] p 3443 N93-28968

Annual progress report on the NSRR experiments, (21)
[DE93-753190] p 3574 N93-29137

TRAB: A transient analysis program for BWR. Part 2: User's manual
[VTT-TIED-1232-PT-2] p 3575 N93-29996

Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR)
[DE93-753349] p 3576 N93-30006

Statement on the United Nations Conference on Environment and Development
[DE93-601878] p 3475 N93-30996

REACTOR TECHNOLOGY

Fast neutron cross section measurements
[DE93-009053] p 3563 N93-28546

READING

Expertise, text coherence, and constraint satisfaction: Effects on harmony and settling rate --- mental representations
[AD-A262703] p 3498 N93-28901

Profiles of major federal literacy programs
[PB93-163863] p 3608 N93-30657

READOUT

Associative memories for supercomputers
[AD-A263142] p 3520 N93-29482

Design of a pixel cell optimized for a data push architecture readout
[DE93-011016] p 3616 N93-30122

REAL GASES

Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model
[NASA-CR-4515] p 3420 N93-29159

Hypersonic lateral and directional stability characteristics of aeroassist flight experiment configuration in air and CF4
[NASA-TM-4435] p 3239 N93-29166

REAL TIME OPERATION

Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730

Near real-time GIS in deep-ocean exploration
[AD-A262073] p 3487 N93-29003

Improved real-time imaging spectrometer
[NASA-CASE-NPO-18410-1-CU] p 3578 N93-29086

Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A263076] p 3382 N93-29131

Resource utilization model for the algorithm to architecture mapping model
[NASA-CR-193122] p 3527 N93-29171

Building a generalized distributed system model
[NASA-CR-193239] p 3527 N93-29219

SPREE Interactive Data Analysis Tool (SIDAT)
[AD-A262782] p 3273 N93-29306

Research on reconfigurable and reliable manipulators
[DE93-010244] p 3444 N93-29330

Real time self-directed MBE flux control incorporation in situ ellipsometry, phase 1
[AD-A263501] p 3595 N93-29341

Operating manual for single-shot autocorrelator
[AD-A262016] p 3438 N93-29395

A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle
[AD-A262477] p 3248 N93-29409

Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A262966] p 3384 N93-29514

A neuro-fuzzy architecture for real-time applications
p 3511 N93-29529

Designing a fuzzy scheduler for hard real-time systems p 3512 N93-29537

Intelligent fuzzy controller for event-driven real time systems p 3515 N93-29551

Special purpose parallel computer architecture for real-time control and simulation in robotic applications
[NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608

Development of neural network architectures for self-organizing pattern recognition and robotics
[AD-A264831] p 3543 N93-29791

Two simulation studies of precision runway monitoring of independent approaches to closely spaced parallel runways
[AD-A263433] p 3261 N93-29815

Three-dimensional graphical representation of objects according to movement data in realtime
[ESA-TT-1258] p 3521 N93-30104

A parallel processing system for intensive I/O
p 3362 N93-30262

A multiprocessor architecture for realtime robot control p 3372 N93-30327

Issues of ATC conflict resolution under real-time constraints p 3247 N93-30350

A video transmission system for low-bandwidth remote driving
[DE93-010275] p 3544 N93-30529

Intelligent real-time problem solving
[AD-A264830] p 3535 N93-30614

RECEIVERS

Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A263161] p 3406 N93-28940

Optical coherent phase diversity systems
[ISBN-90-9004897-9] p 3578 N93-29270

Acoustic transducer system
[AD-D015713] p 3562 N93-29279

Attitude determination using GPS: Development of an all solid-state guidance, navigation, and control sensor for air and space vehicles based on the global positioning system p 3246 N93-30605

A long wave TE/TM noise prediction model
p 3397 N93-30742

RECEPTORS (PHYSIOLOGY)

Principal components of natural images: An analytical solution
[AD-A264800] p 3489 N93-30603

RECLAMATION

Polymeric materials for use in wet hydrochloric acid environments
[DE93-010881] p 3330 N93-28600

RECOIL IONS

Measurement of 1s2s(sup 3)S(sub 1)-1s2p(sup 3)P(sub 2,0) intervals in helium-like neon
[DE93-009243] p 3563 N93-28521

RECONNAISSANCE AIRCRAFT

High-altitude reconnaissance aircraft
p 3227 N93-29713

RECORDING INSTRUMENTS

The NT digital micro tape recorder
p 3435 N93-30461

RECRYSTALLIZATION

Environmental embrittlement of binary and Zr-doped Ni3Al
[DE93-008575] p 3321 N93-28679

Constitutive laws for deformation and dynamic recrystallization in cubic metals
[DE93-010740] p 3326 N93-30486

RECTANGULAR PANELS

A Rayleigh-Ritz analysis methodology for cutouts in composite structures p 3307 N93-30869

RECTIFICATION

Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096

RECURSIVE FUNCTIONS

Iterative encoding methods for computer generated holograms
[AD-A263705] p 3431 N93-29297

RED SHIFT

GRO: Red-shifted electron-positron annihilation gamma-rays from radiopulsars
[NASA-CR-193243] p 3635 N93-30053

REDUCED GRAVITY

Preliminary endurance tests of water vaporizers for resistojet applications
[NASA-TM-106222] p 3287 N93-28694

The MODE family of facility class experiments
p 3263 N93-28705

Vented Tank Resupply Experiment (VTRE) for In-Space Technology Experiment Program (IN-STEP)
p 3264 N93-28711

Tank Pressure Control Experiment/Thermal Phenomena (TPCE/TP) p 3264 N93-28713

Sodium-Sulfur Cell Technology flight experiment (SSCT) p 3264 N93-28715

Thermal energy storage flight experiment in microgravity p 3265 N93-28720

Cryogenic Heat Pipe Experiment (CRYOHP)
p 3265 N93-28721

Heat pipe performance experiment
p 3265 N93-28722

Measurement of the relative and absolute microgravity environment of space platforms, recent flight results, and determination of the spatial microgravity field
p 3266 N93-28725

Effect of microgravity on several visual functions during STS Shuttle missions: Visual Function Tester-Model 1 (VFT-1) p 3268 N93-28740

Effect of microgravity on visual contrast threshold during STS Shuttle missions: Visual Function Tester-Model 2 (VFT-2) p 3268 N93-28741

Effect of microgravity on the visual near point: Visual Function Tester-Model 4 (VFT-4) p 3268 N93-28742

NASA supporting studies for microgravity research on eye movements
[NASA-CR-193233] p 3493 N93-29041

Anthropometric data from launch and entry suited test subjects for the design of a recumbent seating system
[NASA-TM-104769] p 3505 N93-29044

Gravity sensitivity of a resistojet water vaporizer
[NASA-TM-106220] p 3288 N93-29194

Issues on human acceleration tolerance after long-duration space flights
[NASA-TM-104753] p 3495 N93-29651

A high-temperature furnace for applications in microgravity p 3229 N93-29723

Rotational fluid flow experiment p 3235 N93-29761

Planar reorientation of a free-free beam in space using embedded electromechanical actuators
p 3280 N93-29993

Residual acceleration data on IML-1: Development of a data reduction and dissemination plan
[NASA-CR-193224] p 3281 N93-30038

The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376

Prediction of gas-liquid two-phase flow regime in microgravity
[NASA-TM-106274] p 3352 N93-30939

Effects of buoyancy on gas jet diffusion flames
[NASA-CR-191109] p 3352 N93-31031

REDUCTION (CHEMISTRY)

The electrolyte factor in O2 reduction electrocatalysis
[AD-A263565] p 3313 N93-29828

REDUNDANCY

Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210

REDUNDANCY ENCODING

Compiler-assisted multiple instruction rollback recovery using a read buffer
[NASA-CR-193175] p 3527 N93-29170

REDUNDANT COMPONENTS

Analysis of cache for streaming tape drive
p 3435 N93-30477

REENTRY SHIELDING

Thermal certification tests of Orbiter Thermal Protection System tiles coated with KSC coating slurries
[NASA-TM-104766] p 3278 N93-29221

REENTRY VEHICLES

The infrared measurement for the reentry-body-translation
[AD-A263100] p 3278 N93-29134

Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284

Taurus Lightweight Manned Spacecraft Earth orbiting vehicle p 3231 N93-29736

REFERENCE ATMOSPHERES

Graphical comparison of U.S. standard atmospheres and military standard climatic extremes
[AD-A264639] p 3484 N93-30521

REFILLING

Vented Tank Resupply Experiment (VTRE) for In-Space Technology Experiment Program (IN-STEP)
p 3264 N93-28711

REFLECTANCE

Texturing of InP surfaces for device applications
[NASA-TM-106061] p 3321 N93-28618

Infrared rugates by molecular beam epitaxy
p 3582 N93-28808

Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059

Maximum and minimum return losses from a passive two-port network terminated with a mismatched load
p 3385 N93-29594

High resolution free-electron laser spectroscopy
[AD-A263734] p 3439 N93-29853

A variable reflectivity output coupler for optically pumped far infrared lasers
[MPE-PREPRINT-225] p 3441 N93-30640

REFLECTOR ANTENNAS

A satellite-tracking millimeter-wave reflector antenna system for mobile satellite-tracking
[NASA-CASE-NPO-18772-1-CU] p 3381 N93-28955

System overview on electromagnetic compensation for reflector antenna surface distortion [NASA-TM-106217] p 3273 N93-29195

Planar microstrip YAGI antenna array [NASA-CASE-NPO-17873-2-CU] p 3384 N93-29507

A note on the computation of antenna-blocking shadows p 3385 N93-29593

Maximum and minimum return losses from a passive two-port network terminated with a mismatched load p 3385 N93-29594

REFLECTORS

Infrared rugates by molecular beam epitaxy p 3582 N93-28808

Maximum and minimum return losses from a passive two-port network terminated with a mismatched load p 3385 N93-29594

REFRACTION

Enhanced photorefractive effects in barium titanate [AD-A264724] p 3599 N93-30554

REFRACTIVITY

Infrared rugates by molecular beam epitaxy p 3582 N93-28808

Investigations of self-pumped phase conjugate laser beams and coherence length [AD-A263438] p 3438 N93-29789

Atmospheric transverse coherence length measurement system for laser communications [AD-A263563] p 3439 N93-29827

Physical chemical studies on molecular composite compositions [AD-A264834] p 3339 N93-30898

REFRACTORIES

A transient FGM interlayer based approach to joining ceramics [DE93-010415] p 3331 N93-29248

Interfacial studies of refractory glass-ceramic matrix/advanced SiC fiber reinforced composites [AD-A263264] p 3299 N93-29802

REFRACTORY MATERIALS

Soft computing in design and manufacturing of advanced materials [NASA-TM-106032] p 3295 N93-28624

Interfacial studies of refractory glass-ceramic matrix/advanced SiC fiber reinforced composites [AD-A263264] p 3299 N93-29802

Carborane-(silane or siloxane)-unsaturated hydrocarbon based thermosetting polymers [AD-D015718] p 3338 N93-30580

Carborane-(siloxane or silane)-unsaturated hydrocarbon based polymers [AD-D015717] p 3338 N93-30586

REFRACTORY METALS

Refractory metal disilicides research [AD-A262416] p 3320 N93-28499

REFRIGERANTS

Complex-compound heat pump: Topical report on phase 1 results [PB93-185460] p 3466 N93-30814

Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures [PB93-178598] p 3475 N93-30887

REFRIGERATING

Hybrid oxygen system [AD-A262417] p 3500 N93-28464

Spaceborne passive radiative cooler p 3378 N93-28802

REFRIGERATORS

Advanced insulations for refrigerator/freezers: The potential for new shell designs incorporating polymer barrier construction [DE93-010600] p 3353 N93-28570

Theoretical and experimental study of thermoacoustic engines [AD-A261934] p 3561 N93-28995

REFUELING

Aircraft and refueler bonding and grounding study [AD-A262027] p 3261 N93-29398

REGOLITH

Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770

Lunar regolith densification p 3276 N93-29115

Regolith-structure modeling p 3276 N93-29116

Lunar regolith penetrators and cutters p 3276 N93-29117

Indigenous lunar construction materials p 3277 N93-29120

Systems engineering studies of lunar base construction p 3277 N93-29121

REGRESSION ANALYSIS

A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis [AD-A262516] p 3554 N93-28844

Pilot Candidate Selection Method (PCSM): What makes it work? [AD-A262871] p 3498 N93-29481

Fuzzy multiple linear regression: A computational approach p 3518 N93-29574

Chromatographic and solvatochromic measurements on butyl rubbers [AD-A263088] p 3334 N93-29795

Easy-to-apply results for establishing convergence of Markov chains in Bayesian analysis [AD-A264015] p 3555 N93-29979

Procedures for applying Ada quality prediction models [AD-A264730] p 3534 N93-30546

REGULATIONS

Evaluation of environmental marketing terms in the United States [PB93-175784] p 3474 N93-30660

REINFORCED PLASTICS

Effect of water immersion on fiber/matrix adhesion in thermoplastic composites [AD-A263646] p 3299 N93-29984

REINFORCEMENT (STRUCTURES)

Development of stitching reinforcement for transport wing panels p 3304 N93-30852

REINFORCING FIBERS

Aligned, short-fiber composites by novel flow processing methods [DE93-008701] p 3296 N93-28904

Interfacial studies of refractory glass-ceramic matrix/advanced SiC fiber reinforced composites [AD-A263264] p 3299 N93-29802

Effect of water immersion on fiber/matrix adhesion in thermoplastic composites [AD-A263646] p 3299 N93-29984

REINFORCING MATERIALS

Lightweight flexible composite tent materials [AD-A263021] p 3295 N93-28660

The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites [AD-A263567] p 3334 N93-29829

RELATIVISTIC EFFECTS

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program [NASA-CR-193263] p 3460 N93-29179

RELATIVISTIC ELECTRON BEAMS

Measurements of the energy spectrum of an intense microsecond relativistic electron beam in the beam-plasma experiments using a multi-foil analyzer [DE93-606271] p 3590 N93-30768

Microwave emission from relativistic electron beams [AD-A264102] p 3400 N93-30880

Microsecond ribbon relativistic electron beam in a plane undulator and generation of microwave radiation [DE93-605693] p 3400 N93-30993

RELATIVISTIC PARTICLES

Reaction mechanism studies of heavy ion induced nuclear reactions [DE93-010496] p 3569 N93-29807

Invariant structures and static forces in gauge theories [DE92-644740] p 3607 N93-30925

RELATIVISTIC THEORY

An algebraic approach to the quantization of constrained systems: Finite dimensional examples p 3548 N93-28671

Modern approach to relativity theory (radar formulation) [DE93-606032] p 3606 N93-30804

On the energy-momentum tensors for field theories in spaces with affine connection and metric [DE92-644744] p 3557 N93-30927

Fourth-rank cosmology [DE92-641346] p 3637 N93-30997

RELATIVISTIC VELOCITY

A new exact solution to the classical equations of motion of the relativistic string with massive ends [DE92-644736] p 3557 N93-30922

Some problems of relativistic electrodynamics [DE92-644738] p 3400 N93-30923

RELATIVITY

An algebraic approach to the quantization of constrained systems: Finite dimensional examples p 3548 N93-28671

Topics in General Relativity theory: Gravitational-wave measurements of black-hole parameters; gravitational collapse of a cylindrical body; and classical-particle evolution in the presence of closed, timelike curves p 3603 N93-28690

Investigation of a geodesy coexperiment to the Gravity Probe B relativity gyroscope program [NASA-CR-193263] p 3460 N93-29179

A covariant form of the Maxwell's equations in four-dimensional spaces with an arbitrary signature [DE93-606070] p 3605 N93-30783

Geometrical approach to the dynamics of a relativistic string in the D-dimensional Minkowski space [DE93-606071] p 3605 N93-30784

On the photonic chiral anomaly in an external gravitational field [DE93-606082] p 3479 N93-30785

Beyond two dimensions [DE93-606084] p 3606 N93-30786

Modern approach to relativity theory (radar formulation) [DE93-606032] p 3606 N93-30804

A simple formula for reducing Feynman diagrams to scalar integrals [DE92-644717] p 3607 N93-30916

Fourth-rank gravity and cosmology [DE92-644722] p 3637 N93-30918

Some problems of relativistic electrodynamics [DE92-644738] p 3400 N93-30923

On the energy-momentum tensors for field theories in spaces with affine connection and metric [DE92-644744] p 3557 N93-30927

Relativity theory in (2 + 2)-space [DE92-644671] p 3608 N93-30983

Spherically symmetric line element and Killing vectors in five-dimensional space [DE93-604132] p 3558 N93-30988

The geometry of complex space-times with torsion [DE92-641343] p 3608 N93-31003

RELAXATION (MECHANICS)

Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays [DE93-008713] p 3593 N93-29094

Anelastic relaxations associated with local disordering in grain boundaries [AD-A263101] p 3596 N93-29796

Electrical relaxation in acid-form nafion [AD-A263558] p 3410 N93-29826

Fundamental studies of the mechanical behavior of microelectronics thin film materials [AD-A264334] p 3337 N93-30417

RELAXATION METHOD (MATHEMATICS)

Image classification using Markov random fields with two new relaxation methods: Deterministic pseudo annealing and modified metropolis dynamics [INRIA-RR-1606] p 3553 N93-28510

RELAXATION TIME

Isothermal annealing and relaxation of the second harmonic generation signal from a nonlinear optical polymer [AD-A262007] p 3333 N93-29442

RELIABILITY

Reliability assessment at airline inspection facilities. Volume 2: Protocol for an eddy current inspection reliability experiment [DOT/FAA/CT-92/12-VOL-2] p 3449 N93-28685

Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA [DE93-001923] p 3505 N93-28942

Using today's technology to improve mobile C4I for the operational commander [AD-A263613] p 3245 N93-29285

Tutorial: Performance and reliability in redundant disk arrays p 3537 N93-30463

Striped tertiary storage arrays p 3620 N93-30464

Optimizing digital 8mm drive performance p 3435 N93-30479

RELIABILITY ANALYSIS

Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA [DE93-001923] p 3505 N93-28942

Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques [NASA-CR-190785] p 3288 N93-29068

Efficient algorithms for the evaluation of planar network reliability [AD-A263602] p 3531 N93-29916

Multiprocessing systems: Reliability modelling and analysis using multimode components and dependent failures [AD-A264230] p 3540 N93-30364

Using Penelope to assess the correctness of NASA Ada software: A demonstration of formal methods as a counterpart to testing [NASA-CR-4509] p 3533 N93-30380

RELIABILITY ENGINEERING

Development of an updated pinch-welding capability [DE93-009823] p 3442 N93-28552

Using Penelope to assess the correctness of NASA Ada software: A demonstration of formal methods as a counterpart to testing [NASA-CR-4509] p 3533 N93-30380

Steps required in the pursuit of quantitative risk management processes for high pressure systems [DE93-007586] p 3378 N93-30508

REMANENCE

Modification of the S-band phase shifter model 331A-3 of Electromagnetic Sciences Inc. [DIGEL-1992-5] p 3399 N93-30836

REMODULATION
Design and integration of high bit rate four phase monolithic demodulators and modulators at X band
[LAAS-92354] p 3414 N93-31030
REMOTE CONTROL
Development and testing of the Perseus proof-of-concept aircraft
[DE93-010121] p 3247 N93-28586
A study of the effects of lens focal length on remote driver performance
[AD-A263191] p 3505 N93-28941
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Research on reconfigurable and reliable manipulators
[DE93-010244] p 3444 N93-29330
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
Security of the remote control link of Anik E satellites
p 3365 N93-30282
A video transmission system for low-bandwidth remote driving
[DE93-010275] p 3544 N93-30529
Graphical programming: On-line robot simulation for telerobotic control
[DE93-009796] p 3447 N93-30654
REMOTE HANDLING
New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583
Robotics and artificial intelligence for hazardous environments
[DE93-008271] p 3541 N93-29047
Structural design of cryostat and port penetration of International Thermonuclear Experimental Reactor (ITER)
[DE93-753267] p 3587 N93-29243
Research on reconfigurable and reliable manipulators
[DE93-010244] p 3444 N93-29330
Leaky coaxial cable signal transmission for remote facilities
[DE93-007916] p 3383 N93-29348
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
Radiation-hardened microwave communications system
[DE93-007915] p 3394 N93-30631
REMOTE MANIPULATOR SYSTEM
Multivariable control of the Space Shuttle Remote Manipulator System using linearization by state feedback
[NASA-CR-188248] p 3443 N93-29080
A functional system architecture for fully autonomous robot p 3370 N93-30311
Joint drive development for the Space Station Remote Manipulator System p 3370 N93-30313
REMOTE SENSING
SeaWiFS technical report series. Volume 6: SeaWiFS technical report series cumulative index: Volumes 1-5
[NASA-TM-104566-VOL-6] p 3486 N93-28500
Preprocessing remotely-sensed data for efficient analysis and classification
[DE93-007367] p 3611 N93-28580
Results from the US/Russian Meteor-3/Total Ozone Mapping Spectrometer
[NASA-TM-104576] p 3467 N93-28682
Polarimetric multispectral imaging technology
p 3434 N93-28774
Imaging spectrometers using concave holographic gratings p 3434 N93-28783
Optical technologies for UV remote sensing instruments p 3582 N93-28788
Remote measurement of planetary magnetic fields by the Hanle effect p 3645 N93-28793
Filtering interpolators for image comparison algorithms
p 3463 N93-28797
Use of particle beams for lunar prospecting
p 3650 N93-28822
A team approach to the development of gamma ray and x ray remote sensing and in situ spectroscopy for planetary exploration missions p 3650 N93-28824
Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR)
[DLR-MITT-92-09] p 3456 N93-28915
The German PAF (Processing and Archiving Facilities) for ERS-1 p 3457 N93-28916
Processing of altimeter data by the German ERS-1 Processing and Archiving Facility (D-PAF)
p 3457 N93-28917
Exact trajectory determinator for ERS-1
p 3457 N93-28918
The interferometric SAR technology and its usability in the framework of ERS-1 p 3457 N93-28919
Recording of forest surface in SAR-images with statistical methods in areas of pronounced relief
p 3457 N93-28920
Forest examination with polarimetric radar image data
p 3457 N93-28921
Remote sensing of agricultural vegetation: Status and perspectives p 3458 N93-28922
SAR shape-from-shading for a populated alpine area
p 3458 N93-28923
Fog studies in the Alpine region with digital NOAA/AVHRR data p 3458 N93-28925
Utilization of NOAA/AVHRR data for energy balance of Lake Constance (Switzerland) p 3458 N93-28926
Model-oriented correction of thematic mapper raw data p 3459 N93-28930
Evidence-based classification of satellite image data
p 3459 N93-28931
Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results
[AD-A261939] p 3486 N93-28996
Earth observation from space: Competition or cooperation?
[AD-A262044] p 3459 N93-29000
Fiber grating-based sensing system with interferometric wavelength-shift detection
[AD-D015697] p 3577 N93-29038
Remote sensing survey of Mississippi River-Gulf Outlet, Breton Sound disposal area, Plaquemines Parish, Louisiana
[AD-A263097] p 3459 N93-29146
Geographic information system for fusion and analysis of high-resolution remote sensing and ground truth data
p 3614 N93-29234
Spatial Analysis and Modeling Systems (SAMS)
p 3614 N93-29239
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Information system for co-registration of CAESAR sea-images based on two dimensional image matching techniques (SCORE). Part 1: Introduction, user requirements, and feasibility tests
[BCRS-90-40A-PT-1] p 3460 N93-29307
The MAESTRO-1 campaign: Analyses of polarimetric SAR data of agricultural fields and forests
[BCRS-92-06] p 3460 N93-29320
Preprocessing airborne remote sensing PARES calibration maintenance functional design document
[BCRS-92-07] p 3460 N93-29321
Convective and stratiform rain: Multichannel microwave sensing over oceans
[NASA-TM-104586] p 3482 N93-29448
Design of a high resolution spatial heterodyne interferometer
[AD-A262867] p 3285 N93-29461
National remote sensing programme 2 ACMS project. Phase 1: Validation. Part 1: Definition of validation experiment
[BCRS-92-10-PHASE-1-PT-1] p 3461 N93-29465
Remote sensing in Czechoslovakia and Hungary: An analysis of the possible co-operation of The Netherlands with Czechoslovakia and Hungary in the field of remote sensing
[BCRS-92-12] p 3461 N93-29466
Project Copernicus: An Earth observing system
p 3231 N93-29738
Project MEDSAT p 3231 N93-29739
Low cost TACSAT for NATO surveillance
p 3285 N93-29911
Cost effective TacSats for military support
p 3285 N93-29912
What's past is prologue: Supporting global change research with historical data
[DE93-005777] p 3472 N93-30009
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
The estimation and scaling of land-surface fluxes of latent and sensible heat with remotely sensed data over a grassland site p 3462 N93-30045
A stochastic formation of radiative transfer in clouds
[DE93-011372] p 3484 N93-30055
Observing and modelling F-region ionospheric dynamics using the OII 7320A emission p 3479 N93-30564
Remote sensing for water quality monitoring in the Tennessee Valley: Field tests of two systems
[DE93-008997] p 3462 N93-30637
CAESAR development plan 1992-1995
[BCRS-92-17] p 3463 N93-31009
Bayesian linear analysis with application to removal of atmospheric influences on optical remote sensing images
[BCRS-92-19] p 3463 N93-31011
REMOTE SENSORS
Improved real-time imaging spectrometer
[NASA-CASE-NPO-18410-1-CU] p 3578 N93-29086
What's past is prologue: Supporting global change research with historical data
[DE93-005777] p 3472 N93-30009
CAESAR development plan 1992-1995
[BCRS-92-17] p 3463 N93-31009
REMOTELY PILOTED VEHICLES
Advanced Unmanned Search System (AUSS) supervisory command, control and navigation
[AD-A263171] p 3245 N93-28990
A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle
[AD-A262477] p 3248 N93-29409
Design study to simulate the development of a commercial transportation system p 3228 N93-29718
Solar powered multipurpose remotely powered aircraft
p 3229 N93-29722
Preliminary development of a VTOL unmanned air vehicle for the close-range mission
[AD-A263514] p 3354 N93-29969
RENDEZVOUS TRAJECTORIES
Galileo post-Gaspra cruise and Earth-2 encounter
p 3385 N93-29597
RENORMALIZATION GROUP METHODS
Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542
Phase structure of three- and four-dimensional phi(exp 4) field theory
[DE93-606069] p 3605 N93-30782
REPORTS
NASA/DoD Aerospace Knowledge Diffusion Research Project. Paper 29: The US government technical report and the transfer of federally funded aerospace R and D
[NASA-TM-109221] p 3615 N93-29709
REPRODUCTION (COPYING)
High-speed data duplication/data distribution: An adjunct to the mass storage equation
p 3619 N93-30459
RESEARCH AIRCRAFT
International aviation (Selected articles)
[AD-A262566] p 3227 N93-28576
Development and testing of the Perseus proof-of-concept aircraft
[DE93-010121] p 3247 N93-28586
X-31 demonstration of integrated flight and propulsion control for effective combat at extreme angles of attack
p 3260 N93-28851

ASPEC: Solar power satellite p 3233 N93-29750

B and T: Lunar landers p 3234 N93-29751

Spacely's rockets: Personnel launch system/family of heavy lift launch vehicles p 3234 N93-29752

RS Landers: Lunar lander p 3234 N93-29753

SPECS: Orbital debris removal p 3234 N93-29754

The 1990-1991 project summaries p 3234 N93-29755

Mars Aquarius Mission and Titan Explorer p 3235 N93-29756

Thermion: Verification of a thermionic heat pipe in microgravity p 3235 N93-29757

Solar electric propulsion cargo spacecraft for Mars missions p 3235 N93-29758

Antares: A low cost modular launch vehicle for the future p 3235 N93-29759

GENESIS 2: Advanced lunar outpost p 3235 N93-29760

Rotational fluid flow experiment p 3235 N93-29761

Research and education by SF cyclotron facility [DE93-753135] p 3576 N93-30002

AFOSR Status Report [AD-A264720] p 3670 N93-30513

RESEARCH VEHICLES

Advanced Transport Operating System (ATOPS) Flight Management/Flight Controls (FM/FC) software description [NASA-CR-191457] p 3250 N93-28621

STRV1-b flight experiment p 3265 N93-28723

A study of the effects of lens focal length on remote driver performance [AD-A263191] p 3505 N93-28941

A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle [AD-A262477] p 3248 N93-29409

Flight control system design factors for applying automated testing techniques [NASA-TM-4242] p 3260 N93-30764

RESERVOIRS

A diffusion approximation for a network of reservoirs with power law release rule [AD-A263753] p 3550 N93-29872

RESIDUAL STRENGTH

Comparison of impact results for several polymeric composites over a wide range of low impact velocities p 3304 N93-30848

Progressive failure methodologies for predicting residual strength and life of laminated composites p 3307 N93-30866

RESIDUAL STRESS

Crack length determination by ultrasonic methods [DE93-008075] p 3450 N93-28567

Development of adherent ceramic coatings to reduce contact stress damage of ceramics [DE93-012518] p 3336 N93-30182

Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance [AD-A264191] p 3339 N93-30883

Fracture of glass p 3293 N93-30969

RESIDUES

Hypervelocity impact survivability experiments for carbonaceous impactors p 3283 N93-29364

SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2 p 3318 N93-29367

Scanning electron microscope/energy dispersive x ray analysis of impact residues in LDEF tray clamps p 3283 N93-29369

Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment p 3638 N93-29370

Interplanetary meteoroid debris in LDEF metal craters p 3638 N93-29372

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces p 3638 N93-29378

Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System [DE93-006283] p 3412 N93-30370

RESIN MATRIX COMPOSITES

Environmental effects on stitched RTM composites [NASA-CR-193221] p 3297 N93-29107

Effect of water immersion on fiber/matrix adhesion in thermoplastic composites [AD-A263646] p 3299 N93-29984

Mechanical properties of composite materials p 3290 N93-30951

RESINS

An investigation of stereolithography as a means of prototyping from a cad database [AD-A263410] p 3613 N93-29210

Resin transfer molding for advanced composite primary aircraft structures p 3301 N93-30438

Preliminary properties of a resin from ethynyl terminated materials p 3303 N93-30842

Infiltration/cure modeling of resin transfer molded composite materials using advanced fiber architectures p 3303 N93-30843

Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials p 3303 N93-30845
Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850
Development of stitching reinforcement for transport wing panels p 3304 N93-30852
Development of resins for composites by resin transfer molding p 3305 N93-30853
Advanced fiber/matrix material systems p 3305 N93-30854
Mechanical and analytical screening of braided composites for transport fuselage applications p 3305 N93-30855

RESISTOJET ENGINES
Preliminary endurance tests of water vaporizers for resistojet applications [NASA-TM-106222] p 3287 N93-28694
Gravity sensitivity of a resistojet water vaporizer [NASA-TM-106220] p 3288 N93-29194

RESOLUTION
An investigation of resolution as encountered in various chromatographic operational modes [AD-A262883] p 3312 N93-29510

RESONANCE
Dynamical analysis of highly excited molecular spectra [DE93-010771] p 3564 N93-28604
Aerosol particle analysis by Raman scattering technique [DE93-005587] p 3309 N93-28880

RESONANCE FLUORESCENCE
Remote measurement of planetary magnetic fields by the Hanle effect p 3645 N93-28793

RESONANCE SCATTERING
Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid [DE93-007362] p 3593 N93-28966

RESONANT FREQUENCIES
Theoretical and experimental investigation of slack cable/mass system dynamics p 3455 N93-31028

RESONATORS
Investigation of thermoacoustic muffler [AD-A262009] p 3562 N93-29392

RESOURCES MANAGEMENT
Tropical forests and biological diversity: USAID report to Congress 1990-1991 [PB93-180453] p 3471 N93-29681

RESPIRATION
Evaluation of test methods and requirements for respiratory protection systems 21 [AD-A262466] p 3501 N93-28757

RESPIRATORS
Evaluation and optimization of a flexible filtration system for respiratory protection system 21 [AD-A262467] p 3493 N93-28758

RESPIRATORY SYSTEM
Evaluation of test methods and requirements for respiratory protection systems 21 [AD-A262466] p 3501 N93-28757
Evaluation and optimization of a flexible filtration system for respiratory protection system 21 [AD-A262467] p 3493 N93-28758

RESPONSE TIME (COMPUTERS)
Context switch time scalability: Benchmark results [PB93-181832] p 3539 N93-29661

RESTORATION
Strategic Environmental Research and Development Program (SERDP) [AD-A263745] p 3471 N93-29858
Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances [PB93-185551] p 3475 N93-30829

RETINA
Image enhancement using an analog device neural network p 3376 N93-30346
Analysis of visual loss from retinal lesions [AD-A264692] p 3496 N93-30494
A simple computational model of center-surround receptive fields in the retina [AD-A264723] p 3496 N93-30515
An algorithm for simple and complex feature detection: From retina to primary visual cortex [AD-A264306] p 3497 N93-30897
Photoreceptors regulating circadian behavior: A mouse model [AD-A264881] p 3497 N93-30908

RETINAL IMAGES
Modelling and simulation of human retinal vision processing p 3363 N93-30269

RETURN TO EARTH SPACE FLIGHT
Design, building, and testing of the postlanding systems for the assured crew return vehicle p 3229 N93-29726

REUSABLE HEAT SHIELDING
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136

REUSABLE LAUNCH VEHICLES
ASUR p 3228 N93-29720
Spacely's rockets: Personnel launch system/family of heavy lift launch vehicles p 3234 N93-29752

REUSABLE SPACECRAFT
Retrievable payload carrier, next generation Long Duration Exposure Facility: Update 1992 p 3283 N93-29705
Delta Advanced Reusable Transport (DART): An alternative manned spacecraft p 3231 N93-29735
RS Landers: Lunar lander p 3234 N93-29753

REVERSE FIELD PINCH
Nonlinear coupling of tearing fluctuations in the Madison Symmetric Torus [DE93-010131] p 3584 N93-28602
The fluctuation induced Hall effect [DE93-010130] p 3585 N93-28912

REVERSED FLOW
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft [NASA-TM-106149] p 3252 N93-29065

REVISIONS
CAESAR development plan 1992-1995 [BCRS-92-17] p 3463 N93-31009

REYNOLDS NUMBER
An experimental study of flow over a 6 to 1 prolate spheroid at incidence p 3239 N93-29124
Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions p 3253 N93-29933
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions p 3253 N93-29934
Turbulence characteristics of an axisymmetric reacting flow [NASA-CR-4110] p 3242 N93-30373
Effects of buoyancy on gas jet diffusion flames [NASA-CR-191109] p 3352 N93-31031

REYNOLDS STRESS
Large eddy simulations of shockwave passage through turbulence [DE92-019503] p 3419 N93-29050

RHEOLOGY
Macrostatistical hydrodynamics [DE93-012289] p 3417 N93-28751
The XNOVAKTC rheological model [AD-A263298] p 3342 N93-29762
Wetting and dispersion in ceramic/polymer melt injection molding systems [DE93-013240] p 3338 N93-30601
Physical chemical studies on molecular composite compositions [AD-A264834] p 3339 N93-30898

RHODAMINE
Pulsed laser photoacoustic spectrometer for study of solid materials [DE93-605290] p 3441 N93-31023

RHODE ISLAND
Rhode Island hurricanes and tropical storms: A fifty-six year summary, 1936-1991 [PB93-162006] p 3481 N93-29198

RIBBONS
Microsecond ribbon relativistic electron beam in a plane undulator and generation of microwave radiation [DE93-605693] p 3400 N93-30993

RIBLETS
Turbulent drag reduction: Studies of feedback control and flow over riblets p 3242 N93-30645

RIBONUCLEIC ACIDS
Computer assisted multiplex sequencing [DE93-007144] p 3536 N93-30934

RIDING QUALITY
The Ultra Light Aircraft Testing [NASA-CR-193043] p 3249 N93-29774

RIEMANN MANIFOLD
Integrals of motion on the group of invariance of an interval in three-dimensional spaces [DE93-606090] p 3606 N93-30797
An adaptive Lagrangian method for computing 1-D reacting flows and the theory of Riemann invariant manifolds for the compressible Euler equations p 3428 N93-30902
Fourth-rank gravity and cosmology [DE92-644722] p 3637 N93-30918
Spherically symmetric line element and Killing vectors in five-dimensional space [DE93-604132] p 3558 N93-30988
Superconformal structures and holomorphic 1/2-superdifferentials on N = 1 super Riemann surfaces [DE93-604133] p 3558 N93-30989

RIGID STRUCTURES
Vision-based control of holonomic robots for 3-dimensional rigid-body positioning using camera-space manipulation p 3578 N93-29178
Gravity referenced elevation encoder development p 3385 N93-29592
Attitude stabilization of a rigid spacecraft using gas jet actuators operating in a failure mode p 3280 N93-29992
Planar reorientation of a free-free beam in space using embedded electromechanical actuators p 3280 N93-29993
A continuum code investigation of stress integration using exact and approximate material rotation [DE93-001892] p 3454 N93-31013

RIGIDITY
Development of an experimental method to determine the axial rigidity of a strut-node joint p 3290 N93-30950

RIPPLES
Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results [AD-A261939] p 3486 N93-28996

RISK
Radiation monitoring equipment dosimeter experiment p 3266 N93-28730
Life insurance risk assessment using a fuzzy logic expert system p 3520 N93-29585
Steps required in the pursuit of quantitative risk management processes for high pressure systems [DE93-007586] p 3378 N93-30508
Uses of risk importance measures [VTT-TIED-1245] p 3378 N93-30581

RIVERS
Development of an airborne MMW FM-CW radar for mapping river ice [AD-A262655] p 3379 N93-28588

ROBOT ARMS
A portable modular architecture for robotic manipulator control [DE93-010819] p 3444 N93-29254
Some results on feedback stabilization of a one-link flexible arm [INRIA-RR-1682] p 3543 N93-30116
Trajectory generation for dual-arm robots using artificial impedance approach p 3370 N93-30310
Robot arm with positional absolute encoded joints p 3370 N93-30312

ROBOT CONTROL
Sources sought for innovative scientific instrumentation for scientific lunar rovers p 3434 N93-28804
Dual arm generalized compliant motion with shared control [NASA-CASE-NPO-18738-1-CU] p 3443 N93-28954
An autonomous vision-based mobile robot p 3443 N93-29082
Vision-based control of holonomic robots for 3-dimensional rigid-body positioning using camera-space manipulation p 3578 N93-29178
A portable modular architecture for robotic manipulator control [DE93-010819] p 3444 N93-29254
An architecture for robotic system integration [DE93-010829] p 3444 N93-29316
Research on reconfigurable and reliable manipulators [DE93-010244] p 3444 N93-29330
Spline screw autochanger [NASA-CASE-GSC-13435-1] p 3445 N93-29505
Special purpose parallel computer architecture for real-time control and simulation in robotic applications [NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608
Application of sensors to the control of robotic systems [DE93-009837] p 3543 N93-30012
The planning coordinator: A design architecture for autonomous error recovery and on-line planning of intelligent tasks [NASA-CR-193250] p 3543 N93-30039
Some results on feedback stabilization of a one-link flexible arm [INRIA-RR-1682] p 3543 N93-30116
Input relegation control for gross motion of a kinematically redundant manipulator [DE93-005301] p 3446 N93-30210
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261
A parallel processing system for intensive I/O p 3362 N93-30262
Task allocation and real-time considerations for the Robot Controller Test Station (RCTS) p 3364 N93-30278
On the implementation of the BIRIS range sensor for applications in robotic control and autonomous navigation p 3366 N93-30286

Supervised autonomy in telerobotics
p 3372 N93-30326
A multiprocessor architecture for realtime robot control p 3372 N93-30327
Drive-reinforcement learning system applications
[AD-A264514] p 3446 N93-30404
Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561
Graphical programming: On-line robot simulation for telerobotic control
[DE93-009796] p 3447 N93-30654
Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization
p 3544 N93-30893
Adaptive motion control of mobile robots
p 3545 N93-30903

ROBOT DYNAMICS
Dual arm generalized compliant motion with shared control
[NASA-CASE-NPO-18738-1-CU] p 3443 N93-28954
An autonomous vision-based mobile robot
p 3443 N93-29082
Lunar rovers and local positioning system
p 3277 N93-29119
A portable modular architecture for robotic manipulator control
[DE93-010819] p 3444 N93-29254
Spline screw autochanger
[NASA-CASE-GSC-13435-1] p 3445 N93-29505
Walking robot: A design project for undergraduate students p 3231 N93-29737
Optimal geometric design of robots for environments with obstacles p 3445 N93-30149
Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261
Trajectory generation for dual-arm robots using artificial impedance approach p 3370 N93-30310
Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561
Adaptive motion control of mobile robots
p 3545 N93-30903

ROBOT SENSORS
A modular head/eye platform for real-time reactive vision
[OUEL-1941/92] p 3505 N93-28897
Dual arm generalized compliant motion with shared control
[NASA-CASE-NPO-18738-1-CU] p 3443 N93-28954
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
A testbed for autonomous reflexive grasping
[AD-A264557] p 3446 N93-30384

ROBOTICS
Small Stirling dynamic isotope power system for robotic space missions
[NASA-TM-105785] p 3287 N93-28686
Workshop on Advanced Technologies for Planetary Instruments, part 1
[NASA-CR-193015] p 3639 N93-28764
Gamma ray/neutron spectrometers for planetary elemental mapping p 3647 N93-28807
Robotics and artificial intelligence for hazardous environments
[DE93-008271] p 3541 N93-29047
Graphical interface between the CIRSSE testbed and CimStation software with MCS/CTOS
[NASA-CR-193276] p 3527 N93-29218
A manipulator kinematic design for high-vacuum operation
[DE93-010264] p 3444 N93-29247
A portable modular architecture for robotic manipulator control
[DE93-010819] p 3444 N93-29254
An architecture for robotic system integration
[DE93-010829] p 3444 N93-29316
Special purpose parallel computer architecture for real-time control and simulation in robotic applications
[NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608
Advanced design for orbital debris removal in support of solar system exploration p 3229 N93-29724
Walking robot: A design project for undergraduate students p 3231 N93-29737
Development of neural network architectures for self-organizing pattern recognition and robotics
[AD-A264831] p 3543 N93-29791
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-1-2] p 3354 N93-30215
A closed-form formula for the manipulator regressor
p 3355 N93-30218
An artificial neural network model for periodic trajectory generation p 3356 N93-30225
An expert system for identification of the task status from tactile sensor data p 3368 N93-30300
A functional system architecture for fully autonomous robot p 3370 N93-30311
Drive-reinforcement learning system applications
[AD-A264514] p 3446 N93-30404
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
Robotic technology evolution and transfer
p 3627 N93-30714

ROBOTS
Graphical interface between the CIRSSE testbed and CimStation software with MCS/CTOS
[NASA-CR-193276] p 3527 N93-29218
A manipulator kinematic design for high-vacuum operation
[DE93-010264] p 3444 N93-29247
An architecture for robotic system integration
[DE93-010829] p 3444 N93-29316
A virtual environment for manufacturing systems
[AD-A263128] p 3528 N93-29473
Planning collision free paths for two cooperating robots using a divide-and-conquer C-space traversal heuristic
[NASA-CR-193252] p 3542 N93-29771
Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012
Input relegation control for gross motion of a kinematically redundant manipulator
[DE93-005301] p 3446 N93-30210
Analysis and simulation of a two degrees-of-freedom one-link flexible forearm p 3361 N93-30261
Task allocation and real-time considerations for the Robot Controller Test Station (RCTS)
p 3364 N93-30278
Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561

ROBUSTNESS (MATHEMATICS)
Study on various problems in statistical planning and inference
[AD-A262484] p 3554 N93-29411
Dynamics and robust control of sampled data systems for large space structures
[AD-A264192] p 3281 N93-30142
Robust control via H-infinity optimization
p 3354 N93-30216
A robust model for finding optimal evolutionary trees
[DE93-010682] p 3491 N93-30483

ROCKET ENGINE CASES
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix B: Case, seals, and joints PFORs
[NASA-CR-192564] p 3272 N93-30619

ROCKET ENGINES
A new facility for advanced rocket propulsion research
[NASA-TM-106193] p 3270 N93-28696
Altitude compensating ablative stiffening band for rocket motor nozzles
[NASA-CASE-MFS-28728-1] p 3288 N93-28950
A fuzzy case based reasoning tool for model based approach to rocket engine health monitoring
p 3289 N93-29570
Conceptual design of a two-stage-to-orbit vehicle
p 3228 N93-29716
Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1] p 3289 N93-29847

ROCKET EXHAUST
The Ultraviolet Plume Instrument (UVPI)
p 3285 N93-28784
Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284

ROCKET LAUNCHING
Wind measurement accuracy of a loran radiosonde
[AD-A263572] p 3483 N93-29832

ROCKET NOZZLES
Altitude compensating ablative stiffening band for rocket motor nozzles
[NASA-CASE-MFS-28728-1] p 3288 N93-28950
Postflight hardware evaluation 360T025 (RSRM-25, STS-46)
[NASA-CR-192562] p 3272 N93-30617
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix A: Insulation PFORs
[NASA-CR-192563] p 3272 N93-30618
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix C: Nozzle PFORs
[NASA-CR-192565] p 3272 N93-30620
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix D: Nozzle postfire data
[NASA-CR-192580] p 3289 N93-30648

ROCKET PROPELLANTS
Benefits of in situ propellant utilization for a Mars sample return mission
[NASA-TM-106243] p 3341 N93-28695

ROCKET-BORNE INSTRUMENTS
Plasma diagnostics by antenna impedance measurements p 3400 N93-28820
Aerospace payload design and development
[AD-A264502] p 3289 N93-30402

RODS
Integrated approaches to parallelism in optimization and solution of inverse problems
[AD-A262259] p 3452 N93-29349

ROLL
Evaluation of four advanced nozzle concepts for short takeoff and landing performance
[NASA-TP-3314] p 3239 N93-29165
Computation of a delta-wing roll-and-hold maneuver
[AD-A264704] p 3260 N93-30498

ROLLER BEARINGS
Cryogenic magnetic bearing
[AD-A264716] p 3446 N93-30512

ROLLING CONTACT LOADS
The contact mechanical nonlinearities of a mathematical model of a railway wheel rolling over corrugated rail
[ILR-MITT-266(1991)] p 3454 N93-31015
The steady-state tangential contact problem for a falling drop type of contact area on corrugated rail by simplified theory of rolling contact
[ILR-MITT-267(1991)] p 3455 N93-31016

ROOFS
Wind loads on canopy roofs
[RR-CE132] p 3451 N93-29106

ROOT-MEAN-SQUARE ERRORS
A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844

ROOTS OF EQUATIONS
Zero-crossing rate of some non-Gaussian processes
p 3360 N93-30254

ROSAT MISSION
ROSAT detection of stellar x ray sources in the old open cluster M67
[MPE-PREPRINT-230] p 3631 N93-30578

ROTARY WING AIRCRAFT
Chaos in mechanical systems with especial reference to rotorcraft and missiles
[AD-A263703] p 3604 N93-29384
Rotorcraft master plan p 3236 N93-30677
Determining the transferability of flight simulator data
p 3237 N93-30685
Frequency-response techniques for documentation and improvement of rotorcraft simulators
p 3237 N93-30689
Bandwidth and SIMDUCE as simulator fidelity criteria
p 3238 N93-30690
Methodology development for evaluation of selective-fidelity rotorcraft simulation
p 3238 N93-30691

ROTARY WINGS
A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152
Flow visualization on helicopter blades using acenaphthen
[ESA-TT-1255] p 3422 N93-29273
Aerodynamic characteristics of a rotorcraft airfoil designed for the tip region of a main rotor blade
[NASA-TM-4264] p 3240 N93-29450
Computation of far-field helicopter rotor tone noise
[ONERA-P-1990-5] p 3562 N93-30110
Helicopter simulation: An aircrew training and qualification perspective p 3236 N93-30676

ROTATING BODIES
A continuum code investigation of stress integration using exact and approximate material rotation
[DE93-001892] p 3454 N93-31013

ROTATING DISKS
Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926
Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948
Flow and heat transfer between gas-turbine discs
p 3256 N93-29950
Dioxygen reduction in various acid electrolytes
[AD-A263564] p 3317 N93-30664

ROTATING FLUIDS
Analysis of unsteady wave processes in a rotating channel
[NASA-CR-191154] p 3251 N93-28617
Fluid flow and heat transfer in the entrance region of an annulus between independently rotating tubes with a turbulent axial flow p 3256 N93-29952

ROTATING LIQUIDS

Liquid Motion in a rotating tank Experiment (LME) p 3264 N93-28710

ROTATING SHAFTS

Transient thermal behaviour of a compressor rotor with axial cooling air flow and co-rotating or contra-rotating shaft p 3255 N93-29946

Vibration localization in rotating shafts p 3454 N93-30626

ROTATION

Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers p 3642 N93-28777

A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis [AD-A262516] p 3554 N93-28844

The effect of orthogonal-mode rotation on forced convection in a circular-sectioned tube fitted with full circumferential transverse ribs p 3254 N93-29937

Turbulent flow and heat transfer in idealized blade cooling passages p 3254 N93-29938

An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels p 3255 N93-29942

Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases p 3255 N93-29943

Heat transfer and leakage in high-speed rotating stepped labyrinth seals p 3256 N93-29951

Theoretical studies in nuclear structure [DE93-012290] p 3570 N93-30505

ROTATIONAL SPECTRA

A novel flame thermometer based on the doppler width of ro-vibrational transitions [AD-A264515] p 3315 N93-30405

ROTOR AERODYNAMICS

Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller [AD-A264057] p 3241 N93-29891

Three-dimensional fiber-optic LDV measurements in the endwall region of a linear cascade of controlled-diffusion stator blades [AD-A263513] p 3424 N93-29968

ROTOR BLADES

An integrated optimum design approach for high speed prop-rotors including acoustic constraints [NASA-CR-193222] p 3248 N93-29153

ROTOR BLADES (TURBOMACHINERY)

Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller [AD-A264057] p 3241 N93-29891

ROTOR LIFT

Aerodynamic characteristics of a rotorcraft airfoil designed for the tip region of a main rotor blade [NASA-TM-4264] p 3240 N93-29450

ROTORCRAFT AIRCRAFT

An integrated optimum design approach for high speed prop-rotors including acoustic constraints [NASA-CR-193222] p 3248 N93-29153

ROTORS

Experimental evaluation of a cooled radial-inflow turbine [NASA-TM-106230] p 3251 N93-28697

Use of local x ray computerized tomography for high-resolution, region-of-interest inspection of large ceramic components for engines [DE93-005564] p 3449 N93-28943

Three-dimensional numerical simulation of gradual opening in a wave rotor passage [NASA-CR-191157] p 3252 N93-29072

Robust control of intelligent rotor [AD-A263707] p 3259 N93-29985

Some implications of a differential turbomachinery equation with viscous correction [AD-A264693] p 3427 N93-30571

ROUTES

An analysis of en route controller-pilot voice communications [AD-A264784] p 3394 N93-30611

ROVING VEHICLES

Mars sample return mission: Two alternate scenarios p 3233 N93-29746

RUBBER

APU diaphragm testing. Test plan [NASA-TM-108251] p 3271 N93-29387

Chromatographic and solvatochromic measurements on butyl rubbers [AD-A263088] p 3334 N93-29795

RULES

Automatic rule generation for high-level vision p 3511 N93-29526

A model for amalgamation in group decision making p 3513 N93-29540

Determining rules for closing customer service centers: A public utility company's fuzzy decision p 3516 N93-29561

Comparison between the performance of two classes of fuzzy controllers p 3517 N93-29566

Inference in fuzzy rule bases with conflicting evidence p 3519 N93-29583

Turning SOS rules into equations [CWI-CS-R9218] p 3532 N93-30017

RUN TIME (COMPUTERS)

NESL: A nested data-parallel language (Version 2.6) [AD-A263548] p 3530 N93-29822

RUNGE-KUTTA METHOD

Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations [NASA-CR-193241] p 3421 N93-29213

An upwind method for the solution of the 3D Euler and Navier-Stokes equations on adaptively refined meshes [AD-A262863] p 3423 N93-29472

Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack [AD-A263905] p 3240 N93-29862

The application of concentric vortex simulation to calculating the aerodynamic characteristics of bodies of revolution at high angles of attack [AD-A263879] p 3241 N93-29919

RUNWAYS

Two simulation studies of precision runway monitoring of independent approaches to closely spaced parallel runways [AD-A263433] p 3261 N93-29815

RUTHENIUM

Growth model of Au films on Ru(001) [DE92-642126] p 3602 N93-30998

RUTILE

Role of oxygen vacancies in anodic TiO2 thin films [DE92-642137] p 3602 N93-31027

S

S MATRIX THEORY

Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484

Unitary approximation of Bhabha diffusion by high energies and its implementation in Monte Carlo event generators [ETN-93-93622] p 3571 N93-30670

S WAVES

Jet mixer noise suppressor using acoustic feedback [NASA-CASE-LEW-15170-1] p 3561 N93-28953

Modern seismic travel time tables and station corrections for P and S waves [AD-A262536] p 3477 N93-29412

Algorithm of numerical calculations of differential Yakubovsky equations for the (1 + 3) scattering problem [DE92-644679] p 3535 N93-30915

SAFETY

Gene transcription and electromagnetic fields [DE93-010854] p 3490 N93-28848

Weakly nonlinear dynamics of near-CJ detonation waves [DE93-007344] p 3424 N93-29836

Combustion/explosion chemistry of bulk materials p 3343 N93-30062

Using Penelope to assess the correctness of NASA Ada software: A demonstration of formal methods as a counterpart to testing [NASA-CR-4509] p 3533 N93-30380

Uses of risk importance measures [VTT-TIED-1245] p 3378 N93-30581

Vehicle dynamic stability and rollover [PB93-185437] p 3447 N93-30828

Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964

SAFETY DEVICES

Inservice diagnostic methods for solenoid-operated valves [DE93-007823] p 3443 N93-28968

SAFETY FACTORS

Energetic material response to abnormal environments p 3350 N93-30095

Solving a product safety problem using a recycled high density polyethylene container p 3292 N93-30964

SAFETY MANAGEMENT

Steps required in the pursuit of quantitative risk management processes for high pressure systems [DE93-007586] p 3378 N93-30508

SALINITY

A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region [AD-A263490] p 3488 N93-29819

Hydrographic observations in the western tropical and subtropical north Atlantic Ocean: Atlantic Climate Change Program (ACCP) and Western Tropical Atlantic Experiment (WESTRAX) during 1990 [PB93-184760] p 3489 N93-30827

SALT SPRAY TESTS

Chromate-free corrosion resistant conversion coatings for aluminum [DE93-009835] p 3336 N93-30051

SALTS

A field investigation of water and salt movement in permafrost and the active layer [AD-A263706] p 3487 N93-29298

SAMPLED DATA SYSTEMS

Dynamics and robust control of sampled data systems for large space structures [AD-A264192] p 3281 N93-30142

SAMPLING

Tank issues: Design and placement of floating liquid monitoring wells [PB93-161149] p 3469 N93-29033

Feature based neural network acoustic transient signal classification [AD-A263437] p 3562 N93-29816

Subpicosecond electrooptic sampling [AD-A264635] p 3581 N93-30520

SANDS

Digital image processing of descanned terrestrial ground photographs p 3459 N93-28926

Performance and cost evaluation of bioremediation techniques for fuel spills [PB93-175545] p 3474 N93-30762

SANDWICH STRUCTURES

Optimization of composite sandwich cover panels subjected to compressive loadings p 3306 N93-30862

SAPPHIRE

Healing of lithographically introduced flaws in glass and glass containing ceramics [DE93-010453] p 3330 N93-28761

SATELLITE ALTIMETRY

Processing of altimeter data by the German ERS-1 Processing and Archiving Facility (D-PAF) p 3457 N93-28917

SATELLITE ANTENNAS

Status of the Canadian military Multibeam Antenna (MBA) development for EHF SATCOM p 3374 N93-30334

Durability of Quick Reaction Satellite Antenna (QRSA) trunnion castings [AD-A264095] p 3281 N93-30813

SATELLITE ATTITUDE CONTROL

Control-structures interaction test of the LACE satellite p 3263 N93-28706

Refinements on the pinhole camera measurements of the LDEF attitude p 3283 N93-29622

Attitude- and Orbit Control Subsystem concepts for TACSATS p 3284 N93-29906

Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization p 3544 N93-30893

SATELLITE COMMUNICATION

Automating the satellite range scheduling process [AD-A262601] p 3270 N93-28468

Design and construction of a prototype ACTS propagation terminal [NASA-CR-193071] p 3404 N93-28539

T(lc2)acS(lc3)ats for Surveillance Verification and C3I [AGARD-CP-522] p 3387 N93-29892

Tactical satellites p 3284 N93-29893

TACSAT ground control and data collection p 3388 N93-29895

TACSAT-spacecraft bus concept and design: Application of a multimission bus for TACSAT in LEO p 3284 N93-29896

Considerations for NATO satellite communications in the post-2000 era p 3388 N93-29899

Terrain and coverage prediction analyses for non-geostationary orbit EHF satellite communications p 3389 N93-29902

Launch vehicles for lightweight TACSAT deployment p 3271 N93-29903

A slotted Aloha satellite channel simulator p 3360 N93-30250

Canadian EHF MILSATCOM research and development project p 3362 N93-30264

SAW technology for on-board processing in military satellite communications p 3362 N93-30265

A satellite downlink spread spectrum timing beacon p 3362 N93-30267

FASSET: A development model for a Canadian EHF MILSATCOM system p 3363 N93-30268

Coarse synchronization in an EHF frequency-hopped satellite communications system p 3365 N93-30281

Security of the remote control link of Anik E satellites p 3365 N93-30282

Coding for frequency hopped spread spectrum satellite communications p 3365 N93-30283
Adaptive jammer nulling in EHF communications satellites p 3365 N93-30284
Temporal synchronization of frequency hopped DPSK p 3365 N93-30285
Performance of frequency hopped M-ary FSK in Rayleigh fading and partial-band jamming p 3368 N93-30303
Comparison of two random access techniques for the North American MSAT system p 3370 N93-30315
Teleglobe's international Mobile Earth Terminal service p 3371 N93-30317
Constant Average Power Single Sideband (CAPSSB) modulation p 3373 N93-30331
Signal processor based MSAT trellis coded M-DPSK with adaptive Doppler phasor correction p 3373 N93-30332
Two-stage Doppler phasor corrected TCM/DMPSK for shadowed mobile satellite channels p 3373 N93-30333
Engineering management consideration for an integrated aeronautical mobile satellite service p 3374 N93-30337
The evolution of global mobile communications p 3376 N93-30349

SATELLITE CONFIGURATIONS
Multipurpose satellite bus (MPS) p 3232 N93-29743
QuickStar: System design, capabilities, and tactical applications of a small, smart space system p 3284 N93-29905

SATELLITE CONTROL
Upper atmosphere research satellite jitter study p 3264 N93-28708
System of navigation by satellites with European coverage p 3284 N93-29897
Security of the remote control link of Anik E satellites p 3365 N93-30282

SATELLITE DESIGN
International aviation (Selected articles) [AD-A262566] p 3227 N93-28576
Project MEDSAT p 3231 N93-29739
Multipurpose satellite bus (MPS) p 3232 N93-29743
An overview of DARPA's advanced space technology program p 3269 N93-29908
SAR sensors on TACSATS: A feasibility assessment p 3286 N93-29909
A TACSAT SAR concept p 3286 N93-29910

SATELLITE DOPPLER POSITIONING
Precise tracking of the Magellan and Pioneer Venus orbiters by Same-Beam Interferometry. Part 2: Orbit determination analysis p 3270 N93-29589

SATELLITE IMAGERY
Leadex data report. Part 1: Weather analysis and satellite images [AD-A263217] p 3481 N93-28876
Utilization of NOAA/AVHRR data for energy balance of Lake Constance (Switzerland) p 3458 N93-28926
Evidence-based classification of satellite image data p 3459 N93-28931
Earth observation from space: Competition or cooperation? [AD-A262044] p 3459 N93-29000
Convective and stratiform rain: Multichannel microwave sensing over oceans [NASA-TM-104586] p 3482 N93-29448
Automated satellite image navigation [AD-A262868] p 3269 N93-29475
What's past is prologue: Supporting global change research with historical data [DE93-005777] p 3472 N93-30009
Neural network cloud classification research [AD-A264628] p 3484 N93-30176
Interim report on Landsat national archive activities p 3618 N93-30455
Land use database for the Netherlands using LANDSAT Thematic Mapper pictures [BCRS-91-32] p 3463 N93-30839
Bayesian linear analysis with application to removal of atmospheric influences on optical remote sensing images [BCRS-92-19] p 3463 N93-31011

SATELLITE INSTRUMENTS
SeaWiFS technical report series. Volume 2: Analysis of orbit selection for SeaWiFS: Ascending versus descending node [NASA-TM-104566-VOL-2] p 3486 N93-28497
SeaWiFS technical report series. Volume 6: SeaWiFS technical report series cumulative index: Volumes 1-5 [NASA-TM-104566-VOL-6] p 3486 N93-28500
Total dose tests for the PROMICS-3 instrument [VTT-TIED-1203] p 3411 N93-30108
NOAA satellite programs and technology requirements p 3627 N93-30710

SATELLITE NAVIGATION SYSTEMS
T(lc2)acS(lc3)ats for Surveillance Verification and C3I [AGARD-CP-522] p 3387 N93-29892

SATELLITE NETWORKS
On-board B-ISDN fast packet switching architectures. Phase 2: Development. Proof-of-concept architecture definition report [NASA-CR-191151] p 3273 N93-29884
T(lc2)acS(lc3)ats for Surveillance Verification and C3I [AGARD-CP-522] p 3387 N93-29892
TACSAT-spacecraft bus concept and design: Application of a multimission bus for TACSAT in LEO p 3284 N93-29896
System of navigation by satellites with European coverage p 3284 N93-29897

SATELLITE OBSERVATION
SeaWiFS technical report series. Volume 6: SeaWiFS technical report series cumulative index: Volumes 1-5 [NASA-TM-104566-VOL-6] p 3486 N93-28500
IUE observations of cataclysmic variable [NASA-CR-193188] p 3629 N93-28634
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit [AD-A262786] p 3287 N93-28658
The dynamic cusp at low altitudes: A case study combining Viking, DMSP, and Sondrestrom incoherent scatter radar observations [NASA-CR-193152] p 3476 N93-28842
Leadex data report. Part 1: Weather analysis and satellite images [AD-A263217] p 3481 N93-28876
Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR) [DLR-MITT-92-09] p 3456 N93-28915
Earth observation from space: Competition or cooperation? [AD-A262044] p 3459 N93-29000
Space optical and low-frequency radio searches for Earth-crossing asteroids and comets [DE93-008716] p 3634 N93-29246
Ionospheric structure specifications and systems effects [AD-A263573] p 3476 N93-29343
A TACSAT SAR concept p 3286 N93-29910
The possible direct use of satellite radiance measurements by the Atmospheric Radiation Measurement Program [DE93-009819] p 3462 N93-30049

SATELLITE ORBITS
Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction [NASA-CR-188249] p 3634 N93-29042
Terrain and coverage prediction analyses for non-geostationary orbit EHF satellite communications p 3389 N93-29902
Attitude- and Orbit Control Subsystem concepts for TACSATS p 3284 N93-29906

SATELLITE POWER TRANSMISSION
ASPEC: Solar power satellite p 3233 N93-29750
Power beaming to communication satellites in GEO [DE93-007608] p 3279 N93-29840

SATELLITE ROTATION
Liquid Motion in a rotating tank Experiment (LME) p 3264 N93-28710

SATELLITE TEMPERATURE
LDEF: 69 Months in Space. Second Post-Retrieval Symposium, part 2 [NASA-CP-3194-PT-2] p 3654 N93-29354

SATELLITE TRACKING
Automating the satellite range scheduling process [AD-A262601] p 3270 N93-28468
A satellite-tracking millimeter-wave reflector antenna system for mobile satellite-tracking [NASA-CASE-NPO-18772-1-CU] p 3381 N93-28955

SATELLITE-BORNE INSTRUMENTS
Miniature long-life space cryocoolers p 3378 N93-28825
Ultraviolet imaging spectrometer p 3582 N93-28827
Development of Miniaturized Optimized Smart Sensors (MOSS) for space plasmas p 3286 N93-28828
Project Copernicus: An Earth observing system p 3231 N93-29738

SATELLITE-BORNE RADAR
SAR shape-from-shading for a populated alpine area p 3458 N93-28923

SATELLITES
Beta/gamma Monte Carlo transport in repetitive structures of satellite systems [DE93-007610] p 3281 N93-30509

SCALARS
Non-scalar uncertainty: Uncertainty in dynamic systems p 3517 N93-29565
The ground state wavefunctions of a conformally invariant scalar field in different spacetime background [DE93-606063] p 3606 N93-30808
A simple formula for reducing Feynman diagrams to scalar integrals [DE92-644717] p 3607 N93-30916
Nonlinear realisations of omega(1 + infinity) [DE92-644721] p 3557 N93-30917
Quantum group generalization of the heterotic QFT [DE92-644727] p 3607 N93-30920
On one-dimensional topological and conformal field theories [DE92-644726] p 3558 N93-30986

SCALE EFFECT
Planck scale effects in neutrino physics [DE93-606133] p 3571 N93-30793
Effects of scale in predicting global structural response p 3306 N93-30860
Evaluation of some scale effects in the response and failure of composite beams p 3308 N93-30874

SCALE HEIGHT
ELF propagation highlights p 3395 N93-30730

SCALE MODELS
Lunar regolith densification p 3276 N93-29115
Lunar crane system p 3277 N93-29118
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding [PB93-156792] p 3476 N93-29197
Exploitation of parallelism in climate models [DE93-011259] p 3470 N93-29318
Design, building, and testing of the postlanding systems for the assured crew return vehicle p 3229 N93-29726
Construction, wind tunnel testing and data analysis for a 1/5 scale ultra-light wing model p 3243 N93-29778
Evaluation of some scale effects in the response and failure of composite beams p 3308 N93-30874

SCALING LAWS
Some aspects of the aeroacoustics of high-speed jets [NASA-CR-191458] p 3418 N93-28975
Optimization of HPM device parameters for maximum air transmission [DE93-007332] p 3386 N93-29765
Catastrophic collisions: Laboratory impact experiments, hydrocode simulations, and the scaling problem p 3635 N93-30411

SCALLOPING
Microwave emission from relativistic electron beams [AD-A264102] p 3400 N93-30880

SCANNERS
Measurement of a Michelson interferometer mirror velocity with a time interval analyzer [AD-A263009] p 3430 N93-28659
Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists [AD-A263130] p 3432 N93-29476

SCANNING ELECTRON MICROSCOPY
Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists [AD-A263130] p 3432 N93-29476

SCANNING TUNNELING MICROSCOPY
Surface diffusion: Atomistics and surface morphology (summary of MRS Symposium B panel discussion) [DE93-009862] p 3594 N93-29188
Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments [AD-A262208] p 3596 N93-29445
Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists [AD-A263130] p 3432 N93-29476
Fundamental studies of friction, lubrication, and wear by atomic force microscopy [AD-A264647] p 3446 N93-30524

SCATHA SATELLITE
Spacecraft surface charging handbook [AD-A262778] p 3279 N93-29305

SCATTER PROPAGATION
Scattering through apertures and by three-dimensional structures. Application to the measurement of the surface impedance of conductive materials [ONERA-P-1990-2] p 3392 N93-30018
Performance statistics bulletin. High latitude meteor scatter propagation, May, June, July 1989 [AD-A264003] p 3399 N93-30757

SCATTERING
Comparison of analytical transport and stochastic solutions for neutron slowing down in an infinite medium [DE93-010799] p 3565 N93-28833
Method and apparatus for imaging an object in or through a scattering medium by using multiple-wave mixing [AD-D015707] p 3581 N93-30410
Algorithm of numerical calculations of differential Yakubovsky equations for the (1 + 3) scattering problem [DE92-644679] p 3535 N93-30915
Low-energy behaviour of few-particle scattering amplitudes in two dimensions [DE93-609834] p 3572 N93-30944

SCATTERING AMPLITUDE
Spin observables in large t elastic N-N scattering
[DE93-009211] p 3564 N93-28549
Coupled-channel analysis of low energy nucleon-antinucleon interactions
[DE93-606115] p 3571 N93-30791
Low-energy behaviour of few-particle scattering amplitudes in two dimensions
[DE93-609834] p 3572 N93-30944

SCATTERING CROSS SECTIONS
Exotic atoms
[DE93-010242] p 3564 N93-28611
Measurement of W-Z interference from neutrino-electron scattering
[DE93-010724] p 3566 N93-29313
Electron interactions with non-linear polyatomic molecules and their radicals and ions
[AD-A262279] p 3568 N93-29446
Unitary approximation of Bhabha diffusion by high energies and its implementation in Monte Carlo event generators
[ETN-93-93622] p 3571 N93-30670
Baryon number violation and particle collider experiments
[NIKHEF-H/92-14] p 3572 N93-31008

SCENE ANALYSIS
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
Encoding spatial images: A fuzzy set theory approach
p 3511 N93-29527
Binocular spherical disparity: A study in representation for a forward translating camera
[PB93-184422] p 3579 N93-29667

SCHEDULES
A perspective on acquisition of NASA space systems
[AD-A263246] p 3610 N93-29499
Designing a fuzzy scheduler for hard real-time systems p 3512 N93-29537
Payload flight assignments. NASA mixed fleet
[NASA-TM-108255] p 3268 N93-30133
A representative survey of US space systems and methods for estimating their costs
[AD-A264159] p 3272 N93-30881

SCHEDULING
Automating the satellite range scheduling process
[AD-A262601] p 3270 N93-28468
Preemptive scheduling with variable profile, precedence constraints and due dates
[INRIA-RR-1622] p 3538 N93-28937
Designing a fuzzy scheduler for hard real-time systems p 3512 N93-29537
Assessment of Columbus payload operations capabilities by scheduling with the MARS system
[ESA-STR-235] p 3281 N93-30106
Analytical foundations of gain scheduling
[AD-A264682] p 3260 N93-30550

SCHLIEREN PHOTOGRAPHY
Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine
[AD-A263810] p 3580 N93-29880

SCHOOLS
Proposal to develop guides for high school teachers on global systems science
[DE93-008759] p 3624 N93-29100
Advanced network technology: Background paper
[OTA-BP-TCT-101] p 3539 N93-29650
Filling the gaps: An overview of data on education in grades K through 12
[PB93-176550] p 3608 N93-30821

SCHROEDINGER EQUATION
The semiclassical stability of de Sitter spacetime
[DESY-92-131] p 3603 N93-28472
On the method of determining relations
[DE93-606041] p 3551 N93-30765
Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796
On two-dimensional quasiclassics
[DE93-606034] p 3606 N93-30805
The ground state wavefunctions of a conformally invariant scalar field in different spacetime background
[DE93-606063] p 3606 N93-30808
On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912
General method for reducing the two-body Dirac equation
[DE93-609833] p 3607 N93-30943
A squeezed state holomorphic phase space representation of equations of motion
[DE93-609835] p 3607 N93-30945
A remark on the invariant measure for the nonlinear Schroedinger equation
[DE93-609840] p 3552 N93-30946
Schroedinger equations of higher (greater than 2) order
[DE92-644677] p 3552 N93-30984
Formulation of wave mechanics without the Planck constant h/2 pi
[DE93-604083] p 3608 N93-30987

SCIENTIFIC SATELLITES
Measurements of magnetic fields produced by a 30 kWe class Arcjet Power Conditioning Unit
[AD-A262786] p 3287 N93-28658
FNAS CRRES program completion
[NASA-CR-192468] p 3476 N93-29032
A program to determine the pointing angle to a specular point
[AD-A262777] p 3630 N93-29460

SCIENTISTS
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 28: The technical communication practices of Russian and US aerospace engineers and scientists
[NASA-TM-108249] p 3612 N93-28948
Technology transfer personnel exchange at the Boeing Company
[DE93-010190] p 3625 N93-29329
Advanced network technology: Background paper
[OTA-BP-TCT-101] p 3539 N93-29650

SCINTILLATION
Ionospheric structure specifications and systems effects
[AD-A263573] p 3476 N93-29343
Comparison of diversity combining, interleaving, and decoding techniques of a scintillated channel
p 3362 N93-30266

SCINTILLATION COUNTERS
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415
Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807
Pion pair production in photon-photon collisions
[DE93-606114] p 3571 N93-30790

SCRAP
Tool grinding and spark testing p 3291 N93-30954

SCREWS
Spline screw autochanger
[NASA-CASE-GSC-13435-1] p 3445 N93-29505

SEA ICE
Leadex data report. Part 2: Rawinsonde and ice station data
[AD-A263218] p 3483 N93-29491
Ice-ocean four dimensional structure and dynamics
[AD-A264850] p 3490 N93-30906

SEA LEVEL
Field trial of caffeine on physical performance at altitude: An attempt to overcome the challenge
[AD-A264260] p 3497 N93-30894

SEA SURFACE TEMPERATURE
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model
[DE93-007365] p 3477 N93-29346

SEA WATER
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
Acoustic transducer system
[AD-D015713] p 3562 N93-29279
A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region
[AD-A263490] p 3488 N93-29819
Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740

SEALERS
Compatibility studies of AISI type 316 stainless steel with lead-lithium eutectic alloy
[DE93-605281] p 3328 N93-31022

SEALS (STOPPERS)
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix B: Case, seals, and joints PFORs
[NASA-CR-192564] p 3272 N93-30619

SEAS
Ocean Margins Program
[DE93-008937] p 3470 N93-29262

SEASONS
VLF/LF propagation measurements
p 3395 N93-30732

SECONDARY ION MASS SPECTROMETRY
Scanning ionic microscopy with high spatial resolution: Parallel acquisition of elementary images by high resolution mass spectrometry
[ONERA-NT-1990-7] p 3314 N93-30139

SECURITY
Security classification of information
[DE93-012416] p 3612 N93-28840
Activities report of PTT Research
[ISBN-9-07-212514-2] p 3392 N93-30025
Security of the remote control link of Anik E satellites
p 3365 N93-30282

SEDIMENT TRANSPORT
IOC-UNEP review meeting on oceanographic processes of transport and distribution of pollutants in the sea
[DE93-605070] p 3490 N93-31019

SEEDS
Final results of space exposed experiment developed for students p 3492 N93-29702
Continued results of the seeds in space experiment
p 3492 N93-29703

SEISMIC WAVES
Modern seismic travel time tables and station corrections for P and S waves
[AD-A262536] p 3477 N93-29412
Modeling earthquakes with local and regional broadband data p 3478 N93-30005
Modeling regional seismic waves
[AD-A264002] p 3479 N93-30756

SEISMOGRAPHS
A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765
Optimism experiment and development of space-qualified seismometers in France
p 3646 N93-28796
The MESUR mission p 3649 N93-28816
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819

SEISMOLOGY
A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819
Modern seismic travel time tables and station corrections for P and S waves
[AD-A262536] p 3477 N93-29412

SELECTION
An experimental methodology for a fuzzy set preference model p 3514 N93-29547
A fuzzy case based reasoning tool for model based approach to rocket engine health monitoring
p 3289 N93-29570

SELF CONSISTENT FIELDS
Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540
The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis
[DE93-007537] p 3313 N93-29837
Theoretical studies in nuclear structure
[DE93-012290] p 3570 N93-30505

SELF ERECTING DEVICES
In-step inflatable antenna experiment
p 3263 N93-28701

SELF ORGANIZING SYSTEMS
Adding dynamic rules to self-organizing fuzzy systems
p 3515 N93-29557
A conjugate gradients/trust regions algorithms for training multilayer perceptrons for nonlinear mapping
p 3519 N93-29581
Evolving neural network architecture
[AD-A264802] p 3544 N93-30592

SELF TESTS
Fault tolerance and testing for WSI systems
p 3361 N93-30258

SEMANTICS
Formal definition of a conceptual language for the description and manipulation of information models
[TR-92-16] p 3523 N93-28503
Nets of reactive processes
[INRIA-RR-1588] p 3537 N93-28505
Implementing error-valued semantics for dataflow languages on imperative machines
[DE93-009319] p 3615 N93-29310
Information compression in the context model
p 3514 N93-29549
A functional implementation of the Jacobi eigen-solver
[DE93-007349] p 3549 N93-29769
Full abstraction for a shared variable parallel language
[AD-A263547] p 3530 N93-29821
Turning SOS rules into equations
[CWI-CS-R9218] p 3532 N93-30017

SEMICONDUCTOR DEVICES
Analysis of electrothermal interactions in power semiconductor modules
[ETN-93-93800] p 3591 N93-28470
Optically controlled solid state opening switches
[AD-A262404] p 3591 N93-28496
Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642

Semiconductor cooling apparatus [NASA-CASE-LEW-14162-3] p 3299 N93-29614
Simulation of transient radiation effects on semiconductor devices using a pulsed Q-switched Nd:YAG laser p 3357 N93-30230
NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension [AD-A264813] p 3581 N93-30666
Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation [DE93-606332] p 3601 N93-30798
Laboratory experiments in integrated circuit fabrication p 3292 N93-30962

SEMICONDUCTOR DIODES
The 2-6 semiconductor superlattices [AD-A264343] p 3597 N93-30164
Analytical predictions of the intermodulation noise of semiconductor laser diode p 3361 N93-30256

SEMICONDUCTOR JUNCTIONS
Ultrafast optical studies of surface reaction processes at semiconductor interfaces [DE93-009049] p 3593 N93-29096

SEMICONDUCTOR LASERS
Influence of optical feedback on the pulse behavior of semiconductor lasers [ETN-93-93798] p 3436 N93-28614
ND laser with co-doped ion(s) pumped by visible laser diodes [AD-D015711] p 3437 N93-29277
Fiber-optic currents measurements [DE93-007970] p 3579 N93-29350
The 2-6 semiconductor superlattices [AD-A264343] p 3597 N93-30164
Analytical predictions of the intermodulation noise of semiconductor laser diode p 3361 N93-30256

SEMICONDUCTORS (MATERIALS)
Excited states in electronic structure calculations [DE93-007704] p 3592 N93-28642
Planning of a West Virginia University Research Center in the basic materials sciences [DE93-011731] p 3592 N93-28647
Infrared rugates by molecular beam epitaxy p 3582 N93-28808
Subnanosecond high power performance of a bistable optically-controlled GaAs switch [DE93-006285] p 3406 N93-28944
New III-V cell design approaches for very high efficiency [DE93-000097] p 3464 N93-28971
Electrochemical fabrication of cadmium chalcogenide microdiode arrays [AD-A263169] p 3310 N93-28988
Ultrafast optical studies of surface reaction processes at semiconductor interfaces [DE93-009049] p 3593 N93-29096
Femtosecond carrier processes in compound semiconductors and real time signal processing [AD-A263076] p 3382 N93-29131
New Mexico Center for Particle Physics: Studies of fundamental interactions [DE93-008302] p 3566 N93-29261
Low temperature (LT) GaAs and related materials [AD-A263607] p 3298 N93-29282
Femtosecond carrier processes in compound semiconductors and real time signal processing [AD-A262966] p 3384 N93-29514
Proceedings of Symposium F on New Aspects on the Growth, Characterization and Applications of CdTe and related Cd rich alloys 5, 1992 [AD-A263541] p 3597 N93-29974
Nonequilibrium screening and exciton dynamics probed by femtosecond laser pulses [AD-A263603] p 3439 N93-29983
Fundamental studies of the morphology, chemistry, and electrical properties of metals on GaAs and other III-V semiconductor compounds [AD-A264417] p 3597 N93-30120
The 2-6 semiconductor superlattices [AD-A264343] p 3597 N93-30164
Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue [AD-A264523] p 3598 N93-30407
Fundamental studies of the mechanical behavior of microelectronics thin film materials [AD-A264334] p 3337 N93-30417
Infrared imaging array integrated in three dimensions directly on top of silicon circuits [AD-A264707] p 3581 N93-30500
Atomic layer epitaxy of semiconductor heterostructures [AD-A264755] p 3599 N93-30560
Study on diamond semiconductor [DE92-531076] p 3413 N93-30622
NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension [AD-A264813] p 3581 N93-30666
Ultrafast, passive, broad-band, optical shutter based on novel semiconductor/conducting polymer interfaces [AD-A264098] p 3601 N93-30878

SENSITIVITY
Optimism experiment and development of space-qualified seismometers in France p 3646 N93-28796
Composite laminate stiffnesses and their sensitivities [DLR-FB-92-16] p 3296 N93-29007
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model [DE93-007365] p 3477 N93-29346
A steric hindrance model for the crystal orientation dependence of the shock initiation sensitivity of PETN explosive [LA-UR-92-1427] p 3345 N93-30074
Sensitive detection of new superconductors created at ultra high pressures [AD-A264340] p 3597 N93-30161

SENSORIMOTOR PERFORMANCE
Human capabilities and limitations in situation awareness p 3503 N93-28863
Cognitive and Neural Sciences Division 1992 programs [AD-A263400] p 3654 N93-29258

SENSORS
The dynamic behavior of constrained adaptive array sensor processors [AD-A262402] p 3541 N93-28494
Development of Miniaturized Optimized Smart Sensors (MOSS) for space plasmas p 3286 N93-28828
Progress in the development of broadband electric-field sensors for transient fields p 3369 N93-30306

SENSORY PERCEPTION
Cognitive and Neural Sciences Division 1992 programs [AD-A263400] p 3654 N93-29258

SEPARATED FLOW
Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077
An experimental study of flow over a 6 to 1 prolate spheroid at incidence p 3239 N93-29124
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet [NASA-TM-106240] p 3252 N93-29162
A theoretical and computational study on active wake control p 3243 N93-30892

SEPARATION
Process for selectively recovering algae and protozoa [NASA-CASE-MFS-26124-1-NPO] p 3491 N93-29174

SEPARATORS
Combined centrifugal force/gravity gas/liquid separator system [AD-D015726] p 3444 N93-29288

SEQUENCING
Uncorrectable sequences and telecommand p 3385 N93-29596
NESL: A nested data-parallel language (Version 2.6) [AD-A263548] p 3530 N93-29822
Computer assisted multiplex sequencing [DE93-007144] p 3536 N93-30934

SEQUENTIAL COMPUTERS
Neural network simulations on massively parallel computers: Applications in chemical physics [DE93-006739] p 3538 N93-28894

SEROTONIN
Molecular approach to hypothalamic rhythms [AD-A264438] p 3496 N93-30421

SERUMS
Amino acid sequences for the binding regions in serum albumin proteins [NASA-CASE-MFS-28402-1] p 3491 N93-28952

SERVICE LIFE
Sodium sulfur technology program NaSTEC p 3265 N93-28718
Approach to extending the cycle life of lithium secondary battery [DE93-776266] p 3406 N93-28983
Polymer electrolyte fuel cells for transportation applications [DE93-008721] p 3464 N93-29147
APU diaphragm testing [NASA-TM-108254] p 3272 N93-29501
Power beaming to communication satellites in GEO [DE93-007608] p 3279 N93-29840
Direct use geothermal applications for brazed plate heat exchangers [DE93-008559] p 3465 N93-30011

SERVICES
SESC products and services user guide [PB93-178879] p 3653 N93-29679

SERVOMECHANISMS
Measurement of a Michelson interferometer mirror velocity with a time interval analyzer [AD-A263009] p 3430 N93-28659
Leaky coaxial cable signal transmission for remote facilities [DE93-007916] p 3383 N93-29348

SERVOMOTORS
Study on decreasing torque noise resulting from feedback noise for the modified bang-bang controller [AD-A263178] p 3407 N93-29010

SET THEORY
Handshake circuits: An intermediary between communicating processes and VLSI [ETN-93-93579] p 3408 N93-29269
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 1 [NASA-CP-10112-VOL-1] p 3509 N93-29516
An analysis of possible applications of fuzzy set theory to the actuarial credibility theory p 3510 N93-29517
Estimations of expectedness and potential surprise in possibility theory p 3510 N93-29518
Comparison of specificity and information for fuzzy domains p 3510 N93-29519
Encoding spatial images: A fuzzy set theory approach p 3511 N93-29527
North American Fuzzy Logic Processing Society (NAFIPS 1992), volume 2 [NASA-CP-10112-VOL-2] p 3515 N93-29556
On probability-possibility transformations p 3519 N93-29582
Modeling the bidirectional reflectance and spectra [AD-A263570] p 3462 N93-29830

SETTLING
Macrostatistical hydrodynamics [DE93-012289] p 3417 N93-28751

SEWING
Development of stitching reinforcement for transport wing panels p 3304 N93-30852

SEYFERT GALAXIES
Infrared spectroscopy and imaging of starburst galaxies and AGNs [MPE-PREPRINT-229] p 3632 N93-30643

SHADOWS
A note on the computation of antenna-blocking shadows p 3385 N93-29593

SHAFTS (MACHINE ELEMENTS)
Durability of Quick Reaction Satellite Antenna (QRSA) trunnion castings [AD-A264095] p 3281 N93-30813

SHALLOW WATER
Ocean waves in SAMSON/SWADE [AD-A263681] p 3487 N93-29295
Finite element approximation of the shallow water equations on the MASPAR [AD-A264649] p 3489 N93-30525
ELF propagation in deep and shallow sea water p 3397 N93-30739

SHAPE MEMORY ALLOYS
A one-dimensional continuum model for shape-memory alloys [AD-A262505] p 3321 N93-28656
Nonlinear analyses of composite aerospace structures in sonic fatigue [NASA-CR-193124] p 3451 N93-29154
Articulated fin/wing control system [AD-D015712] p 3259 N93-29278

SHAPES
Three dimensional reconstruction of complex shapes based on the Delaunay triangulation [INRIA-RR-1697] p 3547 N93-28616
Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591
Methods for characterizing the human head for the design of helmets [AD-A263875] p 3507 N93-29889
Representations of shape in object recognition and long-term visual memory [AD-A264342] p 3499 N93-30163

SHEAR FLOW
Vertical slot convection: A linear study [DE93-007643] p 3423 N93-29804

SHEAR LAYERS
The development of a mixing layer under the action of weak streamwise vortices [NASA-TM-106089] p 3418 N93-28947
Shear, strain, and thermohaline vertical fine structure in the upper ocean p 3488 N93-30046
A theoretical and computational study on active wake control p 3243 N93-30892

SHEAR STRAIN
Enhanced noncontacting laser extensometer for biaxial strain measurements [AD-A263170] p 3430 N93-28989

SHEAR STRESS

Mechanics of elevated temperature fatigue damage in fiber-reinforced ceramics [AD-A262403] p 3329 N93-28495

Influence of ply waviness on stiffness and strength reduction of composite laminates [AD-A263224] p 3294 N93-28559

Shear sensitive monomer-polymer laminate structure and method of using same [NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613

Surface shear stress estimates from geostrophic winds for use in sensible and latent heat flux formulations p 3483 N93-30044

Laboratory studies of gravity wave/mean flow interactions [AD-A264226] p 3478 N93-30174

Compressible turbulence in a high-speed high Reynolds number mixing layer p 3242 N93-30583

Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g) [AD-A264297] p 3601 N93-30819

Prediction of stiffener-skin separation in composite panels p 3307 N93-30871

Structural response of bead-stiffened thermoplastic shear webs p 3308 N93-30873

SHEARING

Preliminary experimental results for a cryogenic brush seal configuration [NASA-TM-106236] p 3416 N93-28627

SHIPS

A comparison of simulated parallax and single-station range aids to navigation [AD-A263460] p 3246 N93-29818

SHOCK FRONTS

Large eddy simulations of shockwave passage through turbulence [DE92-019503] p 3419 N93-29050

Detonation shock dynamics of composite energetic materials p 3350 N93-30096

SHOCK LOADS

Examination of shock induced chemical reactions in liquids using time-resolved optical spectroscopy p 3318 N93-30073

A steric hindrance model for the crystal orientation dependence of the shock initiation sensitivity of PETN explosive [LA-UR-92-1427] p 3345 N93-30074

Microstructural basis for enhanced shock-induced chemistry in single crystals of ammonium perchlorate p 3319 N93-30092

Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate p 3350 N93-30094

Detonation shock dynamics of composite energetic materials p 3350 N93-30096

Isothermal and shock compression of high density ammonium nitrate and ammonium perchlorate [DE93-000682] p 3315 N93-30209

SHOCK RESISTANCE

Testing in combined dynamic environments [DE93-010679] p 3278 N93-29250

SHOCK SIMULATORS

Subjective response to simulated sonic booms with ground reflections [NASA-TM-107764] p 3561 N93-28692

SHOCK SPECTRA

Characterizing transient vibrations using band limited temporal moments [DE93-009639] p 3453 N93-30185

SHOCK TESTS

Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484

Towards a better hydro for dynamic mix calculations [DE93-010702] p 3426 N93-30485

SHOCK TUBES

Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer [DE93-010741] p 3421 N93-29253

Thermal oxidation of HCN by NO2 in shock waves p 3318 N93-30064

Towards a better hydro for dynamic mix calculations [DE93-010702] p 3426 N93-30485

SHOCK TUNNELS

Mitigation of shock waves in a cylindrical tunnel by foam [AD-A262491] p 3423 N93-29419

SHOCK WAVE INTERACTION

Large eddy simulations of shockwave passage through turbulence [DE92-019503] p 3419 N93-29050

Non-linear wave phenomena in a gas-vapour mixture with phase transition [ETN-93-93582] p 3422 N93-29319

Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484

SHOCK WAVE PROPAGATION

Some aspects of the aeroacoustics of high-speed jets [NASA-CR-191458] p 3418 N93-28975

Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100

SHOCK WAVES

International aviation (Selected articles) [AD-A262566] p 3227 N93-28576

Analysis of unsteady wave processes in a rotating channel [NASA-CR-191154] p 3251 N93-28617

Nonlinear stability of viscous shock waves [TRITA-NA-9205] p 3419 N93-29025

Implementation of a single-material version of PAGOSA on MIMD hypercubes [SAND-92-0640] p 3526 N93-29127

Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer [DE93-010741] p 3421 N93-29253

Kinetics and energy transfer in nonequilibrium fluid flows [AD-A263612] p 3240 N93-29284

Response of energetic solids to light, heat and shock pulses [AD-A263702] p 3342 N93-29296

Kinetics of nitric oxide formation behind 3 to 4 KM/S shock waves [AD-A263653] p 3312 N93-29389

Mitigation of shock waves in a cylindrical tunnel by foam [AD-A262491] p 3423 N93-29419

Thermal oxidation of HCN by NO2 in shock waves p 3318 N93-30064

Chemical dynamics simulations as a probe to the initiation and propagation of condensed phase detonations p 3318 N93-30071

Shock waves and polymorphic phase transitions in energetic materials p 3351 N93-30100

Contribution to the study of the interaction between acoustic waves and coherent structures induced by a prismatic cylinder in a rectangular cavity [ONERA-NT-1990-10] p 3314 N93-30203

Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484

Towards a better hydro for dynamic mix calculations [DE93-010702] p 3426 N93-30485

Near-infrared line imaging of NGC 6240: Global shock and nuclear starburst [MPE-PREPRINT-226] p 3631 N93-30641

SHORELINES

Building alliances to restore coastal environments: A coastal America progress report [PB93-169464] p 3470 N93-29674

SHORT TAKEOFF AIRCRAFT

Evaluation of four advanced nozzle concepts for short takeoff and landing performance [NASA-TP-3314] p 3239 N93-29165

SHROUDED PROPELLERS

The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet [NASA-TM-106240] p 3252 N93-29162

SHUTTERS

Ultrafast, passive, broad-band, optical shutter based on novel semiconductor/conducting polymer interfaces [AD-A264098] p 3601 N93-30878

SHUTTLE DERIVED VEHICLES

Minimum Hamiltonian ascent trajectory evaluation (MASTRE) program (update to automatic flight trajectory design, performance prediction, and vehicle sizing for support of shuttle and shuttle derived vehicles) users manual [NASA-CR-192556] p 3269 N93-28558

SIDEBANDS

Nonlinear mode coupling in free electron lasers [AD-A263999] p 3439 N93-29883

SIGNAL ANALYSIS

A compact imaging detector of polarization and spectral content p 3582 N93-28810

Wavelet transform techniques and signal analysis [DE93-007919] p 3382 N93-29244

The use of data turning in airborne radars p 3358 N93-30241

Classification of radar clutter in an air traffic control environment p 3246 N93-30299

Analysis and computation for vortex dynamics and rarefied gases [AD-A264705] p 3427 N93-30499

Independent research and independent exploratory development programs [AD-A264735] p 3544 N93-30556

SIGNAL ANALYZERS

Digital hardware architecture implementation [AD-A263219] p 3521 N93-29492

Acoustic charge transport technology investigation for advanced development transponder p 3386 N93-29602

SIGNAL DETECTION

Multichannel detection of partially correlated signals in clutter [AD-A261984] p 3381 N93-28998

Improved bounds for synchronization jitter p 3360 N93-30251

SIGNAL DETECTORS

Inservice diagnostic methods for solenoid-operated valves [DE93-007823] p 3443 N93-28968

SIGNAL DISTORTION

Effects of imbalances and DC offsets on I/Q demodulation [AD-A264466] p 3393 N93-30537

SIGNAL ENCODING

Uncorrectable sequences and telecommand p 3385 N93-29596

On subband coding/embedded vector quantization for speech coding p 3355 N93-30220

A systolic-array structure for MTCM receivers p 3357 N93-30236

An error control protocol based on trellis coded modulations p 3358 N93-30237

SIGNAL FADING

Dipolar orientational relaxation in guest/host amorphous polymer probed by second harmonic generation [AD-A262006] p 3333 N93-29441

Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252

Performance of frequency hopped M-ary FSK in Rayleigh fading and partial-band jamming p 3368 N93-30303

An adaptive maximum likelihood receiver for correlated Rayleigh fading channels p 3371 N93-30316

SIGNAL GENERATORS

Upgrading the LAMPF 201 MHz RF generators [DE93-010715] p 3406 N93-28830

High-resolution signal synthesis for time-frequency distributions [DE93-008735] p 3380 N93-28909

Advanced technologies for lightweight EHF tactical communications satellites p 3389 N93-29900

SIGNAL PROCESSING

Electronics research report [AD-A262733] p 3405 N93-28589

Measurement of a Michelson interferometer mirror velocity with a time interval analyzer [AD-A263009] p 3430 N93-28659

Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801

High-resolution signal synthesis for time-frequency distributions [DE93-008735] p 3380 N93-28909

Fundamental study of the signal processing by optics [DE93-776265] p 3577 N93-28982

Modified Acousto-Optic Adaptive Processor (Mod-AOAP) [AD-A261983] p 3381 N93-28997

Fiber grating-based sensing system with interferometric wavelength-shift detection [AD-D015697] p 3577 N93-29038

Femtosecond carrier processes in compound semiconductors and real time signal processing [AD-A263076] p 3382 N93-29131

Wideband propagation measurements for wireless indoor communication [PB93-175123] p 3382 N93-29202

Acoustic transducer system [AD-D015713] p 3562 N93-29279

Theoretical bit error rate performance of the Kalman filter excisor for FM interference [AD-A263018] p 3383 N93-29407

Programmable interactive system for cochlear implant electrode stimulation [AD-A262558] p 3494 N93-29421

Digital hardware architecture implementation [AD-A263219] p 3521 N93-29492

Femtosecond carrier processes in compound semiconductors and real time signal processing [AD-A262966] p 3384 N93-29514

Performance analysis of subspace methods [AD-A263984] p 3530 N93-29865

Advanced technologies for lightweight EHF tactical communications satellites p 3389 N93-29900

Synchronization techniques for medium data rate EHF MILSATCOM systems p 3389 N93-29901

ARSRP signal processing software [AD-A263543] p 3391 N93-29975

Photorefractive integrators and correlators [AD-A264200] p 3597 N93-30144

Electro-optic characterisation of extremely wide bandwidth electrical signals
[AD-A264202] p 3392 N93-30145
Nonlinear processing of phase vocoded speech
p 3355 N93-30219
A systolic-array structure for MTCM receivers
p 3357 N93-30236
Enhanced resolution and de-aliasing techniques for fast Fourier transforms p 3358 N93-30240
The use of data turning in airborne radars
p 3358 N93-30241
Synchronization of the LAPTV adative filter with input statistics p 3358 N93-30242
Radar beam effects for a flight simulator using signal processor based hardware p 3373 N93-30328
Signal processor based MSAT trellis coded M-DPSK with adaptive Doppler phasor correction
p 3373 N93-30332
Multiscale and multigrid information representation, extraction and fusion
[AD-A264623] p 3393 N93-30386
Analysis and computation for vortex dynamics and rarefied gases
[AD-A264705] p 3427 N93-30499
Adaptive airborne radar simulation with equalization filter taps
[AD-A264722] p 3393 N93-30514
Effects of imbalances and DC offsets on I/Q demodulation
[AD-A264466] p 3393 N93-30537
Enhanced photorefractive effects in barium titanate
[AD-A264724] p 3599 N93-30554
Multiple neuron recording in the hippocampus of freely moving animals
[AD-A264807] p 3492 N93-30594
The use of DFT windows in signal-to-noise ratio and harmonic distortion computations
[DE93-009800] p 3433 N93-30655
Application of non-standard signal processing to ELF noise characterization for the TSS1-OESEE programme
p 3397 N93-30743
Application of the Fourier transform to short antennas
p 3398 N93-30750
Enhanced convergence adaptive detection
[AD-A264100] p 3399 N93-30879
Massively parallel spatial light modulation-based optical signal processing
[AD-A264846] p 3581 N93-30905

SIGNAL RECEPTION
The dynamic behavior of constrained adaptive array sensor processors
[AD-A262402] p 3541 N93-28494

SIGNAL TO NOISE RATIOS
The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766
Development of a 9.3 micrometer CW LIDAR for the study of atmospheric aerosol
[NASA-CR-193227] p 3381 N93-29105
Signal-to-noise ratio losses in full spectrum combining of signals with a downconverted subcarrier
p 3386 N93-29599
The use of DFT windows in signal-to-noise ratio and harmonic distortion computations
[DE93-009800] p 3433 N93-30655
Reception at Ascension Island, South Atlantic, of the transmissions from the Heard Island feasibility test
[PB93-176261] p 3394 N93-30662
Examinations of perturbation reduction by automatic speech dependent recognition of separately spoken single words
[ETN-93-94180] p 3394 N93-30672
Performance statistics bulletin. High latitude meteor scatter propagation, May, June, July 1989
[AD-A264003] p 3399 N93-30757
Investigation of methods for the measurement of small electron bundle currents
[DIGEL-1992-4] p 3413 N93-30763
Evaluation of the scattered pressure due to infinite rigid cylinders, infinite elastic cylindrical shells, and rigid spheres in the presence of an ambient noise field
[AD-A264835] p 3563 N93-30899
Atmospheric studies with SODAR at Kalpakkam
[DE93-605544] p 3480 N93-30992

SIGNAL TRANSMISSION
Wideband propagation measurements for wireless indoor communication
[PB93-175123] p 3382 N93-29202
Leaky coaxial cable signal transmission for remote facilities
[DE93-007916] p 3383 N93-29348
Feature based neural network acoustic transient signal classification
[AD-A263437] p 3562 N93-29816

SIGNATURES
Subjective response to simulated sonic booms with ground reflections
[NASA-TM-107764] p 3561 N93-28692
A covariant form of the Maxwell's equations in four-dimensional spaces with an arbitrary signature
[DE93-606070] p 3605 N93-30783

SIGNS AND SYMPTOMS
Spurious symptom reduction in fault monitoring
[NASA-CR-191453] p 3542 N93-29192
The Environmental Symptoms Questionnaire (ESQ): Development and application
[AD-A264127] p 3495 N93-30196

SILICIDES
High temperature creep and oxidation resistant chromium silicide matrix alloy containing molybdenum
[NASA-CASE-LEW-15697-1] p 3323 N93-29172
Fundamental studies of the mechanical behavior of microelectronics thin film materials
[AD-A264334] p 3337 N93-30417

SILICON
A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765
Silicon crystal under bending
[DE93-010522] p 3593 N93-28888
Instrumental neutron activation analysis developed for silicon integrated circuit technology
[ETN-93-93581] p 3408 N93-29271
The microchannel heatsink with liquid nitrogen cooling
[DE93-009258] p 3422 N93-29300
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301
FI-STM investigation of atomic hydrogen adsorption on the Si(100)2x1 surface
[AD-A262748] p 3567 N93-29403
Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424
Infrared imaging array integrated in three dimensions directly on top of silicon circuits
[AD-A264707] p 3581 N93-30500
Surface chemistry of hydrogen-passivated porous silicon-oxidation of surface Si-H groups by acetone
[AD-A264655] p 3315 N93-30526
Silicon Film(trademark) photovoltaic manufacturing technology
[DE93-010008] p 3466 N93-30891
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

SILICON ALLOYS
Oxidation behavior in reaction-bonded aluminum-silicon alloy/alumina powder compacts
[DE93-010407] p 3298 N93-29191

SILICON CARBIDES
Catalytic synthesis of silicon carbide preceramic polymers: Polycarbosilanes
[DE93-008634] p 3329 N93-28541
Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564
Interfacial studies of refractory glass-ceramic matrix/advanced SiC fiber reinforced composites
[AD-A263264] p 3299 N93-29802
The effect of oxidation embrittlement on the impact behavior of nicalon reinforced CAS 2 ceramic matrix composites
[AD-A263567] p 3334 N93-29829
Air oxidation behavior of fuel for the High Temperature Engineering Test Reactor (HTTR)
[DE93-753349] p 3576 N93-30006
Methylhydridopolysilazane and its pyrolytic conversion to Si3N4/SiC ceramics
[AD-A264150] p 3336 N93-30170
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A264191] p 3339 N93-30883

SILICON COMPOUNDS
Development of Si(1-x)Ge(x) technology for microwave sensing applications
[NASA-TM-106157] p 3405 N93-28610

SILICON DIOXIDE
Electron transport calculations between 1 MeV and 1 eV
[AD-A263412] p 3568 N93-29787
Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658

SILICON ISOTOPES
1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568

SILICON NITRIDES
Improved silicon nitride for advanced heat engines
[NASA-CR-182193] p 3298 N93-29451
Microwave processing of silicon nitride for advanced gas turbine applications
[DE93-007910] p 3334 N93-29767
Methylhydridopolysilazane and its pyrolytic conversion to Si3N4/SiC ceramics
[AD-A264150] p 3336 N93-30170
Colloid and interface chemistry aspects of ceramics
[AD-A264685] p 3337 N93-30552

SILICONES
Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193
Post-flight analyses of the crystals from the M0003-14 quartz crystal microbalance experiment
p 3602 N93-29684
SESAME equation of state number 8010: Boron loaded silicone potting material
[DE93-012083] p 3300 N93-30395

SILVER
Diffusion bonding
[DE93-011480] p 3442 N93-28837
Processing and property evaluation of silver or aluminum matrix YBa2Cu3O(6+x) superconducting materials
[AD-A263382] p 3595 N93-29333

SILVER IODIDES
The adhesion of AgI molecules to gaseous metallic silver cluster cations
[AD-A264820] p 3338 N93-30628

SIMD (COMPUTERS)
Implementation of a single-material version of PAGOSA on MIMD hypercubes
[SAND-92-0640] p 3526 N93-29127
The parallel implementation of a backpropagation neural network and its applicability to SPECT image reconstruction
[DE93-010304] p 3567 N93-29416
Special purpose parallel computer architecture for real-time control and simulation in robotic applications
[NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608
Data parallelism
[DE93-009300] p 3539 N93-29782

SIMULATED ANNEALING
Structural design using neural networks
p 3545 N93-31029

SIMULATION
Lunar gravitational field estimation and the effects of mismodeling upon lunar satellite orbit prediction
[NASA-CR-188249] p 3634 N93-29042
Adsorption of hydrated halide ions on charged electrodes: Molecular dynamics simulation
[AD-A263137] p 3568 N93-29619
Space station attitude disturbance arising from internal motions p 3280 N93-29995
Radiated fields from an electromagnetic pulse simulator p 3366 N93-30290
Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359
Experimental and analytical investigation of finger-follower cam systems p 3446 N93-30378

SIMULATORS
Building a generalized distributed system model
[NASA-CR-193239] p 3527 N93-29219
Programmable interactive system for cochlear implant electrode stimulation
[AD-A262558] p 3494 N93-29421
Exercise/recreation facility for a lunar or Mars analog
p 3230 N93-29733
A functional implementation of the Jacobi eigen-solver
[DE93-007349] p 3549 N93-29769
Development of a concept formulation process aid for analyzing training requirements and developing training devices
[AD-A263579] p 3261 N93-29972

SINE WAVES
Infrared rugates by molecular beam epitaxy
p 3582 N93-28808
The use of DFT windows in signal-to-noise ratio and harmonic distortion computations
[DE93-009800] p 3433 N93-30655

SINGLE CRYSTALS
Be3(AsO4)2 2H2O: A new berylloarsenate phase containing bridged tetrahedral 3-rings
[AD-A262518] p 3592 N93-28584
Enhancements of the critical currents of YBaCuO single crystals by neutron (n) and proton (p) irradiation
[DE93-007892] p 3592 N93-28661
Environmental embrittlement of binary and Zr-doped Ni3Al
[DE93-008575] p 3321 N93-28679
A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765

Growth, characterization and device development in monocrystalline diamond films
[AD-A263204] p 3593 N93-28874
Neutron scattering studies of the structures and lattice dynamics of the alkali metals
[DE93-008272] p 3593 N93-28956
Uniaxially stressed Ge:Ga and Ge:Be
[DE93-010426] p 3594 N93-29150
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301
In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331
Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424
Balanced technology initiative on computational mechanics of materials
[AD-A263906] p 3453 N93-29863
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A264048] p 3411 N93-30031
Structure, adhesion, and stability of metal/oxide and oxide/oxide interfaces
[DE93-012930] p 3325 N93-30060
Observation of reaction intermediates in crystalline RDX p 3318 N93-30067
Microstructural basis for enhanced shock-induced chemistry in single crystals of ammonium perchlorate
p 3319 N93-30092
Defect density measurements in a shocked single crystal of ammonium perchlorate p 3319 N93-30093
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
Sensitive detection of new superconductors created at ultra high pressures
[AD-A264340] p 3597 N93-30161
Center for surface radiation damage studies
[AD-A264330] p 3570 N93-30366
The calculation of electrostatic interactions and their role in determining the energies and geometries of molecular HE crystals
[DE92-040374] p 3570 N93-30448
Photoinduced charge separation in Q1D heterojunction materials: Evidence for electron-hole pair separation in mixed-halide MX solids
[AD-A264711] p 3598 N93-30501
Photoinduced electron-hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: Mixed-halide MX solids
[AD-A264714] p 3600 N93-30569
Coordination compounds of aluminum as precursors to aluminum nitride
[AD-A264700] p 3327 N93-30574
Hard photon emission from high energy electrons and positrons in single crystals
[DE93-606328] p 3600 N93-30770
Visible light emitting materials and injection devices
[AD-A263499] p 3601 N93-30811
Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g)
[AD-A264297] p 3601 N93-30819
Ultrafast, passive, broad-band, optical shutter based on novel semiconductor/conducting polymer interfaces
[AD-A264098] p 3601 N93-30878
Pulsed laser photoacoustic spectrometer for study of solid materials
[DE93-605290] p 3441 N93-31023

SINGLE EVENT UPSETS
SEU tolerant computer based on the R3000
[DE93-009294] p 3520 N93-29058

SINGLE SIDEBAND TRANSMISSION
Constant Average Power Single Sideband (CAPSSB) modulation p 3373 N93-30331

SINGLE STAGE TO ORBIT VEHICLES
Antares: A low cost modular launch vehicle for the future p 3235 N93-29759

SINTERING
Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092
Microwave processing of ceramics
[DE93-010708] p 3332 N93-29252
Properties of superconducting YBa2Cu3O(6+4) ceramic materials: Effect of processing parameters
[AD-A263441] p 3334 N93-29790
Development of adherent ceramic coatings to reduce contact stress damage of ceramics
[DE93-012518] p 3336 N93-30182
Colloid and interface chemistry aspects of ceramics
[AD-A264685] p 3337 N93-30552
Reactive sintering of Ni3Al intermetallic alloys under compressive stress
[DE93-009729] p 3327 N93-30652
Superconducting films of YBaCuO
[DE93-606831] p 3600 N93-30772
Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976

SIPHONS
Siphon breaker design requirements
[DE93-011799] p 3425 N93-30132

SIS (SEMICONDUCTORS)
Activities report for the Laboratory for Space Research Groningen (Netherlands)
[ETN-93-93688] p 3631 N93-30638

SISO (CONTROL SYSTEMS)
Stabilization using low-gain PI control: SISO case
[OUEL-1947/92] p 3541 N93-28898

SITE SELECTION
Atmospheric studies with SODAR at Kalpakkam
[DE93-605544] p 3480 N93-30992

SIZE DISTRIBUTION
Elastic and reactive collisions of atoms and molecules with neutral alkali clusters
[DE93-009313] p 3566 N93-29206
Micrometeoroids and debris on LDEF
p 3638 N93-29356

SKIN (STRUCTURAL MEMBER)
Fabrication of the V-22 composite AFT fuselage using automated fiber placement p 3302 N93-30443

SKIN FRICTION
The effect of high temperature on wall shear in a two dimensional wall jet
[AD-A262982] p 3423 N93-29426

SKY SURVEYS (ASTRONOMY)
Magnetic activity in low mass stars
[DE93-009073] p 3632 N93-28547
Digital image compression using artificial neural networks p 3624 N93-28811
The multiplicity of T Tauri stars in the star forming regions Taurus-Auriga and Ophiuchus-Scorpius: A 2.2 micron speckle imaging survey p 3634 N93-28945
Bonner Durchmusterung (Southern Durchmusterung)
[NASA-RP-1298-VOL-3] p 3630 N93-29811
Young open clusters as probes of the star formation process p 3635 N93-30377
The faintest stars p 3630 N93-30493
Dense gas in the monoceros OB1 dark cloud and its relationship to star formation p 3636 N93-30502
A characterization of young stellar objects in Bok globules: Infrared imaging, spectral energy distributions, and molecular outflows p 3636 N93-30563

SLIDING
Determination of low frequency reference slipping for high frequency unstationary motion processes
[ILR-MITT-273(1992)] p 3455 N93-31017

SLIDING FRICTION
Interfacial viscosity measurements of adsorbed monolayers on metal surfaces
[AD-A263288] p 3324 N93-29803

SLOT ANTENNAS
Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

SLOTS
Additional support for the TDK/MABL computer program
[NASA-CR-193037] p 3526 N93-29028
Vertical slot convection: A linear study
[DE93-007643] p 3423 N93-29804

SLUDGE
An evaluation of factors affecting the solidification/stabilization of heavy metal sludge
[AD-A264128] p 3473 N93-30197

SLURRIES
Method for producing oxygen from lunar materials
[NASA-CASE-MSC-21759-1] p 3312 N93-29617

SMART STRUCTURES
Smart skin structures for identifying and locating laser irradiation
[DE93-005464] p 3436 N93-28887
Robust control of intelligent rotor
[AD-A263707] p 3259 N93-29985

SMOKE
Preliminary design of an intermittent smoke flow visualization system
[NASA-CR-186027] p 3248 N93-28693
Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399

SNOW
Seasonal snowfall statistics for selected stations
[AD-A263173] p 3481 N93-28991

SOCIAL FACTORS
Multi-Attribute Decision Theory methodology for pollution control measure analysis
[DE93-005444] p 3472 N93-30008

SODALITE
Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue
[AD-A264523] p 3598 N93-30407

SODAR
Atmospheric studies with SODAR at Kalpakkam
[DE93-605544] p 3480 N93-30992

SODIUM CHLORIDES
The growth of small corrosion fatigue cracks in alloy 2024
[NASA-TM-107755] p 3451 N93-29069

SODIUM SULFUR BATTERIES
Sodium-Sulfur Cell Technology flight experiment (SSCT) p 3264 N93-28715
Sodium sulfur technology program NaSTEC
p 3265 N93-28718
Battery testing at Argonne National Laboratory
[DE93-009204] p 3407 N93-29036

SOFTENING
A 69 cent look at thermoplastic softening
p 3292 N93-30963

SOFTWARE ENGINEERING
Parallel computation and the basis system
[DE93-008755] p 3537 N93-28544
An assessment of space shuttle flight software development processes
[NASA-CR-193179] p 3525 N93-28934
Concept document of the repository-based software engineering program: A constructive appraisal
[NASA-CR-193125] p 3526 N93-29027
Distributed Virtual System (DIVIRS) Project
[NASA-CR-193234] p 3526 N93-29169
RBSE: Product development team research activity deliverables
[NASA-CR-193115] p 3527 N93-29212
National Center for Supercomputer Applications
p 3614 N93-29232
Development of a visual system interface to support a domain-oriented application composition system
[AD-A262489] p 3528 N93-29418
Software development and analysis for experimental high frequency surface wave radar data
[AD-A261982] p 3383 N93-29438
Learning characteristics of a space-time neural network as a tether skiprope observer p 3512 N93-29534
Synthesis techniques and analysis tools for on-chip fault-tolerance
[AD-A263167] p 3409 N93-29654
Capability maturity model for software, version 1.1
[AD-A263403] p 3530 N93-29852
A guide to total software quality control, volume 1
[AD-A263881] p 3531 N93-29920
A guide to total software quality control, volume 2
[AD-A263891] p 3531 N93-29921
Key practices of the capability maturity model, version 1.1
[AD-A263432] p 3610 N93-29970
Accelerating the transfer of technology for implementing domain specific software architectures
[AD-A264017] p 3532 N93-30014
Estimating Ada system size during development
[AD-A263880] p 3532 N93-30022
Software testing using the IEEE standards
[DE93-009833] p 3532 N93-30050
On analytical performance modelling of software for distributed systems p 3364 N93-30279
Communications systems design for testability: Grey-box testing p 3368 N93-30302
Using Penelope to assess the correctness of NASA Ada software: A demonstration of formal methods as a counterpart to testing
[NASA-CR-4509] p 3533 N93-30380
An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547
Nonsmooth optimization algorithms, system theory, and software tools
[AD-A264679] p 3534 N93-30549
An annotated bibliography on integration in software engineering environments
[AD-A264798] p 3535 N93-30602
Gigabit network communications research
[AD-A264895] p 3536 N93-31026

SOFTWARE RELIABILITY
An assessment of space shuttle flight software development processes
[NASA-CR-193179] p 3525 N93-28934
Key practices of the capability maturity model, version 1.1
[AD-A263432] p 3610 N93-29970

Using Penelope to assess the correctness of NASA Ada software: A demonstration of formal methods as a counterpart to testing
[NASA-CR-4509] p 3533 N93-30380
Procedures for applying Ada quality prediction models
[AD-A264730] p 3534 N93-30546
An approach to software quality prediction from Ada designs
[AD-A264731] p 3534 N93-30547

SOFTWARE REUSE
Toward reusable graphics components in Ada
[AD-A262568] p 3524 N93-28577

SOFTWARE TOOLS
A proposed approach for developing next-generation computational electromagnetics software
[DE93-007326] p 3380 N93-28900
Parallel software tools at Langley Research Center
[NASA-TM-108995] p 3520 N93-29070
The scientific modeling assistant: An advanced software tool for scientific model building p 3613 N93-29229
Development of a visual system interface to support a domain-oriented application composition system
[AD-A262489] p 3528 N93-29418
SWAT system performance predictions
[AD-A262857] p 3579 N93-29470
Synthesis techniques and analysis tools for on-chip fault-tolerance
[AD-A263167] p 3409 N93-29654
Data probe user's guide
[PB93-178655] p 3530 N93-29678
Nonsmooth optimization algorithms, system theory, and software tools
[AD-A264679] p 3534 N93-30549
Electronics mixed-mode simulation
[AD-A264734] p 3534 N93-30577
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
Design and implementation of a Global Positioning System (GPS) supported area navigation system with electronic aircraft
[ILR-MITT-275(1992)] p 3246 N93-30671
Multi-parameter optimization tool for low-cost commercial fuselage crown designs
p 3305 N93-30858
The HSCT mission analysis of waverider designs
[NASA-CR-193467] p 3243 N93-31037

SOHO MISSION
Optical technologies for UV remote sensing instruments p 3582 N93-28788

SOIL MECHANICS
Lunar regolith densification p 3276 N93-29115
Regolith-structure modeling p 3276 N93-29116

SOIL MOISTURE
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103

SOIL SCIENCE
Thermal Analyzer for Planetary Soil (TAPS): An in situ instrument for mineral and volatile-element measurements p 3643 N93-28782
Mathematical model of frost heave and thaw settlement in pavements
[CRREL-REPT-93-2] p 3262 N93-30103
Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study
[PB93-181618] p 3474 N93-30823

SOILS
Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky
[PB93-182244] p 3474 N93-30825

SOL-GEL PROCESSES
Thermal properties of organic and modified inorganic aerogels
[DE93-009230] p 3311 N93-29263
Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films
[AD-A263664] p 3594 N93-29293
Materials studies for preventing corrosion in condensing environments
[PB93-185478] p 3327 N93-30815

SOLAR ACTIVITY
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
SESC products and services user guide
[PB93-178879] p 3653 N93-29679

SOLAR ARRAYS
Developing an inflatable solar array
p 3264 N93-28714
Solar Array Module Plasma Interaction Experiment (SAMPIE) p 3265 N93-28716
The Photovoltaic Array Space Power Plus diagnostics (PASP Plus) flight experiment p 3265 N93-28717
Solar electric propulsion cargo spacecraft for Mars missions p 3235 N93-29758

SOLAR BLANKETS
Developing an inflatable solar array
p 3264 N93-28714

SOLAR CELLS
Texturing of InP surfaces for device applications
[NASA-TM-106061] p 3321 N93-28618
The Photovoltaic Array Space Power Plus diagnostics (PASP Plus) flight experiment p 3265 N93-28717
New III-V cell design approaches for very high efficiency
[DE93-000097] p 3464 N93-28971
The effect of the low Earth orbit environment on space solar cells: Results of the Advanced Photovoltaic Experiment (S0014) p 3467 N93-29686
LEO effects on candidate solar cell cover materials
p 3467 N93-29687
LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690
Low-cost, high-efficiency solar cells utilizing GaAs-on-Si technology
[DE93-000096] p 3464 N93-29965
Measurements and Characterization Branch
[DE93-000094] p 3465 N93-30207
Growth and development of GaInAsP for use in high-efficiency solar cells
[DE93-000098] p 3465 N93-30208
Change of solar cell element properties influenced by adsorbed atoms
[DE93-606694] p 3466 N93-30777
Silicon Film(trademark) photovoltaic manufacturing technology
[DE93-010008] p 3466 N93-30891

SOLAR COLLECTORS
STRV1-b flight experiment p 3265 N93-28723
Solar energy emplacement developer
p 3230 N93-29732
Modification of flux profiles using a faceted concentrator
[DE93-000087] p 3464 N93-29925
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206
Thermal effects testing at the National Solar Thermal Test Facility
[DE93-009825] p 3465 N93-30391

SOLAR COOLING
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206

SOLAR CORONA
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
Solar flare MDH
[AD-A262275] p 3652 N93-28756
Two-dimensional and three-dimensional time-dependent MHD model of extended corona
p 3653 N93-30496

SOLAR CORPUSCULAR RADIATION
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744

SOLAR DYNAMIC POWER SYSTEMS
Thermal energy storage flight experiment in microgravity p 3265 N93-28720

SOLAR ELECTRIC PROPULSION
ELITE program: Electric insertion transfer experiment
p 3264 N93-28709
Solar electric propulsion cargo spacecraft for Mars missions p 3235 N93-29758

SOLAR ENERGY
Solar energy emplacement developer
p 3230 N93-29732
Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2
[PB93-174779] p 3465 N93-30001
Solar World Congress: Proceedings of the Biennial Congress of the International Solar Energy Society, volume 2, part 2
[PB93-174795] p 3466 N93-30935

SOLAR ENERGY ABSORBERS
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206

SOLAR ENERGY CONVERSION
ASPEC: Solar power satellite p 3233 N93-29750
Low-cost, high-efficiency solar cells utilizing GaAs-on-Si technology
[DE93-000096] p 3464 N93-29965
Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2
[PB93-174779] p 3465 N93-30001
Measurements and Characterization Branch
[DE93-000094] p 3465 N93-30207

SOLAR FLARES
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
Solar flare MDH
[AD-A262275] p 3652 N93-28756
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744

SOLAR FLUX
A study of the physical mechanisms for filament eruption and coronal mass ejection via numerical simulation
[NASA-CR-193180] p 3653 N93-28935
Modification of flux profiles using a faceted concentrator
[DE93-000087] p 3464 N93-29925

SOLAR FURNACES
Modification of flux profiles using a faceted concentrator
[DE93-000087] p 3464 N93-29925
Thermal effects testing at the National Solar Thermal Test Facility
[DE93-009825] p 3465 N93-30391

SOLAR GENERATORS
Technical examination and simulation of a photovoltaic system: Solar generator, battery, download
[ETN-93-94179] p 3466 N93-30573

SOLAR GRAVITATION
The detection of low-degree solar gravity mode oscillations by differential radius observations, 1986-1987 p 3652 N93-28605

SOLAR MAGNETIC FIELD
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585

SOLAR NEUTRINOS
Neutrino oscillations and a new Faraday effect
[DE93-606111] p 3571 N93-30789
Planck scale effects in neutrino physics
[DE93-606133] p 3571 N93-30793

SOLAR OSCILLATIONS
The detection of low-degree solar gravity mode oscillations by differential radius observations, 1986-1987 p 3652 N93-28605

SOLAR PHYSICS
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
Activities report of the Astronomical Society
[MITT-75] p 3629 N93-29008
NSSDC data listing
[NASA-TM-108264] p 3612 N93-29167

SOLAR POWER SATELLITES
ASPEC: Solar power satellite p 3233 N93-29750

SOLAR POWERED AIRCRAFT
Solar powered multipurpose remotely powered aircraft
p 3229 N93-29722

SOLAR RADIATION
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
Clouds and radiation: A primier
[AD-A263136] p 3482 N93-29479
Daily sum of the global radiation: Calculation method and verification of forecast
[KNMI-TR-138] p 3478 N93-30113

SOLAR REFLECTORS
In orbit degradation of EUV optical components in the wavelength range 10-40 nm AO 138-3
p 3582 N93-29691

SOLAR SENSORS
Long Duration Exposure Facility (LDEF) attitude measurements of the Interplanetary Dust Experiment
p 3638 N93-29377

SOLAR SPECTRA
A unique photon bombardment system for space applications p 3286 N93-28790
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
The effect of the low Earth orbit environment on space solar cells: Results of the Advanced Photovoltaic Experiment (S0014) p 3467 N93-29686
Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830
Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

SOLAR STORMS
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744

SOLAR SYSTEM
Space research in Germany 1990-1991
[ETN-93-93807] p 3654 N93-28477
Workshop on Advanced Technologies for Planetary Instruments, part 1
[NASA-CR-193015] p 3639 N93-28764

SOLAR TERRESTRIAL INTERACTIONS
SESC products and services user guide
[PB93-178879] p 3653 N93-29679
SOLAR WIND
Mithras studies of the boundary between open and closed field lines
[AD-A264758] p 3479 N93-30562
SOLAR X-RAYS
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
SOLDERED JOINTS
The 17th Annual Electronics Manufacturing Seminar proceedings
[AD-A261963] p 3409 N93-29435
SOLDERING
Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems
[DE93-753130] p 3320 N93-28529
Characterization and optimization of a Hot Air Solder-Leveling System
[DE93-010188] p 3332 N93-29328
The 17th Annual Electronics Manufacturing Seminar proceedings
[AD-A261963] p 3409 N93-29435
Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System
[DE93-006283] p 3412 N93-30370
Performance of thermal adhesives in forced convection p 3293 N93-30974
SOLDERS
Characterization and optimization of a Hot Air Solder-Leveling System
[DE93-010188] p 3332 N93-29328
Adhesion of thick film Au to alumina ceramics
[DE93-009802] p 3339 N93-30656
SOLID CRYOGENS
Specific impulse calculations of high energy density solid cryogenic rocket propellants. 1. Atoms in solid H2
[AD-A263208] p 3341 N93-28517
SOLID ELECTROLYTES
In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques
[DE93-007699] p 3405 N93-28581
Polymer electrolyte fuel cells for transportation applications
[DE93-008721] p 3464 N93-29147
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion
[DE93-010662] p 3464 N93-29844
The effect of Bi2 O3 on the electrical properties of Zr O2: 3 percent Mg O ceramic solid electrolytes
[DE93-607029] p 3339 N93-30774
SOLID LUBRICANTS
Synthesis of new high performance lubricants and solid lubricants
[DE93-012237] p 3330 N93-28748
SOLID PHASES
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Powder metallurgy: Solid and liquid phase sintering of copper p 3294 N93-30976
SOLID PROPELLANT COMBUSTION
Response of energetic solids to light, heat and shock pulses
[AD-A263702] p 3342 N93-29296
The outlook for understanding the combustion of solid propellants and what it will take p 3346 N93-30078
Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080
Unsteady combustion of energetic materials using laser-recoil p 3319 N93-30085
SOLID PROPELLANT IGNITION
Response of energetic solids to light, heat and shock pulses
[AD-A263702] p 3342 N93-29296
Interfacial melting in cracked explosives
p 3349 N93-30089
SOLID PROPELLANT ROCKET ENGINES
Microstructural modeling of electrical breakdown in solid fuel propellants
[AD-A263466] p 3342 N93-29835
Postflight hardware evaluation 360T025 (RSRM-25, STS-46)
[NASA-CR-192562] p 3272 N93-30617
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix A: Insulation PFORs
[NASA-CR-192563] p 3272 N93-30618
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix B: Case, seals, and joints PFORs
[NASA-CR-192564] p 3272 N93-30619
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix E: Insulation postfire data
[NASA-CR-192566] p 3272 N93-30621
Postflight hardware evaluation 360T025 (RSRM-25, STS-46). Appendix D: Nozzle postfire data
[NASA-CR-192580] p 3289 N93-30648
SOLID PROPELLANTS
Response of energetic solids to light, heat and shock pulses
[AD-A263702] p 3342 N93-29296
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Combustion/explosion chemistry of bulk materials
p 3343 N93-30062
Single-shot femtosecond spectroscopy: A methodology for observation of solid-state chemical reactions
p 3319 N93-30075
SOLID ROCKET PROPELLANTS
Specific impulse calculations of high energy density solid cryogenic rocket propellants. 1. Atoms in solid H2
[AD-A263208] p 3341 N93-28517
Microstructural modeling of electrical breakdown in solid fuel propellants
[AD-A263466] p 3342 N93-29835
The outlook for understanding the combustion of solid propellants and what it will take p 3346 N93-30078
Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080
SOLID SOLUTIONS
Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue
[AD-A264523] p 3598 N93-30407
SOLID STATE
Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films
[AD-A263664] p 3594 N93-29293
Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816
Ultrafast, passive, broad-band, optical shutter based on novel semiconductor/conducting polymer interfaces
[AD-A264098] p 3601 N93-30878
SOLID STATE DEVICES
In situ characterization of interfacial and bulk properties of lithium polymer batteries using 4-probe DC techniques
[DE93-007699] p 3405 N93-28581
Electronics research report
[AD-A262733] p 3405 N93-28589
Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830
A novel approach for new radiation sources based on solid state plasma instabilities
[AD-A263699] p 3588 N93-29382
Electronics research at the University of Texas at Austin. Appendix: JSEP sponsored publications
[AD-A262993] p 3409 N93-29485
SOLID STATE LASERS
All solid-state high power visible laser
[NASA-CR-193163] p 3436 N93-28623
Design of the Nova Upgrade laser system for ignition fusion experiments
[DE93-009077] p 3436 N93-29097
Holmium quasi-two level laser
[AD-D015706] p 3440 N93-30427
Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics
[DE93-009827] p 3433 N93-30510
SOLID SUSPENSIONS
Magnetohydrodynamic projects at the CDIF
[DE93-012195] p 3584 N93-28649
SOLID WASTES
Strategic Environmental Research and Development Program (SERDP)
[AD-A263745] p 3471 N93-29858
Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances
[PB93-185551] p 3475 N93-30829
SOLIDIFICATION
An evaluation of factors affecting the solidification/stabilization of heavy metal sludge
[AD-A264128] p 3473 N93-30197
Development of a CFD code for casting simulation
[NASA-CR-192577] p 3427 N93-30492
Eutectic solidification of Al-U at slowly cooling rates (10 C per second)
[DE92-640082] p 3328 N93-30941
Visualizing weld metal solidification using organic analogs p 3293 N93-30973
A review of hot cracking in austenitic stainless steel weldments
[DE93-605280] p 3328 N93-31021
SOLIDIFIED GASES
Specific impulse calculations of high energy density solid cryogenic rocket propellants. 1. Atoms in solid H2
[AD-A263208] p 3341 N93-28517
SOLIDS
Theory of normal and superconducting properties of fullerene-based solids
[DE93-007722] p 3592 N93-28582
Some problems in the mechanics of solids with phase mixtures
[AD-A263652] p 3311 N93-29291
Representation and recognition with invariants and geometric constraint models
[AD-A263235] p 3529 N93-29493
Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711
Rapidly activated dynamic phase transitions in nonlinear solids
[AD-A263601] p 3299 N93-29982
Metallization at detonation fronts in solids
p 3319 N93-30087
Pulsed laser photoacoustic spectrometer for study of solid materials
[DE93-605290] p 3441 N93-31023
SOLIDS FLOW
Dense inclined flows: Theory and experiments
[DE93-011452] p 3417 N93-28630
SOLITARY WAVES
Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565
Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569
Dynamics and photoexcitation in MX and MXX' chain solids
[AD-A264823] p 3561 N93-29711
On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912
Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988
SOLUBILITY
Super critical water oxidation on energetic materials
[DE93-010704] p 3342 N93-29312
Chromatographic and solvatochromic measurements on butyl rubbers
[AD-A263088] p 3334 N93-29795
Water-soluble polyphosphazenes and their hydrogels
[AD-A264883] p 3340 N93-30909
SOLUTES
Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551
SOLUTIONS
Applications of laser light scattering in polymer dilute solution characterization
[AD-A263110] p 3335 N93-30007
SOLVATION
A simple model for ion solvation with non additive cores
[AD-A263075] p 3566 N93-29143
Chromatographic and solvatochromic measurements on butyl rubbers
[AD-A263088] p 3334 N93-29795
SOLVENTS
Acid gas treating by aqueous alkanolamines
[PB93-176188] p 3471 N93-29676
Hydrogen sulfide decomposition into hydrogen and sulfur by quinone cycles, part 1
[PB93-175297] p 3317 N93-30761
SONIC BOOMS
Subjective response to simulated sonic booms with ground reflections
[NASA-TM-107764] p 3561 N93-28692
Sonic boom problem for future highspeed aircraft
[ONERA-NT-1990-3] p 3241 N93-30020
SOOT
Detailed studies of soot formation in laminar diffusion flames for application to modeling studies
[AD-A264827] p 3317 N93-30667
SORET COEFFICIENT
Follow up on the crystal growth experiments of the LDEF p 3602 N93-29381
SOUND DETECTING AND RANGING
Acoustic transducer system
[AD-D015713] p 3562 N93-29279
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
Atmospheric studies with SODAR at Kalpakkam
[DE93-605544] p 3480 N93-30992
SOUND FIELDS
Investigation of thermoacoustic muffler
[AD-A262009] p 3562 N93-29392
Evaluation of the scattered pressure due to infinite rigid cylinders, infinite elastic cylindrical shells, and rigid spheres in the presence of an ambient noise field
[AD-A264835] p 3563 N93-30899

SOUND GENERATORS
Investigation of thermoacoustic muffler
[AD-A262009] p 3562 N93-29392

SOUND PRESSURE
Acoustic transducer system
[AD-D015713] p 3562 N93-29279

SOUND TRANSDUCERS
Acoustic transducer system
[AD-D015713] p 3562 N93-29279

SOUND TRANSMISSION
Experiments in materials science from household items p 3293 N93-30971

SOUND WAVES
Jet mixer noise suppressor using acoustic feedback
[NASA-CASE-LEW-15170-1] p 3561 N93-28953
Feature based neural network acoustic transient signal classification
[AD-A263437] p 3562 N93-29816
Sound wave scattering from an elastic spherical shell
[AD-A264039] p 3562 N93-30029
Sound wave scattering from a rigid sphere
[AD-A264182] p 3562 N93-30157
Acoustic-gravity waves from low-altitude localized disturbances
[AD-A264804] p 3479 N93-30593

SOUNDS (TOPOGRAPHIC FEATURES)
Remote sensing survey of Mississippi River-Gulf Outlet, Breton Sound disposal area, Plaquemines Parish, Louisiana
[AD-A263097] p 3459 N93-29146

SOUTHERN OSCILLATION
Atmospheric and Geophysical Sciences Division: G-Division did you know?
[DE93-007412] p 3469 N93-28967

SPACE BASED RADAR
Array-fed reflector systems with limited scan
p 3371 N93-30318

SPACE CHARGE
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method
[ONERA-P-1990-4] p 3335 N93-30024
Some problems of relativistic electrodynamics
[DE92-644738] p 3400 N93-30923

SPACE COMMERCIALIZATION
US space commerce, 1991 p 3625 N93-30695
Sandia National Laboratories p 3626 N93-30702

SPACE COMMUNICATION
System overview on electromagnetic compensation for reflector antenna surface distortion
[NASA-TM-106217] p 3273 N93-29195
The Telecommunications and Data Acquisition Report
[NASA-CR-193144] p 3384 N93-29586

SPACE DEBRIS
Orbital Debris Environment Monitor (ODEM)
p 3267 N93-28735
Proposal for a universal particle detector experiment
p 3286 N93-28795
Report of the Meteoroid and Debris Special Investigation Group p 3638 N93-29355
Micrometeoroids and debris on LDEF
p 3638 N93-29356
Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357
Predicted and observed directional dependence of meteoroid/debris impacts on LDEF thermal blankets
p 3638 N93-29358
Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361
Derivation of particulate directional information from analysis of elliptical impact craters on LDEF
p 3283 N93-29362
Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363
Hypervelocity impact facility for simulating materials exposure to impact by space debris
p 3283 N93-29365
Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370
Interplanetary meteoroid debris in LDEF metal craters
p 3638 N93-29372
Origin of orbital debris impacts on LDEF's trailing surfaces p 3283 N93-29373
Damage areas on selected LDEF aluminum surfaces
p 3283 N93-29374
LDEF data: Comparisons with existing models
p 3283 N93-29375
Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379
An LDEF 2 dust instrument for discrimination between orbital debris and natural particles in near-Earth space
p 3286 N93-29707
Advanced design for orbital debris removal in support of solar system exploration p 3229 N93-29724
From orbital debris capture systems through internal combustion engines on Mars p 3232 N93-29745
Hypervelocity impact testing of the Space Station utility distribution system carrier
[NASA-TM-104771] p 3289 N93-30507

SPACE ENVIRONMENT SIMULATION
Laboratory simulation of field-aligned currents
[NASA-CR-193091] p 3476 N93-28538
Lunar regolith penetrators and cutters
p 3276 N93-29117
Radiation model predictions and validation using LDEF satellite data p 3573 N93-29641
Future directions for LDEF ionizing radiation modeling and assessments p 3573 N93-29642
Mathematical simulation of the induced (gamma)-radiation in structural materials of spaceships. Time dependence
[DE93-605312] p 3281 N93-31024

SPACE ERECTABLE STRUCTURES
Vibration control of flexible space structures in noisy environment p 3285 N93-30235

SPACE EXPLORATION
Advanced collapsible tank for liquid containment
[NASA-CR-188247] p 3353 N93-28698
Workshop on Advanced Technologies for Planetary Instruments, part 1
[NASA-CR-193015] p 3639 N93-28764
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Advanced design for orbital debris removal in support of solar system exploration p 3229 N93-29724
Project WISH: The Emerald City p 3232 N93-29744
Sandia National Laboratories p 3626 N93-30702
Exploration technology prioritization
p 3629 N93-30726
Space transfer concepts and analyses for exploration missions, phase 3
[NASA-CR-192584] p 3268 N93-31034

SPACE FLIGHT
Armstrong Laboratory space visual function tester program p 3267 N93-28739

SPACE HABITATS
Selenia: A habitability study for the development of a third generation lunar base p 3233 N93-29748

SPACE LOGISTICS
Analysis of orbital system logistics in the cis-lunar space with particular consideration of life cycle costs
[ETN-93-93484] p 3268 N93-29063

SPACE MANUFACTURING
Space construction activities
[NASA-CR-192690] p 3274 N93-29108

SPACE MECHANICS
Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796
On the invariant measure for the nonlinear Schroedinger equation
[DE92-644672] p 3551 N93-30912

SPACE MISSIONS
Small Stirling dynamic isotope power system for robotic space missions
[NASA-TM-105785] p 3287 N93-28686
The APX spectrometer for Martian missions
p 3434 N93-28776
Detection of other planetary systems using photometry p 3632 N93-28791
The MESUR mission p 3649 N93-28816
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819
Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502
Technology transfer and space science missions
p 3626 N93-30705
Technology transfer within the government
p 3627 N93-30709
Technology transfer within the government
p 3627 N93-30711

SPACE NAVIGATION
Clementine sensor processing system
p 3285 N93-28778
Reference equations of motion for automatic rendezvous and capture
[NASA-CR-185676] p 3269 N93-29652
Attitude determination using GPS: Development of an all solid-state guidance, navigation, and control sensor for air and space vehicles based on the global positioning system p 3246 N93-30605

SPACE OBSERVATIONS (FROM EARTH)
Advanced research in sky surveillance: A search for low-luminosity objects
[AD-A264832] p 3631 N93-30629

SPACE PERCEPTION
Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1
p 3502 N93-28857

SPACE PLASMAS
Plasma, magnetic, and electromagnetic measurements at nonmagnetic bodies p 3647 N93-28809
Development of Miniaturized Optimized Smart Sensors (MOSS) for space plasmas p 3286 N93-28828
Ionospheric structure specifications and systems effects
[AD-A263573] p 3476 N93-29343

SPACE PLATFORMS
Measurement of the relative and absolute microgravity environment of space platforms, recent flight results, and determination of the spatial microgravity field
p 3266 N93-28725

SPACE POWER REACTORS
Analysis of TOPAZ 2 and SPACE-R space nuclear power plants using a modified thermionic model
[AD-A262612] p 3286 N93-28474
NEP space test program objective
p 3265 N93-28724
Technology transfer personnel exchange at the Boeing Company
[DE93-010190] p 3625 N93-29329
Thermion: Verification of a thermionic heat pipe in microgravity p 3235 N93-29757

SPACE PROBES
Spaceborne passive radiative cooler
p 3378 N93-28802
Double swingby at Earth-Moon for increase of excess velocity
[ETN-93-94177] p 3270 N93-30582

SPACE PROCESSING
Measurement of the relative and absolute microgravity environment of space platforms, recent flight results, and determination of the spatial microgravity field
p 3266 N93-28725

SPACE PROGRAMS
Decision maker's guide to international space
[ANSER-STDN-93-4] p 3669 N93-29710
Proceedings of the Seventh Annual Summer Conference. NASA/USRA: University Advanced Design Program
[NASA-CR-192962] p 3227 N93-29712
Technology Transfer and the Civil Space Program. Volume 2: Workshop proceedings
[NASA-TM-108250] p 3625 N93-30692
Workshop conclusions: Technology transfer and the civil space program p 3628 N93-30721

SPACE RENDEZVOUS
The +vbar breakout during approach to Space Station Freedom
[NASA-TM-104772] p 3269 N93-30135

SPACE SHUTTLE MAIN ENGINE
Additional support for the TDK/MABL computer program
[NASA-CR-193037] p 3526 N93-29028
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade
[NASA-TM-106187] p 3420 N93-29157

SPACE SHUTTLE MISSIONS
Low-frequency vibration environment for five Shuttle missions
[NASA-TM-106059] p 3285 N93-28554
Description of the Joint Damping Experiment (JDX)
p 3263 N93-28703
Effect of microgravity on several visual functions during STS Shuttle missions: Visual Function Tester-Model 1 (VFT-1) p 3268 N93-28740
Effect of microgravity on visual contrast threshold during STS Shuttle missions: Visual Function Tester-Model 2 (VFT-2) p 3268 N93-28741
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55
[NASA-TM-107559] p 3271 N93-29136
The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376

SPACE SHUTTLE ORBITERS
Space Station: Orbiter berthing p 3274 N93-29031

SPACE SHUTTLE PAYLOADS
NASA/DOD Flight Experiments Technical Interchange Meeting Proceedings
[NASA-TM-108721] p 3262 N93-28699
The MODE family of facility class experiments
p 3263 N93-28705
Tank Pressure Control Experiment (TPCE)
p 3264 N93-28712
In-STEP Two-Phase Flow (TPF) thermal control experiment p 3265 N93-28719
Payload flight assignments. NASA mixed fleet
[NASA-TM-108255] p 3268 N93-30133
The middeck 0-gravity dynamics experiment
[NASA-CR-4500] p 3281 N93-30376

Aerospace payload design and development [AD-A264502] p 3289 N93-30402

SPACE SHUTTLES

The Orbiter Experiments (OEX) program p 3266 N93-28731

An assessment of space shuttle flight software development processes [NASA-CR-193179] p 3525 N93-28934

Multivariable control of the Space Shuttle Remote Manipulator System using linearization by state feedback [NASA-CR-188248] p 3443 N93-29080

Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136

Numerical computation of inviscid flow around nose tip of Space Shuttle with NND scheme [AD-A264012] p 3421 N93-29260

Payload flight assignments. NASA mixed fleet [NASA-TM-108255] p 3268 N93-30133

Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation [NASA-CR-193016] p 3272 N93-31033

SPACE STATION FREEDOM

Space Station: Orbiter berthing p 3274 N93-29031

Automation of closed environments in space for human comfort and safety p 3230 N93-29734

From orbital debris capture systems through internal combustion engines on Mars p 3232 N93-29745

The +vbar breakout during approach to Space Station Freedom [NASA-TM-104772] p 3269 N93-30135

Hypervelocity impact testing of the Space Station utility distribution system carrier [NASA-TM-104771] p 3289 N93-30507

Space transfer concepts and analyses for exploration missions, phase 3 [NASA-CR-192584] p 3268 N93-31034

SPACE STATION PAYLOADS

Analysis of orbital system logistics in the cis-lunar space with particular consideration of life cycle costs [ETN-93-93484] p 3268 N93-29063

SPACE STATION STRUCTURES

Space station attitude disturbance arising from internal motions p 3280 N93-29995

SPACE STATIONS

Project WISH: The Emerald City p 3232 N93-29744

SPACE STORAGE

The 1990-1991 project summaries p 3230 N93-29730

SPACE TRANSPORTATION

Space transportation analysis and design (Reissue A) [AD-A262752] p 3271 N93-28487

The Orbiter Experiments (OEX) program p 3266 N93-28731

Antares: A low cost modular launch vehicle for the future p 3235 N93-29759

Space transfer concepts and analyses for exploration missions, phase 3 [NASA-CR-192584] p 3268 N93-31034

SPACE TRANSPORTATION SYSTEM

Analysis of orbital system logistics in the cis-lunar space with particular consideration of life cycle costs [ETN-93-93484] p 3268 N93-29063

Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation [NASA-CR-193016] p 3272 N93-31033

SPACE TRANSPORTATION SYSTEM FLIGHTS

Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55 [NASA-TM-107559] p 3271 N93-29136

Enhanced reduction of velocity data obtained during CETA flight experiment [NASA-TM-4460] p 3431 N93-29209

SPACE-TIME FUNCTIONS

Quantum field theory in spaces with closed time-like curves [DE93-010564] p 3605 N93-30481

Phase structure of three- and four-dimensional phi(exp 4) field theory [DE93-606069] p 3605 N93-30782

Beyond two dimensions [DE93-606084] p 3606 N93-30786

The ground state wavefunctions of a conformally invariant scalar field in different spacetime background [DE93-606063] p 3606 N93-30808

A simple formula for reducing Feynman diagrams to scalar integrals [DE92-644717] p 3607 N93-30916

Fourth-rank gravity and cosmology [DE92-644722] p 3637 N93-30918

Topology and statistics in zero dimensions [DE93-604080] p 3607 N93-30932

Relativity theory in (2 + 2)-space [DE92-644671] p 3608 N93-30983

Spherically symmetric line element and Killing vectors in five-dimensional space [DE93-604132] p 3558 N93-30988

The geometry of complex space-times with torsion [DE92-641343] p 3608 N93-31003

SPACEBORNE ASTRONOMY

Space research in Germany 1990-1991 [ETN-93-93807] p 3654 N93-28477

The Ultraviolet Plume Instrument (UVPI) p 3285 N93-28784

SPACEBORNE EXPERIMENTS

NASA/DOD Flight Experiments Technical Interchange Meeting Proceedings [NASA-TM-108721] p 3262 N93-28699

Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700

In-step inflatable antenna experiment p 3263 N93-28701

Description of the Joint Damping Experiment (JDX) p 3263 N93-28703

Adaptive structures flight experiments p 3263 N93-28704

The MODE family of facility class experiments p 3263 N93-28705

Control-structures interaction test of the LACE satellite p 3263 N93-28706

CSI-Star: A low-cost CSI orbital testbed p 3263 N93-28707

Vented Tank Resupply Experiment (VTRE) for In-Space Technology Experiment Program (IN-STEP) p 3264 N93-28711

Tank Pressure Control Experiment (TPCE) p 3264 N93-28712

Tank Pressure Control Experiment/Thermal Phenomena (TPCE/TP) p 3264 N93-28713

Solar Array Module Plasma Interaction Experiment (SAMPIE) p 3265 N93-28716

The Photovoltaic Array Space Power Plus diagnostics (PASP Plus) flight experiment p 3265 N93-28717

Sodium sulfur technology program NaSTEC p 3265 N93-28718

In-STEP Two-Phase Flow (TPF) thermal control experiment p 3265 N93-28719

Thermal energy storage flight experiment in microgravity p 3265 N93-28720

Cryogenic Heat Pipe Experiment (CRYOHP) p 3265 N93-28721

STRV1-b flight experiment p 3265 N93-28723

NEP space test program objective p 3265 N93-28724

The Optical Properties Monitor (OPM): A multipurpose optical laboratory in space p 3266 N93-28729

The Orbiter Experiments (OEX) program p 3266 N93-28731

NPB cesium space experiment p 3267 N93-28733

Environmental monitors in the Midcourse Space Experiments (MSX) p 3286 N93-28826

FNAS CRRES program completion [NASA-CR-192468] p 3476 N93-29032

LDEF materials data bases [NASA-TM-107757] p 3290 N93-29067

Enhanced reduction of velocity data obtained during CETA flight experiment [NASA-TM-4460] p 3431 N93-29209

Progress report on the Heavy Ions in Space (HIIS) experiment p 3573 N93-29645

LDEF: 69 Months in Space. Part 4: Second Post-Retrieval Symposium [NASA-CP-3194-PT-4] p 3665 N93-29682

LDEF Space Plasma-High Voltage Drainage Experiment post-flight results p 3414 N93-29690

LDEF space optics handbook p 3582 N93-29695

Retrievable payload carrier, next generation Long Duration Exposure Facility: Update 1992 p 3283 N93-29705

QuickStar: System design, capabilities, and tactical applications of a small, smart space system p 3284 N93-29905

Residual acceleration data on IML-1: Development of a data reduction and dissemination plan [NASA-CR-193224] p 3281 N93-30038

The middeck 0-gravity dynamics experiment [NASA-CR-4500] p 3281 N93-30376

Aerospace payload design and development [AD-A264502] p 3289 N93-30402

SPACEBORNE LASERS

Subnanoradian, groundbased tracking of spaceborne lasers p 3442 N93-28823

SPACEBORNE TELESCOPES

Formulation of Ames 24E2 IR-black coating [NASA-TM-102864] p 3629 N93-29453

SPACECRAFT ANTENNAS

In-step inflatable antenna experiment p 3263 N93-28701

System overview on electromagnetic compensation for reflector antenna surface distortion [NASA-TM-106217] p 3273 N93-29195

Signal-to-noise ratio losses in full spectrum combining of signals with a downconverted subcarrier p 3386 N93-29599

SPACECRAFT CHARGING

Solar Array Module Plasma Interaction Experiment (SAMPIE) p 3265 N93-28716

Spacecraft surface charging handbook [AD-A262778] p 3279 N93-29305

USU center of excellence in theory and analysis of the geo-plasma environment [AD-A264750] p 3590 N93-30585

SPACECRAFT COMPONENTS

Testing in combined dynamic environments [DE93-010679] p 3278 N93-29250

SPACECRAFT CONFIGURATIONS

Adaptive structures flight experiments p 3263 N93-28704

SPACECRAFT CONSTRUCTION MATERIALS

The Optical Properties Monitor (OPM): A multipurpose optical laboratory in space p 3266 N93-28729

Low Earth orbital mission aboard the Space Test Experiments Platform (STEP-3) p 3267 N93-28732

Induced activation study of LDEF p 3572 N93-29632

SPACECRAFT CONTAMINATION

Environmental Verification Experiment for the Explorer Platform (EVEEP) p 3266 N93-28726

Return flux experiment p 3266 N93-28727

Low Earth orbital mission aboard the Space Test Experiments Platform (STEP-3) p 3267 N93-28732

Proposal for a universal particle detector experiment p 3286 N93-28795

New results from FRECOPA analysis p 3448 N93-29688

SPACECRAFT CONTROL

NASA instep/MDMSC jitter suppression experiment (JITTER) p 3263 N93-28702

Adaptive structures flight experiments p 3263 N93-28704

CSI-Star: A low-cost CSI orbital testbed p 3263 N93-28707

Clementine sensor processing system p 3285 N93-28778

Controls for space structures p 3275 N93-29112

Reference equations of motion for automatic rendezvous and capture [NASA-CR-185676] p 3269 N93-29652

Attitude- and Orbit Control Subsystem concepts for TACSATS p 3284 N93-29906

Efficient Reorientation Maneuvers for Spacecraft with Multiple Articulated Payloads [NASA-CR-193142] p 3279 N93-29988

Space station attitude disturbance arising from internal motions p 3280 N93-29995

SPACECRAFT DESIGN

Natural environmental service support to NASA vehicle, technology, and sensor development programs [NASA-CR-192554] p 3469 N93-29029

Conceptual design of a two-stage-to-orbit vehicle p 3228 N93-29716

The design of two-stage-to-orbit vehicles p 3228 N93-29719

ASUR p 3228 N93-29720

Lunar lander ground support system p 3230 N93-29729

Delta Advanced Reusable Transport (DART): An alternative manned spacecraft p 3231 N93-29735

Taurus Lightweight Manned Spacecraft Earth orbiting vehicle p 3231 N93-29736

Project Copernicus: An Earth observing system p 3231 N93-29738

Project WISH: The Emerald City p 3232 N93-29744

The lightcraft project p 3233 N93-29749

B and T: Lunar landers p 3234 N93-29751

RS Landers: Lunar lander p 3234 N93-29753

SPECS: Orbital debris removal p 3234 N93-29754

Mars Aquarius Mission and Titan Explorer p 3235 N93-29756

Solar electric propulsion cargo spacecraft for Mars missions p 3235 N93-29758

Antares: A low cost modular launch vehicle for the future p 3235 N93-29759

Space Generic Open Avionics Architecture (SGOAA) reference model technical guide [NASA-CR-188246] p 3285 N93-31032

Space transfer concepts and analyses for exploration missions, phase 3 [NASA-CR-192584] p 3268 N93-31034

SPACECRAFT DOCKING

Space Station: Orbiter berthing p 3274 N93-29031

Controls of interaction dynamics of orbital assembly p 3275 N93-29111

Controls for space structures p 3275 N93-29112

Reference equations of motion for automatic rendezvous and capture
[NASA-CR-185676] p 3269 N93-29652
The 1990/1991 project summaries
p 3229 N93-29725

SPACECRAFT ELECTRONIC EQUIPMENT
Total dose tests for the PROMICS-3 instrument
[VTT-TIED-1203] p 3411 N93-30108

SPACECRAFT ENVIRONMENTS
Lightweight modular instrumentation for planetary applications p 3286 N93-28787
Proposal for a universal particle detector experiment
p 3286 N93-28795

SPACECRAFT EQUIPMENT
Spaceborne passive radiative cooler
p 3378 N93-28802

SPACECRAFT GLOW
Spacecraft glow and the EISG/skirt experiment
p 3266 N93-28728

SPACECRAFT GUIDANCE
Reference equations of motion for automatic rendezvous and capture
[NASA-CR-185676] p 3269 N93-29652

SPACECRAFT INSTRUMENTS
The Orbiter Experiments (OEX) program
p 3266 N93-28731
Workshop on Advanced Technologies for Planetary Instruments, part 1
[NASA-CR-193015] p 3639 N93-28764
Clementine sensor processing system
p 3285 N93-28778
Pluto fast flyby mission and science overview
p 3649 N93-28818
A team approach to the development of gamma ray and x ray remote sensing and in situ spectroscopy for planetary exploration missions p 3650 N93-28824
Environmental monitors in the Midcourse Space Experiments (MSX) p 3286 N93-28826
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648
Next generation optical instruments and space experiment based on the LDEF thermal control surfaces experiment (S0069) p 3583 N93-29706

SPACECRAFT LANDING
Design, building, and testing of the postlanding systems for the assured crew return vehicle
p 3229 N93-29726
Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation
[NASA-CR-193016] p 3272 N93-31033

SPACECRAFT LAUNCHING
Space transportation analysis and design (Reissue A)
[AD-A262752] p 3271 N93-28487
SeaWiFS technical report series. Volume 2: Analysis of orbit selection for SeaWiFS: Ascending versus descending node
[NASA-TM-104566-VOL-2] p 3486 N93-28497
Benefits of in situ propellant utilization for a Mars sample return mission
[NASA-TM-106243] p 3341 N93-28695
NEP space test program objective
p 3265 N93-28724
DSN support of Mars Observer p 3385 N93-29598
TACSAT ground control and data collection
p 3388 N93-29895
Launch vehicles for lightweight TACSAT deployment
p 3271 N93-29903
Spacecraft and launch systems for TACSAT applications p 3284 N93-29904
QuickStar: System design, capabilities, and tactical applications of a small, smart space system
p 3284 N93-29905
Electric propulsion for lightsats: A review of applications and advantages p 3290 N93-29907
Payload flight assignments. NASA mixed fleet
[NASA-TM-108255] p 3268 N93-30133
A representative survey of US space systems and methods for estimating their costs
[AD-A264159] p 3272 N93-30881

SPACECRAFT MANEUVERS
Efficient Reorientation Maneuvers for Spacecraft with Multiple Articulated Payloads
[NASA-CR-193142] p 3279 N93-29988
Attitude stabilization of a rigid spacecraft using two momentum wheel actuators p 3280 N93-29990
Efficient reorientation of a deformable body in space: A free-free beam example p 3280 N93-29994

SPACECRAFT MOTION
On symmetric central configurations with application to satellite motion about rings p 3652 N93-31000

SPACECRAFT ORBITS
Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730
New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

SPACECRAFT POWER SUPPLIES
NASA/DOD Flight Experiments Technical Interchange Meeting Proceedings
[NASA-TM-108721] p 3262 N93-28699
Developing an inflatable solar array
p 3264 N93-28714
Sodium-Sulfur Cell Technology flight experiment (SSCT) p 3264 N93-28715
Solar Array Module Plasma Interaction Experiment (SAMPIE) p 3265 N93-28716
The Photovoltaic Array Space Power Plus diagnostics (PASP Plus) flight experiment p 3265 N93-28717
Sodium sulfur technology program NaSTEC
p 3265 N93-28718
NEP space test program objective
p 3265 N93-28724
Evaluation of actuator energy storage and power sources for spacecraft applications
[NASA-CR-193226] p 3288 N93-29091
LDEF: 69 Months in Space. Second Post-Retrieval Symposium, part 2
[NASA-CP-3194-PT-2] p 3654 N93-29354
The lightcraft project p 3233 N93-29749
Power beaming to communication satellites in GEO
[DE93-007608] p 3279 N93-29840
Change of solar cell element properties influenced by adsorbed atoms
[DE93-606694] p 3466 N93-30777

SPACECRAFT PROPULSION
Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-192561] p 3287 N93-28680
A new facility for advanced rocket propulsion research
[NASA-TM-106193] p 3270 N93-28696
NASA/DOD Flight Experiments Technical Interchange Meeting Proceedings
[NASA-TM-108721] p 3262 N93-28699
ELITE program: Electric insertion transfer experiment
p 3264 N93-28709
Advanced engine study program
[NASA-CR-187217] p 3287 N93-28946
Studies of hydrogen-air diffusion flames and of compressibility effects related to high-speed propulsion
p 3310 N93-29125
LDEF: 69 Months in Space. Second Post-Retrieval Symposium, part 2
[NASA-CP-3194-PT-2] p 3654 N93-29354

SPACECRAFT RADIATORS
Technology transfer personnel exchange at the Boeing Company
[DE93-010190] p 3625 N93-29329

SPACECRAFT SHIELDING
Ablative shielding for hypervelocity projectiles
[NASA-CASE-MSC-21884-1] p 3331 N93-29088
New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376
Absorbed dose measurements and predictions on LDEF p 3573 N93-29636
Light-heavy ion measurements in CR-39 located on the Earth side of LDEF p 3573 N93-29638
Three-dimensional shielding effects on charged particle fluences measured in the P0006 experiment of LDEF
p 3573 N93-29639
Overview of the Systems Special Investigation Group investigation p 3318 N93-29683
Beta/gamma Monte Carlo transport in repetitive structures of satellite systems
[DE93-007610] p 3281 N93-30509

SPACECRAFT STABILITY
The dynamics and control of space tethers
p 3274 N93-28629
Liquid Motion in a rotating tank Experiment (LME)
p 3264 N93-28710
Controls for space structures p 3275 N93-29112
Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization
p 3279 N93-29989

SPACECRAFT STRUCTURES
NASA/DOD Flight Experiments Technical Interchange Meeting Proceedings
[NASA-TM-108721] p 3262 N93-28699
Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700
NASA instep/MDMSC jitter suppression experiment (JITTER) p 3263 N93-28702
Adaptive structures flight experiments
p 3263 N93-28704
Upper atmosphere research satellite jitter study
p 3264 N93-28708
Space construction activities
[NASA-CR-192690] p 3274 N93-29108
Controls of interaction dynamics of orbital assembly
p 3275 N93-29111
Controls for space structures p 3275 N93-29112
Structural load control during construction
p 3275 N93-29113
Systems engineering studies of on-orbit assembly operation p 3275 N93-29114
Design optimization of space structures
p 3278 N93-29122
Analysis of LDEF micrometeoroid/debris data and damage to composite materials p 3309 N93-29366
Nonlinear attitude control of planar structures in space using only internal controls p 3280 N93-29991
Planar reorientation of a free-free beam in space using embedded electromechanical actuators
p 3280 N93-29993
Mathematical simulation of the induced (gamma)-radiation in structural materials of spaceships. Time dependence
[DE93-605312] p 3281 N93-31024

SPACECRAFT TRACKING
Subnanoradian, groundbased tracking of spaceborne lasers p 3442 N93-28823
The effect of clock, media, and station location errors on Doppler measurement accuracy
p 3246 N93-29588

SPACECRAFT TRAJECTORIES
Double swingby at Earth-Moon for increase of excess velocity
[ETN-93-94177] p 3270 N93-30582

SPACECREWS
Radiation monitoring equipment dosimeter experiment
p 3266 N93-28730

SPACELAB PAYLOADS
Residual acceleration data on IML-1: Development of a data reduction and dissemination plan
[NASA-CR-193224] p 3281 N93-30038

SPACING
Fundamental studies of impingement cooling thermal boundary conditions p 3254 N93-29940

SPALLATION
Cosmogenic radionuclides on LDEF: An unexpected Be-10 result p 3573 N93-29643

SPARKS
Tool grinding and spark testing p 3291 N93-30954

SPATIAL DEPENDENCIES
A neural network based approach for machine fault diagnosis
[VTT-TIED-1274] p 3543 N93-29998

SPATIAL DISTRIBUTION
Ground clutter measurements for surface-sited radar
[AD-A262472] p 3379 N93-28655
Quantitative analysis of properties and spatial relations of fuzzy image regions p 3510 N93-29523
Encoding spatial images: A fuzzy set theory approach
p 3511 N93-29527
Utility of a ghost horizon and climb/dive ladder line tapering on a head-up display
[AD-A264401] p 3508 N93-30167

SPATIAL RESOLUTION
Characterization of laboratory generated turbulence by optical phase measurements
[AD-A262596] p 3480 N93-28465
Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781
Resolution-enhanced mapping spectrometer
p 3434 N93-28794
Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817

SPECIFIC IMPULSE
Specific impulse calculations of high energy density solid cryogenic rocket propellants. 1. Atoms in solid H2
[AD-A263208] p 3341 N93-28517

SPECIFICATIONS
Concept document of the repository-based software engineering program: A constructive appraisal
[NASA-CR-193125] p 3526 N93-29027
Optical coherent phase diversity systems
[ISBN-90-9004897-9] p 3578 N93-29270
On the evaluation of fuzzy quantified queries in a database management system p 3517 N93-29569
Automatic synthesis of protocol specifications
p 3356 N93-30228

SPECKLE PATTERNS
Applications of mesoscopic physics
[DE93-012104] p 3597 N93-30141
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry
[DE93-011734] p 3427 N93-30489

SPECTRA
Benchmark eigenvalue spectrum calculations with anisotropic effects
[DE93-006387] p 3548 N93-28891
Precision optical interferometry in space
[NASA-CR-193264] p 3630 N93-29163
4D interconnect experimental development
[AD-A264298] p 3540 N93-30895

SPECTRAL BANDS
Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779

Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

SPECTRAL LINE WIDTH

Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772

SPECTRAL METHODS

Accelerated motion of rigid spheres in unsteady flows at low to moderate Reynolds numbers
p 3416 N93-28612

A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214

Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948

SPECTRAL RECONNAISSANCE

Remote sensing of agricultural vegetation: Status and perspectives p 3458 N93-28922

SPECTRAL REFLECTANCE

Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830

SPECTRAL RESOLUTION

The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766

Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781

Resolution-enhanced mapping spectrometer
p 3434 N93-28794

SPECTRAL THEORY

A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214

SPECTROGRAPHS

Design concept for an IR mapping spectrometer for the Pluto fast flyby mission p 3285 N93-28779

A technique for single-pulse spectrum and pulse width measurements for an IR-FEL
[DE93-007732] p 3436 N93-28847

SPECTROMETERS

Research and development of an airborne multispectral scanner to measure fire, terrestrial and atmospheric characteristics (50 channel)
[NASA-CR-193121] p 3456 N93-28620

The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766

The APX spectrometer for Martian missions
p 3434 N93-28776

Prototype backscatter Moessbauer spectrometer for measurement of Martian surface mineralogy
p 3648 N93-28812

A technique for single-pulse spectrum and pulse width measurements for an IR-FEL
[DE93-007732] p 3436 N93-28847

Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396

Investigations of self-pumped phase conjugate laser beams and coherence length
[AD-A263438] p 3438 N93-29789

Reaction mechanism studies of heavy ion induced nuclear reactions
[DE93-010496] p 3569 N93-29807

Research and education by SF cyclotron facility
[DE93-753135] p 3576 N93-30002

Polarization experiments with hadronic and electromagnetic probes
[DE93-011375] p 3392 N93-30126

Operation of a 20-channel grating polychromator diagnostic system and its application to sawtooth observations in JT-60U
[DE93-764388] p 3590 N93-30398

SPECTROPHOTOMETERS

Fiber optic chemical sensors for characterizing the carbon cycle in ocean margin regions
[DE93-011442] p 3489 N93-30056

SPECTROSCOPIC ANALYSIS

Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652

The production and destruction of negative ions
[DE93-010527] p 3564 N93-28665

The APX spectrometer for Martian missions
p 3434 N93-28776

Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096

Elastic and reactive collisions of atoms and molecules with neutral alkali clusters
[DE93-009313] p 3566 N93-29206

Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445

The 2nd International symposium on electrochemical impedance spectroscopy (extended abstracts)
[AD-A262994] p 3312 N93-29462

Molecular dynamics modeling of electric double layers with spectroscopic applications
[AD-A263168] p 3568 N93-29489

Single-shot femtosecond spectroscopy: A methodology for observation of solid-state chemical reactions
p 3319 N93-30075

SPECTROSCOPY

Excited states in electronic structure calculations
[DE93-007704] p 3592 N93-28642

Thermodynamic properties for polycyclic systems by non-calorimetric methods
[DE93-011373] p 3603 N93-28747

Quantum lattice fluctuations in a 1-dimensional charge-density-wave material: Luminescence and resonance Raman studies of an MX solid
[DE93-007362] p 3593 N93-28966

Molecular dynamics modeling of electric double layers with spectroscopic applications
[AD-A263168] p 3568 N93-29489

Examination of shock induced chemical reactions in liquids using time-resolved optical spectroscopy
p 3318 N93-30073

Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162

SPECTRUM ANALYSIS

Tomographic analysis of line-of-sight infrared spectra of low-pressure flames
[AD-A263185] p 3309 N93-28514

Dynamical analysis of highly excited molecular spectra
[DE93-010771] p 3564 N93-28604

Research and development of an airborne multispectral scanner to measure fire, terrestrial and atmospheric characteristics (50 channel)
[NASA-CR-193121] p 3456 N93-28620

Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769

Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing
p 3641 N93-28773

Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207

Characterization of a space orbited incoherent fiber optic bundle p 3583 N93-29698

Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830

A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052

Thermal decomposition pathways of RDX in the condensed phase p 3347 N93-30083

Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

Enhanced resolution and de-aliasing techniques for fast Fourier transforms p 3358 N93-30240

The use of data turning in airborne radars
p 3358 N93-30241

ELF/VLF spectrum measurements
p 3398 N93-30745

Computer control of pulsed tunable dye lasers
[DE93-605896] p 3441 N93-30801

ERS-1 directional wave spectra validation with the airborne SAR PHARS
[BCRS-92-18] p 3463 N93-31010

Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

SPECULAR REFLECTION

Formulation of Ames 24E2 IR-black coating
[NASA-TM-102864] p 3629 N93-29453

A program to determine the pointing angle to a specular point
[AD-A262777] p 3630 N93-29460

SPEECH RECOGNITION

Speech recognition by recursive stochastic modelling
[ISBN-90-9005038-8] p 3382 N93-29266

Improvement of the NRC automatic speech recognition system p 3355 N93-30221

The 1991 neural information processing systems: Natural and synthetic
[AD-A264754] p 3623 N93-30559

Examinations of perturbation reduction by automatic speech dependent recognition of separately spoken single words
[ETN-93-94180] p 3394 N93-30672

SPENT FUELS

Compatibility studies of AISI type 316 stainless steel with lead-lithium eutectic alloy
[DE93-605281] p 3328 N93-31022

SPHERES

Sound wave scattering from a rigid sphere
[AD-A264182] p 3562 N93-30157

SPHERICAL ANTENNAS

Progress in the development of broadband electric-field sensors for transient fields p 3369 N93-30306

SPHERICAL HARMONICS

Modern seismic travel time tables and station corrections for P and S waves
[AD-A262536] p 3477 N93-29412

Evaluation of multi-dimensional flux models for radiative transfer in cylindrical combustion chambers
p 3257 N93-29955

SPHERICAL SHELLS

Sound wave scattering from an elastic spherical shell
[AD-A264039] p 3562 N93-30029

Containment of explosions in spherical vessels
[DE93-005445] p 3446 N93-30211

SPIN

Spin observables in large t elastic N-N scattering
[DE93-009211] p 3564 N93-28549

SPIN DYNAMICS

Spin dependent phenomena in medium energy physics
[DE93-010972] p 3565 N93-28849

SPIN EXCHANGE

A high field optical-pumping spin-exchange polarized deuterium source
[DE93-009208] p 3574 N93-28970

SPIN STABILIZATION

Liquid Motion in a rotating tank Experiment (LME)
p 3264 N93-28710

Recent applications of CFD to the aerodynamics of Army projectiles
[AD-A262953] p 3240 N93-29512

SPIN-LATTICE RELAXATION

High pressure studies of hydrated nafion membranes: Dielectric relaxation and deuteron NMR
[AD-A263511] p 3332 N93-29342

SPINE

Sudden loading and fatigue effects on the human spine
[PB93-167526] p 3493 N93-29199

SPLINE FUNCTIONS

A method for intersection line calculation between parametric surfaces
[ETN-93-94178] p 3551 N93-30572

SPLINES

Spline screw autochanger
[NASA-CASE-GSC-13435-1] p 3445 N93-29505

A numerical solution of the two-center problem
[DE92-644674] p 3551 N93-30913

SPORES

Photobiological investigations on spores of streptomyces griseus
[ESA-TT-1269] p 3491 N93-29274

SPRAYERS

Estimation of droplet collision frequency in a spray
[DE93-007991] p 3416 N93-28566

Pulse mitigation and heat transfer enhancement techniques. Volume 1: Spray cooling
[AD-A263495] p 3423 N93-29352

SPREAD F

Ionospheric structure specifications and systems effects
[AD-A263573] p 3476 N93-29343

SPREAD SPECTRUM TRANSMISSION

Theoretical bit error rate performance of the Kalman filter excisor for FM interference
[AD-A263018] p 3383 N93-29407

Electro-optic characterisation of extremely wide bandwidth electrical signals
[AD-A264202] p 3392 N93-30145

A satellite downlink spread spectrum timing beacon
p 3362 N93-30267

Coding for frequency hopped spread spectrum satellite communications p 3365 N93-30283

SPUTTERING

Diffusion bonding
[DE93-011480] p 3442 N93-28837

Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002

Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films
[AD-A263664] p 3594 N93-29293

Improved heat removal by microscopic surface texturing of capillaries
[AD-A263483] p 3424 N93-29966

Ion emission during high-energy sputtering of ammonium dinitramide and ammonium nitrate crystals and the determination of ion decomposition pathways using tandem mass spectrometry p 3318 N93-30066

SQUEEZED STATES (QUANTUM THEORY)
A squeezed state holomorphic phase space representation of equations of motion
[DE93-609835] p 3607 N93-30945
STABILITY
Subnanosecond high power performance of a bistable optically-controlled GaAs switch
[DE93-006285] p 3406 N93-28944
Improved field emitter current densities and stability through the application of a proprietary process
[AD-A263464] p 3411 N93-29833
Structure, adhesion, and stability of metal/oxide and oxide/oxide interfaces
[DE93-012930] p 3325 N93-30060
Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis
[AD-A264221] p 3453 N93-30147
STABILITY TESTS
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
A spectral method determination of the first critical Rayleigh number for a low-Prandtl number crystal melt in a cylindrical container
[NASA-CR-193238] p 3594 N93-29214
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598
STABILIZATION
Stability, bifurcation, and control of Hamiltonian systems
[DE93-012103] p 3547 N93-28648
Bainitic stabilization of austenite in low alloy steels
[DE93-008275] p 3321 N93-28957
Some results on feedback stabilization of a one-link flexible arm
[INRIA-RR-1682] p 3543 N93-30116
STABILIZED PLATFORMS
Stabilized platform for tethered balloon soundings of broadband long- and short-wave radiation
[DE93-007876] p 3383 N93-29308
Derivation of particulate directional information from analysis of elliptical impact craters on LDEF
p 3283 N93-29362
STAINLESS STEELS
Fundamental aspects in the design of passive alloys
[DE93-009028] p 3320 N93-28545
An experimental investigation of radioactivity induced by ions associated with the operation of pulsed-power accelerators
[DE93-011478] p 3575 N93-29151
Effects of internal helium on mechanical properties of Nitronic (tm) 40 stainless steel
[DE93-009902] p 3324 N93-29265
Sensitivity of LDEF foil analyses using ultra-low background germanium vs. large NaI(Tl) multidimensional spectrometers p 3318 N93-29627
High mass resolution glow discharge mass spectrometry using an external ion source FT-ICR mass spectrometer
[AD-A264347] p 3314 N93-30166
Irradiation assisted stress corrosion cracking of stainless steel irradiated in FBR
[DE93-764495] p 3326 N93-30191
Compatibility studies of AISI type 316 stainless steel with lead-lithium eutectic alloy
[DE93-605281] p 3328 N93-31022
STAIRWAYS
Platform stair lift
[NASA-CASE-MFS-28772-1] p 3507 N93-29845
STANDARD DEVIATION
Monte Carlo simulation of magnitude-angle error sources
[AD-A263738] p 3555 N93-29857
Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595
STANDARDIZATION
Standardization of automatic test equipment in the US Air force
[AD-A262076] p 3250 N93-29004
Optical media standards for industry
p 3617 N93-30451
Evaluation of D-1 tape and cassette characteristics: Moisture content of Sony and Ampex D-1 tapes when delivered p 3435 N93-30466
Measurements over distributed high performance computing and storage systems p 3622 N93-30476
Proceedings of the meeting of the Intergovernmental US-Russian Business Development Committee's Standards Working Group
[PB93-179968] p 3610 N93-30822
STANDARDS
OSI transaction processing standard: An introduction and outlines of implementation
[VTT-TIED-1250] p 3532 N93-29997
Consultative Committee for Space Data Systems recommendation for space data system standards: Telecommand. Part 2.1: Command operation procedures
[NASA-TM-108158] p 3393 N93-30371
Grand challenges in mass storage: A systems integrators perspective p 3620 N93-30467
NASA/FAA helicopter simulator workshop
[NASA-CP-3156] p 3236 N93-30673
Part 1: Executive summary p 3236 N93-30674
STANDING WAVES
Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator
[DE93-010461] p 3575 N93-29870
The IUTAM Symposium on Breaking Waves
[AD-A264196] p 3489 N93-30143
STAR CLUSTERS
ROSAT detection of stellar x ray sources in the old open cluster M67
[MPE-PREPRINT-230] p 3631 N93-30578
STAR DISTRIBUTION
Honeywell's compact, wide-angle UV-visible imaging sensor p 3582 N93-28806
The multiplicity of T Tauri stars in the star forming regions Taurus-Auriga and Ophiuchus-Scorpius: A 2.2 micron speckle imaging survey p 3634 N93-28945
STAR FORMATION
The multiplicity of T Tauri stars in the star forming regions Taurus-Auriga and Ophiuchus-Scorpius: A 2.2 micron speckle imaging survey p 3634 N93-28945
Models of star formation in interacting and merging disk galaxies p 3635 N93-30148
Young open clusters as probes of the star formation process p 3635 N93-30377
The 12 UM contribution of nearby galaxies to the infrared background
[AD-A264336] p 3654 N93-30419
The faintest stars p 3630 N93-30493
Dense gas in the monoceros OB1 dark cloud and its relationship to star formation p 3636 N93-30502
A characterization of young stellar objects in Bok globules: Infrared imaging, spectral energy distributions, and molecular outflows p 3636 N93-30563
CO lines toward NGC 2024 and other star forming regions: A closer look at the warm gas component
[MPE-PREPRINT-223] p 3637 N93-30639
STAR TRACKERS
An auto-guiding system for mid-sized telescopes
p 3375 N93-30340
STARBURST GALAXIES
Models of star formation in interacting and merging disk galaxies p 3635 N93-30148
The 12 UM contribution of nearby galaxies to the infrared background
[AD-A264336] p 3654 N93-30419
Near-infrared line imaging of NGC 6240: Global shock and nuclear starburst
[MPE-PREPRINT-226] p 3631 N93-30641
STARK EFFECT
Start broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers
[DE93-008706] p 3586 N93-29093
Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099
STARS
Activities report of the Astronomical Society
[MITT-75] p 3629 N93-29008
Bonner Durchmusterung (Southern Durchmusterung)
[NASA-RP-1298-VOL-3] p 3630 N93-29811
STATE VECTORS
Asymptotic properties of constrained Markov decision processes
[INRIA-RR-1598] p 3553 N93-28508
State vector splitting: A numerical scheme for the Euler equations p 3419 N93-29039
STATIC LOADS
Axial impact of composites p 3297 N93-29078
Load test set-up for the Airmass Sunburst Ultra-Light Aircraft p 3249 N93-29776
STATIC PRESSURE
Rugged, no-moving-parts windspeed and static pressure probe designs for measurements in planetary atmospheres p 3434 N93-28767
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28
[NASA-TP-3313] p 3239 N93-29160
STATIC THRUST
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28
[NASA-TP-3313] p 3239 N93-29160
STATIONKEEPING
System of navigation by satellites with European coverage p 3284 N93-29897
STATISTICAL ANALYSIS
Information-theoretic performance bounding of Bayesian identifiers
[DE93-010705] p 3554 N93-28763
Recording of forest surface in SAR-images with statistical methods in areas of pronounced relief
p 3457 N93-28920
On the value of function evaluation location information in Monte Carlo simulation
[AD-A263662] p 3554 N93-29292
Characterization and optimization of a Hot Air Solder-Leveling System
[DE93-010188] p 3332 N93-29328
Study on various problems in statistical planning and inference
[AD-A262484] p 3554 N93-29411
Estimating the parameters of chaotic maps
[AD-A262574] p 3556 N93-29423
Character recognition using a neural network model with fuzzy representation p 3512 N93-29536
Inverse problems: Fuzzy representation of uncertainty generates a regularization p 3516 N93-29563
Possibilistic measurement and set statistics
p 3517 N93-29567
Gaussian membership functions are most adequate in representing uncertainty in measurements
p 3520 N93-29584
Some statistical inference problems in linear models and variance components models and their applications
[AD-A264062] p 3555 N93-29923
Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252
Environmental studies: Mathematical, computational and statistical analyses
[AD-A264223] p 3473 N93-30360
Parametric and combinatorial problems in constrained optimization
[AD-A264229] p 3555 N93-30363
Use of statistics in computational chemistry
[AD-A264307] p 3315 N93-30365
Determinants of performance rating accuracy: A field study
[AD-A264726] p 3500 N93-30575
Oceanographic data processing program
[AD-A264801] p 3544 N93-30591
Chaotic quantum systems
[DE93-606030] p 3606 N93-30802
A miniature fatigue test machine p 3291 N93-30956
STATISTICAL CORRELATION
On the impossibility of creating the quantum correlations with computers
[DE93-606039] p 3606 N93-30806
STATISTICAL DECISION THEORY
Decision analysis with approximate probabilities
p 3513 N93-29542
STATISTICAL DISTRIBUTIONS
Modified goodness-of-fit tests for the Weibull distribution
[AD-A262552] p 3553 N93-28574
A new goodness-of-fit test for the Weibull distribution based on spacings
[AD-A262615] p 3553 N93-28587
Scaling properties of localized quantum chaos
[DE93-606031] p 3606 N93-30803
STATISTICAL MECHANICS
Evaluation of some scale effects in the response and failure of composite beams p 3308 N93-30874
Knot invariants and cellular automata
[AD-A264199] p 3607 N93-30884
STATISTICAL TESTS
Modified goodness-of-fit tests for the Weibull distribution
[AD-A262552] p 3553 N93-28574
Modified Anderson-Darling and Cramer-Von Mises goodness-of-fit tests for the normal distribution
[AD-A262554] p 3553 N93-28575
A new goodness-of-fit test for the Weibull distribution based on spacings
[AD-A262615] p 3553 N93-28587
A modified Anderson Darling goodness-of-fit test for the gamma distribution with unknown scale and location parameters
[AD-A262486] p 3553 N93-28760
A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845
STATISTICAL WEATHER FORECASTING
Thunderstorm forecast study for Eglin AFB, Florida
[AD-A263423] p 3483 N93-29810

STATOR BLADES

Three-dimensional fiber-optic LDV measurements in the endwall region of a linear cascade of controlled-diffusion stator blades
[AD-A263513] p 3424 N93-29968

STEADY FLOW

A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method
[DE92-018262] p 3417 N93-26639

Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948

STEADY STATE

Steady-state and transient modeling of tracer and nutrient distributions in the global ocean
[DE93-011043] p 3486 N93-28670

Gradient estimation for regenerative processes
[AD-A263766] p 3555 N93-29878

Optimization for steady-state and hybrid operations of ITER by using scaling models of divertor heat load
[DE93-764151] p 3590 N93-30649

Numerical wave propagation and steady-state solutions p 3428 N93-30999

The steady-state tangential contact problem for a falling drop type of contact area on corrugated rail by simplified theory of rolling contact
[ILR-MITT-267(1991)] p 3455 N93-31016

STEEL STRUCTURES

Containment of explosions in spherical vessels
[DE93-005445] p 3446 N93-30211

STEELS

Sound wave scattering from an elastic spherical shell
[AD-A264039] p 3562 N93-30029

STEERABLE ANTENNAS

Optical antenna beam steering using digital phase shifter control
[AD-D015688] p 3383 N93-29455

STEERING

High-current negative-ion beam transport
[DE93-010732] p 3575 N93-29809

STELLAR ACTIVITY

Magnetic activity in low mass stars
[DE93-009073] p 3632 N93-28547

Dense gas in the monoceros OB1 dark cloud and its relationship to star formation p 3636 N93-30502

STELLAR ATMOSPHERES

Spherically symmetric model atmospheres for late-type giant stars
[ISBN-0-315-72632-6] p 3633 N93-28673

STELLAR COLOR

Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

STELLAR CORES

Why Blue stragglers formed via collisions may not be rapid rotators
[DE93-008708] p 3633 N93-28905

STELLAR ENVELOPES

Why Blue stragglers formed via collisions may not be rapid rotators
[DE93-008708] p 3633 N93-28905

Submillimeter CO observations of warm gas around T-Tauri stars
[MPE-PREPRINT-232] p 3631 N93-30615

STELLAR EVOLUTION

Do the Pop 2 field blue stragglers have a collisional origin?
[DE93-008709] p 3634 N93-28906

Can physical stellar collisions explain the blue stragglers in the dwarf spheroidal galaxies?
[DE93-008711] p 3634 N93-28907

A characterization of young stellar objects in Bok globules: Infrared imaging, spectral energy distributions, and molecular outflows p 3636 N93-30563

STELLAR LUMINOSITY

Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

STELLAR MAGNITUDE

Bonner Durchmusterung (Southern Durchmusterung)
[NASA-RP-1298-VOL-3] p 3630 N93-29811

STELLAR MASS ACCRETION

The heating and cooling of WZ Sge
[DE93-008720] p 3634 N93-28908

STELLAR MASS EJECTION

A study of the physical mechanisms for filament eruption and coronal mass ejection via numerical simulation
[NASA-CR-193180] p 3653 N93-28935

Submillimeter CO observations of warm gas around T-Tauri stars
[MPE-PREPRINT-232] p 3631 N93-30615

STELLAR MODELS

Spherically symmetric model atmospheres for late-type giant stars
[ISBN-0-315-72632-6] p 3633 N93-28673

Models of star formation in interacting and merging disk galaxies p 3635 N93-30148

Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

STELLAR PHYSICS

Activities report of the Astronomical Society
[MITT-75] p 3629 N93-29008

STELLAR RADIATION

The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604

A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052

STELLAR ROTATION

Why Blue stragglers formed via collisions may not be rapid rotators
[DE93-008708] p 3633 N93-28905

STELLAR SPECTRA

A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052

Rejection of archival photographic objects as optical counterparts of gamma ray bursters
[MPE-PREPRINT-228] p 3631 N93-30642

Infrared spectroscopy and imaging of starburst galaxies and AGNs
[MPE-PREPRINT-229] p 3632 N93-30643

Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

STELLAR SPECTROPHOTOMETRY

Multiwavelength studies of classical nova shells
p 3636 N93-30412

STELLAR STRUCTURE

Dense gas in the monoceros OB1 dark cloud and its relationship to star formation p 3636 N93-30502

STELLAR SYSTEMS

Stellar encounters in globular clusters
p 3632 N93-28606

STELLAR TEMPERATURE

The heating and cooling of WZ Sge
[DE93-008720] p 3634 N93-28908

STELLARATORS

Edge plasma control by RF electric field in Compact Helical System (CHS)
[DE93-753242] p 3583 N93-28532

STEP FUNCTIONS

Fuzzy operators and cyclic behavior in formal neuronal networks p 3519 N93-29576

On the ideality of using a step-function current in a metallic foil to simulate a step-function heat-flux source
[AD-A264627] p 3413 N93-30539

STEREOSCOPIC VISION

Intermediate levels of visual processing
[AD-A264117] p 3495 N93-30192

Recursive-batch estimation of structure and motion from stereo image sequences p 3363 N93-30271

STEREOSCOPY

Intermediate levels of visual processing
[AD-A264117] p 3495 N93-30192

STIFFENING

Design and analysis of grid stiffened concepts for aircraft composite primary structural applications
p 3306 N93-30861

Prediction of stiffener-skin separation in composite panels p 3307 N93-30871

Experimental behavior of graphite-epoxy Y-stiffened specimens loaded in compression p 3307 N93-30872

Structural response of bead-stiffened thermoplastic shear webs p 3308 N93-30873

STIFFNESS

Influence of ply waviness on stiffness and strength reduction of composite laminates
[AD-A263224] p 3294 N93-28559

Composite laminate stiffnesses and their sensitivities
[DLR-FB-92-16] p 3296 N93-29007

STIMULATED EMISSION

A quality monitor and monitoring technique employing optically stimulated electron emission
[NASA-CASE-LAR-15063-1] p 3449 N93-30414

STIMULATED EMISSION DEVICES

A quality monitor and monitoring technique employing optically stimulated electron emission
[NASA-CASE-LAR-15063-1] p 3449 N93-30414

STIRLING CYCLE

Small Stirling dynamic isotope power system for robotic space missions
[NASA-TM-105785] p 3287 N93-28686

Cryogenic Heat Pipe Experiment (CRYOHP)
p 3265 N93-28721

Miniature long-life space cryocoolers
p 3378 N93-28825

STIRLING ENGINES

Small Stirling dynamic isotope power system for robotic space missions
[NASA-TM-105785] p 3287 N93-28686

STOCHASTIC PROCESSES

Some qualitative properties in polling systems
[INRIA-RR-1596] p 3552 N93-28506

Comparison of analytical transport and stochastic solutions for neutron slowing down in an infinite medium
[DE93-010799] p 3565 N93-28833

Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303

Stochastic architecture for Hopfield neural nets
p 3519 N93-29579

Gradient estimation for regenerative processes
[AD-A263766] p 3555 N93-29878

A stochastic formation of radiative transfer in clouds
[DE93-011372] p 3484 N93-30055

Damage mechanics in 2-D and 3-D microstructures
[AD-A264337] p 3453 N93-30159

An information theoretic approach to stochastic adaptive control application to manipulators with active inertia
p 3359 N93-30247

Zero-crossing rate of some non-Gaussian processes
p 3360 N93-30254

A numerical simulator for testing sliding mode controls in stochastic systems p 3361 N93-30260

Parametric and combinatorial problems in constrained optimization
[AD-A264229] p 3555 N93-30363

Adaptive networks for sequential decision problems
[AD-A264756] p 3534 N93-30561

Evolving neural network architecture
[AD-A264802] p 3544 N93-30592

Chaotic quantum systems
[DE93-606030] p 3606 N93-30802

Determination of low frequency reference slipping for high frequency unstationary motion processes
[ILR-MITT-273(1992)] p 3455 N93-31017

STOICHIOMETRY

Studies in Lewis acid and superacid ionic liquids
[AD-A264683] p 3316 N93-30551

STORAGE BATTERIES

Development of nickel/metal hydride secondary battery
[DE93-781330] p 3406 N93-28669

Research and development of carbon black anodes for lithium secondary cells
[DE93-781331] p 3406 N93-28746

Approach to extending the cycle life of lithium secondary battery
[DE93-776266] p 3406 N93-28983

Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133

Research and development of lithium secondary batteries for load conditioner use, volume 2
[DE93-781329] p 3410 N93-29673

Characterization of lithium electrode surface in lithium secondary batteries by in situ Raman spectroscopic methods
[AD-A263728] p 3411 N93-29986

STORAGE RINGS (PARTICLE ACCELERATORS)

A 250 mA toroid monitor for the measurement of the bundle current in the stretcher mode of AmPS
[DIGEL-1992-1] p 3413 N93-30835

Charge to frequency converter for ionization chambers belonging to the radiation protection system of AmPS/MEA
[DIGEL-1991-6] p 3577 N93-30837

Electronics for a neutron detector and a Geiger-Mueller detector for the radiation protection around MEA and AmPS
[DIGEL-1992-6] p 3413 N93-30838

STORAGE STABILITY

ICI optical data storage tape: An archival mass storage media p 3621 N93-30472

STORAGE TANKS

Advanced collapsible tank for liquid containment
[NASA-CR-188247] p 3353 N93-28698

Liquid Motion in a rotating tank Experiment (LME)
p 3264 N93-28710

Vented Tank Resupply Experiment (VTRE) for In-Space Technology Experiment Program (IN-STEP)
p 3264 N93-28711

Tank issues: Design and placement of floating liquid monitoring wells
[PB93-161149] p 3469 N93-29033

STORM DAMAGE

Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts)
[PB93-174993] p 3485 N93-30758

STRAIN DISTRIBUTION

Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074

Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis
[AD-A264221] p 3453 N93-30147

STRAIN GAGES
Tactile sensing for 3-dimensional shape estimation
p 3357 N93-30232
Fiber-optic polarimetric strain gauge
p 3375 N93-30341
STRAIN HARDENING
Constitutive laws for deformation and dynamic recrystallization in cubic metals
[DE93-010740] p 3326 N93-30486
STRAIN MEASUREMENT
The design and testing of a high-temperature graphite dilatometer
[AD-A262185] p 3430 N93-28488
Enhanced noncontacting laser extensometer for biaxial strain measurements
[AD-A263170] p 3430 N93-28989
Results of a round robin test program: Complex modulus properties of a polymeric damping material
[AD-A263619] p 3332 N93-29344
Fiber-optic polarimetric strain gauge
p 3375 N93-30341
STRAIN RATE
Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments
[DE93-009202] p 3323 N93-29102
Comparison of deformation and shock reactivity for single crystals of RDX and ammonium perchlorate
p 3350 N93-30094
STRANDS
Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102
STRATIFIED FLOW
Laboratory studies of gravity wave/mean flow interactions
[AD-A264226] p 3478 N93-30174
STRATIGRAPHY
Drill/borescope system for the Mars Polar Pathfinder
p 3647 N93-28805
STRATOCUMULUS CLOUDS
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model
[DE93-007365] p 3477 N93-29346
STRATOSPHERE
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197
STREAK CAMERAS
A new tubeless nanosecond streak camera based on optical deflection and direct CCD imaging
[DE93-011893] p 3433 N93-30491
STREAK PHOTOGRAPHY
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065
STREPTOMYCETES
Photobiological investigations on spores of streptomyces griseus
[ESA-TT-1269] p 3491 N93-29274
STRESS (PHYSIOLOGY)
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471
STRESS ANALYSIS
Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641
Design and evaluation of a uniaxial pull test for lithium hydride/deuteride
[DE93-010760] p 3451 N93-28832
Ceramic matrix composites properties/microstresses with complete and partial interphase bond
[NASA-TM-106136] p 3297 N93-29071
A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161
Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207
Structural design of cryostat and port penetration of International Thermonuclear Experimental Reactor (ITER)
[DE93-753267] p 3587 N93-29243
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Three-dimensional elastic stress analysis in materials with many inhomogeneities
[AD-A263736] p 3453 N93-29855
Design and implementation of an interactive isochromatic fringe-analysis system using machine-vision techniques p 3369 N93-30305
Elastic stability considerations for deep submergence ceramic pressure housing
[AD-A264824] p 3454 N93-30598
Structural design, analysis, and code evaluation of an odd-shaped pressure vessel
[DE93-008182] p 3447 N93-30632
A Rayleigh-Ritz analysis methodology for cutouts in composite structures p 3307 N93-30869
Direct tension experiments on compacted granular materials p 3292 N93-30960
STRESS CONCENTRATION
Cratering in glasses impacted by debris or micrometeorites p 3340 N93-29368
STRESS CORROSION
Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893
STRESS CORROSION CRACKING
Irradiation assisted stress corrosion cracking of stainless steel irradiated in FBR
[DE93-764495] p 3326 N93-30191
STRESS DISTRIBUTION
Advanced collapsible tank for liquid containment
[NASA-CR-188247] p 3353 N93-28698
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074
Shear sensitive monomer-polymer laminate structure and method of using same
[NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613
Direct tension experiments on compacted granular materials p 3292 N93-30960
STRESS INTENSITY FACTORS
The growth of small corrosion fatigue cracks in alloy 2024
[NASA-TM-107755] p 3451 N93-29069
Stress-intensity-factor influence coefficients for axial and circumferential flaws in reactor pressure vessels
[DE93-006206] p 3454 N93-30213
STRESS MEASUREMENT
Shear sensitive monomer-polymer laminate structure and method of using same
[NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A264191] p 3339 N93-30883
STRESS RATIO
Mechanical behaviour of a closed collar model for an 11.5 T dipole
[NIKHEF-H/92-03] p 3576 N93-30019
STRESS TENSORS
Quantum field theory in spaces with closed time-like curves
[DE93-010564] p 3605 N93-30481
STRESS WAVES
Rapidly activated dynamic phase transitions in nonlinear solids
[AD-A263601] p 3299 N93-29982
STRESS-STRAIN RELATIONSHIPS
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414
The XNOVAKTC rheological model
[AD-A263298] p 3342 N93-29762
Experiment and analysis on elastic deformation properties of graphite and carbon materials for HTTR core components
[DE93-753271] p 3299 N93-30004
Damage growth in composite propellants
p 3348 N93-30088
Damage of multi-directionally reinforced ceramic-matrix composites p 3308 N93-30937
Mechanical properties of composite materials
p 3290 N93-30951
A miniature fatigue test machine p 3291 N93-30956
A continuum code investigation of stress integration using exact and approximate material rotation
[DE93-001892] p 3454 N93-31013
STRIATION
Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534
STRING THEORY
Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542
Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565
Understanding conformal field theory through parafermions and Chern Simons theory
[DE93-010452] p 3604 N93-29806
Topics in inflationary universe models and cosmic string theories p 3637 N93-30579
Geometrical approach to the dynamics of a relativistic string in the D-dimensional Minkowski space
[DE93-606071] p 3605 N93-30784
Electric magnetic duality in string theory
[DE93-606061] p 3606 N93-30807
A new exact solution to the classical equations of motion of the relativistic string with massive ends
[DE92-644736] p 3557 N93-30922
Invariant structures in gauge theories and confinement
[DE92-644739] p 3607 N93-30924
Invariant structures and static forces in gauge theories
[DE92-644740] p 3607 N93-30925
STRINGS
Geometrical approach to the dynamics of a relativistic string in the D-dimensional Minkowski space
[DE93-606071] p 3605 N93-30784
STRONTIUM TITANATES
Phase transition studies in barium and strontium titanates at microwave frequencies p 3293 N93-30970
STROUHAL NUMBER
Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions
p 3253 N93-29933
Vortex shedding by blunt/bluff bodies at high Reynolds numbers. Volume 4: Rectangles
[AD-A264154] p 3241 N93-30151
STRUCTURAL ANALYSIS
Metal Matrix Laminate Tailoring (MMLT) code: User's manual
[NASA-TM-106052] p 3295 N93-28681
Analysis for thermo-chemical decomposition of composite structures
[NASA-CR-193185] p 3295 N93-28843
TESLA test cell cryostat support post thermal and structural analysis
[DE93-008365] p 3407 N93-29048
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Nonlinear analyses of composite aerospace structures in sonic fatigue
[NASA-CR-193124] p 3451 N93-29154
The Ultra Light Aircraft Testing
[NASA-CR-193043] p 3249 N93-29774
Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359
Structural evaluation of curved stiffened composite panels fabricated using a THERM-Xsm process
p 3301 N93-30435
Long discontinuous fiber composite structure: Forming and structural mechanics p 3301 N93-30437
Effects of scale in predicting global structural response p 3306 N93-30860
Multiple methods integration for structural mechanics analysis and design p 3307 N93-30867
Probabilistic composite analysis p 3307 N93-30868
Prediction of stiffener-skin separation in composite panels p 3307 N93-30871
Structural response of bead-stiffened thermoplastic shear webs p 3308 N93-30873
STRUCTURAL DESIGN
Planning of a West Virginia University Research Center in the basic materials sciences
[DE93-011731] p 3592 N93-28647
A demonstration of simple airfoils: Structural design and materials choices
[DE93-007882] p 3238 N93-28662
Indigenous lunar construction materials
p 3277 N93-29120
Structural design of cryostat and port penetration of International Thermonuclear Experimental Reactor (ITER)
[DE93-753267] p 3587 N93-29243
Concept design example, Computer Aided Structural Modeling (CASM). Scheme A
[AD-A264759] p 3529 N93-29657
Concept design example, Computer Aided Structural Modeling (CASM). Scheme B
[AD-A264760] p 3529 N93-29658
From orbital debris capture systems through internal combustion engines on Mars p 3232 N93-29745
B and T: Lunar landers p 3234 N93-29751
Report on the test set-up for the structural testing of the Airmass Sunburst Ultralight Aircraft
p 3249 N93-29775
Effect of design selection on response surface performance
[NASA-CR-4520] p 3249 N93-29885
Structural design, analysis, and code evaluation of an odd-shaped pressure vessel
[DE93-008182] p 3447 N93-30632
Guideway structural design and power/propulsion/braking in relation to guideways, volume 1
[PB93-169902] p 3447 N93-30820
Preliminary properties of a resin from ethynyl terminated materials p 3303 N93-30842
Multi-parameter optimization tool for low-cost commercial fuselage crown designs
p 3305 N93-30858

A comparison of classical mechanics models and finite element simulation of elastically tailored wing boxes
p 3306 N93-30863
Multiple methods integration for structural mechanics analysis and design p 3307 N93-30867
Tailored composite wings with elastically produced chordwise camber p 3308 N93-30876
Design, synthesis, and chemical processing of hierarchical ceramic structures for aerospace applications
[AD-A264227] p 3339 N93-30885
Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979
Structural design using neural networks
p 3545 N93-31029

STRUCTURAL ENGINEERING
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-001] p 3274 N93-29014
Concept design example, Computer Aided Structural Modeling (CASM). Scheme A
[AD-A264759] p 3529 N93-29657
Concept design example, Computer Aided Structural Modeling (CASM). Scheme B
[AD-A264760] p 3529 N93-29658
GENESIS 2: Advanced lunar outpost
p 3235 N93-29760
Geoscience center research
[AD-A263465] p 3462 N93-29834

STRUCTURAL FAILURE
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068
Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205
Progressive failure methodologies for predicting residual strength and life of laminated composites
p 3307 N93-30866
Probabilistic composite analysis p 3307 N93-30868

STRUCTURAL MEMBERS
Effects of scale in predicting global structural response p 3306 N93-30860

STRUCTURAL PROPERTIES (GEOLOGY)
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819

STRUCTURAL STABILITY
Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700
Bainitic stabilization of austenite in low alloy steels
[DE93-008275] p 3321 N93-28957

STRUCTURAL VIBRATION
The natural excitation technique (NExT) for modal parameter extraction from operating wind turbines
[DE93-010611] p 3463 N93-28603
NASA instep/MDMSC jitter suppression experiment (JITTER) p 3263 N93-28702
Description of the Joint Damping Experiment (JDX)
p 3263 N93-28703
Control-structures interaction test of the LACE satellite
p 3263 N93-28706
Upper atmosphere research satellite jitter study
p 3264 N93-28708
Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079
Testing in combined dynamic environments
[DE93-010679] p 3278 N93-29250

STRUCTURAL WEIGHT
Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979

STRUCTURED PROGRAMMING
Reactive integration for traditional programming languages
[AD-A263986] p 3531 N93-29866

STRUTS
CSI-Star: A low-cost CSI orbital testbed
p 3263 N93-28707
Development of an experimental method to determine the axial rigidity of a strut-node joint
p 3290 N93-30950

STUDENTS
Filling the gaps: An overview of data on education in grades K through 12
[PB93-176550] p 3608 N93-30821
Materials education activities p 3291 N93-30958
Visualizing weld metal solidification using organic analogs p 3293 N93-30973

SUBASSEMBLIES
Hybrid CMS methods with model reduction for assembly of structures p 3274 N93-29110

SUBLIMATION
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929

SUBMARINES
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

SUBMERGED BODIES
Sound wave scattering from an elastic spherical shell
[AD-A264039] p 3562 N93-30029
Sound wave scattering from a rigid sphere
[AD-A264182] p 3562 N93-30157

SUBMILLIMETER WAVES
Novel low temperature superconducting bolometers
[DE93-010433] p 3430 N93-28664
Superconducting submillimeter and millimeter wave detectors
[DE93-007656] p 3431 N93-29149
Submillimeter and microwave residual losses in epitaxial films of Y-Ba-Cu-O and Tl-Ca-Ba-Cu-O
[DE93-010430] p 3596 N93-29868
Submillimeter CO observations of warm gas around T-Tauri stars
[MPE-PREPRINT-232] p 3631 N93-30615

SUBREFLECTORS
A note on the computation of antenna-blocking shadows p 3385 N93-29593
DSS-14 subreflector actuator dynamics during the Landers earthquake p 3386 N93-29600

SUBROUTINE LIBRARIES (COMPUTERS)
RTE: A UNIX library with on-line documentation and sample programs for microwave radiative transfer calculations
[PB93-180248] p 3386 N93-29680

SUBROUTINES
Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

SUBSONIC FLOW
The numerical solution of low Mach number flow in confined regions by Richardson extrapolation
[TRITA-NA-9207] p 3238 N93-29005
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet
[NASA-TM-106240] p 3252 N93-29162
Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931
Plasma/particle interaction in subsonic argon/helium thermal plasma jets
[DE93-010808] p 3589 N93-30181
Numerical wave propagation and steady-state solutions p 3428 N93-30999

SUBSTITUTES
Materials characterization of cermet anodes tested in a pilot cell
[DE93-008924] p 3323 N93-29101
Effect of lead addition on the formation of superconducting phases in Bi-Sr-Ca-Cu-O ceramics
[DE93-606893] p 3339 N93-30773

SUBSTRATES
Influence of the Cold Buster (tm) sports bar on heat debt, mobilization and oxidation of energy substrates
[AD-A262762] p 3493 N93-28939
Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059
High-dose implantations of Al into Si(111) and Si(100)
[DE93-009552] p 3594 N93-29301
The mechanical response of gold substrates modified with self-assembling monolayer films
[AD-A262997] p 3452 N93-29515
The 2-6 semiconductor superlattices
[AD-A264343] p 3597 N93-30164
Study on diamond semiconductor
[DE92-531076] p 3413 N93-30622
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

SUBSTRUCTURES
An overview of the crash dynamics failure behavior of metal and composite aircraft structures
p 3308 N93-30875

SUITS
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471

SULFATES
Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259
Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665

SULFONATES
Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146

SULFONIC ACID
Dioxygen reduction in various acid electrolytes
[AD-A263564] p 3317 N93-30664

SULFUR
The thermodynamic properties of thianthrene and phenoxathiin
[DE93-000124] p 3603 N93-28964
Hydrogen and sulfur production from hydrogen sulfide wastes
[DE93-008658] p 3310 N93-29052
Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665
Hydrogen sulfide decomposition into hydrogen and sulfur by quinone cycles, part 1
[PB93-175297] p 3317 N93-30761

SULFUR DIOXIDES
Analysis of protocol gases: An on-going quality assurance audit
[PB93-168839] p 3311 N93-29204
Organometallic and surface chemistry of mixed-metal systems
[DE93-012686] p 3325 N93-30059
Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658

SULFUR FLUORIDES
Global warming potential for SF6
[DE93-007394] p 3469 N93-28972

SULFURIC ACID
In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259

SUM RULES
Nonlinear coupling of tearing fluctuations in the Madison Symmetric Torus
[DE93-010131] p 3584 N93-28602
Borel sum rules for octet baryons in nuclear medium
[DE93-753245] p 3604 N93-29242

SUNLIGHT
Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

SUNRISE
Tidal and lunar data for Point Mugu, San Nicolas island, and the Barking Sanda area during 1993
[AD-A262725] p 3477 N93-29401

SUNSET
Tidal and lunar data for Point Mugu, San Nicolas island, and the Barking Sanda area during 1993
[AD-A262725] p 3477 N93-29401

SUPERCHARGERS
Improved silicon nitride for advanced heat engines
[NASA-CR-182193] p 3298 N93-29451

SUPERCOMPUTERS
Installation of a new Fortran compiler and effective programming method on the vector supercomputer
[DE93-753322] p 3524 N93-28537
Computing for magnetic fusion energy research: An updated vision
[DE93-010394] p 3587 N93-29190
National Center for Supercomputer Applications
p 3614 N93-29232
Associative memories for supercomputers
[AD-A263142] p 3520 N93-29482
NESL: A nested data-parallel language (Version 2.6)
[AD-A263548] p 3530 N93-29822
High performance computing: Advanced Research Projects Agency should do more to foster program goals. Report to the Chairman, Committee on Armed Services, House of Representatives
[GAO/IMTEC-93-24] p 3533 N93-30202
Promoting high-performance computing and communications
[ISBN-0-16-041828-3] p 3522 N93-30570
Nonlinear explicit transient finite element analysis on the Intel Delta
[DE93-009561] p 3535 N93-30647
High performance computing and communications program p 3627 N93-30715

SUPERCONDUCTING CAVITY RESONATORS
TESLA test cell cryostat support post thermal and structural analysis
[DE93-008365] p 3407 N93-29048
Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317
Advanced microwave frequency sources and filters based on superconducting Photonic Band Gap (PBG) structures
[AD-A264404] p 3597 N93-30175

SUPERCONDUCTING DEVICES

Novel low temperature superconducting bolometers
[DE93-010433] p 3430 N93-28664

Superconducting submillimeter and millimeter wave detectors
[DE93-007656] p 3431 N93-29149

Quantum devices using Si-based superlattices and structures
[AD-A263700] p 3595 N93-29383

Advanced microwave frequency sources and filters based on superconducting Photonic Band Gap (PBG) structures
[AD-A264404] p 3597 N93-30175

Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

SUPERCONDUCTING FILMS

Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays
[DE93-008713] p 3593 N93-29094

A novel approach for new radiation sources based on solid state plasma instabilities
[AD-A263699] p 3588 N93-29382

Submillimeter and microwave residual losses in epitaxial films of Y-Ba-Cu-O and Tl-Ca-Ba-Cu-O
[DE93-010430] p 3596 N93-29868

Measurement of magnetic field penetration depth in niobium polycrystalline films by polarized neutron reflection method
[DE93-606390] p 3600 N93-30771

Superconducting films of YBaCuO
[DE93-606831] p 3600 N93-30772

Heat generation produced in thin layers of GaAs superconductors under high energy particles irradiation
[DE93-606332] p 3601 N93-30798

Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

SUPERCONDUCTING MAGNETS

Microstructural understanding and critical current optimization of advanced high field superconductors
[DE93-011046] p 3592 N93-28643

Flux lattice relaxation, noise, and symmetry-breaking in frustrated Josephson junction arrays
[DE93-008713] p 3593 N93-29094

Preliminary investigation of high power microwave plasmas for electrothermal thruster use
[NASA-TM-106207] p 3288 N93-29158

An RF driven H(-) source and a low energy beam injection system for RFQ operation
[DE93-010438] p 3575 N93-29302

Guideway structural design and power/propulsion/braking in relation to guideways, volume 1
[PB93-169902] p 3447 N93-30820

SUPERCONDUCTING SUPER COLLIDER

Maximizing the luminosity of hadron, supercolliders at 10-100 TeV
[DE93-009247] p 3574 N93-29103

New Mexico Center for Particle Physics: Studies of fundamental interactions
[DE93-008302] p 3566 N93-29261

An RF driven H(-) source and a low energy beam injection system for RFQ operation
[DE93-010438] p 3575 N93-29302

SUPERCONDUCTIVITY

ORNL superconducting technology program for electric energy systems
[DE93-009588] p 3404 N93-28523

Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556

Theory of normal and superconducting properties of fullerene-based solids
[DE93-007722] p 3592 N93-28582

Numerical simulation of quantum many-body systems
[DE93-008300] p 3603 N93-28958

A detailed technology roadmap for superconductivity
p 3526 N93-29045

Design and test of a superconducting RFQ for heavy ions
[DE93-010862] p 3575 N93-29317

Sensitive detection of new superconductors created at ultra high pressures
[AD-A264340] p 3597 N93-30161

Phase separation, antiferromagnetism, and superconductivity in superconducting-superoxygenated La(2-x)Sr(x)CuO(4+(delta))
[DE93-009852] p 3598 N93-30517

The Road to Room Temperature Superconductivity Workshop
[AD-A264633] p 3561 N93-30519

A tight binding model for the electronic structure of FCC and SC C60
[DE93-606214] p 3601 N93-30794

A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799

Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

Schroedinger equations of higher (greater than 2) order
[DE92-644677] p 3552 N93-30984

SUPERCONDUCTORS

Theory of normal and superconducting properties of fullerene-based solids
[DE93-007722] p 3592 N93-28582

A detailed technology roadmap for superconductivity
p 3526 N93-29045

Ambient-atmosphere compatible superconducting fullerenes
[AD-A262025] p 3595 N93-29397

Phase separation, antiferromagnetism, and superconductivity in superconducting-superoxygenated La(2-x)Sr(x)CuO(4+(delta))
[DE93-009852] p 3598 N93-30517

A possibility to investigate the superconducting gap with the help of neutrons
[DE93-606392] p 3601 N93-30799

SUPERCOOLING

Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359

SUPERGIANT STARS

Spherically symmetric model atmospheres for late-type giant stars
[ISBN-0-315-72632-6] p 3633 N93-28673

SUPERGRAVITY

Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542

Compensating fields and anomalies in supergravity
[DE92-644724] p 3637 N93-30919

SUPERHEATING

Tank Pressure Control Experiment/Thermal Phenomena (TPCE/TP) p 3264 N93-28713

SUPERLATTICES

Planning of a West Virginia University Research Center in the basic materials sciences
[DE93-011731] p 3592 N93-28647

Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059

Quantum devices using Si-based superlattices and structures
[AD-A263700] p 3595 N93-29383

The 2-6 semiconductor superlattices
[AD-A264343] p 3597 N93-30164

Electronic states in quantum wells with periodically structured interfaces
[DE93-606295] p 3600 N93-30769

SUPERNOVA REMNANTS

The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604

SUPERNOVA 1987A

Limits on neutrino radiative decay from SN1987A
[NASA-CR-193262] p 3653 N93-29164

SUPERNOVAE

A search for radiative neutrino decay from supernovae
[NASA-CR-193118] p 3653 N93-30052

Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

SUPERSONIC AIRCRAFT

Sonic boom problem for future highspeed aircraft
[ONERA-NT-1990-3] p 3241 N93-30020

SUPERSONIC BOUNDARY LAYERS

Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model
[NASA-CR-4515] p 3420 N93-29159

SUPERSONIC COMBUSTION

Studies of hydrogen-air diffusion flames and of compressibility effects related to high-speed propulsion
p 3310 N93-29125

SUPERSONIC COMBUSTION RAMJET ENGINES

Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions
p 3421 N93-29177

SUPERSONIC FLOW

Development of a 3-D Implicit Euler Code for Hypersonic and High Supersonic Flows
[ONERA-RSF-23/1123-AY-230A] p 3417 N93-28744

Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model
[NASA-CR-4515] p 3420 N93-29159

SUPERSONIC JET FLOW

Laser spectroscopy of hydrocarbon radicals
[DE93-012555] p 3436 N93-28653

SUPERSONIC SPEED

Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375

SUPERSONIC TRANSPORTS

The HSCT mission analysis of waverider designs
[NASA-CR-193467] p 3243 N93-31037

SUPERSONIC TURBINES

The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932

SUPERSYMMETRY

Topics in gauge theories and the unification of elementary particle interactions
[DE93-009370] p 3563 N93-28542

Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565

Dark matter: Theoretical perspectives
[DE93-008484] p 3633 N93-28676

Compensating fields and anomalies in supergravity
[DE92-644724] p 3637 N93-30919

Quantum group generalization of the heterotic QFT
[DE92-644727] p 3607 N93-30920

Superconformal structures and holomorphic 1/2-superdifferentials on N = 1 super Riemann surfaces
[DE93-604133] p 3558 N93-30989

SUPPORT SYSTEMS

A new class of mission support for combat air-crew
p 3501 N93-28854

Natural environmental service support to NASA vehicle, technology, and sensor development programs
[NASA-CR-192554] p 3469 N93-29029

Intelligent support for human computer interaction and decision-making in distribution planning and scheduling systems
[AD-A263985] p 3610 N93-30124

SUPPORTS

Development of an O atom gun
[AD-A264753] p 3570 N93-30558

SURFACE ACOUSTIC WAVE DEVICES

SAW technology for on-board processing in military satellite communications p 3362 N93-30265

SURFACE CRACKS

The growth of small corrosion fatigue cracks in alloy 2024
[NASA-TM-107755] p 3451 N93-29069

SURFACE DEFECTS

Fracture of glass p 3293 N93-30969

SURFACE DIFFUSION

Surface diffusion: Atomistics and surface morphology (summary of MRS Symposium B panel discussion)
[DE93-009862] p 3594 N93-29188

SURFACE DISTORTION

System overview on electromagnetic compensation for reflector antenna surface distortion
[NASA-TM-106217] p 3273 N93-29195

SURFACE ENERGY

A study of the chemical mechanism in lubrication
[DE93-012230] p 3330 N93-28650

SURFACE LAYERS

Acousto-optic infrared spectral imager for Pluto fast flyby p 3285 N93-28781

Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces
p 3638 N93-29378

Characterization of lithium electrode surface in lithium secondary batteries by in situ Raman spectroscopic methods
[AD-A263728] p 3411 N93-29986

SURFACE NAVIGATION

A comparison of simulated parallax and single-station range aids to navigation
[AD-A263460] p 3246 N93-29818

Conspicuity of aids to navigation. Part 1: Temporal patterns for flashing lights
[AD-A264626] p 3499 N93-30426

SURFACE PROPERTIES

Laer-induced breakdown spectroscopy instrument for element analysis of planetary surfaces
p 3434 N93-28769

Microtextured metals for stray-light suppression in the Clementine startracker p 3286 N93-28785

Visible imaging on the Pluto fast flyby mission
p 3646 N93-28799

Spacecraft surface charging handbook
[AD-A262778] p 3279 N93-29305

Characterization of copper iodide thin films fabricated via laser assisted molecular beam epitaxy
[AD-A262823] p 3596 N93-29430

Improved field emitter current densities and stability through the application of a proprietary process
[AD-A264048] p 3411 N93-30031

Atomic force microscopy of ammmonium perchlorate
p 3349 N93-30091

SURFACE REACTIONS
Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design
[DE93-753270] p 3584 N93-28535
Supported organometallic complexes, surface chemistry, spectroscopy, and catalysis
[DE93-011930] p 3309 N93-28688
Spacecraft glow and the EISG/skirt experiment
p 3266 N93-28728
Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002
Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE93-009049] p 3593 N93-29096
A simple model for explosives formulation
[DE93-010703] p 3341 N93-29251
What is underneath? Moving atoms and molecules to find out
[AD-A263363] p 3567 N93-29332
FI-STM investigation of atomic hydrogen adsorption on the Si(100)2x1 surface
[AD-A262748] p 3567 N93-29403
Electric field induced phenomena in STM: Tip deformations and Au(111)-surface phase transitions during tunneling spectroscopy experiments
[AD-A262208] p 3596 N93-29445
The mechanical response of gold substrates modified with self-assembling monolayer films
[AD-A262997] p 3452 N93-29515
Kinetics and dynamics of reacting systems
[AD-A264046] p 3313 N93-30030
Organometallic and surface chemistry of mixed-metal systems
[DE93-012686] p 3325 N93-30059
Unsteady combustion of energetic materials using laser-recoil p 3319 N93-30085
Center for surface radiation damage studies
[AD-A264330] p 3570 N93-30366
Surface chemistry of hydrogen-passivated porous silicon-oxidation of surface Si-H groups by acetone
[AD-A264655] p 3315 N93-30526
Surface chemistry of N2H4 on Si(100)-2x1
[AD-A264819] p 3316 N93-30627
Fluids in porous media.
[PB93-175198] p 3428 N93-30759
Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816

SURFACE ROUGHNESS
Improved heat removal by microscopic surface texturing of capillaries
[AD-A263483] p 3424 N93-29966
Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling
[AD-A264174] p 3425 N93-30155

SURFACE TEMPERATURE
Spacecraft glow and the EISG/skirt experiment
p 3266 N93-28728
Fundamental studies of impingement cooling thermal boundary conditions p 3254 N93-29940
Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases
p 3255 N93-29943
Transient thermal behaviour of a compressor rotor with axial cooling air flow and co-rotating or contra-rotating shaft p 3255 N93-29946
Measurement of projectile surface temperature by means of its infrared radiation: A preliminary study
[AD-A264053] p 3432 N93-30032

SURFACE TREATMENT
Surface modification of tribological components in transportation
[DE93-008647] p 3442 N93-28903
Method for preparation of a microporous structure with layered interstitial surface treatment
[NASA-CASE-MSC-21487-2] p 3296 N93-29023

SURFACE VEHICLES
A video transmission system for low-bandwidth remote driving
[DE93-010275] p 3544 N93-30529

SURFACE WATER
Utilization of NOAA/AVHRR data for energy balance of Lake Constance (Switzerland) p 3458 N93-28926
Molecular dynamics modeling of electric double layers with spectroscopic applications
[AD-A263168] p 3568 N93-29489
Annual report on monitoring of the unsaturated zone and recharge areas at INEL to the state of Idaho INLEL oversight committee
[DE93-012947] p 3473 N93-30187

SURFACE WAVES
Optical slope/height measurements of small scale waves within the SAXON-FPN experiment
[AD-A262572] p 3487 N93-29422
Software development and analysis for experimental high frequency surface wave radar data
[AD-A261982] p 3383 N93-29438
Acoustic charge transport technology investigation for advanced development transponder
p 3386 N93-29602
Modeling regional seismic waves
[AD-A264002] p 3479 N93-30756

SURVEILLANCE
Inservice diagnostic methods for solenoid-operated valves
[DE93-007823] p 3443 N93-28968
T(lc2)acS(lc3)ats for Surveillance Verification and C3I
[AGARD-CP-522] p 3387 N93-29892
TACSAT ground control and data collection
p 3388 N93-29895
Cost effective TacSats for military support
p 3285 N93-29912

SURVEILLANCE RADAR
Low cost TACSAT for NATO surveillance
p 3285 N93-29911

SURVEYS
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Anthropometric survey of the astronaut applicants and astronauts from 1985 to 1991
[NASA-RP-1304] p 3506 N93-29324
Filling the gaps: An overview of data on education in grades K through 12
[PB93-176550] p 3608 N93-30821
A representative survey of US space systems and methods for estimating their costs
[AD-A264159] p 3272 N93-30881

SWELLING
Thermodynamics of swelling and collapse of polyelectrolytic gels
[ETN-93-93485] p 3331 N93-29064

SWEPT FORWARD WINGS
Effect of canard wing positions on aerodynamic characteristics of swept-forward wing
[AD-A262373] p 3238 N93-28493
Flight control system design factors for applying automated testing techniques
[NASA-TM-4242] p 3260 N93-30764

SWEPT WINGS
Computation of a delta-wing roll-and-hold maneuver
[AD-A264704] p 3260 N93-30498

SWINGBY TECHNIQUE
Double swingby at Earth-Moon for increase of excess velocity
[ETN-93-94177] p 3270 N93-30582

SWITCHES
Subnanosecond high power performance of a bistable optically-controlled GaAs switch
[DE93-006285] p 3406 N93-28944
Analysis of an MCG/fuse/PFS experiment
[DE93-007355] p 3410 N93-29812
Ferroelectric liquid crystal optical interconnect switching systems
[AD-A263751] p 3596 N93-29859
Ultrafast, passive, broad-band, optical shutter based on novel semiconductor/conducting polymer interfaces
[AD-A264098] p 3601 N93-30878

SWITCHING
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

SWITCHING CIRCUITS
Optically controlled solid state opening switches
[AD-A262404] p 3591 N93-28496
Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

SYMBOLIC PROGRAMMING
Nonresident and endangered variables: The effects of code generation optimizations on symbolic debugging
[AD-A263149] p 3529 N93-29486

SYMBOLS
Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1
p 3502 N93-28857

SYMMETRY
Beyond two dimensions
[DE93-606084] p 3606 N93-30786
Computer algebra tools for higher symmetry analysis of nonlinear evolution equations
[DE93-606089] p 3535 N93-30787
Electric magnetic duality in string theory
[DE93-606061] p 3606 N93-30807
Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917
Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928
On one-dimensional topological and conformal field theories
[DE92-644726] p 3558 N93-30986
Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988

SYNAPSES
Computation and generalization in neural networks
[AD-A263752] p 3549 N93-29871
Analog CMOS circuits for neural networks
p 3355 N93-30223
Evolving neural network architecture
[AD-A264802] p 3544 N93-30592
Biophysical and biochemical mechanisms in synaptic transmitter release
[AD-A264829] p 3496 N93-30613

SYNCHRONISM
Synchronization techniques for medium data rate EHF MILSATCOM systems p 3389 N93-29901
Improved bounds for synchronization jitter
p 3360 N93-30251
Coarse synchronization in an EHF frequency-hopped satellite communications system p 3365 N93-30281
Temporal synchronization of frequency hopped DPSK
p 3365 N93-30285

SYNCHRONOUS PLATFORMS
NOAA satellite programs and technology requirements
p 3627 N93-30710

SYNCHROTRON RADIATION
Multifractal analysis of radio lobes
p 3380 N93-28689
Non-perturbative calculation of equilibrium polarization of stored electron beams
[DE93-764500] p 3577 N93-30607

SYNCHROTRONS
New limits on generation-1 leptoquarks
[DE93-008138] p 3567 N93-29351

SYNCOPE
Acquisition of physiological data during G-induced Loss of Consciousness (G-LOC)
[AD-A264492] p 3496 N93-30400

SYNTAX
Character recognition using a neural network model with fuzzy representation p 3512 N93-29536
Proposal for a numerical array library
[DE93-010678] p 3623 N93-30482

SYNTHESIS (CHEMISTRY)
Synthesis of conducting polymer composite fibers in electrochemical flow cells
[AD-A262233] p 3294 N93-28492
Catalytic synthesis of silicon carbide preceramic polymers: Polycarbosilanes
[DE93-008634] p 3329 N93-28541
Be3(AsO4)2 2H2O: A new berylloarsenate phase containing bridged tetrahedral 3-rings
[AD-A262518] p 3592 N93-28584
Polyimides prepared from 3,5-diamino benzo trifluoride
[NASA-CASE-LAR-14206-1] p 3331 N93-29083
Diphenylmethane-containing dianhydride and polyimides prepared therefrom
[NASA-CASE-LAR-14487-1] p 3331 N93-29085
Synthesis and polymerization of azaethylenes and aza-1,3-dienes
[AD-A263651] p 3332 N93-29290
Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456
Polymers with electrical and nonlinear optical properties
[AD-D015691] p 3333 N93-29457
Synthesis of oligoimides and oligoimide anion radicals
[AD-A263129] p 3290 N93-29474
Process to prepare 1,3-diamino-5-pentafluorosulfanylbenzene
[NASA-CASE-LAR-14773-2-CU] p 3312 N93-29506
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825
A novel process for methanol synthesis
[DE93-013070] p 3314 N93-30188
Ordered molecular arrays as templates: A new approach to synthesis of mesoporous materials
[AD-A264631] p 3570 N93-30540
Design, synthesis, and chemical processing of hierarchical ceramic structures for aerospace applications
[AD-A264227] p 3339 N93-30885

SYNTHETIC APERTURE RADAR
Leadex data report. Part 1: Weather analysis and satellite images
[AD-A263217] p 3481 N93-28876
The interferometric SAR technology and its usability in the framework of ERS-1 p 3457 N93-28919

Recording of forest surface in SAR-images with statistical methods in areas of pronounced relief
p 3457 N93-28920
The German satellite ground station in Antarctica: Realization and first results p 3458 N93-28924
SAR sensors on TACSATS: A feasibility assessment
p 3286 N93-29909
A TACSAT SAR concept p 3286 N93-29910
Low cost TACSAT for NATO surveillance
p 3285 N93-29911
Similarities between synthetic aperature radar and ground probing radar imaging p 3376 N93-30347
Segmentation of SAR images p 3376 N93-30348
Multiresolution analysis of SAR data
[AD-A264727] p 3393 N93-30576
ERS-1 directional wave spectra validation with the airborne SAR PHARS
[BCRS-92-18] p 3463 N93-31010

SYNTHETIC FIBERS
Synthesis of conducting polymer composite fibers in electrochemical flow cells
[AD-A262233] p 3294 N93-28492

SYNTHETIC FUELS
Introductions to the Proceedings of the Fourteenth Symposium on Biotechnology for Fuels and Chemicals
[DE93-006235] p 3490 N93-28890

SYSTEM FAILURES
Multiprocessing systems: Reliability modelling and analysis using multimode components and dependent failures
[AD-A264230] p 3540 N93-30364
Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413

SYSTEM IDENTIFICATION
Advances in the identification of electrochemical transfer function models using Prony analysis
[DE93-009424] p 3550 N93-30041
On neural networks in identification and control of dynamic systems
[NASA-TM-107702] p 3455 N93-31038

SYSTEMS ANALYSIS
Resource limited reasoning: A study of literature in the context of model-based diagnosis
[MEMO-INF-92-38] p 3540 N93-28480
System analysis for a kinematic positioning system based on the global positioning system
[AD-A262830] p 3245 N93-29468
Overview of the Systems Special Investigation Group investigation p 3318 N93-29683
Advances in the identification of electrochemical transfer function models using Prony analysis
[DE93-009424] p 3550 N93-30041
Nonsmooth optimization algorithms, system theory, and software tools
[AD-A264679] p 3534 N93-30549
Uses of risk importance measures
[VTT-TIED-1245] p 3378 N93-30581
Minimum security requirements for multi-user operating systems
[PB93-185999] p 3522 N93-30832
Optical system analysis for the ground based EXVM
[NASA-CR-192588] p 3582 N93-31035

SYSTEMS ENGINEERING
The meta model hierarchy: A framework for information systems concepts and techniques
[TR-92-17] p 3611 N93-28481
A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578
Magnetohydrodynamic projects at the CDIF
[DE93-012195] p 3584 N93-28649
Operator and automation capability analysis: Picking the right team p 3503 N93-28864
System automation and pilot-vehicle-interface for unconstrained low-altitude night attack
p 3503 N93-28867
Flight evaluation of a computer aided low-altitude helicopter flight guidance system p 3260 N93-28869
Overview of cockpit technology research and development programs for improvement of the man/machine interface: Review of the AGARD AVP Symposium held in Madrid, May 1992
p 3505 N93-28872
Systems engineering studies of on-orbit assembly operation p 3275 N93-29114
Systems engineering studies of lunar base construction p 3277 N93-29121
Taurus Lightweight Manned Spacecraft Earth orbiting vehicle p 3231 N93-29736
Solid oxide fuel cells for transportation: A clean, efficient alternative for propulsion
[DE93-010662] p 3464 N93-29844
Adapting system engineering principles to the Canadian Airspace System p 3247 N93-30338
Radiation-hardened microwave communications system
[DE93-007915] p 3394 N93-30631
OAST space research and technology applications: Technology transfer successes p 3625 N93-30693
Technology transfer in the NASA Ames Advanced Life Support Division p 3628 N93-30724
Gigabit network communications research
[AD-A264895] p 3536 N93-31026

SYSTEMS INTEGRATION
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
A new class of mission support for combat air-crew
p 3501 N93-28854
Grand challenges in mass storage: A systems integrators perspective p 3620 N93-30467
An annotated bibliography on integration in software engineering environments
[AD-A264798] p 3535 N93-30602

SYSTEMS MANAGEMENT
Distributed Virtual System (DIVIRS) Project
[NASA-CR-193234] p 3526 N93-29169
Changing role of telecommunications management in air traffic control in the FAA p 3247 N93-30354
Office of Water Environmental and Program Information Systems Compendium, FY 1992
[PB93-186203] p 3462 N93-30833

SYSTEMS STABILITY
Stabilization using low-gain PI control: SISO case
[OUEL-1947/92] p 3541 N93-28898

SYSTOLIC ARRAYS
A systolic-array structure for MTCM receivers
p 3357 N93-30236

T

T TAURI STARS
The multiplicity of T Tauri stars in the star forming regions Taurus-Auriga and Ophiuchus-Scorpius: A 2.2 micron speckle imaging survey p 3634 N93-28945
Submillimeter CO observations of warm gas around T-Tauri stars
[MPE-PREPRINT-232] p 3631 N93-30615

TABLES (DATA)
Tables of experimental data used for the correlation of the thermophysical properties of ethane
[PB93-173417] p 3313 N93-29768

TACTILE DISCRIMINATION
Tactile sensing for 3-dimensional shape estimation
p 3357 N93-30232

TACTILE SENSORS (ROBOTICS)
Tactile sensing for 3-dimensional shape estimation
p 3357 N93-30232
An expert system for identification of the task status from tactile sensor data p 3368 N93-30300
A testbed for autonomous reflexive grasping
[AD-A264557] p 3446 N93-30384

TAIWAN
Scientific research abstracts in the Republic of China, 1991 (science and technology) p 3670 N93-30911

TAKEOFF
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

TANTALUM
Gas electron diffraction employing a pulsed electron beam synchronous with photoexcitation
p 3319 N93-30101

TAPE RECORDERS
The NT digital micro tape recorder
p 3435 N93-30461
Towards a 1000 tracks digital tape recorder
p 3435 N93-30469
Evolution of a high-performance storage system based on magnetic tape instrumentation recorders
p 3435 N93-30470

TAPS
Adaptive airborne radar simulation with equalization filter taps
[AD-A264722] p 3393 N93-30514

TARGET ACQUISITION
SWAT 2 overview
[AD-A262905] p 3578 N93-29139
SWAT laboratory test results
[AD-A262906] p 3578 N93-29140
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight
[AD-A264661] p 3499 N93-30542
Enhanced convergence adaptive detection
[AD-A264100] p 3399 N93-30879

TARGET RECOGNITION
Information-theoretic performance bounding of Bayesian identifiers
[DE93-010705] p 3554 N93-28763
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
The fusion of information via fuzzy integration
p 3517 N93-29568
Generalized octrees for constrained object modeling
p 3369 N93-30304
Analysis and computation for vortex dynamics and rarefied gases
[AD-A264705] p 3427 N93-30499
Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight
[AD-A264661] p 3499 N93-30542

TARGETS
Multisensor image analysis system
[AD-A263679] p 3528 N93-29294
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334

TASK PLANNING (ROBOTICS)
The planning coordinator: A design architecture for autonomous error recovery and on-line planning of intelligent tasks
[NASA-CR-193250] p 3543 N93-30039
Task allocation and real-time considerations for the Robot Controller Test Station (RCTS)
p 3364 N93-30278

TATB
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069
Pressure dependence of the reaction propagation rate of TATB to 40 GPa p 3319 N93-30082

TDR SATELLITES
Interferometric tracking system for the tracking and data relay satellite
[NASA-CR-193274] p 3382 N93-29217

TEARING MODES (PLASMAS)
Nonlinear coupling of tearing fluctuations in the Madison Symmetric Torus
[DE93-010131] p 3584 N93-28602

TECHNOLOGICAL FORECASTING
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-92-006] p 3353 N93-28636
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-92-010] p 3353 N93-28674
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-92-008] p 3353 N93-28675
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-003] p 3353 N93-28691

TECHNOLOGIES
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-003] p 3327 N93-30623
The NCAT process p 3626 N93-30697

TECHNOLOGY ASSESSMENT
Refractory metal disilicides research
[AD-A262416] p 3320 N93-28499
Reliability assessment at airline inspection facilities. Volume 2: Protocol for an eddy current inspection reliability experiment
[DOT/FAA/CT-92/12-VOL-2] p 3449 N93-28685
Polarimetric multispectral imaging technology
p 3434 N93-28774
New technologies for UV detectors
p 3582 N93-28786
Assessment of energy technologies contributing to environmental conservation
[DE93-781439] p 3468 N93-28882
Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205
The 17th Annual Electronics Manufacturing Seminar proceedings
[AD-A261963] p 3409 N93-29435
Advanced NDE technology program
[AD-A262008] p 3449 N93-29443
Multi-Attribute Decision Theory methodology for pollution control measure analysis
[DE93-005444] p 3472 N93-30008
Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider
[DE93-011481] p 3412 N93-30127
The Visible Human Project of the National Library of Medicine: Remote access and distribution of a multi-gigabyte data set p 3617 N93-30453
The NCAT process p 3626 N93-30697
Technology transfer within NASA
p 3627 N93-30708

TECHNOLOGY TRANSFER
ORNL superconducting technology program for electric energy systems
[DE93-009588] p 3404 N93-28523
Reliability assessment at airline inspection facilities. Volume 2: Protocol for an eddy current inspection reliability experiment
[DOT/FAA/CT-92/12-VOL-2] p 3449 N93-28685
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-010658] p 3408 N93-29311
Technology transfer personnel exchange at the Boeing Company
[DE93-010190] p 3625 N93-29329
Decision maker's guide to international space
[ANSER-STDN-93-4] p 3669 N93-29710
Accelerating the transfer of technology for implementing domain specific software architectures
[AD-A264017] p 3532 N93-30014
Promoting high-performance computing and communications
[ISBN-0-16-041828-3] p 3522 N93-30570
Technology Transfer and the Civil Space Program. Volume 2: Workshop proceedings
[NASA-TM-108250] p 3625 N93-30692
Departmental technology transfer update p 3625 N93-30694
The role of the University Licensing Office in transferring intellectual property to industry p 3626 N93-30698
Technology transfer p 3626 N93-30699
National Technology Transfer Center p 3626 N93-30700
Technology transfer from the viewpoint of a NASA prime contractor p 3626 N93-30701
Sandia National Laboratories p 3626 N93-30702
Technology transfer needs and experiences: The NASA Research Center perspective p 3626 N93-30703
Technology transfer within the NASA Goddard Space Flight Center p 3626 N93-30704
Technology transfer and space science missions p 3626 N93-30705
Technology coordination p 3626 N93-30706
Technology transfer p 3627 N93-30707
Technology transfer within NASA p 3627 N93-30708
Technology transfer within the government p 3627 N93-30709
Technology transfer within the government p 3627 N93-30711
Technology transfer and Rockwell International p 3627 N93-30712
NASP technology transfer p 3627 N93-30713
Robotic technology evolution and transfer p 3627 N93-30714
High performance computing and communications program p 3627 N93-30715
Technology transfer between the government and the aerospace industry p 3628 N93-30716
National Media Laboratory p 3628 N93-30717

TECHNOLOGY UTILIZATION
Development of Si(1-x)Ge(x) technology for microwave sensing applications
[NASA-TM-106157] p 3405 N93-28610
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-92-007] p 3353 N93-28635
JPRS report: Science and technology. Central Eurasia: Life sciences
[JPRS-ULS-93-005] p 3490 N93-28683
JPRS report: Science and technology. Central Eurasia: Life sciences
[JPRS-ULS-92-027] p 3490 N93-28684
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-003] p 3353 N93-28691
Electrolysis performance improvement and validation experiment p 3267 N93-28737
A unique photon bombardment system for space applications p 3286 N93-28790
Energy efficient drivepower: An overview
[DE93-012435] p 3411 N93-30057
Energy efficient drivepower
[DE93-012436] p 3411 N93-30058
How to compete for NASA contracts
[NASA-TM-109238] p 3610 N93-30644
OAST space research and technology applications: Technology transfer successes p 3625 N93-30693
The NCAT process p 3626 N93-30697
Technology transfer p 3626 N93-30699
Sandia National Laboratories p 3626 N93-30702
Technology transfer p 3627 N93-30707
Technology transfer within the government p 3627 N93-30711
Robotic technology evolution and transfer p 3627 N93-30714

TELECOMMUNICATION
Applying high-level language paradigms to communications software for distributed systems
[AD-A263001] p 3528 N93-29463
The Telecommunications and Data Acquisition Report
[NASA-CR-193144] p 3384 N93-29586
The general theory of convolutional codes p 3385 N93-29595
GE networked mass storage solutions supporting IEEE network mass storage model p 3618 N93-30458

TELECONNECTIONS (METEOROLOGY)
A water mass analysis of the 1991-1992 El Nino signal in the Farallon Islands region
[AD-A263490] p 3488 N93-29819

TELEOPERATORS
Sources sought for innovative scientific instrumentation for scientific lunar rovers p 3434 N93-28804
A study of the effects of lens focal length on remote driver performance
[AD-A263191] p 3505 N93-28941
Graphical interface between the CIRSSE testbed and CimStation software with MCS/CTOS
[NASA-CR-193276] p 3527 N93-29218
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Graphical programming: On-line robot simulation for telerobotic control
[DE93-009796] p 3447 N93-30654

TELEROBOTICS
Sources sought for innovative scientific instrumentation for scientific lunar rovers p 3434 N93-28804
Lunar crane system p 3277 N93-29118
Lunar rovers and local positioning system p 3277 N93-29119
Graphical interface between the CIRSSE testbed and CimStation software with MCS/CTOS
[NASA-CR-193276] p 3527 N93-29218
Supervised autonomy in telerobotics p 3372 N93-30326
A video transmission system for low-bandwidth remote driving
[DE93-010275] p 3544 N93-30529
Graphical programming: On-line robot simulation for telerobotic control
[DE93-009796] p 3447 N93-30654

TELESCOPES
Subnanoradian, groundbased tracking of spaceborne lasers p 3442 N93-28823
A technique for single-pulse spectrum and pulse width measurements for an IR-FEL
[DE93-007732] p 3436 N93-28847
Sodium guide star adaptive optics system for astronomical imaging in the visible and near-infrared
[DE93-009543] p 3630 N93-29785
Advanced research in sky surveillance: A search for low-luminosity objects
[AD-A264832] p 3631 N93-30629

TELEVISION SYSTEMS
Topical meeting of broadband analog and digital optoelectronics
[AD-A264643] p 3581 N93-30522
A video transmission system for low-bandwidth remote driving
[DE93-010275] p 3544 N93-30529

TEMPERATURE COMPENSATION
Temperature compensated lithium battery energy monitor
[AD-D015680] p 3409 N93-29605

TEMPERATURE CONTROL
Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561
In-STEP Two-Phase Flow (TPF) thermal control experiment p 3265 N93-28719
LDEF: 69 Months in Space. Second Post-Retrieval Symposium, part 2
[NASA-CP-3194-PT-2] p 3654 N93-29354
Long Duration Exposure Facility (LDEF) low temperature Heat Pipe Experiment Package (HEPP) flight results p 3429 N93-29701
Thermal cycler temperature variation and its effect on the polymerase chain reaction
[AD-A264660] p 3337 N93-30541

TEMPERATURE DEPENDENCE
The temperature dependence of the deformation and oxidation behavior of an age-hardenable beta + alpha-two titanium alloy
[AD-A262232] p 3320 N93-28491
Investigation of ion beam mixing of iron marker layers in aluminum oxide by RBS
[DE93-010727] p 3594 N93-29314
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069
Thermal cycler temperature variation and its effect on the polymerase chain reaction
[AD-A264660] p 3337 N93-30541
Superconducting films of YBaCuO
[DE93-606831] p 3600 N93-30772
Temperature-dependent electrical conductivity of soda-lime glass p 3294 N93-30978

TEMPERATURE DISTRIBUTION
A thermal stress solution for multilayered composite cylinders
[AD-A262579] p 3295 N93-28657
Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model
[NASA-CR-4515] p 3420 N93-29159
The thermal structure, dust loading, and meridional transport in the Martian atmosphere during late southern summer p 3651 N93-29616
A generalized approach to the thermal analysis of the Long Duration Exposure Facility's flight experiments p 3428 N93-29624
Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931
Local heat transfer measurement with liquid crystals on rotating surfaces including non-axisymmetric cases p 3255 N93-29943
Fluid flow and heat transfer in the entrance region of an annulus between independently rotating tubes with a turbulent axial flow p 3256 N93-29952
Cooling predictions in turbofan engine components p 3259 N93-29964

TEMPERATURE EFFECTS
The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886
Environmental effects on stitched RTM composites
[NASA-CR-193221] p 3297 N93-29107
System overview on electromagnetic compensation for reflector antenna surface distortion
[NASA-TM-106217] p 3273 N93-29195
Novel polymer compositions for high-temperature membrane applications, phase 1
[PB93-174126] p 3331 N93-29201
Response of energetic solids to light, heat and shock pulses
[AD-A263702] p 3342 N93-29296
The microchannel heatsink with liquid nitrogen cooling
[DE93-009258] p 3422 N93-29300
Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads
[AD-A263497] p 3423 N93-29339
Results of a round robin test program: Complex modulus properties of a polymeric damping material
[AD-A263619] p 3332 N93-29344
The effect of high temperature on wall shear in a two dimensional wall jet
[AD-A262982] p 3423 N93-29426
Radiation and temperature effects on LDEF fiber optic samples p 3583 N93-29700
Properties of superconducting YBa2Cu3O(6+4) ceramic materials: Effect of processing parameters
[AD-A263441] p 3334 N93-29790
Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane p 3253 N93-29930
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206
Holmium quasi-two level laser
[AD-D015706] p 3440 N93-30427
Improved measurement of thermal effects on microstructure p 3292 N93-30959

TEMPERATURE GRADIENTS
Analyses of data from fine structure and circulation studies in the Gulf of California
[AD-A262910] p 3486 N93-28885
Self-organized profile relaxation by ion temperature gradient instability in toroidal plasmas
[DE93-009580] p 3585 N93-28910
Investigation of thermoacoustic muffler
[AD-A262009] p 3562 N93-29392

TEMPERATURE MEASUREMENT
Program for an improved hypersonic temperature-sensing probe
[NASA-CR-186025] p 3431 N93-29066
A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325
Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine
[AD-A263810] p 3580 N93-29880
Cooling predictions in turbofan engine components p 3259 N93-29964

Measurement of projectile surface temperature by means of its infrared radiation: A preliminary study
[AD-A264053] p 3432 N93-30032

In-situ temperature and concentration measurements of organosilicon decomposition in a chemical vapor deposition reactor
[ONERA-P-1990-3] p 3313 N93-30109

A novel flame thermometer based on the doppler width of ro-vibrational transitions
[AD-A264515] p 3315 N93-30405

Studies of curvature, strain, and unsteady effects on premixed flames p 3316 N93-30646

TEMPERATURE PROFILES

Utilization of NOAA/AVHRR data for energy balance of Lake Constance (Switzerland) p 3458 N93-28926

A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152

Determination of gas phase species and temperature profiles above solid propellants p 3346 N93-30080

TEMPERATURE SENSORS

Program for an improved hypersonic temperature-sensing probe
[NASA-CR-186025] p 3431 N93-29066

TEMPORAL DISTRIBUTION

Temporal synchronization of frequency hopped DPSK
p 3365 N93-30285

TEMPORAL RESOLUTION

Subnanosecond high power performance of a bistable optically-controlled GaAs switch
[DE93-006285] p 3406 N93-28944

TENNESSEE VALLEY (AL-KY-TN)

Remote sensing for water quality monitoring in the Tennessee Valley: Field tests of two systems
[DE93-008997] p 3462 N93-30637

TENSILE CREEP

Tensile creep behavior of polycrystalline alumina fibers
[NASA-TM-106269] p 3340 N93-30938

TENSILE PROPERTIES

Design and evaluation of a uniaxial pull test for lithium hydride/deuteride
[DE93-010760] p 3451 N93-28832

Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144

APU diaphragm testing
[NASA-TM-108254] p 3272 N93-29501

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 2
[AD-A263814] p 3335 N93-29881

Development of a test program to evaluate structural defects in Glass-Reinforced Plastic (GRP), volume 1
[AD-A263813] p 3335 N93-29886

Mechanical properties of several magnesium and aluminum composites
[AD-A262481] p 3299 N93-30137

Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g)
[AD-A264297] p 3601 N93-30819

Mechanical properties of composite materials
p 3290 N93-30951

TENSILE STRENGTH

Design and evaluation of a uniaxial pull test for lithium hydride/deuteride
[DE93-010760] p 3451 N93-28832

Aligned, short-fiber composites by novel flow processing methods
[DE93-008701] p 3296 N93-28904

Aluminium-high strength material by mechanical alloying and reaction milling: Basics of processing and characterisation of material
[ESA-TT-1249] p 3324 N93-29272

Studies of fiber-matrix adhesion on compression strength p 3304 N93-30846

Mechanical properties of composite materials
p 3290 N93-30951

Direct tension experiments on compacted granular materials p 3292 N93-30960

Application of hardness testing in foundry processing operations: A university and industry partnership
p 3292 N93-30961

TENSILE STRESS

The design and lifetime calculation of MHD generator walls based on subcritical crack growth in ceramics
[ISBN-90-9004009-9] p 3332 N93-29267

TENSILE TESTS

Design and evaluation of a uniaxial pull test for lithium hydride/deuteride
[DE93-010760] p 3451 N93-28832

Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens
[NASA-TM-106219] p 3449 N93-29073

TENSOR ANALYSIS

Beyond two dimensions
[DE93-606084] p 3606 N93-30786

TENSORS

Non-scalar uncertainty: Uncertainty in dynamic systems p 3517 N93-29565

Integrals of motion on the group of invariance of an interval in three-dimensional spaces
[DE93-606090] p 3606 N93-30797

A simple formula for reducing Feynman diagrams to scalar integrals
[DE92-644717] p 3607 N93-30916

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644743] p 3557 N93-30926

On the energy-momentum tensors for field theories in spaces with affine connection and metric
[DE92-644744] p 3557 N93-30927

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

TERMINAL BALLISTICS

The effect of material strength on segment penetration behavior
[AD-A263262] p 3453 N93-29801

Comparison of impact results for several polymeric composites over a wide range of low impact velocities
p 3304 N93-30848

TERMINOLOGY

Application of ray tracing in radiation heat transfer
[NASA-TM-106206] p 3419 N93-29075

TERMS

Handbook of frequently used acronyms and glossary of terms
[DE93-011388] p 3616 N93-30123

TERNARY ALLOYS

Some effects of composition and microstructure on the B2 in equilibrium to DO3 ordered phase transition in Fe3Al alloys
[DE93-009724] p 3325 N93-29813

Improvement in ductility of the intermetallic compound Ti3Al
[ESA-TT-1276] p 3325 N93-30105

Flexible storage medium for write-once optical tape
p 3621 N93-30473

TERRAIN

Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399

Simulation of landscape disturbances and the effect of climatic change
[DE93-011615] p 3472 N93-30131

Spacecraft studies of Phobos and Mars
[NASA-CR-193298] p 3651 N93-30635

TERRAIN ANALYSIS

Terrain and coverage prediction analyses for non-geostationary orbit EHF satellite communications
p 3389 N93-29902

TERRAIN FOLLOWING AIRCRAFT

Optimal trajectories for aircraft terrain following and terrain avoidance: A literature review update
[AD-A264075] p 3260 N93-30604

TEST CHAMBERS

Mathematical modeling and control law development for the atmospheric monitoring and control system of the Controlled Environment Research Chamber (CERC) at NASA Ames Research Center
[AD-A261978] p 3261 N93-29436

TEST EQUIPMENT

Loading and testing a light scattering cell with a binary fluid mixture near its critical composition
[NASA-CR-193147] p 3415 N93-28557

Lunar regolith penetrators and cutters
p 3276 N93-29117

Rotational fluid flow experiment p 3235 N93-29761

The USAF Advanced Turbine Aerothermal Research Rig (ATARR) p 3255 N93-29945

TEST FACILITIES

A new facility for advanced rocket propulsion research
[NASA-TM-106193] p 3270 N93-28696

CSI-Star: A low-cost CSI orbital testbed
p 3263 N93-28707

Testing in combined dynamic environments
[DE93-010679] p 3278 N93-29250

Improved design concepts for millimeter wave power sources
[AD-A264060] p 3411 N93-29922

FASSET: A development model for a Canadian EHF MILSATCOM system p 3363 N93-30268

Task allocation and real-time considerations for the Robot Controller Test Station (RCTS)
p 3364 N93-30278

Development of an antenna measurement facility operating in the 2 GHz - 100 GHz frequency range
p 3369 N93-30308

Thermal effects testing at the National Solar Thermal Test Facility
[DE93-009825] p 3465 N93-30391

TEST RANGES

Estimating test range capacity
[AD-A262493] p 3270 N93-28938

TEST STANDS

CSI-Star: A low-cost CSI orbital testbed
p 3263 N93-28707

Graphical interface between the CIRSSE testbed and CimStation software with MCS/CTOS
[NASA-CR-193276] p 3527 N93-29218

Load test set-up for the Airmass Sunburst Ultra-Light Aircraft p 3249 N93-29776

The USAF Advanced Turbine Aerothermal Research Rig (ATARR) p 3255 N93-29945

TETHERED BALLOONS

Stabilized platform for tethered balloon soundings of broadband long- and short-wave radiation
[DE93-007876] p 3383 N93-29308

TETHERED SATELLITES

SPREE Interactive Data Analysis Tool (SIDAT)
[AD-A262782] p 3273 N93-29306

Learning characteristics of a space-time neural network as a tether skiprope observer p 3512 N93-29534

Clustering of tethered satellite system simulation data by an adaptive neuro-fuzzy algorithm
p 3512 N93-29535

Application of non-standard signal processing to ELF noise characterization for the TSS1-OESEE programme
p 3397 N93-30743

Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

TETHERING

The dynamics and control of space tethers
p 3274 N93-28629

Learning characteristics of a space-time neural network as a tether skiprope observer p 3512 N93-29534

Tethered aerostat VLF/LF transmitter system design considerations p 3399 N93-30753

TETHERLINES

The dynamics and control of space tethers
p 3274 N93-28629

TETRAHEDRONS

Be3(AsO4)2 2H2O: A new berylloarsenate phase containing bridged tetrahedral 3-rings
[AD-A262518] p 3592 N93-28584

TETRAHYDROFURAN

NMR studies of molecules in liquid crystals and graphite
[DE93-010423] p 3569 N93-29805

TETRODES

Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830

TEXTBOOKS

Syllabus physical meteorology, part 1
[KNMI-TR-140-PT-1] p 3484 N93-30114

TEXTILES

Lightweight flexible composite tent materials
[AD-A263021] p 3295 N93-28660

The 1990-1991 project summaries
p 3230 N93-29731

Infiltration/cure modeling of resin transfer molded composite materials using advanced fiber architectures
p 3303 N93-30843

Advanced fiber/matrix material systems
p 3305 N93-30854

TEXTS

Dynamic object oriented interaction and its implementation in the framework in an interface management system
[ETN-93-93795] p 3523 N93-28526

A model for processing the SGML document in version oriented hypertext systems
[ETN-93-93797] p 3611 N93-28528

Parcels with TAGS
[PB93-181824] p 3535 N93-30824

TEXTURES

Microtextured metals for stray-light suppression in the Clementine startracker p 3286 N93-28785

Improved heat removal by microscopic surface texturing of capillaries
[AD-A263483] p 3424 N93-29966

THEMATIC MAPPERS (LANDSAT)

Model-oriented correction of thematic mapper raw data p 3459 N93-28930

The estimation and scaling of land-surface fluxes of latent and sensible heat with remotely sensed data over a grassland site p 3462 N93-30045

Land use database for the Netherlands using LANDSAT Thematic Mapper pictures
[BCRS-91-32] p 3463 N93-30839

THEMATIC MAPPING
Proceedings of the 8th User Seminar of the German Remote Sensing Data Center of the German Aerospace Establishment (DLR)
[DLR-MITT-92-09] p 3456 N93-28915

THEOREM PROVING
Automated reasoning with function evaluation for COCOLOG
[INRIA-RR-1713] p 3529 N93-29488
Packing odd paths
[CWI-BS-R9207] p 3549 N93-29849

THEOREMS
Lie groups whose set of compact subgroups is inductive
[ETN-93-93791] p 3547 N93-28524
Classification theorem for principal fibre bundles, Berry's phase, and exact cycle evolution
[DE93-011114] p 3556 N93-28601
Closed-loop control with delayed information
[INRIA-RR-1638] p 3541 N93-28638
Mixed limit theorems for pattern analysis
[AD-A263735] p 3549 N93-29854

THEORETICAL PHYSICS
Studies in theoretical high energy particle physics
[DE93-007990] p 3574 N93-28565
Research in theoretical nuclear physics
[DE93-008380] p 3565 N93-28960
Research in theoretical physics
[DE93-008401] p 3603 N93-28961
JPRS report: Science and technology. Central Eurasia: Physics and mathematics
[JPRS-UPM-93-002] p 3560 N93-29022
A survey of problems in divertor and edge plasma theory
[DE93-007531] p 3586 N93-29056
New Mexico Center for Particle Physics: Studies of fundamental interactions
[DE93-008302] p 3566 N93-29261
Task A: Theory of elementary particles
[DE93-010561] p 3569 N93-29841
Continuation of: Applications of gauge theories to enhance numerical solutions of mixed potential integral equations
[AD-A263763] p 3550 N93-29876
Theoretical studies in nuclear structure
[DE93-012290] p 3570 N93-30505
NATO Advanced Research Workshop on Frontiers of Optical Phenomena in Semiconductor Structure of Reduced Dimension
[AD-A264813] p 3581 N93-30666
Plasma Physics Network Newsletter, no. 5
[DE93-606216] p 3591 N93-30795
Connections between quantized affine algebras and superalgebras
[DE93-606065] p 3551 N93-30810
Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

THERAPY
Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy
[AD-A262483] p 3493 N93-28759
Pharmacokinetics and Pharmacodynamics in Space
[NASA-CP-10048] p 3494 N93-29502

THERMAL ANALYSIS
Thermal and mechanical analysis of flip-chips on a liquid cooled multichip module
[DE93-007609] p 3405 N93-28641
Thermal Analyzer for Planetary Soil (TAPS): An in situ instrument for mineral and volatile-element measurements p 3643 N93-28782
A DTA/GC for the in situ identification of the Martian surface material p 3646 N93-28800
TESLA test cell cryostat support post thermal and structural analysis
[DE93-008365] p 3407 N93-29048
Application of ray tracing in radiation heat transfer
[NASA-TM-106206] p 3419 N93-29075
A generalized approach to the thermal analysis of the Long Duration Exposure Facility's flight experiments
p 3428 N93-29624
Progress report on the ultra heavy cosmic ray experiment (AO178) p 3654 N93-29646
Long Duration Exposure Facility (LDEF) low temperature Heat Pipe Experiment Package (HEPP) flight results
p 3429 N93-29701
Aero-thermal design of a cooled transonic NGV and comparison with experimental results
p 3257 N93-29957
Analysis of thermal bar using boundary-layer integral equations gradients
[MATHS-REPT-A-177] p 3462 N93-30107
Thermal cycler temperature variation and its effect on the polymerase chain reaction
[AD-A264660] p 3337 N93-30541

THERMAL BATTERIES
Ordnance thermal battery
[AD-D015722] p 3412 N93-30201

THERMAL CONDUCTIVITY
The microchannel heatsink with liquid nitrogen cooling
[DE93-009258] p 3422 N93-29300
Semiconductor cooling apparatus
[NASA-CASE-LEW-14162-3] p 3299 N93-29614
Diamond nucleation of surfaces using carbon clusters
[AD-A264634] p 3599 N93-30548
High thermal conductivity of diamond
p 3294 N93-30977

THERMAL CONTROL COATINGS
Thermal certification tests of Orbiter Thermal Protection System tiles coated with KSC coating slurries
[NASA-TM-104766] p 3278 N93-29221
LDEF microenvironments, observed and predicted
p 3283 N93-29623
Next generation optical instruments and space experiment based on the LDEF thermal control surfaces experiment (S0069) p 3583 N93-29706

THERMAL CYCLING TESTS
Ruled and holographic experiment (AO 138-5)
p 3434 N93-29696
Analyses of space environment effects on active fiber optic links orbited aboard the LDEF
p 3583 N93-29699
Thermal cycler temperature variation and its effect on the polymerase chain reaction
[AD-A264660] p 3337 N93-30541

THERMAL DECOMPOSITION
Analysis for thermo-chemical decomposition of composite structures
[NASA-CR-193185] p 3295 N93-28843
Thermal decomposition of nitramines
p 3318 N93-30065
Observation of reaction intermediates in crystalline RDX p 3318 N93-30067
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069
Thermal decomposition pathways of RDX in the condensed phase p 3347 N93-30083
Coordination compounds of aluminum as precursors to aluminum nitride
[AD-A264700] p 3327 N93-30574
Surface chemistry of N2H4 on Si(100)-2x1
[AD-A264819] p 3316 N93-30627

THERMAL DEGRADATION
Energetic material response to abnormal environments p 3350 N93-30095

THERMAL DIFFUSION
Follow up on the crystal growth experiments of the LDEF p 3602 N93-29381
On the ideality of using a step-function current in a metallic foil to simulate a step-function heat-flux source
[AD-A264627] p 3413 N93-30539

THERMAL DIFFUSIVITY
Clementine 2: A double asteroid flyby and impactor mission p 3268 N93-28770
Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model
[NASA-CR-4515] p 3420 N93-29159
On the ideality of using a step-function current in a metallic foil to simulate a step-function heat-flux source
[AD-A264627] p 3413 N93-30539
High thermal conductivity of diamond
p 3294 N93-30977

THERMAL EXPANSION
The design and testing of a high-temperature graphite dilatometer
[AD-A262185] p 3430 N93-28488
Influence of ply waviness on stiffness and strength reduction of composite laminates
[AD-A263224] p 3294 N93-28559
The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886

THERMAL FATIGUE
Mechanics of elevated temperature fatigue damage in fiber-reinforced ceramics
[AD-A262403] p 3329 N93-28495
Overview of piping issues and trends
[DE93-006628] p 3354 N93-28893

THERMAL INSULATION
Advanced insulations for refrigerator/freezers: The potential for new shell designs incorporating polymer barrier construction
[DE93-010600] p 3353 N93-28570
Thermal properties of organic and modified inorganic aerogels
[DE93-009230] p 3311 N93-29263
Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357
Predicted and observed directional dependence of meteoroid/debris impacts on LDEF thermal blankets
p 3638 N93-29358

THERMAL MAPPING
Quantification of thermographic mapping techniques
[AD-A264020] p 3391 N93-30016
Analysis of thermal bar using boundary-layer integral equations gradients
[MATHS-REPT-A-177] p 3462 N93-30107

THERMAL NOISE
A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A263161] p 3406 N93-28940
The flight performance of the Galileo orbiter USO
p 3386 N93-29603

THERMAL PLASMAS
Plasma/particle interaction in subsonic argon/helium thermal plasma jets
[DE93-010808] p 3589 N93-30181

THERMAL PROTECTION
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-55
[NASA-TM-107559] p 3271 N93-29136
Thermal certification tests of Orbiter Thermal Protection System tiles coated with KSC coating slurries
[NASA-TM-104766] p 3278 N93-29221

THERMAL RESISTANCE
Advanced insulations for refrigerator/freezers: The potential for new shell designs incorporating polymer barrier construction
[DE93-010600] p 3353 N93-28570
Biophysical model for handwear insulation testing
[AD-A262926] p 3505 N93-28884
Novel polymer compositions for high-temperature membrane applications, phase 1
[PB93-174126] p 3331 N93-29201
The microchannel heatsink with liquid nitrogen cooling
[DE93-009258] p 3422 N93-29300
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825

THERMAL SHOCK
DOE fundamentals handbook: Material science
[DE93-012225] p 3314 N93-30200

THERMAL STABILITY
Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402
Synthesis and properties of a cation-conducting, high temperature polymer electrolyte
[AD-A263557] p 3334 N93-29825

THERMAL STRESSES
A thermal stress solution for multilayered composite cylinders
[AD-A262579] p 3295 N93-28657
The design and lifetime calculation of MHD generator walls based on subcritical crack growth in ceramics
[ISBN-90-9004009-9] p 3332 N93-29267
Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402

THERMAL VACUUM TESTS
Long Duration Exposure Facility (LDEF) low temperature Heat Pipe Experiment Package (HEPP) flight results
p 3429 N93-29701

THERMIONIC DIODES
Analysis of TOPAZ 2 and SPACE-R space nuclear power plants using a modified thermionic model
[AD-A262612] p 3286 N93-28474

THERMIONIC POWER GENERATION
Analysis of TOPAZ 2 and SPACE-R space nuclear power plants using a modified thermionic model
[AD-A262612] p 3286 N93-28474
Thermion: Verification of a thermionic heat pipe in microgravity p 3235 N93-29757

THERMOCHEMISTRY
Analysis for thermo-chemical decomposition of composite structures
[NASA-CR-193185] p 3295 N93-28843
Thermodynamics of swelling and collapse of polyelectrolytic gels
[ETN-93-93485] p 3331 N93-29064
The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials
p 3343 N93-30063
Thermal oxidation of HCN by NO2 in shock waves
p 3318 N93-30064
Thermal decomposition of nitramines
p 3318 N93-30065
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069

Study of codeposition of aluminum-haffnium and deposition of yttrium by the cementation technique: Elaboration of Ni-Cr-Al and Ni-Cr-Al-Hf felt materials
[ONERA-NT-1990-9] p 3336 N93-30112

THERMOCOUPLES
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325
Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions
p 3253 N93-29933

THERMODYNAMIC EQUILIBRIUM
Radiative interactions in molecular gases under local and nonlocal thermodynamic equilibrium conditions
[NASA-CR-193223] p 3604 N93-29168
Decomposition of hydrogen sulfide for small scale gas processing.
[PB93-174704] p 3316 N93-30658

THERMODYNAMIC PROPERTIES
Thermodynamic properties for polycyclic systems by non-calorimetric methods
[DE93-011373] p 3603 N93-28747
The thermodynamic properties of thianthrene and phenoxathiin
[DE93-000124] p 3603 N93-28964
Thermal properties of organic and modified inorganic aerogels
[DE93-009230] p 3311 N93-29263
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405
Thermodynamic properties of natural gas mixtures
[PB93-162816] p 3604 N93-29428
Advanced NDE technology program
[AD-A262008] p 3449 N93-29443
Tables of experimental data used for the correlation of the thermophysical properties of ethane
[PB93-173417] p 3313 N93-29768
Thermodynamic properties of natural gas mixtures
[PB93-176162] p 3604 N93-29794
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206
Thermodynamic and structural properties of metallic glasses and supercooled liquids
[ISBN-0-315-72443-9] p 3605 N93-30359
Development of an O atom gun
[AD-A264753] p 3570 N93-30558
Effective interactions between concentration fluctuations and charge transfer in chemically ordering liquid alloys
[DE93-606724] p 3327 N93-30778
Knot invariants and cellular automata
[AD-A264199] p 3607 N93-30884
Damage of multi-directionally reinforced ceramic-matrix composites p 3308 N93-30937

THERMODYNAMICS
A one-dimensional continuum model for shape-memory alloys
[AD-A262505] p 3321 N93-28656
Tailored interfaces for metal-matrix composites-fundamental considerations
[AD-A263048] p 3298 N93-29130
Quantum group and symmetry of the heat equation
[DE93-607560] p 3605 N93-30779

THERMOELASTICITY
Influence of ply waviness on stiffness and strength reduction of composite laminates
[AD-A263224] p 3294 N93-28559

THERMOGRAPHY
Quantification of thermographic mapping techniques
[AD-A264020] p 3391 N93-30016
Logarithmic time scale in thermographic Non Destructive Evaluation (NDE) of materials p 3359 N93-30246

THERMOGRAVIMETRY
Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design
[DE93-753270] p 3584 N93-28535

THERMONUCLEAR POWER GENERATION
Structural design of cryostat and port penetration of International Thermonuclear Experimental Reactor (ITER)
[DE93-753267] p 3587 N93-29243

THERMONUCLEAR REACTIONS
Development of high power microwave source
[DE93-753316] p 3436 N93-28980
A study on radiation shielding analysis for toroidal field coils of a tokamak-type fusion reactor
[DE93-753398] p 3585 N93-28981

THERMOPHYSICAL PROPERTIES
Tables of experimental data used for the correlation of the thermophysical properties of ethane
[PB93-173417] p 3313 N93-29768

THERMOPLASTIC RESINS
Effect of water immersion on fiber/matrix adhesion in thermoplastic composites
[AD-A263646] p 3299 N93-29984
Design and manufacturing concepts for thermoplastic structures p 3301 N93-30434
F-15 composite engine access door
p 3302 N93-30442
Structural response of bead-stiffened thermoplastic shear webs p 3308 N93-30873

THERMOPLASTICITY
Influence of ply waviness on stiffness and strength reduction of composite laminates
[AD-A263224] p 3294 N93-28559
Gordon Research Conferences, 1991
[AD-A264275] p 3317 N93-30816
A 69 cent look at thermoplastic softening
p 3292 N93-30963

THERMOSETTING RESINS
Carborane-(silane or siloxane)-unsaturated hydrocarbon based thermosetting polymers
[AD-D015718] p 3338 N93-30580
Carborane-(siloxane or silane)-unsaturated hydrocarbon based polymers
[AD-D015717] p 3338 N93-30586
Performance of thermal adhesives in forced convection p 3293 N93-30974

THERMOSPHERE
Spectral energetics of the lower thermosphere
p 3477 N93-29467

THICK FILMS
Adhesion of thick film Au to alumina ceramics
[DE93-009802] p 3339 N93-30656
Superconducting films of YBaCuO
[DE93-606831] p 3600 N93-30772

THICKNESS
Silicon crystal under bending
[DE93-010522] p 3593 N93-28888
Composite laminate stiffnesses and their sensitivities
[DLR-FB-92-16] p 3296 N93-29007
Superconducting films of YBaCuO
[DE93-606831] p 3600 N93-30772

THIN FILMS
New technologies for UV detectors
p 3582 N93-28786
Growth, characterization and device development in monocrystalline diamond films
[AD-A263204] p 3593 N93-28874
Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002
Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059
Structure and switching dynamics in ferroelectric crystal and liquid crystal thin films
[AD-A263664] p 3594 N93-29293
Investigation of ion beam mixing of iron marker layers in aluminum oxide by RBS
[DE93-010727] p 3594 N93-29314
Proceedings of the 25th European Conference on the Application of Polar Dielectrics to celebrate the 25th anniversary of the Dielectric Society, incorporating the 1st International Workshop on Integrated Ferroelectrics
[AD-A263427] p 3332 N93-29337
Real time self-directed MBE flux control incorporation in situ ellipsometry, phase 1
[AD-A263501] p 3595 N93-29341
Ambient-atmosphere compatible superconducting fullerenes
[AD-A262025] p 3595 N93-29397
Characterization of copper iodide thin films fabricated via laser assisted molecular beam epitaxy
[AD-A262823] p 3596 N93-29430
Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456
Shear sensitive monomer-polymer laminate structure and method of using same
[NASA-CASE-LAR-14654-1-CU] p 3452 N93-29613
Interfacial viscosity measurements of adsorbed monolayers on metal surfaces
[AD-A263288] p 3324 N93-29803
Thermal effects of a coolant film along the suction side of a high pressure turbine nozzle guide vane
p 3253 N93-29930
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934
Materials for adaptive structural acoustic control, volume 2
[AD-A264620] p 3563 N93-30385
RF vacuum microelectronics
[AD-A264528] p 3412 N93-30409
Fundamental studies of the mechanical behavior of microelectronics thin film materials
[AD-A264334] p 3337 N93-30417
Visible light emitting materials and injection devices
[AD-A263499] p 3601 N93-30811
Silicon Film(trademark) photovoltaic manufacturing technology
[DE93-010008] p 3466 N93-30891
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896
Growth model of Au films on Ru(001)
[DE92-642126] p 3602 N93-30998
Role of oxygen vacancies in anodic TiO2 thin films
[DE92-642137] p 3602 N93-31027

THIN WALLS
Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591

THIOLS
Scanning probe lithography. Part 1: Scanning tunneling microscope-induced lithography of self-assembled n-alkanethiol monolayer resists
[AD-A263130] p 3432 N93-29476
Observation of phase-separated nanometer scale molecular domains in mixed self-assembled monolayers
[AD-A263470] p 3569 N93-29839

THREADS
Development of stitching reinforcement for transport wing panels p 3304 N93-30852

THREE BODY PROBLEM
Double swingby at Earth-Moon for increase of excess velocity
[ETN-93-94177] p 3270 N93-30582
A numerical solution of the two-center problem
[DE92-644674] p 3551 N93-30913
Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles
[DE92-644678] p 3535 N93-30914

THREE DIMENSIONAL BOUNDARY LAYER
The development of a mixing layer under the action of weak streamwise vortices
[NASA-TM-106089] p 3418 N93-28947

THREE DIMENSIONAL FLOW
Development of a 3-D Implicit Euler Code for Hypersonic and High Supersonic Flows
[ONERA-RSF-23/1123-AY-230A] p 3417 N93-28744
Numerical simulation of perfect fluid flows around complex 3D configurations by a multidomain solver using the MUSCL approach p 3417 N93-28745
An experimental study of flow over a 6 to 1 prolate spheroid at incidence p 3239 N93-29124
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet
[NASA-TM-106240] p 3252 N93-29162
Nonlinear relaxation algorithms for the compressible Navier-Stokes equations in two and three dimensions
p 3421 N93-29177
Numerical computation of inviscid flow around nose tip of Space Shuttle with NND scheme
[AD-A264012] p 3421 N93-29260
Navier-Stokes analysis of three-dimensional flow and heat transfer inside turbine blade rows
p 3259 N93-29963
Three-dimensional fiber-optic LDV measurements in the endwall region of a linear cascade of controlled-diffusion stator blades
[AD-A263513] p 3424 N93-29968
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162

THREE DIMENSIONAL MODELS
Recognizing parameterized objects from range data
[OUEL-1918/92] p 3523 N93-28486
High performance dispersion model PHYSIC
[DE93-753303] p 3467 N93-28536
Direct volume visualization of three-dimensional vector fields
[DE93-009233] p 3524 N93-28550
Three dimensional reconstruction of complex shapes based on the Delaunay triangulation
[INRIA-RR-1697] p 3547 N93-28616
Three-dimensional numerical simulation of gradual opening in a wave rotor passage
[NASA-CR-191157] p 3252 N93-29072
NASTRAN analysis for the Airmass Sunburst model 'C' Ultralight Aircraft p 3249 N93-29777
Three-dimensional simulation analysis of the standing-wave free-electron laser two-beam accelerator
[DE93-010461] p 3575 N93-29870
Applications of three-dimensional modeling in electromagnetic exploration p 3391 N93-30010
Three-dimensional graphical representation of objects according to movement data in realtime
[ESA-TT-1258] p 3521 N93-30104
Tactile sensing for 3-dimensional shape estimation
p 3357 N93-30232

THREE DIMENSIONAL MOTION
A corner matching and tracking strategy applied to videophony
[OUEL-1933/92] p 3380 N93-28896

Integrals of motion on the group of invariance of an interval in three-dimensional spaces
[DE93-606090] p 3606 N93-30797

THRESHOLD GATES
Fuzzy operators and cyclic behavior in formal neuronal networks p 3519 N93-29576

THRUST
Thrust augmentation system for low-cost-expendable turbojet engine
[AD-A263727] p 3259 N93-30877

THRUST AUGMENTATION
Thrust augmentation system for low-cost-expendable turbojet engine
[AD-A263727] p 3259 N93-30877

THRUST CHAMBERS
Reliability assessment of thrust chamber cooling concepts using probabilistic analysis techniques
[NASA-CR-190785] p 3288 N93-29068

THRUST VECTOR CONTROL
X-31 demonstration of integrated flight and propulsion control for effective combat at extreme angles of attack
p 3260 N93-28851
Requirements for pilot assistance in a thrust-vectoring combat aircraft p 3504 N93-28870
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28
[NASA-TP-3313] p 3239 N93-29160

THUNDERSTORMS
Proceedings of the Thunder and Lighting Seminar and the 3D Lightning Warning Workshop
[AD-A262766] p 3482 N93-29304
Thunderstorm forecast study for Eglin AFB, Florida
[AD-A263423] p 3483 N93-29810
Stand alone lightning detection equipment used at Canadian Forces air bases p 3367 N93-30295

TIDES
Spectral energetics of the lower thermosphere
p 3477 N93-29467

TILES
Thermal certification tests of Orbiter Thermal Protection System tiles coated with KSC coating slurries
[NASA-TM-104766] p 3278 N93-29221

TILT ROTOR AIRCRAFT
Rotorcraft master plan p 3236 N93-30677

TIME
Time-interpolation method for digital beamformers
[AD-D015709] p 3383 N93-29275

TIME CONSTANT
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325

TIME DEPENDENCE
Response of a Nb/Al2O3/Nb tunnel junction to picosecond electrical pulses
[DE93-010416] p 3594 N93-29249
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325
Incorporation of varying types of temporal data in a neural network p 3518 N93-29575
Optimization of HPM device parameters for maximum air transmission
[DE93-007332] p 3386 N93-29765

TIME DIVISION MULTIPLE ACCESS
Comparison of two random access techniques for the North American MSAT system p 3370 N93-30315

TIME DIVISION MULTIPLEXING
Fiber grating-based sensing system with interferometric wavelength-shift detection
[AD-D015697] p 3577 N93-29038
Data Multiplexing Network (DMN) equipment Operational Test and Evaluation (OT&E) integration test report
[AD-A263172] p 3538 N93-29490

TIME FUNCTIONS
Selection and transmission of information. Issue 22: Republic interdepartmental collection (selected articles)
[AD-A262825] p 3615 N93-29431

TIME LAG
Time delay measurements of current primary FAA air/ground transmitters and receivers
[DOT/FAA/CT-TN93/14] p 3379 N93-28555
Time-interpolation method for digital beamformers
[AD-D015709] p 3383 N93-29275

TIME MARCHING
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet
[NASA-TM-106240] p 3252 N93-29162
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934

TIME MEASUREMENT
Large amplitude striations in an RF discharge
[DE93-753244] p 3379 N93-28534
XRONOS: A timing analysis software package. User's guide, version 3.00
[NASA-TM-109222] p 3532 N93-30023

Foreign technology assessment: Environmental evaluation of a radiation-hard oscillator/divider
[DE93-011481] p 3412 N93-30127

TIME OF FLIGHT SPECTROMETERS
A remote laser-mass spectrometer for determination of elemental composition p 3434 N93-28775
A low-cost, lightweight, and miniaturized Time-Of-Flight Mass Spectrometer (TOFMS) p 3434 N93-28817
Detonation mass spectrometry p 3319 N93-30076

TIME OPTIMAL CONTROL
Robust feedforward/feedback control synthesis for uncertain dynamical systems p 3542 N93-29079

TIME SERIES ANALYSIS
Fundamental study of the signal processing by optics
[DE93-776265] p 3577 N93-28982

TIME SIGNALS
Fundamental study of the signal processing by optics
[DE93-776265] p 3577 N93-28982
Distributed traffic signal control using fuzzy logic
p 3513 N93-29543

TIMOSHENKO BEAMS
Vibration localization in rotating shafts
p 3454 N93-30626

TISSUES (BIOLOGY)
Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy
[AD-A262483] p 3493 N93-28759
The chronic effects of jP-8 jet fuel exposure on the lungs
[AD-A264162] p 3495 N93-30153
Theoretical-experimental study of the non-thermal effects of the polarized laser radiation in living tissues
[DE93-607212] p 3441 N93-30775

TITANIUM
Plastic deformation behaviour of oxide dispersion strengthened titanium alloys
[ONERA-NT-1990-6] p 3326 N93-30138

TITANIUM ALLOYS
The temperature dependence of the deformation and oxidation behavior of an age-hardenable beta + alpha-two titanium alloy
[AD-A262232] p 3320 N93-28491
International Conference on Martensitic Transformations (ICOMAT 92)
[AD-A262739] p 3321 N93-28591
Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144
Boron carbide aluminum cermets for external pressure housing applications
[AD-A262749] p 3333 N93-29404
Mechanisms of fracture and creep of structural alloys
[AD-A263108] p 3324 N93-29799
Improvement in ductility of the intermetallic compound Ti3Al
[ESA-TT-1276] p 3325 N93-30105

TITANIUM BORIDES
Explosive consolidation of combustion synthesized TiC and TiB2: Precursor morphology effects
[AD-A263186] p 3341 N93-28515

TITANIUM CARBIDES
Explosive consolidation of combustion synthesized TiC and TiB2: Precursor morphology effects
[AD-A263186] p 3341 N93-28515
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092
Laser gas alloying of titanium materials
[ETN-93-93805] p 3325 N93-30115

TITANIUM COMPOUNDS
Laser gas alloying of titanium materials
[ETN-93-93805] p 3325 N93-30115
Two new titanium pyroarsenates: Alpha-TiAs2O7 and Beta-TiAs2O7
[AD-A264632] p 3599 N93-30518

TITANIUM NITRIDES
Ion-beam-assisted deposition of wear-resistant coatings
[DE93-011529] p 3330 N93-28687
Design of interfaces in metal matrix composites
[AD-A262052] p 3296 N93-29001
Laser gas alloying of titanium materials
[ETN-93-93805] p 3325 N93-30115

TOKAMAK DEVICES
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design
[DE93-753270] p 3584 N93-28535
New remote maintenance approach for TPX
[DE93-007857] p 3584 N93-28583
Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749

Moment approach to fast ion neoclassical transport and viscous forces
[DE93-753305] p 3585 N93-28979
A study on radiation shielding analysis for toroidal field coils of a tokamak-type fusion reactor
[DE93-753398] p 3585 N93-28981
Theory of tokamak edge turbulence: Drift-thermal instability-induced turbulence and ionization-driven drift wave turbulence p 3586 N93-29123
Effects of neutral gas collisions on the power transmission factor at the divertor sheath
[DE93-009320] p 3588 N93-29334
Modeling the D3-D plasma boundary with the LEDGE code
[DE93-009301] p 3588 N93-29772
Bootstrap current profiles and scaling in large aspect ratio tokamaks
[DE93-753158] p 3589 N93-30003
Fundamental studies of fusion plasmas
[DE93-013144] p 3589 N93-30189
Preliminary design study of a steady state tokamak device
[DE93-764162] p 3589 N93-30397
Operation of a 20-channel grating polychromator diagnostic system and its application to sawtooth observations in JT-60U
[DE93-764388] p 3590 N93-30398
Optimization for steady-state and hybrid operations of ITER by using scaling models of divertor heat load
[DE93-764151] p 3590 N93-30649
Plasma Physics Network Newsletter, no. 5
[DE93-606216] p 3591 N93-30795

TOLERANCES (MECHANICS)
Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205
Mechanical behaviour of a closed collar model for an 11.5 T dipole
[NIKHEF-H/92-03] p 3576 N93-30019
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 3447 N93-30567
Developments in impact damage modeling for laminated composite structures p 3305 N93-30857
Progressive failure methodologies for predicting residual strength and life of laminated composites
p 3307 N93-30866

TOMATOES
Final results of space exposed experiment developed for students p 3492 N93-29702

TOMOGRAPHY
Tomographic analysis of line-of-sight infrared spectra of low-pressure flames
[AD-A263185] p 3309 N93-28514
Applications of mesoscopic physics
[DE93-012104] p 3597 N93-30141

TOOLING
Development of an updated pinch-welding capability
[DE93-009823] p 3442 N93-28552

TOPOGRAPHY
Multibeam laser altimeter for planetary topographic mapping p 3442 N93-28780
The German PAF (Processing and Archiving Facilities) for ERS-1 p 3457 N93-28916
Charting the remote southern oceans with geosat altimetry
[AD-A263452] p 3461 N93-29817
ARI: Internal gravity waves at abrupt topography
[AD-A263795] p 3477 N93-29879
Simulation of landscape disturbances and the effect of climatic change
[DE93-011615] p 3472 N93-30131

TOPOLOGY
Topology of hybrid objects
[ETN-93-93594] p 3546 N93-28466
NetStat: A probabilistic network connectivity analysis tool
[AD-A262838] p 3529 N93-29647
Ethernet performance of the Motorola Altair WIN system
[AD-A263877] p 3387 N93-29890

TORNADOES
Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra
[DE93-008734] p 3481 N93-29095
Case study of the operational usefulness of the sharp workstation in forecasting a mesocyclone-induced cold sector tornado event in California
[PB93-178697] p 3485 N93-30889

TOROIDAL PLASMAS
JT-60 Upgrade vertical stability experiments and analysis
[DE93-753131] p 3583 N93-28530
Nonlinear coupling of tearing fluctuations in the Madison Symmetric Torus
[DE93-010131] p 3584 N93-28602

Self-organized profile relaxation by ion temperature gradient instability in toroidal plasmas
[DE93-009580] p 3585 N93-28910

Electron cyclotron heating and current drive in toroidal geometry
[DE93-010400] p 3586 N93-29049

Poloidal field measurements during transient phenomena on MTX: Sawtooth perturbations and the effect of ECH on disruptions
[DE93-010516] p 3587 N93-29303

Bootstrap current profiles and scaling in large aspect ratio tokamaks
[DE93-753158] p 3589 N93-30003

TOROIDS

A 250 mA toroid monitor for the measurement of the bundle current in the stretcher mode of AmPS
[DIGEL-1992-1] p 3413 N93-30835

TORQUE

Study on decreasing torque noise resulting from feedback noise for the modified bang-bang controller
[AD-A263178] p 3407 N93-29010

TORSION

A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

TORSIONAL VIBRATION

Vibration localization in rotating shafts
p 3454 N93-30626

TORSO

Sudden loading and fatigue effects on the human spine
[PB93-167526] p 3493 N93-29199

TOTAL OZONE MAPPING SPECTROMETER

Results from the US/Russian Meteor-3/Total Ozone Mapping Spectrometer
[NASA-TM-104576] p 3467 N93-28682

TOUGHNESS

The effect of temperature on the impact behavior of TiB2 reinforced XDTM-TiAl intermetallic matrix composites
[AD-A262924] p 3296 N93-28886

Transformation plasticity in ductile solids
[DE93-008636] p 3321 N93-28902

Whisker toughening of ceramic materials: A review
[DE93-011565] p 3336 N93-30129

Effects of intra- and inter-laminar resin content on the mechanical properties of toughened composite materials
p 3303 N93-30845

TOWED BODIES

A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578

TOWERS

DSS-14 subreflector actuator dynamics during the Landers earthquake p 3386 N93-29600

Oceanographic research towers in european waters
[AD-A264795] p 3489 N93-30612

TOWING

A complete set of field equations for the dynamic simulation of a towed cable system
[AD-A262570] p 3442 N93-28578

TOXIC HAZARDS

Application of sensors to the control of robotic systems
[DE93-009837] p 3543 N93-30012

An evaluation of factors affecting the solidification/stabilization of heavy metal sludge
[AD-A264128] p 3473 N93-30197

TOXICITY

Development of novel models for describing multiple toxicity effects
[AD-A264439] p 3496 N93-30422

TOXINS AND ANTITOXINS

The AFOSR Workshop on the Future of EEG and MEG
[AD-A264338] p 3495 N93-30160

TRACE CONTAMINANTS

Emission inventories: A global modeling perspective
[DE93-005817] p 3469 N93-28965

Global warming potential for SF6
[DE93-007394] p 3469 N93-28972

Computerized atmospheric trace contaminant control simulation for manned spacecraft
[NASA-TM-108409] p 3505 N93-28977

Case study of Frontal Boundary Study Mission 03
[DE93-007176] p 3473 N93-30183

TRACE ELEMENTS

Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519

Emission inventories: A global modeling perspective
[DE93-005817] p 3469 N93-28965

Global warming potential for SF6
[DE93-007394] p 3469 N93-28972

Instrumental neutron activation analysis developed for silicon integrated circuit technology
[ETN-93-93581] p 3408 N93-29271

Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405

TRACKING (POSITION)

A corner matching and tracking strategy applied to videophony
[OUEL-1933/92] p 3380 N93-28896

An autonomous vision-based mobile robot
p 3443 N93-29082

Interferometric tracking system for the tracking and data relay satellite
[NASA-CR-193274] p 3382 N93-29217

TRACKING PROBLEM

A fuzzy logic optimal control law solution to the CMMCA tracking problem
[AD-A262555] p 3542 N93-29420

Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization
p 3279 N93-29989

Synchronization of the LAPTV adative filter with input statistics p 3358 N93-30242

Control of nonlinear systems with applications to constrained robots and spacecraft attitude stabilization
p 3544 N93-30893

TRACKING STATIONS

Investigation of Mars rotational dynamics using Earth-based radio tracking of Mars landers
p 3642 N93-28777

High-power Ka-band amplifier p 3385 N93-29590

TRACKS

Sensor systems for monitoring Maglev guideway structures
[PB93-154821] p 3444 N93-29205

TRADEOFFS

Concept formulation process aid for trade-off determination: Operator's guide
[AD-A263756] p 3531 N93-29874

TRAFFIC

Distributed traffic signal control using fuzzy logic
p 3513 N93-29543

Ethernet performance of the Motorola Altair WIN system
[AD-A263877] p 3387 N93-29890

Vehicle dynamic stability and rollover
[PB93-185437] p 3447 N93-30828

TRAFFIC CONTROL

Distributed traffic signal control using fuzzy logic
p 3513 N93-29543

TRAILING EDGES

Articulated fin/wing control system
[AD-D015712] p 3259 N93-29278

SIMS chemical analysis of extended impacts on the leading and trailing edges of LDEF experiment AO187-2
p 3318 N93-29367

Projectile compositions and modal frequencies on the chemistry of micrometeoroids LDEF experiment
p 3638 N93-29370

Long-term microparticle flux variability indicated by comparison of Interplanetary Dust Experiment (IDE) timed impacts for LDEF's first year in orbit with impact data for the entire 5.77-year orbital lifetime p 3638 N93-29379

Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375

TRAINING AIRCRAFT

Simulators for corporate pilot training and evaluation
p 3236 N93-30678

TRAINING DEVICES

Concept formulation process aid for trade-off determination: Operator's guide
[AD-A263756] p 3531 N93-29874

Development of a concept formulation process aid for analyzing training requirements and developing training devices
[AD-A263579] p 3261 N93-29972

Review of the effectiveness of video media in instruction
[AD-A264228] p 3392 N93-30362

Virtual reality flight control display with six-degree-of-freedom controller and spherical orientation overlay
[NASA-CASE-NPO-18733-1-CU] p 3251 N93-30416

TRAINING EVALUATION

The air traffic controller's mental model and it's implications for equipment design and trainee selection
p 3372 N93-30322

Helicopter training simulators: Key market factors
p 3237 N93-30683

Training effectiveness assessment: Methodological problems and issues p 3237 N93-30684

Determining the transferability of flight simulator data
p 3237 N93-30685

Progress through precedent: Going where no helicopter simulator has gone before p 3237 N93-30686

Transfer of training and simulator qualification or myth and folklore in helicopter simulation
p 3237 N93-30687

TRAINING SIMULATORS

Radar beam effects for a flight simulator using signal processor based hardware p 3373 N93-30328

NASA/FAA helicopter simulator workshop
[NASA-CP-3156] p 3236 N93-30673

Part 1: Executive summary p 3236 N93-30674

Helicopter simulator standards p 3236 N93-30675

Simulators for corporate pilot training and evaluation
p 3236 N93-30678

TRAJECTORIES

Preliminary design of an intermittent smoke flow visualization system
[NASA-CR-186027] p 3248 N93-28693

An artificial neural network model for periodic trajectory generation p 3356 N93-30225

TRAJECTORY ANALYSIS

Detonation shock dynamics of composite energetic materials p 3350 N93-30096

TRAJECTORY CONTROL

Symbology for head up and head down applications for highly agile fighter aircraft: To improve spatial awareness, trajectory control, and unusual attitude recovery, part 1
p 3502 N93-28857

Exact trajectory determinator for ERS-1
p 3457 N93-28918

A portable modular architecture for robotic manipulator control
[DE93-010819] p 3444 N93-29254

TRAJECTORY MEASUREMENT

Onboard signal processing: Wave of the future for planetary radio science? p 3646 N93-28801

An LDEF 2 dust instrument for discrimination between orbital debris and natural particles in near-Earth space
p 3286 N93-29707

TRAJECTORY OPTIMIZATION

Optimal trajectories for aircraft terrain following and terrain avoidance: A literature review update
[AD-A264075] p 3260 N93-30604

TRAJECTORY PLANNING

An autonomous vision-based mobile robot
p 3443 N93-29082

Planning collision free paths for two cooperating robots using a divide-and-conquer C-space traversal heuristic
[NASA-CR-193252] p 3542 N93-29771

Trajectory generation for dual-arm robots using artificial impedance approach p 3370 N93-30310

Double swingby at Earth-Moon for increase of excess velocity
[ETN-93-94177] p 3270 N93-30582

TRANSCENDENTAL FUNCTIONS

Study on the concurrent calculation with a multitransputer network
[DE93-753191] p 3524 N93-28531

The generic arithmetic of SISYPHE
[INRIA-RT-0136] p 3524 N93-28755

TRANSDUCERS

A microseismometer for terrestrial and extraterrestrial applications p 3434 N93-28765

TRANSFER FUNCTIONS

Advances in the identification of electrochemical transfer function models using Prony analysis
[DE93-009424] p 3550 N93-30041

Control system design and multiparameter variations
p 3355 N93-30217

Realization of high speed adaptive FIR digital filters
p 3355 N93-30222

TRANSFER OF TRAINING

Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396

Transfer of training and simulator qualification or myth and folklore in helicopter simulation
p 3237 N93-30687

TRANSFER ORBITS

Transfer Orbit Plasma Interaction Experiment (TROPIX) p 3267 N93-28734

TRANSFORMATIONS (MATHEMATICS)

The space of spheres, a geometric tool to unify duality results in Voronoi diagrams
[INRIA-RR-1620] p 3547 N93-28512

Polygonal approximation overviews and perspectives
[INRIA-RR-1621] p 3547 N93-28513

Comparison between the performance of two classes of fuzzy controllers p 3517 N93-29566

On probability-possibility transformations
p 3519 N93-29582

Zero-crossing rate of some non-Gaussian processes
p 3360 N93-30254

TRANSFORMERS
Charge to frequency converter for ionization chambers belonging to the radiation protection system of AmPS/MEA
[DIGEL-1991-6] p 3577 N93-30837

TRANSIENT RESPONSE
Transient response of embedded thermocouples
[DE93-009889] p 3431 N93-29325
Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load
[AD-A263496] p 3422 N93-29338
Pulse mitigation and heat transfer enhancement techniques. Volume 4: Transient behavior of heat pipe with thermal energy storage under pulse heat loads
[AD-A263497] p 3423 N93-29339
Transient field computations within or proximity of complex structures: FD-TD approach
p 3366 N93-30292

TRANSISTORS
RF vacuum microelectronics
[AD-A264528] p 3412 N93-30409
Effects of device scaling and geometry on MOS radiation hardness assurance
[DE93-009832] p 3413 N93-30516
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

TRANSITION FLOW
A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method
[DE92-018262] p 3417 N93-28639
Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456
Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934

TRANSITION METALS
Catalytic synthesis of silicon carbide preceramic polymers: Polycarbosilanes
[DE93-008634] p 3329 N93-28541
Supported organometallic complexes, surface chemistry, spectroscopy, and catalysis
[DE93-011930] p 3309 N93-28688
Theoretical hyperfine structure constants for transition metal atoms and ions
[DE93-012325] p 3566 N93-29183
Applications of transition metal compounds in the preparation of useful silicon-containing ceramics
[AD-A264028] p 3335 N93-30028
Organometallic compounds and polymers with second and third order nonlinear optical properties
[AD-A264774] p 3338 N93-30610

TRANSITION POINTS
Materials characterization of cermet anodes tested in a pilot cell
[DE93-008924] p 3323 N93-29101

TRANSITION TEMPERATURE
The Road to Room Temperature Superconductivity Workshop
[AD-A264633] p 3561 N93-30519

TRANSLATING
Transforming AdaPT to Ada9x
[NASA-CR-193117] p 3526 N93-29026

TRANSLATIONAL MOTION
Coarse image motion for saccade control
[OUEL-1916/92] p 3523 N93-28485

TRANSMISSION EFFICIENCY
Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734

TRANSMISSION LINES
Potential transmission and transients during corrosion: Applications to corrosion monitoring
[DE93-010863] p 3323 N93-29256
Planar active antennas and quasi-optical power combining arrays using FET's and slots
[AD-A263759] p 3387 N93-29875

TRANSMITTANCE
An automated observing system for passive evaluation of cloud cover and visibility
[AD-A263207] p 3481 N93-28875

TRANSMITTER RECEIVERS
Hybrid data link
[AD-D015714] p 3383 N93-29280
High-speed, CMOS dual modulus frequency divider for RF frequency synthesis p 3359 N93-30245
Uplink laser propagation measurements through the sea surface, haze and clouds
[AD-A264687] p 3440 N93-30553
A methodology and tool for the prediction of depth of reception in the sea for a VLF/LF communications system p 3397 N93-30741

TRANSMITTERS
Method of emitting on a specific wavelength fraunhofer line using a neodymium doped laser transmitter
[AD-D015710] p 3437 N93-29276
High-power Ka-band amplifier p 3385 N93-29590
Biophysical and biochemical mechanisms in synaptic transmitter release
[AD-A264829] p 3496 N93-30613
Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734
A long wave TE/TM noise prediction model
p 3397 N93-30742

TRANSONIC FLOW
Transonic flows on an oscillating airfoil and their effect on the flutter-boundary
[DLR-FB-92-08] p 3238 N93-29006
A Navier-Stokes solver with different turbulence models applied to film-cooled turbine cascades
p 3258 N93-29962
Computational fluid dynamics research on dynamically adaptive mesh methods for transonic flows
[AD-A264833] p 3428 N93-30630

TRANSONIC FLUTTER
Transonic flows on an oscillating airfoil and their effect on the flutter-boundary
[DLR-FB-92-08] p 3238 N93-29006

TRANSONIC WIND TUNNELS
Performance characteristics of two multiaxis thrust-vectoring nozzles at Mach numbers up to 1.28
[NASA-TP-3313] p 3239 N93-29160

TRANSPLANTATION
Incorporation of varying types of temporal data in a neural network p 3518 N93-29575
Control and circadian behavior by transplanted suprachiasmatic nuclei
[AD-A264553] p 3496 N93-30382

TRANSPONDERS
Acoustic charge transport technology investigation for advanced development transponder
p 3386 N93-29602
Satellite calibration requirements
[AD-A264279] p 3281 N93-30817

TRANSPORT AIRCRAFT
The development of a parachute system for aerial delivery from high speed cargo aircraft
[DE93-008339] p 3239 N93-29035
Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique
[PB93-180263] p 3242 N93-30388
Composites technology for transport primary structure
p 3300 N93-30431
Advanced technology commercial fuselage structure
p 3300 N93-30432
Design, analysis, and fabrication of the technology integration box beam p 3300 N93-30433
Mechanical and analytical screening of braided composites for transport fuselage applications
p 3305 N93-30855
Optimization of composite sandwich cover panels subjected to compressive loadings p 3306 N93-30862
Advanced fiber placement of composite fuselage structures p 3306 N93-30864

TRANSPORT PROPERTIES
Ion motion effects on charged radiators
[DE93-009257] p 3565 N93-29099
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197
High-current negative-ion beam transport
[DE93-010732] p 3575 N93-29809
Studies of fluctuation processes in nuclear collisions
[DE93-011263] p 3576 N93-30054
Effect of planar magnetic field on electron transport properties of n-AlGaAs/GaAs heterojunction and photoluminescence measures in GaAs samples
[DE93-608739] p 3601 N93-30776

TRANSPORT THEORY
Nonlinear dynamics and plasma transport
[DE93-012238] p 3585 N93-28749
The investigation of nonlinear effects on quasiparticle transport in condensed matter systems
[DE93-009582] p 3565 N93-28914
Moment approach to fast ion neoclassical transport and viscous forces
[DE93-753305] p 3585 N93-28979
Modern Monte Carlo particle transport simulation for safety and radiation protection applications in accelerometer technology and in space science
[JUEL-2609] p 3574 N93-29062
Collective transport of alpha particles due to Alfven wave instability
[DE93-009578] p 3587 N93-29148
Modeling the D3-D plasma boundary with the LEDGE code
[DE93-009301] p 3588 N93-29772

TRANSPORTATION
Power generation and transportation systems research department
[PB93-178309] p 3352 N93-30663

TRANSPORTER
Leaky coaxial cable signal transmission for remote facilities
[DE93-007916] p 3383 N93-29348

TRANSPUTERS
Study on the concurrent calculation with a multitranspuler network
[DE93-753191] p 3524 N93-28531
Transputers, parallel processing in embedded systems for image compression in space applications
[NLR-TP-89242-U] p 3522 N93-30840

TRAPPED PARTICLES
The Interstellar Gas Experiment: Analysis in progress
p 3639 N93-29380
LDEF: Dosimetric measurement results (AO 138-7 experiment) p 3573 N93-29635

TRAVELING WAVE TUBES
Novel methods of acceleration
[AD-A264828] p 3590 N93-30600

TRAYS
Scanning electron microscope/energy dispersive x ray analysis of impact residues in LDEF tray clamps
p 3283 N93-29369
Elemental analyses of hypervelocity microparticle impact sites on Interplanetary Dust Experiment sensor surfaces
p 3638 N93-29378

TREES (MATHEMATICS)
Robust and efficient implementation of the Delaunay tree
[INRIA-RR-1619] p 3547 N93-28511
Packing of Steiner trees: Polyhedric studies and application
[ETN-93-93796] p 3547 N93-28527
Generalized octrees for constrained object modeling
p 3369 N93-30304
A robust model for finding optimal evolutionary trees
[DE93-010682] p 3491 N93-30483
Placement of cells: Theory and solution of a quadratic 0/1 optimization problem
[ETN-93-94182] p 3413 N93-30616

TREES (PLANTS)
Predicting the response of a temperate forest ecosystem to atmospheric CO2 increase
[DE93-010081] p 3467 N93-28543

TRELLIS CODING
An error control protocol based on trellis coded modulations p 3358 N93-30237
Signal processor based MSAT trellis coded M-DPSK with adaptive Doppler phasor correction
p 3373 N93-30332
Two-stage Doppler phasor corrected TCM/DMPSK for shadowed mobile satellite channels
p 3373 N93-30333

TREND ANALYSIS
Overview of the DOE Atmospheric Chemistry Program's Ozone Project
[DE93-007416] p 3471 N93-29770

TRENDS
Evaluation of environmental marketing terms in the United States
[PB93-175784] p 3474 N93-30660

TRIANGULATION
Robust and efficient implementation of the Delaunay tree
[INRIA-RR-1619] p 3547 N93-28511
Three dimensional reconstruction of complex shapes based on the Delaunay triangulation
[INRIA-RR-1697] p 3547 N93-28616
Development of a new technique for image reconstruction, enhancement, and visualization
[AD-A263145] p 3528 N93-29483
Multiple image multipoint matching for automatic aerotriangulation p 3461 N93-29615

TRIATOMIC MOLECULES
The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis
[DE93-007537] p 3313 N93-29837
NO2 unimolecular decomposition: Step-like variation of k(sub uni)(E) p 3318 N93-30068

TRIBOLOGY
Effect of metallic-coating properties on the tribology of coated and oil-lubricated ceramics
[DE93-010663] p 3330 N93-28666
Surface modification of tribological components in transportation
[DE93-008647] p 3442 N93-28903
Polarization modulated ellipsometry
[NASA-CR-4012] p 3580 N93-30372

Fundamental studies of friction, lubrication, and wear by atomic force microscopy
[AD-A264647] p 3446 N93-30524
Tribology: Friction, lubrication, and wear technology
p 3292 N93-30965
Walkway friction: Experiment and analysis
p 3293 N93-30966

TRIGGER CIRCUITS
Improving the jitter of the 150 kJ experiments solid dielectric switches
[DE93-009459] p 3405 N93-28597
High-voltage pulse generator capable of 2000 J at 10 kV
[AD-A262034] p 3407 N93-28999

TRIGONOMETRIC FUNCTIONS
Study on the concurrent calculation with a multitransputer network
[DE93-753191] p 3524 N93-28531

TRINITROTOLUENE
Interfacial melting in cracked explosives
p 3349 N93-30089

TRIODES
Upgrading the LAMPF 201 MHz RF generators
[DE93-010715] p 3406 N93-28830

TRITIUM
Exotic atoms
[DE93-010242] p 3564 N93-28611

TROPICAL METEOROLOGY
Ocean aerosol measurements and models in the straits of Florida (The KEY-90 experiment)
[AD-A264777] p 3487 N93-29659

TROPICAL REGIONS
Advanced Earth Observing Satellite (ADEOS)
p 3279 N93-29648
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681
Hydrographic observations in the western tropical and subtropical north Atlantic Ocean: Atlantic Climate Change Program (ACCP) and Western Tropical Atlantic Experiment (WESTRAX) during 1990
[PB93-184760] p 3489 N93-30827
The distribution of the annual and semiannual cycles in the tropics
[DE92-642213] p 3485 N93-31006

TROPICAL STORMS
Rhode Island hurricanes and tropical storms: A fifty-six year summary, 1936-1991
[PB93-162006] p 3481 N93-29198
The sensitivity of ageostrophic circulations to model resolution: A case study using NGM forecasts of ERICA IOP-4
[AD-A262011] p 3482 N93-29393

TROPOPAUSE
Analysis of mass transport and potential vorticity budget in a simulated tropopause folding
[PB93-156792] p 3476 N93-29197

TROPOSPHERE
Distribution of C1-C2 aldehydes in the free troposphere
[JUEL-2650] p 3475 N93-28475
Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519

TRUCKS
Aircraft and refueler bonding and grounding study
[AD-A262027] p 3261 N93-29398

TRUSSES
Description of the Joint Damping Experiment (JDX)
p 3263 N93-28703
CSI-Star: A low-cost CSI orbital testbed
p 3263 N93-28707

TUNABLE LASERS
ND laser with co-doped ion(s) pumped by visible laser diodes
[AD-D015711] p 3437 N93-29277
Tunable CW diode-pumped Tm,Ho:YLiF4 laser operating at or near room temperature
[NASA-CASE-NPO-18611-1-CU] p 3440 N93-30415
Computer control of pulsed tunable dye lasers
[DE93-605896] p 3441 N93-30801

TUNGSTEN ALLOYS
The effect of material strength on segment penetration behavior
[AD-A263262] p 3453 N93-29801
Examination of formability to seamless tubes on Ni-Cr-W superalloy
[DE93-764158] p 3326 N93-30396
Development of Ni-Cr-W superalloys for high temperature components in high temperature gas-cooled reactors, part 2
[DE93-764469] p 3326 N93-30399

TUNING
A composite self tuning strategy for fuzzy control of dynamic systems p 3511 N93-29530
Design issues of a reinforcement-based self-learning fuzzy controller for petrochemical process control
p 3512 N93-29533
Tuning a fuzzy controller using quadratic response surfaces p 3515 N93-29553
A genetic algorithms approach for altering the membership functions in fuzzy logic controllers
p 3518 N93-29573
Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882

TURBIDITY
Loading and testing a light scattering cell with a binary fluid mixture near its critical composition
[NASA-CR-193147] p 3415 N93-28557

TURBINE BLADES
The natural excitation technique (NExT) for modal parameter extraction from operating wind turbines
[DE93-010611] p 3463 N93-28603
Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926
Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929
The influence of non-uniform spanwise inlet temperature on turbine rotor heat transfer p 3253 N93-29932
Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935
The effect of orthogonal-mode rotation on forced convection in a circular-sectioned tube fitted with full circumferential transverse ribs p 3254 N93-29937
Cooling geometry optimization using liquid crystal technique p 3254 N93-29939
Prediction of jet impingement cooling scheme characteristics (airfoil leading edge application)
p 3255 N93-29941
An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels
p 3255 N93-29942
Impingement/effusion cooling p 3257 N93-29954
The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade
p 3258 N93-29958
Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960
Coupling of 3D-Navier-Stokes external flow calculations and internal 3D-heat conduction calculations for cooled turbine blades p 3258 N93-29961
A Navier-Stokes solver with different turbulence models applied to film-cooled turbine cascades
p 3258 N93-29962
Navier-Stokes analysis of three-dimensional flow and heat transfer inside turbine blade rows
p 3259 N93-29963
Optical blade vibration measurement
[ETN-93-93454] p 3259 N93-29999

TURBINE ENGINES
Navier-Stokes analysis of radial turbine rotor performance
[NASA-CR-191153] p 3251 N93-28609
Aero-thermal design of a cooled transonic NGV and comparison with experimental results
p 3257 N93-29957

TURBINE PUMPS
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade
[NASA-TM-106187] p 3420 N93-29157
Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing
[NASA-CR-191036] p 3448 N93-31039

TURBINE WHEELS
Improved silicon nitride for advanced heat engines
[NASA-CR-182193] p 3298 N93-29451

TURBINES
Experimental evaluation of a cooled radial-inflow turbine
[NASA-TM-106230] p 3251 N93-28697
Aerothermic calculations of flows in interdisc cavities of turbines p 3256 N93-29947

TURBOCOMPRESSORS
Flow phenomena in turbomachines
[AD-A263049] p 3420 N93-29141
Improved silicon nitride for advanced heat engines
[NASA-CR-182193] p 3298 N93-29451

TURBOFAN AIRCRAFT
Design of a turbofan powered regional transport aircraft p 3228 N93-29721

TURBOFAN ENGINES
Cooling predictions in turbofan engine components
p 3259 N93-29964

TURBOJET ENGINES
Thrust augmentation system for low-cost-expendable turbojet engine
[AD-A263727] p 3259 N93-30877

TURBOMACHINERY
Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller
[AD-A264057] p 3241 N93-29891
Modelling thermal behaviour of turbomachinery discs and casings p 3256 N93-29949
Some implications of a differential turbomachinery equation with viscous correction
[AD-A264693] p 3427 N93-30571

TURBULENCE
Studies of complexity in fluid systems
[DE93-010776] p 3418 N93-28878
Nonconservative and reverse spectral transfer in Hasegawa-Mima turbulence
[DE93-010132] p 3585 N93-28913
A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161
Chaos in mechanical systems with especial reference to rotorcraft and missiles
[AD-A263703] p 3604 N93-29384
Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927
Measurement of turbulent spots and intermittency modelling at gas-turbine conditions
p 3253 N93-29934
Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935
Heat transfer with moderate free stream turbulence
p 3254 N93-29936
Cooling geometry optimization using liquid crystal technique p 3254 N93-29939
An L2F-measurement device with image rotator prism for flow velocity analysis in rotating coolant channels
p 3255 N93-29942
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
Towards a better hydro for dynamic mix calculations
[DE93-010702] p 3426 N93-30485
Analysis and computation for vortex dynamics and rarefied gases
[AD-A264705] p 3427 N93-30499

TURBULENCE EFFECTS
Large eddy simulations of shockwave passage through turbulence
[DE92-019503] p 3419 N93-29050
Theory of tokamak edge turbulence: Drift-thermal instability-induced turbulence and ionization-driven drift wave turbulence p 3586 N93-29123
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade
[NASA-TM-106187] p 3420 N93-29157

TURBULENCE MODELS
Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model
[NASA-CR-4515] p 3420 N93-29159
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-193241] p 3421 N93-29213
Sensitivity study of cloud/radiation interaction using a second order turbulence radiative-convective model
[DE93-007365] p 3477 N93-29346
Methods for reducing turbulent flow aero-optical distortion
[AD-A263698] p 3423 N93-29353
A Navier-Stokes solver with different turbulence models applied to film-cooled turbine cascades
p 3258 N93-29962
Navier-Stokes analysis of three-dimensional flow and heat transfer inside turbine blade rows
p 3259 N93-29963

TURBULENT BOUNDARY LAYER
The effect of high temperature on wall shear in a two dimensional wall jet
[AD-A262982] p 3423 N93-29426
Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927
Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935
Heat transfer with moderate free stream turbulence
p 3254 N93-29936
Turbulent drag reduction: Studies of feedback control and flow over riblets p 3242 N93-30645

TURBULENT COMBUSTION
Calculations of reactive turbulent flows in aeronautical chambers p 3257 N93-29956

TURBULENT DIFFUSION
Theory of tokamak edge turbulence: Drift-thermal instability-induced turbulence and ionization-driven drift wave turbulence p 3586 N93-29123
Application of Schlieren optical techniques for the measurement of gas temperature and turbulent diffusivity in a diesel engine
[AD-A263810] p 3580 N93-29880

TURBULENT FLOW
The onset of vortex turbulence
[DE93-010424] p 3417 N93-28663

An efficient spectral integration method for the solution of the Navier-Stokes equations
[FFA-TN-1992-28] p 3418 N93-29009
High Reynolds number and turbulence effects on aerodynamics and heat transfer in a turbine cascade
[NASA-TM-106187] p 3420 N93-29157
A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-193241] p 3421 N93-29213
Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer
[DE93-010741] p 3421 N93-29253
Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326
Methods for reducing turbulent flow aero-optical distortion
[AD-A263698] p 3423 N93-29353
The effect of high temperature on wall shear in a two dimensional wall jet
[AD-A262982] p 3423 N93-29426
Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456
Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926
Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927
Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935
Turbulent flow and heat transfer in idealized blade cooling passages p 3254 N93-29938
Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948
Fluid flow and heat transfer in the entrance region of an annulus between independently rotating tubes with a turbulent axial flow p 3256 N93-29952
Calculations of reactive turbulent flows in aeronautical chambers p 3257 N93-29956
Modeling of a turbulent flow in the presence of discrete parietal cooling jets p 3258 N93-29960
Laboratory studies of gravity wave/mean flow interactions
[AD-A264226] p 3478 N93-30174
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
Towards a better hydro for dynamic mix calculations
[DE93-010702] p 3426 N93-30485

TURBULENT HEAT TRANSFER
Turbulent flow and heat transfer in idealized blade cooling passages p 3254 N93-29938
Compressible turbulence in a high-speed high Reynolds number mixing layer p 3242 N93-30583

TURBULENT JETS
A numerical study of confined turbulent jets
[NASA-TM-106197] p 3420 N93-29161

TURBULENT WAKES
Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926
Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions
p 3253 N93-29933

TURING MACHINES
Automated reasoning with function evaluation for COCOLOG
[INRIA-RR-1713] p 3529 N93-29488

TVD SCHEMES
An upwind method for the solution of the 3D Euler and Navier-Stokes equations on adaptively refined meshes
[AD-A262863] p 3423 N93-29472

TWO BODY PROBLEM
A numerical solution of the two-center problem
[DE92-644674] p 3551 N93-30913
General method for reducing the two-body Dirac equation
[DE93-609833] p 3607 N93-30943

TWO DIMENSIONAL FLOW
A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method
[DE92-018262] p 3417 N93-28639
The onset of vortex turbulence
[DE93-010424] p 3417 N93-28663
Numerical computation of inviscid flow around nose tip of Space Shuttle with NND scheme
[AD-A264012] p 3421 N93-29260
Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935
A theoretical and computational study on active wake control p 3243 N93-30892

TWO DIMENSIONAL MODELS
Coarse image motion for saccade control
[OUEL-1916/92] p 3523 N93-28485
A study of the physical mechanisms for filament eruption and coronal mass ejection via numerical simulation
[NASA-CR-193180] p 3653 N93-28935
Remote vehicle survey tool
[DE93-010822] p 3460 N93-29255
Two-dimensional model for current and heat transport in solid-armature railguns
[AD-A262014] p 3271 N93-29394
Modeling the D3-D plasma boundary with the LEDGE code
[DE93-009301] p 3588 N93-29772
Two-parameter crack tip field associated with stable crack growth in a thin plate: A hybrid analysis
[AD-A264221] p 3453 N93-30147

TWO FLUID MODELS
A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126
Studies of fluctuation processes in nuclear collisions
[DE93-011263] p 3576 N93-30054

TWO PHASE FLOW
Preliminary endurance tests of water vaporizers for resistojet applications
[NASA-TM-106222] p 3287 N93-28694
In-STEP Two-Phase Flow (TPF) thermal control experiment p 3265 N93-28719
A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126
Evolution of flow disturbances in cocurrent gas-liquid flows
[DE93-010083] p 3422 N93-29326
Use of a genetic algorithm to solve two-fluid flow problems on an NCUBE multiprocessor computer
[DE93-009630] p 3425 N93-30184
Towards a better hydro for dynamic mix calculations
[DE93-010702] p 3426 N93-30485
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry
[DE93-011734] p 3427 N93-30489
Prediction of gas-liquid two-phase flow regime in microgravity
[NASA-TM-106274] p 3352 N93-30939

U

UH-60A HELICOPTER
Helicopter approach capability using the differential global positioning system
[NASA-CR-193183] p 3245 N93-28936

ULTRAHIGH VACUUM
Undulator Spectromicroscopy Facility at the Advanced Light Source
[DE93-007964] p 3261 N93-28490
A manipulator kinematic design for high-vacuum operation
[DE93-010264] p 3444 N93-29247
Development of an O atom gun
[AD-A264753] p 3570 N93-30558

ULTRALIGHT AIRCRAFT
The Ultra Light Aircraft Testing
[NASA-CR-193043] p 3249 N93-29774
Report on the test set-up for the structural testing of the Airmass Sunburst Ultralight Aircraft
p 3249 N93-29775
Load test set-up for the Airmass Sunburst Ultra-Light Aircraft p 3249 N93-29776
NASTRAN analysis for the Airmass Sunburst model 'C' Ultralight Aircraft p 3249 N93-29777
Construction, wind tunnel testing and data analysis for a 1/5 scale ultra-light wing model p 3243 N93-29778

ULTRASONIC FLAW DETECTION
Diffusion bonding
[DE93-011480] p 3442 N93-28837
Ultrasonic detection and identification of fabrication defects in composites p 3305 N93-30856

ULTRASONIC RADIATION
Constant frequency pulsed phase-locked loop measuring device
[NASA-CASE-LAR-13823-1] p 3431 N93-29084

ULTRASONIC TESTS
Crack length determination by ultrasonic methods
[DE93-008075] p 3450 N93-28567
Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens
[NASA-TM-106219] p 3449 N93-29073

ULTRASONIC WELDING
Performance of thermal adhesives in forced convection p 3293 N93-30974

ULTRAVIOLET ABSORPTION
Development of ultraviolet absorption photometer for atmospheric ozone measurements and results from mid-latitude investigations p 3468 N93-28949

ULTRAVIOLET ASTRONOMY
IUE observations of cataclysmic variable
[NASA-CR-193188] p 3629 N93-28634

ULTRAVIOLET DETECTORS
New technologies for UV detectors
p 3582 N93-28786
A quality monitor and monitoring technique employing optically stimulated electron emission
[NASA-CASE-LAR-15063-1] p 3449 N93-30414

ULTRAVIOLET EMISSION
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
Kinetics and energy transfer in nonequilibrium fluid flows
[AD-A263612] p 3240 N93-29284

ULTRAVIOLET LASERS
Ultraviolet free electron laser facility preliminary design report
[DE93-009360] p 3435 N93-28594
Femtosecond laser studies of excited state dynamics
[AD-A263708] p 3439 N93-29918
Research studies on short wavelength by selective auger processes
[AD-A264493] p 3440 N93-30401

ULTRAVIOLET PHOTOGRAPHY
The Ultraviolet Plume Instrument (UVPI)
p 3285 N93-28784

ULTRAVIOLET PHOTOMETRY
Development of ultraviolet absorption photometer for atmospheric ozone measurements and results from mid-latitude investigations p 3468 N93-28949

ULTRAVIOLET RADIATION
Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
New technologies for UV detectors
p 3582 N93-28786
Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193
An investigation of stereolithography as a means of prototyping from a cad database
[AD-A263410] p 3613 N93-29210
Photobiological investigations on spores of streptomyces griseus
[ESA-TT-1269] p 3491 N93-29274
Kinetics of nitric oxide formation behind 3 to 4 KM/S shock waves
[AD-A263653] p 3312 N93-29389
A quality monitor and monitoring technique employing optically stimulated electron emission
[NASA-CASE-LAR-15063-1] p 3449 N93-30414

ULTRAVIOLET SPECTRA
Optical technologies for UV remote sensing instruments p 3582 N93-28788
Honeywell's compact, wide-angle UV-visible imaging sensor p 3582 N93-28806

ULTRAVIOLET SPECTROMETERS
Optical technologies for UV remote sensing instruments p 3582 N93-28788
Ultraviolet imaging spectrometer p 3582 N93-28827

ULTRAVIOLET SPECTROSCOPY
Measurement of 1s2s(sup 3)S(sub 1)-1s2p(sup 3)P(sub 2,0) intervals in helium-like neon
[DE93-009243] p 3563 N93-28521
Design of a high resolution spatial heterodyne interferometer
[AD-A262867] p 3285 N93-29461

ULTRAVIOLET TELESCOPES
X ray, far, and extreme ultraviolet coatings for space applications p 3340 N93-28829

UNDERGROUND EXPLOSIONS
Modeling regional seismic waves
[AD-A264002] p 3479 N93-30756

UNDERGROUND STORAGE
Tank issues: Design and placement of floating liquid monitoring wells
[PB93-161149] p 3469 N93-29033

UNDERWATER ACOUSTICS
ARSRP signal processing software
[AD-A263543] p 3391 N93-29975
Sound wave scattering from a rigid sphere
[AD-A264182] p 3562 N93-30157

UNDERWATER EXPLOSIONS
Homogeneous gas phase kinetic model with gradient sensitivity analysis for high temperature particulate boron combustion in fluorine enriched environments
p 3319 N93-30090

UNDERWATER VEHICLES

Advanced Unmanned Search System (AUSS) supervisory command, control and navigation [AD-A263171] p 3245 N93-28990

Boron carbide aluminum cermets for external pressure housing applications [AD-A262749] p 3333 N93-29404

The wake software suite: User's guide [AD-A264181] p 3425 N93-30156

Ice-ocean four dimensional structure and dynamics [AD-A264850] p 3490 N93-30906

UNITED STATES

Applied research in America [DE93-011725] p 3625 N93-28646

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 28: The technical communication practices of Russian and US aerospace engineers and scientists [NASA-TM-108249] p 3612 N93-28948

Building alliances to restore coastal environments: A coastal America progress report [PB93-169464] p 3470 N93-29674

The 1992 World Administrative Radio Conference: Technology and Policy Implications [OTA-TCT-549] p 3392 N93-30150

Interagency Advanced Power Group (IAPG) Meeting Compendium [DE93-006189] p 3670 N93-30212

US space commerce, 1991 p 3625 N93-30695

White House/OSTP perspective p 3625 N93-30696

Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts) [PB93-174993] p 3485 N93-30758

UNIVERSE

Dark matter: Theoretical perspectives [DE93-008484] p 3633 N93-28676

Predictions of a non-Gaussian model for large scale structure [DE93-010196] p 3636 N93-30528

Topics in inflationary universe medels and cosmic string theories p 3637 N93-30579

Fourth-rank gravity and cosmology [DE92-644722] p 3637 N93-30918

UNIVERSITIES

ORNL superconducting technology program for electric energy systems [DE93-009588] p 3404 N93-28523

Technology Transfer and the Civil Space Program. Volume 2: Workshop proceedings [NASA-TM-108250] p 3625 N93-30692

The role of the University Licensing Office in transferring intellectual property to industry p 3626 N93-30698

High performance computing and communications program p 3627 N93-30715

A research experiment on facilitation and formation of joint research and development programs between government, industry, and universities: Overview, preliminary findings, and observations p 3628 N93-30725

UNIVERSITY PROGRAM

Natural environmental service support to NASA vehicle, technology, and sensor development programs [NASA-CR-192554] p 3469 N93-29029

Proceedings of the Seventh Annual Summer Conference. NASA/USRA: University Advanced Design Program [NASA-CR-192962] p 3227 N93-29712

High-altitude reconnaissance aircraft p 3227 N93-29713

Project summary p 3227 N93-29714

Project ARES 2: High-altitude battery-powered aircraft p 3227 N93-29715

Conceptual design of a two-stage-to-orbit vehicle p 3228 N93-29716

Preliminary design studies of an advanced general aviation aircraft p 3228 N93-29717

The design of two-stage-to-orbit vehicles p 3228 N93-29719

Design of a turbofan powered regional transport aircraft p 3228 N93-29721

Solar powered multipurpose remotely powered aircraft p 3229 N93-29722

A high-temperature furnace for applications in microgravity p 3229 N93-29723

Advanced design for orbital debris removal in support of solar system exploration p 3229 N93-29724

The 1990/1991 project summaries p 3229 N93-29725

Design, building, and testing of the postlanding systems for the assured crew return vehicle p 3229 N93-29726

Earth to lunar CELSS evolution p 3229 N93-29727

Design of biomass management systems and components for closed loop life support systems p 3230 N93-29728

Lunar lander ground support system p 3230 N93-29729

The 1990-1991 project summaries p 3230 N93-29730

The 1990-1991 project summaries p 3230 N93-29731

Solar energy emplacement developer p 3230 N93-29732

Exercise/recreation facility for a lunar or Mars analog p 3230 N93-29733

Automation of closed environments in space for human comfort and safety p 3230 N93-29734

Project ARES 2: High-altitude battery-powered aircraft p 3227 N93-29715

Project UM-HAUL: A self-unloading reusable lunar lander p 3232 N93-29740

RS Landers: Lunar lander p 3234 N93-29753

UNSTEADY AERODYNAMICS

Transonic flows on an oscillating airfoil and their effect on the flutter-boundary [DLR-FB-92-08] p 3238 N93-29006

Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller [AD-A264057] p 3241 N93-29891

UNSTEADY FLOW

Accelerated motion of rigid spheres in unsteady flows at low to moderate Reynolds numbers p 3416 N93-28612

Analysis of unsteady wave processes in a rotating channel [NASA-CR-191154] p 3251 N93-28617

A grid refinement study of two-dimensional transient flow over a backward-facing step using a spectral-element method [DE92-018262] p 3417 N93-28639

State vector splitting: A numerical scheme for the Euler equations p 3419 N93-29039

Stabilized space-time finite element formulations for unsteady incompressible flows involving fluid-body interactions p 3419 N93-29040

Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077

Flow phenomena in turbomachines [AD-A263049] p 3420 N93-29141

Non-linear wave phenomena in a gas-vapour mixture with phase transition [ETN-93-93582] p 3422 N93-29319

Keynote address: Unsteady, multimode transition in gas turbine engines p 3252 N93-29927

Determination of surface heat transfer and film cooling effectiveness in unsteady wake flow conditions p 3253 N93-29933

Study of flow structure in rotating cavities: Numerical predictions of laminar and turbulent, steady, and unsteady flows p 3256 N93-29948

Simulation, characterization and control of forced unsteady viscous flows using Navier-Stokes equations [AD-A264333] p 3425 N93-30369

Computation of a delta-wing roll-and-hold maneuver [AD-A264704] p 3260 N93-30498

Computational fluid dynamics research on dynamically adaptive mesh methods for transonic flows [AD-A264833] p 3428 N93-30630

A theoretical and computational study on active wake control p 3243 N93-30892

An adaptive Lagrangian method for computing 1-D reacting flows and the theory of Riemann invariant manifolds for the compressible Euler equations p 3428 N93-30902

UPLINKING

Experimental and modal verification of an integral equation solution for a thin-walled dichroic plate with cross-shaped holes p 3385 N93-29591

Adaptive jammer nulling in EHF communications satellites p 3365 N93-30284

Uplink laser propagation measurements through the sea surface, haze and clouds [AD-A264687] p 3440 N93-30553

UPPER ATMOSPHERE RESEARCH SATELLITE (UARS)

Upper atmosphere research satellite jitter study p 3264 N93-28708

UPWIND SCHEMES (MATHEMATICS)

Upwind finite element schemes for solving the Maxwell equations [INRIA-RR-1601] p 3546 N93-28509

URANIUM ALLOYS

Eutectic solidification of Al-U at slowly cooling rates (10 C per second) [DE92-640082] p 3328 N93-30941

USER MANUALS (COMPUTER PROGRAMS)

Concurrent clean language manual, version 0.8 [TR-92-18] p 3522 N93-28482

The concurrent clean system user's manual and PABCstat user's manual, version 0.8 [TR-92-19] p 3523 N93-28484

JPDRAW user's manual, version 3.3 [INRIA-RT-0139] p 3523 N93-28504

Minimum Hamiltonian ascent trajectory evaluation (MASTRE) program (update to automatic flight trajectory design, performance prediction, and vehicle sizing for support of shuttle and shuttle derived vehicles) users manual [NASA-CR-192556] p 3269 N93-28558

Predicting radiation characteristics from antenna physical dimensions [AD-A262462] p 3379 N93-28654

Metal Matrix Laminate Tailoring (MMLT) code: User's manual [NASA-TM-106052] p 3295 N93-28681

Users manual for fault tree analysis code: CUT-TD [DE93-753272] p 3525 N93-28978

Hanford Environmental Information System (HEIS) user's manual, volume 1 [DE93-007465] p 3470 N93-29135

The three-dimensional Multi-Block Advanced Grid Generation System (3DMAGGS) [NASA-TM-108985] p 3420 N93-29155

Concept design example, Computer Aided Structural Modeling (CASM). Scheme A [AD-A264759] p 3529 N93-29657

Concept design example, Computer Aided Structural Modeling (CASM). Scheme B [AD-A264760] p 3529 N93-29658

Data probe user's guide [PB93-178655] p 3530 N93-29678

Concept formulation process aid for trade-off determination: Operator's guide [AD-A263756] p 3531 N93-29874

TRAB: A transient analysis program for BWR. Part 2: User's manual [VTT-TIED-1232-PT-2] p 3575 N93-29996

XRONOS: A timing analysis software package. User's guide, version 3.00 [NASA-TM-109222] p 3532 N93-30023

AHP version 5.1 user's manual [DE93-007050] p 3532 N93-30034

Simplified Linear Equation Solvers: User's manual
[DE93-011975] p 3550 N93-30140
The wake software suite: User's guide
[AD-A264181] p 3425 N93-30156

USER REQUIREMENTS
Minimum Hamiltonian ascent trajectory evaluation (MASTRE) program (update to automatic flight trajectory design, performance prediction, and vehicle sizing for support of shuttle and shuttle derived vehicles) users manual
[NASA-CR-192556] p 3269 N93-28558
Information system for co-registration of CAESAR sea-images based on two dimensional image matching techniques (SCORE). Part 1: Introduction, user requirements, and feasibility tests
[BCRS-90-40A-PT-1] p 3460 N93-29307
Satellite calibration requirements
[AD-A264279] p 3281 N93-30817

V

V GROOVES
Texturing of InP surfaces for device applications
[NASA-TM-106061] p 3321 N93-28618

V-22 AIRCRAFT
Fabrication of the V-22 composite AFT fuselage using automated fiber placement p 3302 N93-30443

V/STOL AIRCRAFT
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

VACANCIES (CRYSTAL DEFECTS)
Fundamental aspects in the design of passive alloys
[DE93-009028] p 3320 N93-28545
Role of oxygen vacancies in anodic TiO2 thin films
[DE92-642137] p 3602 N93-31027

VACUUM
Report on the sintering and properties of MgO and MgO-5 percent TiC
[DE93-008676] p 3323 N93-29092
Photobiological investigations on spores of streptomyces griseus
[ESA-TT-1269] p 3491 N93-29274
Phase structure of three- and four-dimensional phi(exp 4) field theory
[DE93-606069] p 3605 N93-30782
Quantum-kinetic Green function and macroscopic wave function
[DE93-606040] p 3606 N93-30796

VACUUM APPARATUS
Advanced coordinate measuring machine at Sandia National Laboratories
[DE93-010618] p 3432 N93-29842

VACUUM CHAMBERS
Growing wheat to maturity in reduced gas pressures
[NASA-CR-193245] p 3491 N93-29216

VACUUM EFFECTS
Effects of vacuum exposure on stress and spectral shift of high reflective coatings
[DE93-009318] p 3437 N93-29207
New results from FRECOPA analysis
p 3448 N93-29688

VACUUM SYSTEMS
A manipulator kinematic design for high-vacuum operation
[DE93-010264] p 3444 N93-29247

VACUUM TUBES
Field-emitter arrays for RF vacuum microelectronics
[AD-A262677] p 3404 N93-28483

VALVES
Preliminary design of an intermittent smoke flow visualization system
[NASA-CR-186027] p 3248 N93-28693
Valve malfunction detection apparatus
[NASA-CASE-MFS-29904-1] p 3432 N93-29503

VAN DER WAALS FORCES
Quantum dynamics of X2BC van der Waals clusters
[DE93-006416] p 3565 N93-28892

VANADIUM OXIDES
Research and development of lithium secondary batteries for load conditioner use, volume 2
[DE93-781329] p 3410 N93-29673

VAPOR DEPOSITION
Surface modification of tribological components in transportation
[DE93-008647] p 3442 N93-28903
Electrochemical behavior and surface chemistry of aluminum alloys: Solute-rich interphase model
[AD-A262061] p 3322 N93-29002
Flame or plasma synthesis of diamond under turbulent and transition flow conditions
[AD-D015689] p 3333 N93-29456
Development of adherent ceramic coatings to reduce contact stress damage of ceramics
[DE93-012518] p 3336 N93-30182
Coordination compounds of aluminum as precursors to aluminum nitride
[AD-A264700] p 3327 N93-30574
Study on diamond semiconductor
[DE92-531076] p 3413 N93-30622
Visible light emitting materials and injection devices
[AD-A263499] p 3601 N93-30811

VAPOR PHASE EPITAXY
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A263076] p 3382 N93-29131
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A262966] p 3384 N93-29514

VAPOR PHASES
Thermodynamic properties for polycyclic systems by non-calorimetric methods
[DE93-011373] p 3603 N93-28747
The thermochemistry and reaction pathways of the decomposition and combustion of energetic materials
p 3343 N93-30063
Thermal decomposition chemistry and shock sensitivity of thermally aged explosives p 3344 N93-30069
Kinetic studies on gas-phase reaction mechanisms important to the combustion of energetic materials: The CO/N2O reaction p 3347 N93-30084

VAPOR PRESSURE
Complex-compound heat pump: Topical report on phase 1 results
[PB93-185460] p 3466 N93-30814

VAPORIZERS
Preliminary endurance tests of water vaporizers for resistojet applications
[NASA-TM-106222] p 3287 N93-28694
Gravity sensitivity of a resistojet water vaporizer
[NASA-TM-106220] p 3288 N93-29194

VAPORS
A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126
Methods for preparation of mixtures of gases in air at the parts-per-billion to parts-per-million concentration range for calibration of monitors
[DE92-642433] p 3317 N93-30982

VARIABILITY
The Mechanisms of Solar Variability (MSV) program
[AD-A262525] p 3652 N93-28585
Variability of the electric field strength in the earth-ionosphere waveguide due to variations in the electron density profile
[AD-A264808] p 3394 N93-30595

VARIANCE (STATISTICS)
Some statistical inference problems in linear models and variance components models and their applications
[AD-A264062] p 3555 N93-29923

VARIATIONAL PRINCIPLES
Finite element analysis of time-independent superconductivity
[NASA-CR-191140] p 3450 N93-28556

VECTOR ANALYSIS
Using C-vector method to derive the three-dimensional circulation pattern near the East Greenland Polar Front
[AD-A261979] p 3487 N93-29437

VECTOR PROCESSING (COMPUTERS)
Installation of a new Fortran compiler and effective programming method on the vector supercomputer
[DE93-753322] p 3524 N93-28537
NESL: A nested data-parallel language (Version 2.6)
[AD-A263548] p 3530 N93-29822
Multiprocessing MCNP on an IBM RS/6000 cluster
[DE93-008712] p 3540 N93-30633

VECTOR QUANTIZATION
Image segmentation using fuzzy LVQ clustering networks p 3511 N93-29528

VECTOR SPACES
Quantum group generalization of the heterotic QFT
[DE92-644727] p 3607 N93-30920
Normal equivariant forms of vector fields
[DE92-644845] p 3551 N93-30929

VECTORS (MATHEMATICS)
Direct volume visualization of three-dimensional vector fields
[DE93-009233] p 3524 N93-28550
Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988

VEGETATION
Modeling the bidirectional reflectance and spectra
[AD-A263570] p 3462 N93-29830
Environmental Monitoring and Assessment Program. EMAP: Arid Colorado plateau pilot study
[PB93-181618] p 3474 N93-30823

VEGETATION GROWTH
Growing wheat to maturity in reduced gas pressures
[NASA-CR-193245] p 3491 N93-29216

VELOCITY
On the meaning of delta T/T
[DE93-008482] p 3653 N93-28962

VELOCITY DISTRIBUTION
The use of objective prism radial velocities for kinematic studies of galactic populations p 3633 N93-28672
Analyses of data from fine structure and circulation studies in the Gulf of California
[AD-A262910] p 3486 N93-28885
Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra
[DE93-008734] p 3481 N93-29095
A four-field approach towards developing a mechanistic model for multiphase flow
[DE93-006572] p 3420 N93-29126
Enhanced reduction of velocity data obtained during CETA flight experiment
[NASA-TM-4460] p 3431 N93-29209
Continued investigation of LDEF's structural frame and thermal blankets by the Meteoroid and Debris Special Investigation Group p 3282 N93-29357
Hypervelocity impact facility for simulating materials exposure to impact by space debris
p 3283 N93-29365
Asteroidal versus cometary meteoroid impacts on the Long Duration Exposure Facility (LDEF)
p 3638 N93-29371
Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399
The wake software suite: User's guide
[AD-A264181] p 3425 N93-30156

VELOCITY MEASUREMENT
Velocity measurements of low Reynolds number tube flow using fiber-optic technology
[DE93-009865] p 3422 N93-29335
An LDEF 2 dust instrument for discrimination between orbital debris and natural particles in near-Earth space
p 3286 N93-29707
Modelling the dynamics of a large sea area
[DE93-778330] p 3488 N93-30040
Shear, strain, and thermohaline vertical fine structure in the upper ocean p 3488 N93-30046
Turbulence characteristics of an axisymmetric reacting flow
[NASA-CR-4110] p 3242 N93-30373
Multiparticle imaging technique for two-phase fluid flows using pulsed laser speckle velocimetry
[DE93-011734] p 3427 N93-30489
Portable fiber optic coupled Doppler interferometer system for detonation and shock wave diagnostics
[DE93-009827] p 3433 N93-30510

VENTILATION
Study of parameters affecting the performance of solar desiccant cooling systems
[DE93-000088] p 3465 N93-30206

VENTING
Vented Tank Resupply Experiment (VTRE) for In-Space Technology Experiment Program (IN-STEP)
p 3264 N93-28711

VENUS (PLANET)
Venus Interior Structure Mission (VISM): Establishing a seismic network on Venus p 3649 N93-28819

VERTICAL DISTRIBUTION
Shear, strain, and thermohaline vertical fine structure in the upper ocean p 3488 N93-30046

VERTICAL FLIGHT
Rotorcraft master plan p 3236 N93-30677

VERTICAL LANDING
Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft
[NASA-TM-106149] p 3252 N93-29065

VERTICAL MOTION SIMULATORS
Frequency-response techniques for documentation and improvement of rotorcraft simulators
p 3237 N93-30689

VERTICAL TAKEOFF AIRCRAFT
Preliminary development of a VTOL unmanned air vehicle for the close-range mission
[AD-A263514] p 3354 N93-29969

VERY HIGH FREQUENCIES
Widebanding techniques for VHF antennas 2
[AD-A263998] p 3387 N93-29882

VERY LARGE SCALE INTEGRATION
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A263076] p 3382 N93-29131
Handshake circuits: An intermediary between communicating processes and VLSI
[ETN-93-93579] p 3408 N93-29269
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A262966] p 3384 N93-29514

WARP: Weight Associative Rule Processor. A dedicated VLSI fuzzy logic megacell p 3513 N93-29538
Intelligent fuzzy controller for event-driven real time systems p 3515 N93-29551
An architecture for an analog VLSI neural network for early computer vision processing p 3359 N93-30244
Optically powered, optoelectronic spatial light modulators
[AD-A264765] p 3581 N93-30609
Placement of cells: Theory and solution of a quadratic 0/1 optimization problem
[ETN-93-94182] p 3413 N93-30616

VERY LONG BASE INTERFEROMETRY
The German satellite ground station in Antarctica: Realization and first results p 3458 N93-28924
Interferometric tracking system for the tracking and data relay satellite
[NASA-CR-193274] p 3382 N93-29217

VERY LOW FREQUENCIES
Measurement of the relative and absolute microgravity environment of space platforms, recent flight results, and determination of the spatial microgravity field p 3266 N93-28725
Structural load control during construction p 3275 N93-29113
Introduction p 3395 N93-30728
Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729
The cone structure and focusing of the electric field of VLF and LF waves at high altitudes of the ionosphere p 3395 N93-30731
VLF propagation measurements in the Canadian Arctic p 3396 N93-30733
Theoretical and experimental coverage analysis of a VLF transmitter p 3396 N93-30734
Investigations of equatorial ionosphere nighttime mode conversion at VLF p 3396 N93-30735
Transient (approximately equals 10 s) VLF amplitude and phase perturbations due to lightning-induced electron precipitation into the ionosphere (the Trimpi effect) p 3396 N93-30736
Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737
A methodology and tool for the prediction of depth of reception in the sea for a VLF/LF communications system p 3397 N93-30741
ELF/VLF radio noise measurements at high latitudes during solar particle events p 3397 N93-30744
ELF/VLF spectrum measurements p 3398 N93-30745
VLF/LF transmitting antennas p 3398 N93-30747
A dynamic bandwidth and phase linearity measurement technique for 4-channel MSK VLF antenna systems p 3398 N93-30748
Study of a VLF distributed antenna array p 3398 N93-30749
Antenna modeling and analysis for ELF/VLF/LF applications p 3398 N93-30751
Viability assessment for reliable long-wave communication links p 3399 N93-30754
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines p 3399 N93-30755

VESTS
Evaluation of personal cooling systems in conjunction with explosive ordnance disposal suits
[AD-A262862] p 3506 N93-29471

VETERINARY MEDICINE
Fuzzy neural network methodology applied to medical diagnosis p 3498 N93-29546

VIABILITY
Viability assessment for reliable long-wave communication links p 3399 N93-30754

VIBRATION
Measurement of the relative and absolute microgravity environment of space platforms, recent flight results, and determination of the spatial microgravity field p 3266 N93-28725
The photodissociation and reaction dynamics of vibrationally excited molecules
[DE93-010896] p 3565 N93-28879
Sound wave scattering from an elastic spherical shell
[AD-A264039] p 3562 N93-30029
Characterizing transient vibrations using band limited temporal moments
[DE93-009639] p 3453 N93-30185
Improved bounds for synchronization jitter p 3360 N93-30251
Theoretical studies in nuclear structure
[DE93-012290] p 3570 N93-30505

VIBRATION DAMPING
The natural excitation technique (NExT) for modal parameter extraction from operating wind turbines
[DE93-010611] p 3463 N93-28603
NASA instep/MDMSC jitter suppression experiment (JITTER) p 3263 N93-28702
Description of the Joint Damping Experiment (JDX) p 3263 N93-28703
Control-structures interaction test of the LACE satellite p 3263 N93-28706
Upper atmosphere research satellite jitter study p 3264 N93-28708
Results of a round robin test program: Complex modulus properties of a polymeric damping material
[AD-A263619] p 3332 N93-29344
Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410
Vibration control of flexible space structures in noisy environment p 3285 N93-30235
Robust boundary control of flexible structures governed by hybrid dynamics p 3285 N93-30249

VIBRATION EFFECTS
Low-frequency vibration environment for five Shuttle missions
[NASA-TM-106059] p 3285 N93-28554

VIBRATION MEASUREMENT
Low-frequency vibration environment for five Shuttle missions
[NASA-TM-106059] p 3285 N93-28554
Control-structures interaction test of the LACE satellite p 3263 N93-28706
Optical blade vibration measurement
[ETN-93-93454] p 3259 N93-29999

VIBRATION MODE
Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410
Theoretical and experimental investigation of slack cable/mass system dynamics p 3455 N93-31028

VIBRATION TESTS
Testing in combined dynamic environments
[DE93-010679] p 3278 N93-29250
Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410

VIBRATIONAL SPECTRA
Dynamical analysis of highly excited molecular spectra
[DE93-010771] p 3564 N93-28604
Spectroscopic probes of vibrationally excited molecules at chemically significant energies
[DE93-012328] p 3564 N93-28652
Vibrational spectroscopy of shock-compressed fluids p 3318 N93-30072
A novel flame thermometer based on the doppler width of ro-vibrational transitions
[AD-A264515] p 3315 N93-30405
1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568

VIBRATORY LOADS
Vibration control of flexible space structures in noisy environment p 3285 N93-30235

VIDEO COMMUNICATION
A corner matching and tracking strategy applied to videophony
[OUEL-1933/92] p 3380 N93-28896
Review of the effectiveness of video media in instruction
[AD-A264228] p 3392 N93-30362

VIDEO DATA
Systematic processing of Clementine data for scientific analyses p 3624 N93-28803
A fuzzy measure approach to motion frame analysis for scene detection p 3511 N93-29525

VIDEO EQUIPMENT
A passive infrared ice detection technique for helicopter applications
[NASA-CR-193187] p 3244 N93-29152

VIDEO TAPE RECORDERS
Evaluation of D-1 tape and cassette characteristics: Moisture content of Sony and Ampex D-1 tapes when delivered p 3435 N93-30466

VIGNETTING
A tutorial on exit pupils and eye rotation with virtual image optical displays
[AD-A262399] p 3494 N93-29400

VIKING MARS PROGRAM
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

VIRTUAL MEMORY SYSTEMS
Distributed Virtual System (DIVIRS) Project
[NASA-CR-193234] p 3526 N93-29169

VIRTUAL REALITY
Virtual interface applications for airborne weapons systems p 3502 N93-28858
Head mounted displays for virtual reality
[AD-A263498] p 3506 N93-29340
Intelligent virtual reality in the setting of fuzzy sets p 3513 N93-29544
Exercise/recreation facility for a lunar or Mars analog p 3230 N93-29733
Virtual reality flight control display with six-degree-of-freedom controller and spherical orientation overlay
[NASA-CASE-NPO-18733-1-CU] p 3251 N93-30416

VISCOPLASTICITY
Thermoviscoplastic analysis of fibrous periodic composites using triangular subvolumes
[NASA-TM-106076] p 3297 N93-29074
Bounds on internal state variables in viscoplasticity
[NASA-TM-106215] p 3451 N93-29196

VISCOSITY
Macrostatistical hydrodynamics
[DE93-012289] p 3417 N93-28751
Interfacial viscosity measurements of adsorbed monolayers on metal surfaces
[AD-A263288] p 3324 N93-29803
Long discontinuous fiber composite structure: Forming and structural mechanics p 3301 N93-30437

VISCOUS DAMPING
Experimental and analytical investigation of finger-follower cam systems p 3446 N93-30378

VISCOUS FLOW
Accelerated motion of rigid spheres in unsteady flows at low to moderate Reynolds numbers p 3416 N93-28612
Moment approach to fast ion neoclassical transport and viscous forces
[DE93-753305] p 3585 N93-28979
Nonlinear stability of viscous shock waves
[TRITA-NA-9205] p 3419 N93-29025
Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077
The 3-D viscous flow CFD analysis of the propeller effect on an advanced ducted propeller subsonic inlet
[NASA-TM-106240] p 3252 N93-29162
Velocity measurements of low Reynolds number tube flow using fiber-optic technology
[DE93-009865] p 3422 N93-29335
Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405
Simulation, characterization and control of forced unsteady viscous flows using Navier-Stokes equations
[AD-A264333] p 3425 N93-30369
Some implications of a differential turbomachinery equation with viscous correction
[AD-A264693] p 3427 N93-30571

VISIBILITY
An automated observing system for passive evaluation of cloud cover and visibility
[AD-A263207] p 3481 N93-28875

VISIBLE SPECTRUM
Visible imaging on the Pluto fast flyby mission p 3646 N93-28799
Honeywell's compact, wide-angle UV-visible imaging sensor p 3582 N93-28806

VISION
Armstrong Laboratory space visual function tester program p 3267 N93-28739
Effect of microgravity on several visual functions during STS Shuttle missions: Visual Function Tester-Model 1 (VFT-1) p 3268 N93-28740
Effect of microgravity on visual contrast threshold during STS Shuttle missions: Visual Function Tester-Model 2 (VFT-2) p 3268 N93-28741
Effect of microgravity on the visual near point: Visual Function Tester-Model 4 (VFT-4) p 3268 N93-28742
Analysis of visual loss from retinal lesions
[AD-A264692] p 3496 N93-30494
Photoreceptors regulating circadian behavior: A mouse model
[AD-A264881] p 3497 N93-30908

VISORS
Helmet visor support apparatus
[AD-D015684] p 3507 N93-29606

VISUAL ACUITY
Armstrong Laboratory space visual function tester program p 3267 N93-28739
Effect of microgravity on several visual functions during STS Shuttle missions: Visual Function Tester-Model 1 (VFT-1) p 3268 N93-28740

VISUAL AIDS
Review of the effectiveness of video media in instruction
[AD-A264228] p 3392 N93-30362

VISUAL DISCRIMINATION
Studies of the effect of image degradation and recombination on visual perception
[AD-A264332] p 3580 N93-30368

VISUAL FIELDS
Principal components of natural images: An analytical solution
[AD-A264800] p 3489 N93-30603

VISUAL OBSERVATION

Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures [PB93-178598] p 3475 N93-30887

VISUAL PERCEPTION

Effect of microgravity on the visual near point: Visual Function Tester-Model 4 (VFT-4) p 3268 N93-28742

Vision-based control of holonomic robots for 3-dimensional rigid-body positioning using camera-space manipulation p 3578 N93-29178

Head mounted displays for virtual reality [AD-A263498] p 3506 N93-29340

A tutorial on exit pupils and eye rotation with virtual image optical displays [AD-A262399] p 3494 N93-29400

Quantitative analysis of properties and spatial relations of fuzzy image regions p 3510 N93-29523

A comparison of simulated parallax and single-station range aids to navigation [AD-A263460] p 3246 N93-29818

Computing with neural maps: Application to perceptual and cognitive function [AD-A264056] p 3499 N93-30033

Representations of shape in object recognition and long-term visual memory [AD-A264342] p 3499 N93-30163

Studies of the effect of image degradation and recombination on visual perception [AD-A264332] p 3580 N93-30368

Conspicuity of aids to navigation. Part 1: Temporal patterns for flashing lights [AD-A264626] p 3499 N93-30426

Effects of area-of-interest display characteristics of visual search performance and head movements in simulated low-level flight [AD-A264661] p 3499 N93-30542

The dynamics of visual representation, attention, encoding, and retrieval processes [AD-A264674] p 3500 N93-30543

Discomfort glare from high-intensity discharge headlamps: Effects of context and experience [PB93-174720] p 3496 N93-30659

An algorithm for simple and complex feature detection: From retina to primary visual cortex [AD-A264306] p 3497 N93-30897

VISUAL TASKS

Effect of microgravity on visual contrast threshold during STS Shuttle missions: Visual Function Tester-Model 2 (VFT-2) p 3268 N93-28741

Human capabilities and limitations in situation awareness p 3503 N93-28863

Studies of the effect of image degradation and recombination on visual perception [AD-A264332] p 3580 N93-30368

VITERBI DECODERS

A systolic-array structure for MTCM receivers p 3357 N93-30236

A single chip high-speed CMOS Viterbi decoder p 3358 N93-30238

VITON RUBBER (TRADEMARK)

Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1 [NASA-TM-108408] p 3331 N93-29193

VOCODERS

Nonlinear processing of phase vocoded speech p 3355 N93-30219

On subband coding/embedded vector quantization for speech coding p 3355 N93-30220

VOICE COMMUNICATION

Comparison of multiple access techniques for bandwidth limited land-mobile satellite communications p 3370 N93-30314

Constant Average Power Single Sideband (CAPSSB) modulation p 3373 N93-30331

An analysis of en route controller-pilot voice communications [AD-A264784] p 3394 N93-30611

VOICE DATA PROCESSING

Frequency domain speech compression using the Karhunen-Loeve Transform [AD-A262613] p 3379 N93-28476

Nonlinear processing of phase vocoded speech p 3355 N93-30219

On subband coding/embedded vector quantization for speech coding p 3355 N93-30220

VOIDS

Mechanisms of fracture and creep of structural alloys [AD-A263108] p 3324 N93-29799

VOLT-AMPERE CHARACTERISTICS

Growth, characterization and device development in monocrystalline diamond films [AD-A263204] p 3593 N93-28874

Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry [AD-A263098] p 3311 N93-29133

VOLUME

Direct volume visualization of three-dimensional vector fields [DE93-009233] p 3524 N93-28550

VORTEX SHEDDING

Vortex shedding by blunt/bluff bodies at high Reynolds numbers. Volume 4: Rectangles [AD-A264154] p 3241 N93-30151

Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 1: Data analysis [AD-A264151] p 3241 N93-30171

Vortex shedding by Blunt/Bluff bodies at high reynolds numbers. Volume 2: Cylinders, octagon, hexagon [AD-A264152] p 3241 N93-30172

Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 3. Cubes [AD-A264153] p 3242 N93-30173

A theoretical and computational study on active wake control p 3243 N93-30892

VORTEX SHEETS

The development of a mixing layer under the action of weak streamwise vortices [NASA-TM-106089] p 3418 N93-28947

Three-dimensional numerical simulation of gradual opening in a wave rotor passage [NASA-CR-191157] p 3252 N93-29072

The structure and dynamics of the vorticity and passive scalar fields at small scales in homogeneous isotropic turbulence p 3427 N93-30625

VORTEX STREETS

Contribution to the study of the interaction between acoustic waves and coherent structures induced by a prismatic cylinder in a rectangular cavity [ONERA-NT-1990-10] p 3314 N93-30203

VORTICES

The onset of vortex turbulence [DE93-010424] p 3417 N93-28663

Effects of flow-path variations on internal reversing flow in a tailpipe offtake configuration for ASTOVL aircraft [NASA-TM-106149] p 3252 N93-29065

Three-dimensional numerical simulation of gradual opening in a wave rotor passage [NASA-CR-191157] p 3252 N93-29072

Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077

Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model [NASA-CR-4515] p 3420 N93-29159

Experimental study of instability growth patterns of a shock-accelerated, thin fluid layer [DE93-010741] p 3421 N93-29253

Rotational fluid flow experiment p 3235 N93-29761

Unsteady vortex loop/dipole theory applied to the work and acoustics of an ideal low speed propeller [AD-A264057] p 3241 N93-29891

The application of concentric vortex simulation to calculating the aerodynamic characteristics of bodies of revolution at high angles of attack [AD-A263879] p 3241 N93-29919

Vortex structure and mass transfer near the base of a cylinder and a turbine blade p 3253 N93-29929

Three-dimensional fiber-optic LDV measurements in the endwall region of a linear cascade of controlled-diffusion stator blades [AD-A263513] p 3424 N93-29968

Vortex shedding by blunt/bluff bodies at high Reynolds numbers. Volume 4: Rectangles [AD-A264154] p 3241 N93-30151

Numerical modeling and parameterization of gravity wave processes and effects in the atmosphere [AD-A264331] p 3478 N93-30367

Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique [PB93-180255] p 3242 N93-30387

Vortex wake characteristics of B757-200 and B767-200 aircraft using the tower fly-by technique [PB93-180263] p 3242 N93-30388

Analysis and computation for vortex dynamics and rarefied gases [AD-A264705] p 3427 N93-30499

Godunov-type methods for the equations of compressible fluid mechanics [KFK-5058] p 3428 N93-31020

VORTICITY

Analysis of mass transport and potential vorticity budget in a simulated tropopause folding [PB93-156792] p 3476 N93-29197

Using C-vector method to derive the three-dimensional circulation pattern near the East Greenland Polar Front [AD-A261979] p 3487 N93-29437

Hamiltonian dynamics of coupled potential vorticity and internal wave motion: 1. Linear modes [AD-A263469] p 3424 N93-29838

Analysis and computation for vortex dynamics and rarefied gases [AD-A264705] p 3427 N93-30499

Case study of the operational usefulness of the sharp workstation in forecasting a mesocyclone-induced cold sector tornado event in California [PB93-178697] p 3485 N93-30889

VSAT (NETWORK)

Design and construction of a prototype ACTS propagation terminal [NASA-CR-193071] p 3404 N93-28539

System overview on electromagnetic compensation for reflector antenna surface distortion [NASA-TM-106217] p 3273 N93-29195

VULNERABILITY

Crucial role of detailed function, task, timeline, link, and human vulnerability analyses in HRA [DE93-001923] p 3505 N93-28942

W

WAFERS

Infrared rugates by molecular beam epitaxy p 3582 N93-28808

Silicon Film(trademark) photovoltaic manufacturing technology [DE93-010008] p 3466 N93-30891

WAKES

The wake software suite: User's guide [AD-A264181] p 3425 N93-30156

A theoretical and computational study on active wake control p 3243 N93-30892

WALKING

Walking robot: A design project for undergraduate students p 3231 N93-29737

Walkway friction: Experiment and analysis p 3293 N93-30966

WALL FLOW

Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model [NASA-CR-4515] p 3420 N93-29159

The effect of high temperature on wall shear in a two dimensional wall jet [AD-A262982] p 3423 N93-29426

Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931

WALL JETS

The effect of high temperature on wall shear in a two dimensional wall jet [AD-A262982] p 3423 N93-29426

Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935

WALL TEMPERATURE

Supersonic flow calculation using a Reynolds-stress and an eddy thermal diffusivity turbulence model [NASA-CR-4515] p 3420 N93-29159

WALLS

Direct numerical simulations of unsteady separated flows using vortex methods p 3419 N93-29077

The design and lifetime calculation of MHD generator walls based on subcritical crack growth in ceramics [ISBN-90-9004009-9] p 3332 N93-29267

Experimental study of heat transfer close to a plane wall heated in the presence of multiple injections (subsonic flow) p 3253 N93-29931

Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484

WARFARE

The environment as an operational center of gravity [AD-A264170] p 3472 N93-30154

WARHEADS

A continuum code investigation of stress integration using exact and approximate material rotation [DE93-001892] p 3454 N93-31013

WARNING SYSTEMS

Results of DATAS investigation of ATCRBS environment at the Los Angeles International Airport [DOT/FAA/CT-93/6] p 3245 N93-28625

Proceedings of the Thunder and Lighting Seminar and the 3D Lightning Warning Workshop [AD-A262766] p 3482 N93-29304

Valve malfunction detection apparatus [NASA-CASE-MFS-29904-1] p 3432 N93-29503

Future directions in aviation security p 3244 N93-30274

Explosives detection systems for airport security gas chromatographic based devices p 3244 N93-30276

Stand alone lightning detection equipment used at Canadian Forces air bases p 3367 N93-30295

Rocket-triggered lightning studies for the protection of critical assets [DE93-009633] p 3484 N93-30651

WASTE DISPOSAL
Super critical water oxidation on energetic materials [DE93-010704] p 3342 N93-29312
An architecture for robotic system integration [DE93-010829] p 3444 N93-29316
Strategic Environmental Research and Development Program (SERDP) [AD-A263745] p 3471 N93-29858
Graphical programming: On-line robot simulation for telerobotic control [DE93-009796] p 3447 N93-30654
WASTE TREATMENT
Technical bases for precipitate hydrolysis process operating parameters, revision 1 [DE93-009894] p 3309 N93-28553
Hydrogen and sulfur production from hydrogen sulfide wastes [DE93-008658] p 3310 N93-29052
Super critical water oxidation on energetic materials [DE93-010704] p 3342 N93-29312
Strategic Environmental Research and Development Program (SERDP) [AD-A263745] p 3471 N93-29858
An evaluation of factors affecting the solidification/stabilization of heavy metal sludge [AD-A264128] p 3473 N93-30197
Environmental characteristics of EPA, NRC, and DOE sites contaminated with radioactive substances [PB93-185551] p 3475 N93-30829
Statement on the United Nations Conference on Environment and Development [DE93-601878] p 3475 N93-30996
WATER
Preliminary endurance tests of water vaporizers for resistojet applications [NASA-TM-106222] p 3287 N93-28694
High octane ethers from synthesis gas-derived alcohols [DE93-012470] p 3341 N93-28752
Ultra-high resolution water window x ray microscope optics design and analysis [NASA-CR-193225] p 3578 N93-29128
Super critical water oxidation on energetic materials [DE93-010704] p 3342 N93-29312
Fast multipole method in simulations of aqueous systems [AD-A263422] p 3567 N93-29336
Electron interactions with non-linear polyatomic molecules and their radicals and ions [AD-A262279] p 3568 N93-29446
Diffusion coefficients and heats of mixing in aqueous alkanolamines [PB93-176212] p 3316 N93-30661
WATER CIRCULATION
IOC-UNEP review meeting on oceanographic processes of transport and distribution of pollutants in the sea [DE93-605070] p 3490 N93-31019
WATER COLOR
SeaWiFS technical report series. Volume 2: Analysis of orbit selection for SeaWiFS: Ascending versus descending node [NASA-TM-104566-VOL-2] p 3486 N93-28497
WATER CONSUMPTION
Growing wheat to maturity in reduced gas pressures [NASA-CR-193245] p 3491 N93-29216
WATER COOLED REACTORS
TRAB: A transient analysis program for BWR. Part 2: User's manual [VTT-TIED-1232-PT-2] p 3575 N93-29996
WATER IMMERSION
Effect of water immersion on fiber/matrix adhesion in thermoplastic composites [AD-A263646] p 3299 N93-29984
WATER LANDING
Design, building, and testing of the postlanding systems for the assured crew return vehicle p 3229 N93-29726
WATER MANAGEMENT
Modelling the dynamics of a large sea area [DE93-778330] p 3488 N93-30040
Guide to Federal Water Quality Programs and Information: A Guide with Computer Software Developed by the Interagency Working Group on Water Quality [PB93-186245] p 3475 N93-30834
WATER POLLUTION
Tank issues: Site characterization for external leak monitoring [PB93-161156] p 3469 N93-29034
Annual report on monitoring of the unsaturated zone and recharge areas at INEL to the state of Idaho INLEL oversight committee [DE93-012947] p 3473 N93-30187
Development of novel models for describing multiple toxicity effects [AD-A264439] p 3496 N93-30422
Performance and cost evaluation of bioremediation techniques for fuel spills [PB93-175545] p 3474 N93-30762
Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky [PB93-182244] p 3474 N93-30825
Hydrogeology and ground-water-quality conditions at the Reno County Landfill, South-Central Kansas, 1990-1991 [PB93-183085] p 3474 N93-30826
Guide to Federal Water Quality Programs and Information: A Guide with Computer Software Developed by the Interagency Working Group on Water Quality [PB93-186245] p 3475 N93-30834
IOC-UNEP review meeting on oceanographic processes of transport and distribution of pollutants in the sea [DE93-605070] p 3490 N93-31019
WATER QUALITY
Modelling the dynamics of a large sea area [DE93-778330] p 3488 N93-30040
Remote sensing for water quality monitoring in the Tennessee Valley: Field tests of two systems [DE93-008997] p 3462 N93-30637
Contamination of soil, soil gas, and ground water by hydrocarbon compounds near Greear, Morgan County, Kentucky [PB93-182244] p 3474 N93-30825
Guide to Federal Water Quality Programs and Information: A Guide with Computer Software Developed by the Interagency Working Group on Water Quality [PB93-186245] p 3475 N93-30834
WATER RESOURCES
Office of Water Environmental and Program Information Systems Compendium, FY 1992 [PB93-186203] p 3462 N93-30833
Guide to Federal Water Quality Programs and Information: A Guide with Computer Software Developed by the Interagency Working Group on Water Quality [PB93-186245] p 3475 N93-30834
WATER SPLITTING
Electrolysis performance improvement and validation experiment p 3267 N93-28737
WATER TABLES
Tank issues: Design and placement of floating liquid monitoring wells [PB93-161149] p 3469 N93-29033
Tank issues: Site characterization for external leak monitoring [PB93-161156] p 3469 N93-29034
Performance and cost evaluation of bioremediation techniques for fuel spills [PB93-175545] p 3474 N93-30762
WATER TEMPERATURE
Hydrographic observations in the western tropical and subtropical north Atlantic Ocean: Atlantic Climate Change Program (ACCP) and Western Tropical Atlantic Experiment (WESTRAX) during 1990 [PB93-184760] p 3489 N93-30827
WATER TREATMENT
DOE fundamentals handbook: Chemistry [DE93-012222] p 3314 N93-30198
WATER VAPOR
Measurements of breakaway reaction between beryllium and water vapor for ITER blanket design [DE93-753270] p 3584 N93-28535
Gravity sensitivity of a resistojet water vaporizer [NASA-TM-106220] p 3288 N93-29194
Prognostic cloud water in the Los Alamos general circulation model [DE93-007381] p 3482 N93-29347
WATER WAVES
Optical measurements of ripples using a scanning laser slope gauge. Part 1: Instrumentation and preliminary results [AD-A261939] p 3486 N93-28996
Ocean waves in SAMSON/SWADE [AD-A263681] p 3487 N93-29295
Dynamics of small-scale oceanic motions [AD-A263582] p 3488 N93-29914
The IUTAM Symposium on Breaking Waves [AD-A264196] p 3489 N93-30143
WATERSHEDS
A diffusion approximation for a network of reservoirs with power law release rule [AD-A263753] p 3550 N93-29872
WAVE DISPERSION
Borel sum rules for octet baryons in nuclear medium [DE93-753245] p 3604 N93-29242
WAVE EQUATIONS
Sound wave scattering from an elastic spherical shell [AD-A264039] p 3562 N93-30029
Sound wave scattering from a rigid sphere [AD-A264182] p 3562 N93-30157
WAVE FUNCTIONS
Wavelet transform techniques and signal analysis [DE93-007919] p 3382 N93-29244
The global potential energy surfaces of the lowest two 1A-prime states of the ozone molecule: Theoretical determination and analysis [DE93-007537] p 3313 N93-29837
Quantum-kinetic Green function and macroscopic wave function [DE93-606040] p 3606 N93-30796
A possibility to investigate the superconducting gap with the help of neutrons [DE93-606392] p 3601 N93-30799
The ground state wavefunctions of a conformally invariant scalar field in different spacetime background [DE93-606063] p 3606 N93-30808
Algorithm for the solution of the Faddeev equation for a system of three identical spinless particles [DE92-644678] p 3535 N93-30914
Algorithm of numerical calculations of differential Yakubovsky equations for the (1 + 3) scattering problem [DE92-644679] p 3535 N93-30915
Schroedinger equations of higher (greater than 2) order [DE92-644677] p 3552 N93-30984
WAVE INTERACTION
Laboratory studies of gravity wave/mean flow interactions [AD-A264226] p 3478 N93-30174
An adaptive Lagrangian method for computing 1-D reacting flows and the theory of Riemann invariant manifolds for the compressible Euler equations p 3428 N93-30902
WAVE PACKETS
Quantum dynamics of X2BC van der Waals clusters [DE93-006416] p 3565 N93-28892
WAVE PROPAGATION
Observation of a beam energy shift caused by a plasma wakefield [DE93-753243] p 3583 N93-28533
Three-dimensional numerical simulation of gradual opening in a wave rotor passage [NASA-CR-191157] p 3252 N93-29072
Ocean waves in SAMSON/SWADE [AD-A263681] p 3487 N93-29295
Mitigation of shock waves in a cylindrical tunnel by foam [AD-A262491] p 3423 N93-29419
Optimization of HPM device parameters for maximum air transmission [DE93-007332] p 3386 N93-29765
Determination of the space charge distribution within an e-irradiated polymer using the pressure wave propagation method [ONERA-P-1990-4] p 3335 N93-30024
Applications of mesoscopic physics [DE93-012104] p 3597 N93-30141
Propagation channel modeling for angle-diversity combining simulation p 3360 N93-30252
ELF/VLF/LF Radio Propagation and Systems Aspects [AGARD-CP-529] p 3394 N93-30727
ELF propagation highlights p 3395 N93-30730
VLF/LF propagation measurements p 3395 N93-30732
VLF propagation measurements in the Canadian Arctic p 3396 N93-30733
Investigations of equatorial ionosphere nighttime mode conversion at VLF p 3396 N93-30735
Lightning-induced effects on VLF/LF radio propagation p 3396 N93-30737
Comparative study of undersea fields produced by various dipoles p 3397 N93-30740
A methodology and tool for the prediction of depth of reception in the sea for a VLF/LF communications system p 3397 N93-30741
Numerical wave propagation and steady-state solutions p 3428 N93-30999
WAVE REFLECTION
Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484
WAVE SCATTERING
The wave, the cylinder, and the plate [DE93-009458] p 3450 N93-28596
Sound wave scattering from an elastic spherical shell [AD-A264039] p 3562 N93-30029
Sound wave scattering from a rigid sphere [AD-A264182] p 3562 N93-30157
Errors when shock waves interact due to numerical shock width [DE93-010699] p 3426 N93-30484
WAVEFORMS
Modeling earthquakes with local and regional broadband data p 3478 N93-30005
The use of DFT windows in signal-to-noise ratio and harmonic distortion computations [DE93-009800] p 3433 N93-30655

Modeling regional seismic waves [AD-A264002] p 3479 N93-30756

WAVEGUIDES

A dual polarized broadband multifrequency Earth station feed p 3371 N93-30319

Numerical modeling of the propagation medium at VLF/LF p 3395 N93-30729

Modification of the S-band phase shifter model 331A-3 of Electromagnetic Sciences Inc. [DIGEL-1992-5] p 3399 N93-30836

WAVELENGTH DIVISION MULTIPLEXING

Wavelength-division multiplexed optical integrated circuit with vertical diffraction grating [NASA-CASE-NPO-18357-1-CU] p 3579 N93-29848

WAVERIDERS

The HSCT mission analysis of waverider designs [NASA-CR-193467] p 3243 N93-31037

WEAK INTERACTIONS (FIELD THEORY)

Measurement of W-Z interference from neutrino-electron scattering [DE93-010724] p 3566 N93-29313

Neutrino mass [DE93-010735] p 3566 N93-29315

Unitary approximation of Bhabha diffusion by high energies and its implementation in Monte Carlo event generators [ETN-93-93622] p 3571 N93-30670

Parton's picture of the electroweak processes in high energy e(+)e(-)-collisions [DE93-606107] p 3571 N93-30788

Massive Majorana neutrinos in pre-bounce supernovae [DE92-642597] p 3572 N93-30931

WEAPON SYSTEMS

NPB cesium space experiment p 3267 N93-28733

Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies [AGARD-CP-520] p 3501 N93-28850

Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing p 3501 N93-28853

Virtual interface applications for airborne weapons systems p 3502 N93-28858

Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method [AD-A263997] p 3439 N93-29867

WEAPONS DELIVERY

Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing p 3501 N93-28853

WEAR

Preliminary experimental results for a cryogenic brush seal configuration [NASA-TM-106236] p 3416 N93-28627

Fundamental studies of friction, lubrication, and wear by atomic force microscopy [AD-A264647] p 3446 N93-30524

Tribology: Friction, lubrication, and wear technology p 3292 N93-30965

WEAR RESISTANCE

Effect of metallic-coating properties on the tribology of coated and oil-lubricated ceramics [DE93-010663] p 3330 N93-28666

Ion-beam-assisted deposition of wear-resistant coatings [DE93-011529] p 3330 N93-28687

Surface modification of tribological components in transportation [DE93-008647] p 3442 N93-28903

WEAR TESTS

Ion-beam-assisted deposition of wear-resistant coatings [DE93-011529] p 3330 N93-28687

WEATHER

An automated observing system for passive evaluation of cloud cover and visibility [AD-A263207] p 3481 N93-28875

Contributions to the American Meteorological Society's 26th International Conference on Radar Meteorology [AD-A263385] p 3481 N93-29257

Cloudiest year study: An analysis of the 3DNEPH and RTNEPH databases [AD-A263409] p 3483 N93-29967

Air weather service master station catalog USAFETAC climatic database users handbook no. 6 [AD-A264761] p 3484 N93-30608

WEATHER FORECASTING

High performance dispersion model PHYSIC [DE93-753303] p 3467 N93-28536

Leadex data report. Part 1: Weather analysis and satellite images [AD-A263217] p 3481 N93-28876

Proceedings of the Thunder and Lighting Seminar and the 3D Lightning Warning Workshop [AD-A262766] p 3482 N93-29304

Leadex data report. Part 2: Rawinsonde and ice station data [AD-A263218] p 3483 N93-29491

The 17th Annual Climate Diagnostics Workshop [PB93-183895] p 3483 N93-29664

Systems description of MIVOS (mist forecast system), part 1 [KNMI-TR-141-PT-1] p 3483 N93-30013

Daily sum of the global radiation: Calculation method and verification of forecast [KNMI-TR-138] p 3478 N93-30113

Stand alone lightning detection equipment used at Canadian Forces air bases p 3367 N93-30295

STRATUS: A prototype expert advisory system for terminal weather forecasting p 3367 N93-30296

Case study of the operational usefulness of the sharp workstation in forecasting a mesocyclone-induced cold sector tornado event in California [PB93-178697] p 3485 N93-30889

Aircraft guidance for wind shear avoidance: Decision-making under uncertainty p 3246 N93-31005

Shuttle landing facility cloud cover study: Climatological analysis and two tenths cloud cover rule evaluation [NASA-CR-193016] p 3272 N93-31033

WEATHER STATIONS

An automated observing system for passive evaluation of cloud cover and visibility [AD-A263207] p 3481 N93-28875

WEAVING

Method and apparatus for weaving a woven angle ply fabric [NASA-CASE-LAR-14048-1] p 3354 N93-29611

Powder towpreg process development p 3303 N93-30844

Characterization of multiaxial warp knit composites p 3304 N93-30851

Advanced fiber/matrix material systems p 3305 N93-30854

Mechanical and analytical screening of braided composites for transport fuselage applications p 3305 N93-30855

WEBBING

Structural response of bead-stiffened thermoplastic shear webs p 3308 N93-30873

WEBER-FECHNER LAW

Detecting residue on a printed circuit board: An application of the Boundary Contour/Feature Contour System [DE93-006283] p 3412 N93-30370

WEIBULL DENSITY FUNCTIONS

Modified goodness-of-fit tests for the Weibull distribution [AD-A262552] p 3553 N93-28574

A new goodness-of-fit test for the Weibull distribution based on spacings [AD-A262615] p 3553 N93-28587

WEIGHT REDUCTION

Advanced composite structural concepts and material technologies for primary aircraft structures p 3300 N93-30430

Composites technology for transport primary structure p 3300 N93-30431

Advanced technology commercial fuselage structure p 3300 N93-30432

Cost studies for commercial fuselage crown designs p 3302 N93-30440

WEIGHTING FUNCTIONS

Parameter identification of time-varying systems using neural networks p 3356 N93-30226

WEIGHTLESSNESS

Pharmacokinetics and Pharmacodynamics in Space [NASA-CP-10048] p 3494 N93-29502

The middeck 0-gravity dynamics experiment [NASA-CR-4500] p 3281 N93-30376

Effects of buoyancy on gas jet diffusion flames [NASA-CR-191109] p 3352 N93-31031

WELDED JOINTS

Preliminary test of liquid metal induced embrittlement in liquid LiPb and stainless-steel systems [DE93-753130] p 3320 N93-28529

Development of an updated pinch-welding capability [DE93-009823] p 3442 N93-28552

A review of hot cracking in austenitic stainless steel weldments [DE93-605280] p 3328 N93-31021

WELDED STRUCTURES

Visualizing weld metal solidification using organic analogs p 3293 N93-30973

WELDING

Development of an updated pinch-welding capability [DE93-009823] p 3442 N93-28552

JPRS report: Science and technology. Central Eurasia: Materials science [JPRS-UMS-92-015] p 3322 N93-29020

Visualizing weld metal solidification using organic analogs p 3293 N93-30973

WELLS

Tank issues: Design and placement of floating liquid monitoring wells [PB93-161149] p 3469 N93-29033

Tank issues: Site characterization for external leak monitoring [PB93-161156] p 3469 N93-29034

Hydrogeology and ground-water-quality conditions at the Reno County Landfill, South-Central Kansas, 1990-1991 [PB93-183085] p 3474 N93-30826

WETTABILITY

Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling [AD-A264174] p 3425 N93-30155

WETTING

Pulse mitigation and heat transfer enhancement techniques. Volume 2: Effect of surface wettability and roughness in evaporative spray cooling [AD-A264174] p 3425 N93-30155

Wetting and dispersion in ceramic/polymer melt injection molding systems [DE93-013240] p 3338 N93-30601

WHEAT

Growing wheat to maturity in reduced gas pressures [NASA-CR-193245] p 3491 N93-29216

WHEELCHAIRS

Platform stair lift [NASA-CASE-MFS-28772-1] p 3507 N93-29845

WHISKER COMPOSITES

Improved silicon nitride for advanced heat engines [NASA-CR-182193] p 3298 N93-29451

Whisker toughening of ceramic materials: A review [DE93-011565] p 3336 N93-30129

WHITE DWARF STARS

The heating and cooling of WZ Sge [DE93-008720] p 3634 N93-28908

WHITE NOISE

The HYDICE instrument design and its application to planetary instruments p 3434 N93-28766

WICKS

Heat pipe performance experiment p 3265 N93-28722

Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load [AD-A263496] p 3422 N93-29338

Pulse mitigation and heat transfer enhancement techniques. Volume 5: Transient liquid movement in heat pipe wicks [AD-A264513] p 3426 N93-30403

WIENER FILTERING

Examinations of perturbation reduction by automatic speech dependent recognition of separately spoken single words [ETN-93-94180] p 3394 N93-30672

WIGGLER MAGNETS

Undulator Spectromicroscopy Facility at the Advanced Light Source [DE93-007964] p 3261 N93-28490

Magnetic field measurements of the CEBAF (NIST) wiggler using the pulsed wire method [AD-A263997] p 3439 N93-29867

WIND (METEOROLOGY)

Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes [AD-A262051] p 3482 N93-29399

WIND DIRECTION

Rugged, no-moving-parts windspeed and static pressure probe designs for measurements in planetary atmospheres p 3434 N93-28767

Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes [AD-A262051] p 3482 N93-29399

WIND EFFECTS

Digital image processing of descanned terrestrial ground photographs p 3459 N93-28928

WIND MEASUREMENT

Rugged, no-moving-parts windspeed and static pressure probe designs for measurements in planetary atmospheres p 3434 N93-28767

Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra [DE93-008734] p 3481 N93-29095

Wind measurement accuracy of a loran radiosonde [AD-A263572] p 3483 N93-29832

Atmospheric studies with SODAR at Kalpakkam [DE93-605544] p 3480 N93-30992

The distribution of the annual and semiannual cycles in the tropics
[DE92-642213] p 3485 N93-31006

WIND PRESSURE

Wind loads on canopy roofs
[RR-CE132] p 3451 N93-29106

WIND PROFILES

Case study of the operational usefulness of the sharp workstation in forecasting a mesocyclone-induced cold sector tornado event in California
[PB93-178697] p 3485 N93-30889

WIND SHEAR

Aircraft guidance for wind shear avoidance: Decision-making under uncertainty p 3246 N93-31005

WIND TUNNEL MODELS

Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410

WIND TUNNEL TESTS

International aviation (Selected articles)
[AD-A262566] p 3227 N93-28576

Wind loads on canopy roofs
[RR-CE132] p 3451 N93-29106

Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410

High-Reynolds-number test of a 5-percent-thick low-aspect-ratio semispan wing in the Langley 0.3-meter transonic cryogenic tunnel: Wing pressure distributions
[NASA-TM-4227] p 3240 N93-29449

Aerodynamic characteristics of a rotorcraft airfoil designed for the tip region of a main rotor blade
[NASA-TM-4264] p 3240 N93-29450

The Ultra Light Aircraft Testing
[NASA-CR-193043] p 3249 N93-29774

Construction, wind tunnel testing and data analysis for a 1/5 scale ultra-light wing model p 3243 N93-29778

On the development of a film cooling layer
p 3258 N93-29959

Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 1: Data analysis
[AD-A264151] p 3241 N93-30171

Vortex shedding by Blunt/Bluff bodies at high reynolds numbers. Volume 2: Cylinders, octagon, hexagon
[AD-A264152] p 3241 N93-30172

Vortex shedding by blunt/bluff bodies at high reynolds numbers. Volume 3. Cubes
[AD-A264153] p 3242 N93-30173

WIND TUNNELS

Summer research program (1992). High School Apprenticeship Program (HSAP) reports. Volume 16: Arnold Engineering Development Center Civil Engineering Laboratory
[AD-A262024] p 3608 N93-29396

WIND TURBINES

The natural excitation technique (NExT) for modal parameter extraction from operating wind turbines
[DE93-010611] p 3463 N93-28603

Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2
[PB93-174779] p 3465 N93-30001

WIND VELOCITY

Rugged, no-moving-parts windspeed and static pressure probe designs for measurements in planetary atmospheres p 3434 N93-28767

Doppler-radar wind-speed measurements in tornadoes: A comparison of real and simulated spectra
[DE93-008734] p 3481 N93-29095

Evaluation of atmospheric wind field and dispersion models for fog-oil smoke dispersion in complex terrain: Field measurement and model evaluation program for assessment of the environmental effects of military smokes
[AD-A262051] p 3482 N93-29399

Surface shear stress estimates from geostrophic winds for use in sensible and latent heat flux formulations
p 3483 N93-30044

Vortex shedding by blunt/bluff bodies at high Reynolds numbers. Volume 4: Rectangles
[AD-A264154] p 3241 N93-30151

WIND VELOCITY MEASUREMENT

The enhanced-model ladar wind sensor and its application in planetary wind velocity measurements
p 3649 N93-28815

WINDOWS (APERTURES)

Ultra-high resolution water window x ray microscope optics design and analysis
[NASA-CR-193225] p 3578 N93-29128

WINDOWS (COMPUTER PROGRAMS)

Using the Mach communication primitives in X11
[AD-A264049] p 3533 N93-30125

WINDPOWER UTILIZATION

Solar world congress: Proceedings of the biennial congress of the international solar energy society, volume 1, part 2
[PB93-174779] p 3465 N93-30001

WING CAMBER

Tailored composite wings with elastically produced chordwise camber p 3308 N93-30876

WING LOADING

High-Reynolds-number test of a 5-percent-thick low-aspect-ratio semispan wing in the Langley 0.3-meter transonic cryogenic tunnel: Wing pressure distributions
[NASA-TM-4227] p 3240 N93-29449

WING PANELS

Design, analysis, and fabrication of the technology integration box beam p 3300 N93-30433

Development of stitching reinforcement for transport wing panels p 3304 N93-30852

WINGS

A demonstration of simple airfoils: Structural design and materials choices
[DE93-007882] p 3238 N93-28662

Articulated fin/wing control system
[AD-D015712] p 3259 N93-29278

Construction, wind tunnel testing and data analysis for a 1/5 scale ultra-light wing model p 3243 N93-29778

Topology and grid adaption for high-speed flow computations
[NASA-CR-4216] p 3426 N93-30375

First NASA Advanced Composites Technology Conference, part 2
[NASA-CP-3104-PT-2] p 3303 N93-30841

Optimization of composite sandwich cover panels subjected to compressive loadings p 3306 N93-30862

A comparison of classical mechanics models and finite element simulation of elastically tailored wing boxes
p 3306 N93-30863

Construction and testing of simple airfoils to demonstrate structural design, materials choice, and composite concepts p 3243 N93-30979

WIRE

ORNL superconducting technology program for electric energy systems
[DE93-009588] p 3404 N93-28523

Welding wire pressure sensor assembly
[NASA-CASE-MFS-26216-1] p 3442 N93-28951

Electromagnetic diffusion and wire coupling
[AD-A263183] p 3381 N93-29011

A miniature fatigue test machine p 3291 N93-30956

WIRELESS COMMUNICATION

Wideband propagation measurements for wireless indoor communication
[PB93-175123] p 3382 N93-29202

Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-1-2] p 3354 N93-30215

Radiation-hardened microwave communications system
[DE93-007915] p 3394 N93-30631

WIRING

Efficient wiring of reconfigurable parallel processors
[DE93-009847] p 3538 N93-29186

WORD PROCESSING

Dynamic object oriented interaction and its implementation in the framework in an interface management system
[ETN-93-93795] p 3523 N93-28526

WORDS (LANGUAGE)

Comparison of crisp and fuzzy character networks in handwritten word recognition p 3514 N93-29545

WORK FUNCTIONS

Measurement of work function of a plasma grid in a cesium seeded negative ion source
[DE93-764153] p 3589 N93-30190

Energy spectra and photoelectron work function from YBa2Cu3O7 high-T(sub c) superconductor
[DE93-606329] p 3600 N93-30766

WORK-REST CYCLE

Engineman stress and fatigue: Pilot tests
[PB93-175008] p 3507 N93-29675

WORKING FLUIDS

Pulse mitigation and heat transfer enhancement techniques. Volume 3: Liquid sodium heat transfer facility and transient response of sodium heat pipe to pulse forward and reverse heat load
[AD-A263496] p 3422 N93-29338

WORKLOADS (PSYCHOPHYSIOLOGY)

Pilot decision aiding for weapon delivery: A novel approach to fire control cueing using parallel computing
p 3501 N93-28853

A new class of mission support for combat air-crew
p 3501 N93-28854

Human capabilities and limitations in situation awareness p 3503 N93-28863

Engineman stress and fatigue: Pilot tests
[PB93-175008] p 3507 N93-29675

WORKSTATIONS

Using today's technology to improve mobile C4I for the operational commander
[AD-A263613] p 3245 N93-29285

The Canadian Automated Air Traffic System
p 3246 N93-30323

Case study of the operational usefulness of the sharp workstation in forecasting a mesocyclone-induced cold sector tornado event in California
[PB93-178697] p 3485 N93-30889

Software conception and structure of automated workstation for an experimental data processing
[DE93-609815] p 3623 N93-30994

WOUND HEALING

Wound healing and connective tissue metabolism: The role of hyperbaric oxygen therapy
[AD-A262483] p 3493 N93-28759

WOVEN COMPOSITES

Acousto-Ultrasonic analysis of failure in ceramic matrix composite tensile specimens
[NASA-TM-106219] p 3449 N93-29073

Method and apparatus for weaving a woven angle ply fabric
[NASA-CASE-LAR-14048-1] p 3354 N93-29611

Micromechanics of fatigue in woven and stitched composites p 3304 N93-30850

Characterization of multiaxial warp knit composites
p 3304 N93-30851

Mechanical and analytical screening of braided composites for transport fuselage applications
p 3305 N93-30855

Damage of multi-directionally reinforced ceramic-matrix composites p 3308 N93-30937

X

X RAY ABSORPTION

In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331

X RAY ANALYSIS

Scanning electron microscope/energy dispersive x ray analysis of impact residues in LDEF tray clamps
p 3283 N93-29369

X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869

Design of acentric materials: X ray structures of guanidinium p-nitro- and p-hydroxybenzenesulfonate
[AD-A264220] p 3597 N93-30146

The x ray microscopy resource center at the advanced light source
[DE93-010443] p 3433 N93-30531

X RAY APPARATUS

Flash x ray system: Techniques and applications
[DE93-011477] p 3430 N93-28645

X RAY ASTRONOMY

The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604

XRONOS: A timing analysis software package. User's guide, version 3.00
[NASA-TM-109222] p 3532 N93-30023

ROSAT detection of stellar x ray sources in the old open cluster M67
[MPE-PREPRINT-230] p 3631 N93-30578

X RAY BINARIES

ROSAT detection of stellar x ray sources in the old open cluster M67
[MPE-PREPRINT-230] p 3631 N93-30578

X RAY DIFFRACTION

Powder x ray diffraction patterns of energetic materials for use as reference standards
[DE93-009903] p 3592 N93-28568

An integrated XRF/XRD instrument for Mars exobiology and geology experiments p 3645 N93-28792

1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568

Coordination compounds of aluminum as precursors to aluminum nitride
[AD-A264700] p 3327 N93-30574

The characterization of materials using x ray diffraction p 3293 N93-30968

X RAY FLUORESCENCE

Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing
p 3641 N93-28773

An integrated XRF/XRD instrument for Mars exobiology and geology experiments p 3645 N93-28792

X RAY IMAGERY

Flash x ray system: Techniques and applications
[DE93-011477] p 3430 N93-28645

A new multichannel soft x ray framing camera for fusion experiments
[DE93-009302] p 3432 N93-29773

X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869
Automatic detection of explosives using x ray imaging
p 3244 N93-30275
The x ray microscopy resource center at the advanced light source
[DE93-010443] p 3433 N93-30531

X RAY INSPECTION
Use of local x ray computerized tomography for high-resolution, region-of-interest inspection of large ceramic components for engines
[DE93-005564] p 3449 N93-28943
Automatic detection of explosives using x ray imaging
p 3244 N93-30275
1,2-Dimethyl-1,2-Disila-Closo-Dodecaborane(12), A silicon analog of an ortho-carborane: Synthesis; x ray crystal structure; NMR, vibrational and photoelectron spectra; bonding
[AD-A264709] p 3599 N93-30568

X RAY LASERS
Development of coherent x ray lasers
[DE93-009288] p 3437 N93-29104
Computational simulations of a soft x ray projection lithography laser plasma source
[DE93-009625] p 3437 N93-29264
Inner-shell photo-ionized x ray laser schemes
[DE93-009285] p 3438 N93-29309
Problems in the implementation of x ray optics with x ray lasers
[DE93-009297] p 3438 N93-29781
High-repetition rate x ray lasers and applications
[DE93-011882] p 3440 N93-30394

X RAY SOURCES
Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing
p 3641 N93-28773
Computational simulations of a soft x ray projection lithography laser plasma source
[DE93-009625] p 3437 N93-29264
The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604
X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869

X RAY SPECTRA
Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059
Defect density measurements in a shocked single crystal of ammonium perchlorate p 3319 N93-30093

X RAY SPECTROSCOPY
Undulator Spectromicroscopy Facility at the Advanced Light Source
[DE93-007964] p 3261 N93-28490
Planetary and satellite x ray spectroscopy: A new window on solid-body composition by remote sensing
p 3641 N93-28773
A team approach to the development of gamma ray and x ray remote sensing and in situ spectroscopy for planetary exploration missions p 3650 N93-28824
Modification of spectral distributions by multilayer structures
[DE93-009308] p 3310 N93-29059
In-situ x ray studies of the underpotential deposition of copper on platinum (3)
[AD-A263361] p 3595 N93-29331

X RAY STARS
The x ray population in globular clusters and three crab-like SNR in the large Magellanic cloud
[NASA-CR-193172] p 3630 N93-29604

X RAY TELESCOPES
X ray, far, and extreme ultraviolet coatings for space applications p 3340 N93-28829

X RAYS
Undulator Spectromicroscopy Facility at the Advanced Light Source
[DE93-007964] p 3261 N93-28490
Adsorption of sulfate on metal electrodes
[AD-A263192] p 3309 N93-28540
Flash x ray system: Techniques and applications
[DE93-011477] p 3430 N93-28645
Analysis of an MCG/fuse/PFS experiment
[DE93-007355] p 3410 N93-29812
X ray microscopy resource center at the Advanced Light Source
[DE93-010449] p 3261 N93-29869

X-29 AIRCRAFT
Flight control system design factors for applying automated testing techniques
[NASA-TM-4242] p 3260 N93-30764

XENON
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798
Low-pump-rate multi-millisecond atomic xenon laser
[DE93-011484] p 3437 N93-29180
What is underneath? Moving atoms and molecules to find out
[AD-A263363] p 3567 N93-29332

XENON ISOTOPES
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

XENON 129
Mass spectrometric measurement of Martian krypton and xenon isotopic abundance p 3646 N93-28798

Y

YAG LASERS
Every good virtue you ever wanted in a Q-switched solid-state laser and more: Monolithic, diode-pumped, self-Q-switched, highly reproducible, diffraction-limited Nd:YAG laser p 3442 N93-28772
ND laser with co-doped ion(s) pumped by visible laser diodes
[AD-D015711] p 3437 N93-29277
Simulation of transient radiation effects on semiconductor devices using a pulsed Q-switched Nd:YAG laser p 3357 N93-30230
Intracavity-pumped 2.1 micrometer Ho(3+): YAG laser
[AD-D015728] p 3441 N93-30587

YAGI ANTENNAS
Planar microstrip YAGI antenna array
[NASA-CASE-NPO-17873-2-CU] p 3384 N93-29507

YARNS
Advanced fiber/matrix material systems
p 3305 N93-30854

YAW
Vehicle dynamic stability and rollover
[PB93-185437] p 3447 N93-30828

YBCO SUPERCONDUCTORS
Enhancements of the critical currents of YBaCuO single crystals by neutron (n) and proton (p) irradiation
[DE93-007892] p 3592 N93-28661
Processing and property evaluation of silver or aluminum matrix YBa2Cu3O(6+x) superconducting materials
[AD-A263382] p 3595 N93-29333
Properties of superconducting YBa2Cu3O(6+4) ceramic materials: Effect of processing parameters
[AD-A263441] p 3334 N93-29790
Submillimeter and microwave residual losses in epitaxial films of Y-Ba-Cu-O and Tl-Ca-Ba-Cu-O
[DE93-010430] p 3596 N93-29868
Energy spectra and photoelectron work function from YBa2Cu3O7 high-T(sub c) superconductor
[DE93-606329] p 3600 N93-30766
Superconducting films of YBaCuO
[DE93-606831] p 3600 N93-30772
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

YIELD STRENGTH
Bounds on internal state variables in viscoplasticity
[NASA-TM-106215] p 3451 N93-29196
Tensile study of single-crystal ternary L1(2) trialuminide Al66Ti25Mn(sub g)
[AD-A264297] p 3601 N93-30819

YTTRIUM
Plastic deformation behaviour of oxide dispersion strengthened titanium alloys
[ONERA-NT-1990-6] p 3326 N93-30138

YTTRIUM COMPOUNDS
Process optimization of Hexoloy SX-SiC towards improved mechanical properties
[DE93-007913] p 3320 N93-28564

Z

ZEOLITES
The synthesis and ab initio structure determination of Zn4O(BO3)2: A microporous zincoborate built up from fused 3-ring and 5-ring sub-units
[AD-A262504] p 3594 N93-29138
Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue
[AD-A264523] p 3598 N93-30407

ZINC
Effect of zinc and iron ions on the electrochemistry of nickel oxide electrode: Slow cyclic voltammetry
[AD-A263098] p 3311 N93-29133

ZINC COATINGS
The synthesis and ab initio structure determination of Zn4O(BO3)2: A microporous zincoborate built up from fused 3-ring and 5-ring sub-units
[AD-A262504] p 3594 N93-29138

ZINC COMPOUNDS
Conjugated polymers from cyclohexadienediol monomers
[AD-A264837] p 3340 N93-30900

ZINC SELENIDES
Synthesis and characterization of mixed 3-5 and 2-6 semiconductor monomers included in the borate sodalite analogue
[AD-A264523] p 3598 N93-30407

ZIRCONIUM NITRIDES
Design of interfaces in metal matrix composites
[AD-A262052] p 3296 N93-29001

ZIRCONIUM OXIDES
The effect of Bi2 O3 on the electrical properties of Zr O2: 3 percent Mg O ceramic solid electrolytes
[DE93-607029] p 3339 N93-30774

ZODIACAL LIGHT
New meteoroid model predictions for directional impacts on LDEF p 3638 N93-29376

ZONAL FLOW (METEOROLOGY)
The thermal structure, dust loading, and meridional transport in the Martian atmosphere during late southern summer p 3651 N93-29616

PERSONAL AUTHOR INDEX

Typical Personal Author Index Listing

ARMSTRONG, WILLIAM D. .... p 27 N93-10277

PERSONAL AUTHOR | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AAMODT, R. E. p 3589 N93-30189
AAZHANG, BEHNAAM p 3519 N93-29581

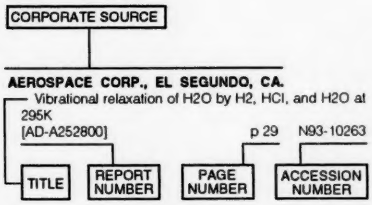
CORPORATE SOURCE INDEX

Typical Corporate Source Index Listing



CORPORATE SOURCE
AEROSPACE CORP., EL SEGUNDO, CA.
Vibrational relaxation of H2O by H2, HCl, and H2O at 295K
[AD-A252800] p 29 N93-10263
TITLE
REPORT NUMBER
PAGE NUMBER
ACCESSION NUMBER

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABB ENVIRONMENTAL SERVICES, INC., PORTLAND, ME.
Fugitive hydrocarbon emissions from Pacific OCS facilities, volume 1
[PB93-173797] p 3468 N93-28899
Fugitive hydrocarbon emissions from Pacific OCS facilities. Volume 2: Executive summary and user's guide
[PB93-173805-VOL-2] p 3471 N93-29861

ABB KRAFTWERKE A.G., MANHEIM (GERMANY).
Optical blade vibration measurement
[ETN-93-93454] p 3259 N93-29999

ABB POWER GENERATION, INC., BADEN (SWITZERLAND).
The aerodynamic effect of coolant ejection in the leading edge region of a film-cooled turbine blade
p 3258 N93-29958

ABT ASSOCIATES, INC., CAMBRIDGE, MA.
Evaluation of environmental marketing terms in the United States
[PB93-175784] p 3474 N93-30660

AC TECHNOLOGY SYSTEMS AND STORAGE TECHNOLOGY, MCLEAN, VA.
RAID 7 disk array p 3537 N93-30462

ACADEMIA R. P. R., BUCHAREST.
Adding dynamic rules to self-organizing fuzzy systems
p 3515 N93-29557

ACADEMY OF SCIENCES OF THE UKRAINE, KIEV.
Change of solar cell element properties influenced by adsorbed atoms
[DE93-606694] p 3466 N93-30777

ACADEMY OF SCIENCES (USSR), NOVOSIBIRSK.
Analysis of possibilities for using laser scattering for MeV electron beam diagnostics
[DE93-606223] p 3441 N93-30767
Measurements of the energy spectrum of an intense microsecond relativistic electron beam in the beam-plasma experiments using a multi-foil analyzer
[DE93-606271] p 3590 N93-30768
Hard photon emission from high energy electrons and positrons in single crystals
[DE93-606328] p 3600 N93-30770
Experimental MHD stability limit in the gas-dynamic trap
[DE93-606218] p 3591 N93-30780
On the photonic chiral anomaly in an external gravitational field
[DE93-606082] p 3479 N93-30785
Parton's picture of the electroweak processes in high energy e(+)e(-)-collisions
[DE93-606107] p 3571 N93-30788
Pion pair production in photon-photon collisions
[DE93-606114] p 3571 N93-30790
Orbital motion calculation using Lie method in collider nonlinear magnetic field
[DE93-605733] p 3571 N93-30800
Chaotic quantum systems
[DE93-606030] p 3606 N93-30802
Scaling properties of localized quantum chaos
[DE93-606031] p 3606 N93-30803
Complex apparatus and results of active experiment Electron-1 with injection of electronic beam in the ionosphere
[DE93-605452] p 3480 N93-30991
Microsecond ribbon relativistic electron beam in a plane undulator and generation of microwave radiation
[DE93-605693] p 3400 N93-30993

ADEPT IC DESIGN, OCEANSIDE, CA.
Design of a pixel cell optimized for a data push architecture readout
[DE93-011016] p 3616 N93-30122

ADVANCED FUEL RESEARCH, INC., EAST HARTFORD, CT.
Superconducting flux coupled fast switching device from YBCO films
[AD-A264301] p 3414 N93-30896

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
Combat Automation for Airborne Weapon Systems: Man/Machine Interface Trends and Technologies
[AGARD-CP-520] p 3501 N93-28850
T(Ic2)acS(Ic3)ats for Surveillance Verification and C3I
[AGARD-CP-522] p 3387 N93-29892
Heat Transfer and Cooling in Gas Turbines
[AGARD-CP-527] p 3252 N93-29926
ELF/VLF/LF Radio Propagation and Systems Aspects
[AGARD-CP-529] p 3394 N93-30727

AERODYNE RESEARCH, INC., BILLERICA, MA.
Condensed phase diagnostics of nitramine propellant combustion p 3320 N93-30102

AEROJET-GENERAL CORP., SACRAMENTO, CA.
Orbital transfer vehicle oxygen turbopump technology. Volume 3: Hot oxygen testing
[NASA-CR-191036] p 3448 N93-31039

AERONAUTICAL RESEARCH INST. OF SWEDEN, BROMMA.
Inviscid quasi one-dimensional nonequilibrium flow
[FFA-TN-1992-35] p 3418 N93-28993
Implementation of a multidomain Navier-Stokes code on the Intel iPSC2 hypercube
[FFA-TN-1992-37] p 3418 N93-28994
An efficient spectral integration method for the solution of the Navier-Stokes equations
[FFA-TN-1992-28] p 3418 N93-29009
Factors influencing the interlaminar fracture toughness and its evaluation in composites
[FFA-TN-1991-34] p 3451 N93-29076

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Optimal trajectories for aircraft terrain following and terrain avoidance: A literature review update
[AD-A264075] p 3260 N93-30604

AEROSPACE CORP., EL SEGUNDO, CA.
Space transportation analysis and design (Reissue A)
[AD-A262752] p 3271 N93-28487
The design and testing of a high-temperature graphite dilatometer
[AD-A262185] p 3430 N93-28488
Thermal control paints on LDEF: Results of M0003 sub-experiment 18
[AD-A263252] p 3329 N93-28561
Long Duration Exposure Facility (LDEF) experiment M0003 meteoroid and debris survey
p 3638 N93-29361
Post-flight analyses of the crystals from the M0003-14 quartz crystal microbalance experiment
p 3602 N93-29684

AEROSPACE CORP., LOS ANGELES, CA.
A measurement of the radiation dose to LDEF by passive dosimetry p 3572 N93-29634
Tactical satellites p 3284 N93-29893
Launch vehicles for lightweight TACSAT deployment
p 3271 N93-29903

AEROSPACE INDUSTRIES ASSOCIATION OF AMERICA, INC., WASHINGTON, DC.
A detailed technology roadmap for superconductivity
p 3526 N93-29045

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Pilot Candidate Selection Method (PCSM): What makes it work?
[AD-A262871] p 3498 N93-29481
Predicting aircrew training performance with psychometric g
[AD-A264021] p 3498 N93-30026

AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OH.
Armstrong Laboratory space visual function tester program p 3267 N93-28739
Effect of microgravity on several visual functions during STS Shuttle missions: Visual Function Tester-Model 1 (VFT-1) p 3268 N93-28740
Effect of microgravity on visual contrast threshold during STS Shuttle missions: Visual Function Tester-Model 2 (VFT-2) p 3268 N93-28741
Effect of microgravity on the visual near point: Visual Function Tester-Model 4 (VFT-4) p 3268 N93-28742
Cognitive interface considerations for intelligent cockpits p 3503 N93-28865
An evaluation of B-1B pilot performance during simulated instrument approaches with and without status information
[AD-A263874] p 3507 N93-29888
Methods for characterizing the human head for the design of helmets
[AD-A263875] p 3507 N93-29889
Handedness and motor programming effects of manual control and movement
[AD-A264022] p 3499 N93-30027

AEROSPATIALE, LES MUREAUX (FRANCE).
Tactical satellites for air command and control
p 3284 N93-29898

AGENCY FOR INTERNATIONAL DEVELOPMENT, WASHINGTON, DC.
Tropical forests and biological diversity: USAID report to Congress 1990-1991
[PB93-180453] p 3471 N93-29681

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, ASHEVILLE, NC.
Air weather service master station catalog USAFETAC climatic database users handbook no. 6
[AD-A264761] p 3484 N93-30608

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, SCOTT AFB, IL.
Seasonal snowfall statistics for selected stations
[AD-A263173] p 3481 N93-28991
Thunderstorm forecast study for Eglin AFB, Florida
[AD-A263423] p 3483 N93-29810

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.
Characterization of laboratory generated turbulence by optical phase measurements
[AD-A262596] p 3480 N93-28465
Rendering the out-the-window view for the AFIT virtual cockpit
[AD-A262599] p 3260 N93-28467
Automating the satellite range scheduling process
[AD-A262601] p 3270 N93-28468
Luminescence study of ion-implanted and MBE-grown Er-doped GaAs and Al(x)Ga(1-x)As
[AD-A262602] p 3591 N93-28471

Analysis of TOPAZ 2 and SPACE-R space nuclear power plants using a modified thermionic model
[AD-A262612] p 3286 N93-28474
Frequency domain speech compression using the Karhunen-Loeve Transform
[AD-A262613] p 3379 N93-28476
Design of a hardware discrete event simulation coprocessor
[AD-A262614] p 3537 N93-28478
Modified goodness-of-fit tests for the Weibull distribution
[AD-A262552] p 3553 N93-28574
Modified Anderson-Darling and Cramer-Von Mises goodness-of-fit tests for the normal distribution
[AD-A262554] p 3553 N93-28575
Toward reusable graphics components in Ada
[AD-A262568] p 3524 N93-28577
A new goodness-of-fit test for the Weibull distribution based on spacings
[AD-A262615] p 3553 N93-28587
A modified Anderson Darling goodness-of-fit test for the gamma distribution with unknown scale and location parameters
[AD-A262486] p 3553 N93-28760
A Monte Carlo study of the raw and normal varimax rotation criterion in factor analysis
[AD-A262516] p 3554 N93-28844
A modified chi-squared goodness-of-fit test for the three-parameter gamma distribution with unknown parameters
[AD-A262553] p 3554 N93-28845
A distributed object-oriented database application design
[AD-A262591] p 3612 N93-28846
Estimating test range capacity
[AD-A262493] p 3270 N93-28938
The infrared measurement for the reentry-body-translation
[AD-A263100] p 3278 N93-29134
Modelling temporal abductive explanation
[AD-A263096] p 3526 N93-29145
Numerical computation of inviscid flow around nose tip of Space Shuttle with NND scheme
[AD-A264012] p 3421 N93-29260
An investigation of graphite peek composite under compression with a centrally located circular discontinuity
[AD-A262549] p 3298 N93-29414
Construction and testing of a neutron and gamma spectrometry system using pulse shape discrimination with an organic scintillator
[AD-A262550] p 3567 N93-29415
Development of a visual system interface to support a domain-oriented application composition system
[AD-A262489] p 3528 N93-29418
Mitigation of shock waves in a cylindrical tunnel by foam
[AD-A262491] p 3423 N93-29419
A fuzzy logic optimal control law solution to the CMMCA tracking problem
[AD-A262555] p 3542 N93-29420
Design and performance evaluation of a gas chromatograph micromachined in a single crystal silicon substrate
[AD-A262594] p 3596 N93-29424
Selection and transmission of information. Issue 22: Republic interdepartmental collection (selected articles)
[AD-A262825] p 3615 N93-29431
An analysis of the Generalized Lambda Distribution
[AD-A262485] p 3555 N93-29447
Solution of Euler equations for forebody-inlet ensemble of aircraft at high angle of attack
[AD-A263905] p 3240 N93-29862
The application of concentric vortex simulation to calculating the aerodynamic characteristics of bodies of revolution at high angles of attack
[AD-A263879] p 3241 N93-29919
Laboratory experiments in integrated circuit fabrication
p 3292 N93-30962

AIR FORCE OFFICE OF SCIENTIFIC RESEARCH, BOLLING AFB, WASHINGTON, DC.
AFOSR Status Report
[AD-A264720] p 3670 N93-30513

AIR FORCE SYSTEMS COMMAND, BROOKS AFB, TX.
Field test of a computer-driven tool to measure psychological characteristics of aircrew
[AD-A264484] p 3499 N93-30425
Determinants of performance rating accuracy: A field study
[AD-A264726] p 3500 N93-30575

AIR FORCE SYSTEMS COMMAND, WRIGHT-PATTERSON AFB, OH.
Effect of canard wing positions on aerodynamic characteristics of swept-forward wing
[AD-A262373] p 3238 N93-28493
International aviation (Selected articles)
[AD-A262566] p 3227 N93-28576
A tutorial on exit pupils and eye rotation with virtual image optical displays
[AD-A262399] p 3494 N93-29400
Anelastic relaxations associated with local disordering in grain boundaries
[AD-A263101] p 3596 N93-29796
Construction and operation of a gas transport CO2 laser
[AD-A263102] p 3438 N93-29797
New developments in vacuum microelectronics
[AD-A263103] p 3410 N93-29798
Graphical comparison of U.S. standard atmospheres and military standard climatic extremes
[AD-A264639] p 3484 N93-30521

AIR PRODUCTS AND CHEMICALS, INC., ALLENTOWN, PA.
Development of alternative fuels from coal-derived syngas
[DE93-011629] p 3341 N93-28668

AIR WEATHER SERVICE, SCOTT AFB, IL.
The basics of weather models
[AD-A263386] p 3483 N93-29850
Cloudiest year study: An analysis of the 3DNEPH and RTNEPH databases

Plasma Physics Network Newsletter, no. 5
[DE93-606216] p 3591 N93-30795

Statement on the United Nations Conference on Environment and Development
[DE93-601878] p 3475 N93-30996

Development of a PC code package for the analysis of research and power reactors
[DE92-638517] p 3536 N93-31001

INTERNATIONAL BUSINESS MACHINES CORP., SAN JOSE, CA.

In situ Fourier transform infrared spectroscopic study of bisulfate and sulfate adsorption on gold, with and without the underpotential deposition of copper
[AD-A263421] p 3323 N93-29259

Fast multipole method in simulations of aqueous systems
[AD-A263422] p 3567 N93-29336

INTERNATIONAL CENTRE FOR THEORETICAL PHYSICS, TRIESTE (ITALY).

Electronic states in quantum wells with periodically structured interfaces
[DE93-606295] p 3600 N93-30769

Effective interactions between concentration fluctuations and charge transfer in chemically ordering liquid alloys
[DE93-606724] p 3327 N93-30778

Quantum group and symmetry of the heat equation
[DE93-607560] p 3605 N93-30779

Neutrino oscillations and a new Faraday effect
[DE93-606111] p 3571 N93-30789

Planck scale effects in neutrino physics
[DE93-606133] p 3571 N93-30793

A tight binding model for the electronic structure of FCC and SC C60
[DE93-606214] p 3601 N93-30794

Electric magnetic duality in string theory
[DE93-606061] p 3606 N93-30807

The ground state wavefunctions of a conformally invariant scalar field in different spacetime background
[DE93-606063] p 3606 N93-30808

Positive energy representations of the conformal quantum algebra
[DE93-606064] p 3551 N93-30809

Connections between quantized affine algebras and superalgebras
[DE93-606065] p 3551 N93-30810

Nonlinear realisations of omega(1 + infinity)
[DE92-644721] p 3557 N93-30917

Fourth-rank gravity and cosmology
[DE92-644722] p 3637 N93-30918

Compensating fields and anomalies in supergravity
[DE92-644724] p 3637 N93-30919

Quantum group generalization of the heterotic QFT
[DE92-644727] p 3607 N93-30920

Abelian gauge theories on homogeneous spaces
[DE92-644730] p 3607 N93-30921

Beltrami parametrization and gauging of Virasoro and w-infinity algebras
[DE92-644844] p 3557 N93-30928

Normal equivariant forms of vector fields
[DE92-644845] p 3551 N93-30929

Massive Majorana neutrinos in pre-bounce supernovae
[DE92-642597] p 3572 N93-30931

General scalar-tensor theories for induced gravity inflation
[DE93-602505] p 3479 N93-30940

Fixed point iterations for quasi-contractive maps in uniformly smooth Banach spaces
[DE92-641348] p 3552 N93-30942

Equivariant elliptic homology
[DE92-641338] p 3557 N93-30981

Nth roots of normal contractions
[DE92-644725] p 3557 N93-30985

On one-dimensional topological and conformal field theories
[DE92-644726] p 3558 N93-30986

Formulation of wave mechanics without the Planck constant h/2 pi
[DE93-604083] p 3608 N93-30987

Spherically symmetric line element and Killing vectors in five-dimensional space
[DE93-604132] p 3558 N93-30988

Superconformal structures and holomorphic 1/2-superdifferentials on N = 1 super Riemann surfaces
[DE93-604133] p 3558 N93-30989

Fourth-rank cosmology
[DE92-641346] p 3637 N93-30997

Growth model of Au films on Ru(001)
[DE92-642126] p 3602 N93-30998

A non degenerate semi-classical Lagrangian for dilaton-gravity in two dimensions
[DE92-641339] p 3480 N93-31002

The geometry of complex space-times with torsion
[DE92-641343] p 3608 N93-31003

Effects of spiral shocks on disk emission lines
[DE92-641716] p 3637 N93-31004

The distribution of the annual and semiannual cycles in the tropics
[DE92-642213] p 3485 N93-31006

Role of oxygen vacancies in anodic TiO2 thin films
[DE92-642137] p 3602 N93-31027

INTERNATIONAL METEOROLOGICAL INST., STOCKHOLM (SWEDEN).

Activities report of the International Meteorological Institute, Stockholm (Sweden)
[ETN-93-93768] p 3480 N93-28519

IONA COLL., NEW ROCHELLE, NY.

Adaptive defuzzification for fuzzy systems modeling
p 3512 N93-29532

System overview on electromagnetic compensation for reflector antenna surface distortion
[NASA-TM-106217] p 3273 N93-29195

Bounds on internal state variables in viscoplasticity
[NASA-TM-106215] p 3451 N93-29196

Accuracy of least-squares methods for the Navier-Stokes equations
[NASA-TM-106209] p 3421 N93-29208
Characteristics of hypervelocity impact craters on LDEF experiment S1003 and implications of small particle impacts on reflective surfaces p 3283 N93-29363
Apparatus for intercalating large quantities of fibrous structures
[NASA-CASE-LEW-15077-2] p 3298 N93-29609
Semiconductor cooling apparatus
[NASA-CASE-LEW-14162-3] p 3299 N93-29614
The effect of the low Earth orbit environment on space solar cells: Results of the Advanced Photovoltaic Experiment (S0014) p 3467 N93-29686
Studies of effects on optical components and sensors: LDEF experiments AO-147 (ERB components) and S-0014 (APEX) p 3582 N93-29693
Navier-Stokes analysis of three-dimensional flow and heat transfer inside turbine blade rows
p 3259 N93-29963
Probabilistic composite analysis p 3307 N93-30868
Tensile creep behavior of polycrystalline alumina fibers
[NASA-TM-106269] p 3340 N93-30938
Prediction of gas-liquid two-phase flow regime in microgravity
[NASA-TM-106274] p 3352 N93-30939

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. MARSHALL SPACE FLIGHT CENTER, HUNTSVILLE, AL.
Low-cost Active Structural Control space experiment (LASC) p 3263 N93-28700
Altitude compensating ablative stiffening band for rocket motor nozzles
[NASA-CASE-MFS-28728-1] p 3288 N93-28950
Welding wire pressure sensor assembly
[NASA-CASE-MFS-26216-1] p 3442 N93-28951
Amino acid sequences for the binding regions in serum albumin proteins
[NASA-CASE-MFS-28402-1] p 3491 N93-28952
Computerized atmospheric trace contaminant control simulation for manned spacecraft
[NASA-TM-108409] p 3505 N93-28977
The role of grain boundaries in hydrogen diffusion in metals at 25 C
[NASA-TM-108407] p 3322 N93-29043
Process for selectively recovering algae and protozoa
[NASA-CASE-MFS-26124-1-NPO] p 3491 N93-29174
Effects of atomic oxygen and ultraviolet radiation on candidate elastomeric materials for long duration missions. Test series no.1
[NASA-TM-108408] p 3331 N93-29193
Valve malfunction detection apparatus
[NASA-CASE-MFS-29904-1] p 3432 N93-29503
System for testing bearings
[NASA-CASE-MFS-28589-1] p 3445 N93-29618
Refinements on the pinhole camera measurements of the LDEF attitude p 3283 N93-29622
Status of LDEF ionizing radiation measurements and analysis p 3654 N93-29626
Collection, analysis, and archival of LDEF activation data p 3624 N93-29631
Induced activation study of LDEF
p 3572 N93-29632
Revised prediction of LDEF exposure to trapped protons p 3572 N93-29633
LET spectra measurements of charged particles in the P0006 experiment on LDEF p 3573 N93-29637
Three-dimensional shielding effects on charged particle fluences measured in the P0006 experiment of LDEF
p 3573 N93-29639
Cosmogenic radionuclides on LDEF: An unexpected Be-10 result p 3573 N93-29643
Platform stair lift
[NASA-CASE-MFS-28772-1] p 3507 N93-29845
Quick connect fastener
[NASA-CASE-MFS-28833-1] p 3445 N93-29846
Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1] p 3289 N93-29847
Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 3338 N93-30565
Prosthetic elbow joint
[NASA-CASE-MFS-28707-1] p 3508 N93-30566
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 3447 N93-30567
Orbiting transmitter and antenna for spaceborne communications at ELF/VLF to submerged submarines
p 3399 N93-30755

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. PASADENA OFFICE, CA.
Dual arm generalized compliant motion with shared control
[NASA-CASE-NPO-18738-1-CU] p 3443 N93-28954
A satellite-tracking millimeter-wave reflector antenna system for mobile satellite-tracking
[NASA-CASE-NPO-18772-1-CU] p 3381 N93-28955
Improved real-time imaging spectrometer
[NASA-CASE-NPO-18410-1-CU] p 3578 N93-29086
Miniature modular microwave end-to-end receiver
[NASA-CASE-NPO-18713-1-CU] p 3381 N93-29087
Three-parameter tunable Tilt-Integral-Derivative (TID) controller
[NASA-CASE-NPO-18492-1-CU] p 3542 N93-29176
Parallel inferencing method and apparatus for rule-based expert systems
[NASA-CASE-NPO-18004-1-CU] p 3521 N93-29504
Planar microstrip YAGI antenna array
[NASA-CASE-NPO-17873-2-CU] p 3384 N93-29507
Special purpose parallel computer architecture for real-time control and simulation in robotic applications
[NASA-CASE-NPO-17629-1-CU] p 3521 N93-29608
Wavelength-division multiplexed optical integrated circuit with vertical diffraction grating
[NASA-CASE-NPO-18357-1-CU] p 3579 N93-29848
Hidden Markov models for fault detection in dynamic systems
[NASA-CASE-NPO-18982-1-CU] p 3449 N93-30413
Tunable CW diode-pumped Tm,Ho:YLiF4 laser operating at or near room temperature
[NASA-CASE-NPO-18611-1-CU] p 3440 N93-30415
Virtual reality flight control display with six-degree-of-freedom controller and spherical orientation overlay
[NASA-CASE-NPO-18733-1-CU] p 3251 N93-30416

NATIONAL AEROSPACE LAB., AMSTERDAM (NETHERLANDS).
Overview of cockpit technology research and development programs for improvement of the man/machine interface: Review of the AGARD AVP Symposium held in Madrid, May 1992
p 3505 N93-28872
Transputers, parallel processing in embedded systems for image compression in space applications
[NLR-TP-89242-U] p 3522 N93-30840

NATIONAL BOARD OF WATERS AND THE ENVIRONMENT, HELSINKI (FINLAND).
Modelling the dynamics of a large sea area
[DE93-778330] p 3488 N93-30040

NATIONAL CENTER FOR ADVANCED TECHNOLOGIES, WASHINGTON, DC.
The NCAT process p 3626 N93-30697

NATIONAL CENTER FOR ATMOSPHERIC RESEARCH, BOULDER, CO.
Analysis of mass transport and potential vorticity budget in a simulated tropopausa folding
[PB93-156792] p 3476 N93-29197
Interactive interface to NCAR graphics
p 3614 N93-29237
Parcels with TAGS
[PB93-181824] p 3535 N93-30824

NATIONAL DEFENCE HEADQUARTERS, OTTAWA (ONTARIO).
Security of the remote control link of Anik E satellites
p 3365 N93-30282
Performance of frequency hopped M-ary FSK in Rayleigh fading and partial-band jamming p 3368 N93-30303

NATIONAL ENVIRONMENTAL SATELLITE SERVICE, SUITLAND, MD.
Data management in NOAA p 3617 N93-30454

NATIONAL ENVIRONMENTAL SATELLITE SERVICE, WASHINGTON, DC.
NOAA satellite programs and technology requirements
p 3627 N93-30710

NATIONAL HURRICANE CENTER, CORAL GABLES, FL.
Deadliest, costliest, and most intense US hurricanes of this century (and other frequently requested hurricane facts)
[PB93-174993] p 3485 N93-30758

NATIONAL INST. FOR FUSION SCIENCE, NAGOYA (JAPAN).
Development of high power microwave source
[DE93-753316] p 3436 N93-28980

NATIONAL INST. FOR RESEARCH IN INORGANIC MATERIALS, IBARAKI (JAPAN).
Study on diamond semiconductor
[DE92-531076] p 3413 N93-30622

NATIONAL INST. OF STANDARDS AND TECHNOLOGY, BOULDER, CO.
Tables of experimental data used for the correlation of the thermophysical properties of ethane
[PB93-173417] p 3313 N93-29768

NATIONAL INST. OF STANDARDS AND TECHNOLOGY, GAITHERSBURG, MD.
Estimation of droplet collision frequency in a spray
[DE93-007991] p 3416 N93-28566
A study of the chemical mechanism in lubrication
[DE93-012230] p 3330 N93-28650
Initial graphics exchange specification hybrid microcircuit application protocol
[PB93-175404] p 3407 N93-29203
Computer systems laboratory
[PB93-181873] p 3521 N93-29662
Programmer's reference guide to FDMS file formats
[PB93-182038] p 3354 N93-29663
Issues, concepts, and standard techniques in assessing accuracy of coordinate measuring machines
[PB93-184331] p 3354 N93-29666
Binocular spherical disparity: A study in representation for a forward translating camera
[PB93-184422] p 3579 N93-29667
Using synthetic-perturbation techniques for tuning shared memory programs
[PB93-178572] p 3539 N93-29677
Data probe user's guide
[PB93-178655] p 3530 N93-29678
Proceedings of the meeting of the Intergovernmental US-Russian Business Development Committee's Standards Working Group
[PB93-179968] p 3610 N93-30822
Minimum security requirements for multi-user operating systems
[PB93-185999] p 3522 N93-30832
Horizontal nucleate flow boiling heat transfer coefficient measurements and visual observations for R12, R134a, and R134a/ester lubricant mixtures
[PB93-178598] p 3475 N93-30887
Physics laboratory technical activities, 1992
[PB93-178648] p 3561 N93-30888

NATIONAL LAB. FOR HIGH ENERGY PHYSICS, TSUKUBA (JAPAN).
Non-perturbative calculation of equilibrium polarization of stored electron beams
[DE93-764500] p 3577 N93-30607

Geochemical and fluid dynamic investigations into the nature of chemical heterogeneity in the Earth's mantle
[AD-A262753] p 3477 N93-29405

Fiber optic chemical sensors for characterizing the carbon cycle in ocean margin regions
[DE93-011442] p 3489 N93-30056

Marine microbial production of dimethylsulfide from dissolved dimethylsulfoniopropionate
[NASA-CR-193278] p 3492 N93-30665

WOOSTER COLL., OH.

Loading and testing a light scattering cell with a binary fluid mixture near its critical composition
[NASA-CR-193147] p 3415 N93-28557

WORCESTER POLYTECHNIC INST., MA.

Solar powered multipurpose remotely powered aircraft
p 3229 N93-29722

Rotational fluid flow experiment p 3235 N93-29761

WRIGHT LAB., EGLIN AFB, FL.

A ceramic fracture model for high velocity impact
[AD-A264728] p 3454 N93-30545

WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.

System automation and pilot-vehicle-interface for unconstrained low-altitude night attack
p 3503 N93-28867

Microstructural effects on the deformation and fracture of the alloy Ti-25Al-10Nb-3B-1Mo
[AD-A263095] p 3323 N93-29144

Results of a round robin test program: Complex modulus properties of a polymeric damping material
[AD-A263619] p 3332 N93-29344

Advanced thermally-stable, coal-derived, jet fuels program: Experiment system and model development
[AD-A262747] p 3342 N93-29402

A real-time, hardware-in-the-loop simulation of an unmanned aerial research vehicle
[AD-A262477] p 3248 N93-29409

Modal survey of a full-scale F-18 wind tunnel model
[AD-A262482] p 3240 N93-29410

The effect of high temperature on wall shear in a two dimensional wall jet
[AD-A262982] p 3423 N93-29426

An upwind method for the solution of the 3D Euler and Navier-Stokes equations on adaptively refined meshes
[AD-A262863] p 3423 N93-29472

Atmospheric transverse coherence length measurement system for laser communications
[AD-A263563] p 3439 N93-29827

Heat transfer in high turbulence flows: A 2-D planar wall jet p 3254 N93-29935

Computation of a delta-wing roll-and-hold maneuver
[AD-A264704] p 3260 N93-30498

Low cost instrumentation: Parallel port analog to digital converter
[AD-A263468] p 3433 N93-30584

WUERZBURG UNIV. (GERMANY).

Digital image processing of descanned terrestrial ground photographs p 3459 N93-28928

WYOMING UNIV., LARAMIE.

Exotic atoms
[DE93-010242] p 3564 N93-28611

Energy efficient drivepower, volume 2
[DE93-012437] p 3410 N93-29814

Energy efficient drivepower: An overview
[DE93-012435] p 3411 N93-30057

Energy efficient drivepower
[DE93-012436] p 3411 N93-30058

Y

YALE UNIV., NEW HAVEN, CT.

Measurements of rare composite objects and high sensitivity searches for novel forms of matter produced in high energy heavy ion collisions
[DE93-009945] p 3574 N93-28569

Observation of reaction intermediates in crystalline RDX p 3318 N93-30067

Numerical modeling of multidimensional flames with application to energetic materials p 3319 N93-30079

Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A264341] p 3425 N93-30162

Representations of shape in object recognition and long-term visual memory
[AD-A264342] p 3499 N93-30163

Analysis and computation for vortex dynamics and rarefied gases
[AD-A264705] p 3427 N93-30499

The 1991 neural information processing systems: Natural and synthetic
[AD-A264754] p 3623 N93-30559

Z

ZEISS (CARL), JENA (GERMANY).

SAR shape-from-shading for a populated alpine area
p 3458 N93-28923

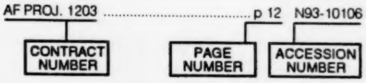
ZURICH UNIV. (SWITZERLAND).

Recording of forest surface in SAR-images with statistical methods in areas of pronounced relief
p 3457 N93-28920

CONTRACT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 31 NUMBER 11

Typical Contract Number Index Listing



AF PROJ. 1203 .... p 12 N93-10106
CONTRACT NUMBER
PAGE NUMBER
ACCESSION NUMBER

Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

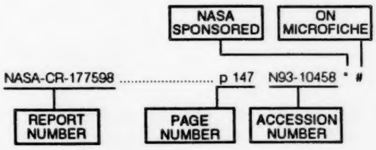
REPORT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 31 NUMBER 11

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *International Aerospace Abstracts (IAA). IAA* is issued on the 1st and 15th of each month and is available from the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, NY 10019.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *IAA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

> **16 SPACE TRANSPORTATION**
>
> Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support.*

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts.* Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum, Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 7514 Eggenstein-Leopoldshafen 2, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *IAA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
